To prevent exceeding the desired recreational harvest level of coho salmon in the OPI and WPP regulatory areas, the Regional Director has determined, in accordance with 50 CFR 661.12(c)(2), and following consultation with the Washington Department of Fisheries, the Oregon Department of Fisheries and Wildlife, and the Chairman of the Pacific Fishery Management Council, that the daily catch limit for the ocean recreational salmon fishery off Washington and Oregon should be reduced from three fish to two fish, and issues this Field Order directing that action, effective 0001 hours, August 8, 1980.

A Supplemental Environmental Impact Statement (SEIS) was prepared for the 1980 Amendment to the fishery management plan for *Commercial Recreational Salmon Fisheries off the Coast of Washington, Oregon, and California Commencing in 1978,* and is on file with the Environmental Protection Agency. As this action does not constitute a "significant action" under Executive Order 12044 the preparation of a regulatory analysis is not necessary.

For the reasons set forth below, the Regional Director for good cause finds that further opportunity for public comment prior to the effective date of this field order (final regulation), is impracticable, unnecessary, and contrary to the public interest, and that there is good cause for this field order to take effect on the date specified herein.

1. Further public comment and further delay in implementing this order is unnecessary because the public had advance notice of the impending action, is familiar with it, and was afforded a reasonable opportunity to review data and submit information from July 30 to August 6 pursuant to procedures fully set forth at 50 CFR 661.12, the FMP itself, and the Notice of Preliminary Projection issued on July 30, 1980, which was also publicized through regional news media. Relevant data was made available to the public as set forth at 50 CFR 661.12 and summarized in the Notice of Preliminary Projection. The public participated in development of the FMP/ SEIS, both orally and in writing, and had opportunity to comment on the implementing regulations since May 1. The opportunity afforded for public comment is reasonable because the determination made by the Regional Director under 661.12, and relevant public input, is limited to the narrow factual question of stock abundance and projected harvest of the recreational fishery in Management Areas A, B and C to September 14.

2. A delay in issuing this field order is not practicable. Data necessary for the Regional Director to review and for the public to review in order to submit relevant comments was made available at the earliest practicable time. Such data is only available during the fishing season and enough of the fishing season must elapse for there to be a sufficient amount of catch and effort information to make reasonably precise midseason stock abundance forecasts and harvest projections. Issuing this field order at a later time would be contrary to the purpose for which this action is being taken: to provide a sufficient escapement of salmon from the ocean and to limit the recreational ocean catch to an appropriate share of the ocean harvest as set forth in the FMP and at 50 CFR 661.12. The procedures followed maximize the information available to the public and the scientific and public input necessary to the determinations made by the Regional Director consistent with the timetable deemed necessary to attain the objectives of the FMP and of 50 CFR 661.12.

3. A delay in the effective data of this field order would be contrary to the public interest. Such a delay would substantially increase the likelihood that the objectives of the FMP, including ocean escapement goals necessary to meet spawning, treaty-Indian, and other inland-harvest objectives, would not be achieved without creating a severe imbalance in the harvest opportunity between commercial and recreational ocean fishermen.

(16 U.S.C. 1801 *et seq.*, 50 CFR 661.12)

Signed at Washington, D.C. this 8th day of August, 1980.

William H. Stevenson,

Deputy Assistant Administrator for Fisheries, National Oceanic and Atmospheric Administration.

BILLING CODE 3510-22-M

Proposed Rules

Federal Register
Vol. 45, No. 158
Wednesday, August 13, 1980

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

NUCLEAR REGULATORY COMMISSION

10 CFR Part 2

[Docket No. PRM-2-8]

Practice Rules; Union of Concerned Scientists and Natural Resources Defense Council, Inc.; Denial of Petition for Rulemaking

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Denial of petition for rulemaking.

SUMMARY: The Nuclear Regulatory Commission is hereby denying a petition for rulemaking (PRM-2-8) submitted by the Union of Concerned Scientists and the Natural Resources Defense Council, Inc. The petitioners had requested the Commission to amend its regulations to precede all proposed regulations by an advance notice of proposed rulemaking and treat staff proposals for regulations procedurally the same as those generated by members of the public.

FOR FURTHER INFORMATION CONTACT: Bruce A. Berson, Office of the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Telephone (301) 492-7678.

SUPPLEMENTARY INFORMATION: The petition for rulemaking (PRM-2-8) submitted by the Union of Concerned Scientists and Natural Resources Defense Council, Inc. was part of a letter commenting upon certain amendments to 10 CFR Part 21, "Reporting of Defects and Noncompliance," adopted by the Commission on October 19, 1978 (43 FR 48621). Petitioners requested the Commission to adopt the following modifications in the policy applicable to consideration of regulatory actions:

1. All proposed regulations should be preceded by an advance notice of intent to develop a regulation.

2. Staff proposals for regulations should be treated no differently from those generated by the public—i.e., a staff submittal of a proposal to the Commission should trigger a **Federal Register** notice and opportunity for public comment on the staff proposal. Only after receipt of the public comment should the Commission take action on the proposal. The staff proposal could be treated as the proposed amendment, provided its publication did not represent a prejudgment of the merits by the Commission.

The petitioners' revised procedures for noticing and treating staff-proposed regulations are designed to prevent the staff from acting in an "adversarial" fashion in its presentations to the Commission.

A notice of filing of the petition, requesting comments by August 6, 1979, was published in the **Federal Register** on June 6, 1979 (44 FR 32489). No letters of public comment were received regarding petitioners' suggestion to revise NRC procedures for handling staff-proposed regulations. (However, three persons did comment on the substance of the amendments to Part 21.) Both the petition and the comments are available for public inspection and copying at the NRC Public Document Room at 1717 H Street, N.W., Washington, D.C.

The Commission has carefully considered the two proposals—(1) that all proposed regulations should be preceded by an advance notice of proposed rulemaking, and (2) that staff proposals for regulations should be treated procedurally no differently than those generated by members of the public. For the reasons set forth below, the Commission has concluded that adoption of these proposals is unnecessary and is not in accordance with good administrative practice.

The procedures which the Commission follows in exercising its authority to promulgate rules and regulations are codified in §§ 2.800 through 2.808 of Title 10 of the Code of Federal Regulations. Under these procedures, which comply with the provisions of the Administrative Procedure Act (APA) applicable to rulemaking (5 U.S.C. 553), the Commission may initiate a rulemaking proceeding on its own initiative, on the recommendation of another Federal agency, or on the petition of any other interested person. The first step in most NRC rulemaking proceedings is publication in the **Federal Register** of a notice of proposed rulemaking; neither the APA nor the Commission's implementing rules requires publication of an advance notice of proposed rulemaking.

The petitioners' first proposal would require that all proposed regulations be preceded by an advance notice of intent to develop a regulation. The Commission's current practice is to publish advance notice of proposed rulemaking only when it deems it appropriate to do so. Such circumstances include matters on which the Commission desires early comments from potentially affected members of the public to assist it in determining the need for a rule, or, if a rule is necessary, the possible components and parameters of a subsequent rulemaking. Hence, the Commission considers an advance notice of proposed rulemaking a useful tool to gauge public interest or obtain public assistance on certain issues in early stages of development.

It does not appear useful or appropriate for the Commission to require an advance notice in all cases. In most cases, the notice of a proposed rulemaking with opportunity for public comment is sufficient to gauge public interest in the proposal and to elicit suggestions relative to such rulemaking. In those matters where the Commission perceives a benefit to be derived from an advance notice, such as those mentioned above, the Commission has in the past exercised, and will continue to exercise, its discretionary authority to publish an advance notice of proposed rulemaking which seeks early advice from the public.[1] It should also be noted that the authority of the Commission extends in certain circumstances to issuing rules without prior notice and comment. While the APA (5 U.S.C. 553(b)(B) and (d)(3)) and the Commission's implementing rules (10-CFR 2.807) require that, in most cases, 30 days notice must precede the effective date of a rule, the APA and Commission rules do provide, in certain circumstances, for publication of immediately effective rules.

The petitioners' second proposal would require that the staff be treated no differently from the public in the procedures applicable to proposals for regulations. In effect this mean that if the staff wished to propose a rulemaking to initiate a new rule or amend an existing one, it would do so by publishing its proposal in the **Federal Register** for public comment without prior Commission review and approval. this suggestion appears to misapprehend the nature and organization of the Nuclear Regulatory Commission and is inconsistent with accepted administrative agency practice.

It has long been recognized that the staff's expertise is central to and an inherent part of the execution of the agency's mission. The staff's advice is considered vital to effective regulation. Hence, pursuant to 10 CFR Part 1, "Statement of Organization and General Information," §§ 1.40-1.64, the staff is directed to recommend to the Commission proposed regulations in a variety of procedural and substantive areas. Only in certain delegated instances may the Executive Director for Operations issue, without prior Commission review and approval, proposed amendments to regulations and amendments in final form.

Unless specifically authorized by the Commission to do otherwise, it is the staff's role to provide advice and expertise to the Commission. In the case of rulemaking, the Commission's review and approval of a recommendation that a proposed rulemaking be instituted (or that an advance notice of proposed rulemaking be published) does not mean that the matter has been finally decided. By assuring that proposed rules comport generally with Commission policy before they are approved for publication, the Commission does not prejudge the final rule (which may differ from the proposal as a result of comments received) but rather intends to achieve sound, effective, economical, and consistent agency practice.

Thus, pursuant to its statutory authority, the Commission reviews and approves staff action such as proposals for regulations prior to publication. The Commission is not aware of any Federal agency that treats staff proposals in the same manner as those generated by the public. The Commission considers it necessary and appropriate in the interest of proper leadership and conduct of agency business that there be ongoing coordination between the staff and the Commission in rulemaking matters.[2]

In view of the foregoing, the Commission denies the petition for rulemaking filed by UCS and NRDC on March 2, 1979. A copy of the Commission's letter of denial is available for public inspection and copying at the NRC Public Document Room at 1717 H Street, N.W., Washington, D.C.

Dated at Washington, D.C., this 6th day of August, 1980.

For the Nuclear Regulatory Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 80-24500 Filed 8-12-80; 8:45 am]

BILLING CODE 7590-01-M

[1] The Commission believes this procedure is consistent with E.O. 12044 (43 FR 12661, March 23, 1978). The Commission has previously expressed full support for the basic objectives of the Executive Order which is to improve existing and future government regulations.

[2] On October 4, 1979 the Commission was provided a report entitled "Review of Delegations of Authority Within NRC" (dated September 1979) and in response to a recommendation of that report requested that a draft proposal be prepared to delegate substantial rulemaking powers to the Office of Standards Development and other staff offices.

SMALL BUSINESS ADMINISTRATION

13 CFR Part 108

Regulations for the Section 503; Development Company Program

AGENCY: Small Business Administration.

ACTION: Proposed rule.

SUMMARY: The regulations proposed herein state the rules under which the Small Business Administration would implement the Section 503 development company program enacted on July 2, 1980. The regulations would define the section 503's certification and application process, the program's eligibility and operational requirements, and the terms and conditions under which financing would be made available to participating 503 companies.

DATE: Comments must be received on or before September 11, 1980.

ADDRESS: Send comments to the Office of Associate Administrator for Financial Assistance, Small Business Administration, 1441 L St. NW., Washington, D.C. 20416.

FOR FURTHER INFORMATION CONTACT: Alan B. Abraham, Financial Analyst, Office of Associate Administrator for Financial Assistance, Small Business Administration, Washington, D.C. 20416, (202) 653-6470.

SUPPLEMENTARY INFORMATION: Section 113 of Pub. L. 96-302, enacted on July 2, 1980, amends the Small Business Investment Act of 1958 by adding a new section 503 Development Company Program. This program authorizes SBA to provide a 100% guarantee of the timely payment of principal and interest on debentures issues by 503 development companies that have a full-time professional staff, an active board of directors, and professional management ability, including adequate accounting, legal and business servicing abilities.

Qualified development companies would be authorized to sell each debenture pertaining to an identifiable small concern with SBA's guarantee. The proceeds from the sale of each debenture would be used for plant acquisition, construction, conversion, expansion or the acquisition of land by or for each such small concern.

The amount of each debenture guaranteed by SBA could not exceed one-half the cost of each project. The remaining one-half would have to be provided from non-federal sources. Each loan made from the debenture proceeds must be approved by SBA.

It is the intent of this law that development companies participating in this program be active, self-sustaining entities that offer small businesses in their area of operations the full range of professional services required in commercial and industrial development projects. In order to reflect the intent of Congress, the Agency has developed a system which would ensure that participating development companies, representative of their constituency, would be available on a full-time basis to provide financial and management assistance to small concerns.

Under the proposed regulations, prospective 503 development companies would be required to apply to SBA for certification. The application process would permit SBA to determine whether the development company is representative of its constituency and has the requisite capabilities that SBA considers essential.

The regulations contained herein, and briefly summarized in the following paragraphs, are intended to promote active, self-sustaining companies that have as their primary objective the growth and development of small business concerns in their area of operations.

Each 503 development company would be required to maintain a minimum level of activity in each fiscal year. For the purposes of this program, that annual level of activity would be not less than assistance to one small business concern.

In order to ensure continuity of the development company's assistance to its portfolio concerns, SBA would require that each development company inject at least 10% of the project's total cost in cash or in property (at its fair market value); such injection may come from Federal, State or local government sources, or, subject to certain conditions, from the small concern to be assisted. Moreover, SBA would require

annual audited reports, with data about each portfolio concern.

Since it is SBA's intent that each 503 development company be active and self-sustaining, such company would be allowed a reasonable return on each project payable to closing, not to exceed 1.5% of the guaranteed debenture, plus a service charge not to exceed 0.5% annually of the outstanding balance of the debenture.

Pursuant to authority contained in section 308(c) of the Small Business Investment Act of 1958 (SBI Act), 15 U.S.C. 687, it is proposed to add the following sections 108.503, and 108.503–1 through 108.503–8, under a new Centerheading entitled "Section 503" to Chapter I, Part 108 of Title 13 of the Code of Federal Regulations, as follows:

PART 108—LOANS TO STATE AND LOCAL DEVELOPMENT COMPANIES

* * * * *

Section 503

Sec.

108.503 Statutory provisions.
108.503–1 Eligibility requirements.
108.503–2 Application procedures.
108.503–3 Operational requirements.
108.503–4 Financing.
108.503–5 Cost of money to small business concerns.
108.503–6 Availability of financing from private sources.
108.503–7 Compliance with other laws.
108.503–8 Suspension and revocation of eligibility.

Authority: Sec. 308(c) of the Small Business Investment Act of 1958, 15 U.S.C. 687, as amended.

§ 108.503 Statutory provisions.

The relevant statutory provisions will be found at 15 U.S.C. 697 (94 Stat. 837).

§ 108.503–1 Eligibility requirements.

SBA is authorized to gurarantee the timely payment of all principal and interest as sheduled on any debenture issued by any qualified state or local development company. The full faith and credit of the United States is pledged to the payments of all amounts so guaranteed. Such debentures (herein sometimes referred to as 503 debentures) will be issued within certain limits solely for the purpose of assisting identifiable small business concerns to finance plant acquisition, construction, conversion, or expansion, including the acquisition of land. For the purpose of this section, state and local development companies qualified to participate in this program (herein sometimes referred to as "503 companies") shall be formally certified by SBA on the terms and conditions contained herein, consistent with the intent of Congress. To qualify, a development company must demonstrate to the satisfaction of SBA that it has:

(a) *Capability.* Capability will include: (1) a full-time professional staff as required by such company, with capability to package, process, close and service its loans; (2) professional management ability, including adequate accounting, legal and business-servicing abilities. Business-servicing ability means the ability to provide management advice and services to small business concerns. Such capabilities as set forth under paragraph (a) (1) and (2) of this section may be drawn from the staff, the board or membership of the development company or acquired on a contractual basis, from qualified individuals or organizations who reside or do business in the development company's defined area of operation, subject to SBA approval; and (3) a board of directors, or membership, which meets on a regular basis to make management decisions for such company, including decisions relating to the making and servicing of loans by such company. A 503 company must have at least five directors who meet at least once in every other month and must be representative of the community as stated in paragraph (b) of this section.

(b) *Membership.* (1) The 503 company must be representative of the community in which the company operates. Evidence of such representation shall include participation by the local government, a private sector lending institution, and at least one of the following groups:

(i) Community development organizations

(ii) Neighborhood Associations

(iii) Business Associations

(iv) Chamber of Commerce.

(2) The 503 company must have at least 25 individual members or stockholders, 75% of whom must reside or do business in the company's defined area of operation, which may be state-wide for a state development company, or as large as city-wide or composed of up to two contiguous counties for a local development company.

(c) *Good Character and Reputation.* A proposed 503 company must possess good character and reputation. Such company will be deemed to possess good character and reputation if all the holders of its voting power and all members of its management possess good character and reputation. Good character and reputation shall be presumed absent if such holders or management are currently incarcerated, on parole or probation following conviction of a serious offense, or when probation or parole is lifted solely for qualification under this program.

(d) *Sole Purpose Intention.* A 503 company shall operate pursuant to Title V of the Small Business Investment Act (Loans to State and Local Development Companies) and shall not participate in any other SBA program.

§ 108.503–2 Application procedures.

Applications for certification as a 503 company should be submitted on Form 503, which is hereby made a part of these regulations, to the SBA field office serving the area in which the prospective 503 company is located. The field office shall forward the application, along with its recommendation, to the Associate Administrator for Financial Assistance, Washington, D.C., for final determination of eligibility. Qualified companies shall receive a certificate evidencing eligibility for participation in this program.

§ 108.503–3 Operational requirements.

(a) *Participation by the Development Company.* (1) A 503 company may be required to inject into the project an amount equal to 10 percent of the funds necessary to complete a given project. Moreover, a 503 company that has not participated in a project under this part, must furnish an amount equal to at least 10 percent of the amount guaranteed by SBA from funds other than funds furnished by the SBC to be assisted. [For example, in a $900,000 project that includes a $400,000 SBA guaranteed debenture, the 503 company must provide an injection equal to 10% of the project, or $90,000. A 503 company which has not participated in at least one such project must provide $40,000 from funds which did not come from the project concern; the remaining $50,000 may come from any source, including the project concern.] SBA may permit a lesser amount in extreme hardship cases, where a project important to the community would otherwise be lost to the community. For the purpose of this section, the 503 company may inject cash and property at fair market value received in exchange for shares of stock issued by the 503 company, or cash and such property contributed to the 503 company without conditions, or cash and such property for which the development company is indebted on a subordinated basis.

(2) Subject to paragraph (a)(1) of this section, a 503 company's injection may also be derived, by way of example and not of limitation, from money contributed to the 503 company by state or local government, banks, or other financial institutions, or the small business concern (or such small business concern's owners, stockholders or affiliates) receiving assistance from the 503 company.

(3) Contributions or loans to the 503 company for inclusion in such company's participation in the cost of a given project may not be conditioned on the granting of voting rights, stock options, or any other type of financial interest in or control of the 503 company or the small business concern being assisted.

(4) The maximum rate the 503 company may charge on its participation in a project shall be legal and reasonable.

(b) *Place of Business.* Each 503 company shall maintain a reasonably accessible place of business which will display the section 503 development company certificate, shall have a separately listed telephone number, and shall be open to the public during normal business hours.

(c) *Level of Activity.* In order to meet the needs of the small business community in its defined area of operation a 503 company shall be required to conduct active operations. For the purposes of this section, a 503 company shall be presumed to be inactive if, during any full fiscal year, it has not been of significant assistance to at least one small business concern: *Provided, however,* That written justification for inactivity promptly filed by the 503 company and acceptable to SBA may rebut the presumption. "Significant", for purposes of this subsection, means assistance utilizing a 503 debenture or Section 502 Financing.

(d) *Records and Reports.* (1) A 503 company shall submit to SBA, within 90 days after the end of each fiscal year, an annual report containing financial statements, management information (including minutes from meetings of the board of directors), a full activity report in narrative form and data that analyze the impact of its assistance on small business concerns. When requested by SBA, interim reports of a similar nature shall be required. The reports are to be prepared in accordance with the Guide for the Preparation of the Annual Report (Appendix A hereto). The annual report shall be filed in duplicate with the SBA field office serving the area in which the 503 company is located, on or before the last day of the third month following the end of the fiscal year, and in the case of interim reports, within the period stated in the SBA request therefor.

(2) The financial statement contained in the annual report shall be audited by an independent public accountant approved by SBA. SBA reserves the right to request additional information or explanations on the reports required by this subsection.

(3) *Changes to be reported.* Any change in stockholdings or membership in a 503 company or in its board of directors shall be reported to SBA in the report required by paragraph (d)(1) of this section, or at an earlier time when an application pursuant to § 108.503–4 is filed.

(e) *Examination.* Each 503 company shall be subject to the same examination requirements, and the fee payment therefor, as are established for paragraph (b) Lenders in § 120.7 of these regulations.

(f) *Restrictions.*

(1) A 503 company is prohibited from owning any equity interest in a small business concern which has received section 503 assistance.

(2) Proceeds from the sale of a section 503 debenture may not be used for working capital purposes.

(3) A 503 company's injection pursuant to § 108.503–3(a) may not be repaid at a faster rate than the repayment on SBA's guaranteed 503 debenture.

(4) No shareholder or member or group of shareholders or members of the 503 company, owning a financial interest in a small business concern to be assisted, shall have voting control of the 503 company in excess of 10%. Ownership of a financial interest includes ownership by a close relative, as defined in § 120.1(d)(3)(i) of these regulations.

(5) No officer, director, or person or group of persons controlling as much as 10% of the voting power of the 503 company, may be an officer, director, or in control of a small business concern receiving assistance, or a close relative of such persons, unless the 503 company has previously assisted at least two small business concerns under Part 108 of these regulations. For definitions of "control," see § 121.3–2(a), and of "close relative," see § 120.1(d)(3)(i) of these regulations.

§ 108.503–4 Financing.

(a) *Method and Amount.* Upon application to the field office described in § 108.503–2, and subject further to the provisions of § 108.503–6, SBA may guarantee 503 debentures to be sold by 503 companies with such guarantee under the following conditions:

(1) Such debenture is issued for the purpose of making a loan to an identifiable small business concern complying with the regulations of this Chapter.

(2) Each loan to be made from the debenture proceeds is approved by SBA.

(3) The aggregrate amount of such debenture does not exceed the amount of the loan to be made from the proceeds of such debenture (other than any excess attributable to the administrative costs of such loan).

(4) The amount of any loan to be made from such debenture proceeds does not exceed an amount equal to 50 percent of the total cost of the project with respect to which the loan is made. At least 50 percent of each project cost must be provided from non-Federal sources, which may not include assistance under Sections 501 and 502 of the Act.

(5) The total amont of guaranteed debentures outstanding at any one time for each identifiable small business concern shall not exceed the statutory limitation of SBA's Business Loan Program pursuant to Sec. 7(a) of the Small Business Act, 15 U.S.C. § 636(a).

(6) A 503 company may prepay a 503 debenture in an amount sufficient to compensate the purchaser for accelerated repayment of the 503 debenture.

(7) SBA may permit subordination of a 503 debenture to any other debenture, promissory note, or other debt or obligation of such company, except any obligation incurred by such company to satisfy the requirement of its participation pursuant to § 108.503(a)(1).

(b) *Collateral.* All debentures guaranteed under this section shall be so secured as SBA determines reasonably to assure repayment. SBA shall require that the 503 company's injection pursuant to § 108.503–3(a) be subordinated to the loan made from the proceeds of the 503 debenture. In the event of default on the debenture, the liability of the 503 company to SBA as guarantor shall be limited to all payments by the small business concern owed to SBA and the collateral securing the defaulted loan. A pledge of additional collateral may be required, when SBA determines that such additional collateral is necessary. In the event personal guarantees are obtained from one or more principals of a small business concern, such guarantee agreement shall waive any right of recovery from the 503 company. All collateral shall be insured against such hazards and risks as SBA may require.

(c) *Participation with Tax-Exempt Financing.* SBA shall not disapprove the guarantee of a debenture because the proceeds would be used in a project whose other sources of financing include tax-exempt bonds.

(d) *Interest Rate.* The interest rate on section 503 debentures shall not be less than a rate determined from time-to-time by the Secretary of the Treasury taking

into consideration the current average market yield on outstanding marketable U.S. obligations with comparable maturities. Such rate can be obtained from the field office described in § 108.503–2.

(e) *Debenture Conditions.* The maturity of any section 503 debenture shall not exceed 25 years. The 503 company shall require the small business concern to make the requisite payments in sufficient time to ensure timely payment by the 503 company. In the case of a lease agreement between the 503 company and a small business concern, SBA shall generally require a lease term no shorter than the term of the debenture.

(f) *Use of Proceeds.* At the time of disbursement to the 503 company, such company shall submit evidence satisfactory to SBA that the proceeds will be used in accordance with the statutory purpose. Such evidence shall include, but not be limited to, proof that the small business concern has the right to use the Plant for at least as long as the term of the debenture whether (1) by lease of the Plant, (2) by lease of the Plant with option in the small business concern to purchase such Plant, (3) by sale of such Plant or (4) by loan of the proceeds for the acquisition of the Plant by the small business concern.

§ 108.503–5 Cost of money to small business concerns.

(a) *Contract Terms.* The contract between the 503 company and the small business concern shall set forth terms acceptable to such concern and SBA, not to exceed the sum of the following:

(1) repayment with interest of the section 503 debenture;

(2) taxes and insurance on the Plant;

(3) administrative costs of the loans; and

(4) The 503 company may also require a reasonable processing fee, not to exceed one and one-half (1.5) percent of the amount of the debenture, payable at closing, and a periodic service charge not to exceed one half of one (0.5) percent per annum on the outstanding balance of the debenture.

(b) *Disclosure of Charges.* The debenture application and the annual report submitted to SBA by the 503 company shall disclose the full amount of all fees and charges, together with names of the recipients and a description of the services rendered therefor.

§ 108.503–6 Availability of financing from private sources.

(a) *Other Lenders.*

(1) Applications for financial assistance will not be accepted for processing unless the 503 company can demonstrate to the satisfaction of SBA that the desired financing is not available from private sources on reasonable terms.

(2) Financial assistance shall be deemed to be available from private sources on reasonable terms, unless the 503 company can demonstrate to SBA that

(i) not less than two banks (including the bank of account of the small business concern to be assisted) have declined to provide assistance on reasonable terms to the project. Evidence of refusal must contain the date, amount and terms requested and the reasons for not granting the desired funds;

(ii) the 503 company is unable to provide financial assistance through funds raised from its membership or, in the case of a for-profit company, from the sale of stock or securities.

(b) *Principals of Concern Receiving Assistance.* The availability of personal resources of the owner or owners of the small business concern shall not disqualify a project for this program.

(c) *State Development Companies.* No Section 503 debenture shall be guaranteed for a state development company unless (1) such company maintains an investment portfolio with a prinicipal value of at least 133⅓% of the Section 503 debenture for which such company is applying, and (2) such company has utilized at least 75% of the funds pledged to it by its stockholders or membership.

§ 108.503–7 Compliance with other laws.

All projects financed with federal assistance are subject to all applicable laws, including (without limitation) the civil rights laws (see Part 112 and 113 of these regulations, as well as Part 117 when adopted) and wage and labor laws, e.g. the Davis-Bacon Act, 40 USC 276a.

§ 108.503–8 Suspension and revocation of eligibility.

(a) *Violations.* SBA reserves the right to revoke the eligibility of any 503 company or to suspend temporarily the eligibility of any 503 company in the case of a violation of law, SBA regulations, any agreement with SBA, or of any failure to comply with operational requirements (§ 108.503–2): *Provided, however,* That such revocation or suspension shall not invalidate any guarantee previously issued by SBA.

(b) *Notification of Suspension or Revocation.* SBA shall serve notice on the 503 company of its intention to revoke or suspend such company's eligibility (Notice). Such Notice shall set forth in detail the basis for SBA's intention. The Notice shall be served upon the 503 company by registered or certified mail, return receipt requested, addressed to the said company's principal business office.

(c) *Service of Papers Other Than the Notice.* Papers other than the Notice may be served upon a 503 company as provided in paragraph (b) of this section, or by service in the manner provided therein upon an attorney at law or other agent designated by such company.

(d) *Service of Papers Upon SBA.* Papers in connection with the suspension or revocation of a 503 company's eligibility shall be served upon SBA by:

(1) Delivery to the Associate Administrator for Financial Assistance, SBA, 1441 L Street, NW., Washington, D.C. 20416; or

(2) Registered or certified mail, return receipt requested, addressed to the Associate Administrator for Financial Assistance at the above listed address.

(e) *Effect of Failure to Respond.* The revocation or temporary suspension of a 503 company's eligibility to participate shall become effective as of the close of business on the tenth day following receipt of the Notice unless, prior to the expiration of the aforementioned time period, SBA shall receive notice of such company's intention to submit an answer.

(f) *Answer.* A 503 company that has notified SBA of its intention to file an answer shall be given twenty additional days to submit to SBA such answer, including briefs and affidavits, showing why its eligibility should not be suspended or revoked. SBA may, in its sole discretion, extend the period permitted hereunder for the filing of an answer. Suspension or revocation of the eligibility of any 503 company that has filed an answer shall be held in abeyance pending final determination by SBA.

(g) *Initial Decision.* SBA's Notice, together with the said company's answer thereto, including briefs and affidavits, shall be referred by the Associate Administrator for Financial Assistance to an SBA employee designated by him/her (designee) for initial determination of any material issues of fact or of law. No person who has particpated in the preparation or approval of the notice to such company, or in any investigation or other fact-finding procedure in connection therewith shall participate in the preparation of the initial determination; and no person who has participated in such companys case, as aforesaid, shall communicate with, or otherwise attempt to influence the initial decision of the designee, who shall as soon as possible prepare proposed findings and conclusions and present them to the Associate Administrator for Financial Assistance.

(h) *Final Decision.* The decision of the Associate Administrator for Financial Assistance shall give appropriate weight to the recommended findings and conclusions of the designee and shall, without further proceedings, be the final decision of SBA.

(i) *Effect of Decision.* Suspension or revocation of a 503 company's eligibility to participate with SBA shall become effective upon such company's receipt of notification of SBA's decision, but shall not relieve that company from its obligation to service any loan made in participation with SBA, nor any other obligation arising out of, or out of the breach of, any agreement with SBA, or any regulation promulgated by SBA.

(Catalog of Federal Domestic Assistance No. 59.013 State and Local Development Company Loans.)

Dated: August 7,1980.

A. Vernon Weaver,

Administrator.

BILLING CODE 8025-01-M

FEDERAL TRADE COMMISSION

16 CFR Part 441

Mobile Home Sales and Service

AGENCY: Federal Trade Commission.

ACTION: Publication of staff report and invitation to submit written comments.

SUMMARY: Federal Trade Commission's Bureau of Consumer Protection has released to the public a Staff Report that summarizes and analyzes the evidence in its rulemaking proceeding on warranty service in the mobile home industry. The report includes the staff's recommendations to the Commission concerning a trade regulation rule. The public is invited to comment on the Staff Report and the previously released Presiding Officer's Report for a period of 60 days, commencing with the publication of this notice. The Staff Report has not been reviewed or adopted by the Commission. The Commission's final determination in this matter will be based on the entire rulemaking record, including the Staff and Presiding Officer's Reports, and on the comments received during the 60-day comment period.

DATE: Written comments on the Staff Report and Presiding Officer's Report will be accepted by the Commission for 60 days, until October 14, 1980.

ADDRESSES: Copies of the Staff and Presiding Officer's Reports are available at the Public Reference Branch, Room 130, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580. Telephone: 202–523–3598.

Written comments should be sent to Raymond L. Rhine, Presiding Officer, Federal Trade Commission, 600 E Street, N.W., Room 667, Washington, D.C. 20580.

FOR FURTHER INFORMATION CONTACT:

Arthur B. Levin, Eloise Gore or Allen Hile, Attorneys, Bureau of Consumer Protection, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580; telephone 202–523–3827.

SUPPLEMENTARY INFORMATION: The Staff Report on warranty service in the mobile home industry was prepared pursuant to § 1.13(g) of the Commission's Rules of Practice. The report and staff's Recommended Rule have been placed on Public Record No. 215–41. The Presiding Officer's Report was issued on September 11, 1979 (see 44 FR 53,538). The rulemaking record and a computer digest of and index to the rulemaking record are also available for use by the public at the Public Reference Branch, Room 130, Federal Trade Commission, 6th Street and Pennsylvania Avenue, N.W., Washington, D.C. 20580. Copying of these materials is permitted, upon payment of the appropriate fees.

Written comments on the Staff and Presiding Officer's Reports are invited from the public pursuant to § 1.13(h) of the Commission's Rules of Practice. Comments must be confined to information already on the record; no new evidence will be accepted. To facilitate consideration, comments should be identified as "Comments on Presiding Officer and Staff Reports—Mobile Home TRR." Comments must be received on or before October 14, 1980 and, when possible, should be submitted in four copies. The Staff Report has not been reviewed or adopted by the Commission, and its publication should not be interpreted as representing the views of the Commission or any individual Commissioner.

Approved: August 4, 1980.

Albert H. Kramer,

Director, Bureau of Consumer Protection.

DEPARTMENT OF THE INTERIOR

Office of Surface Mining Reclamation and Enforcement

30 CFR Chapter VII

Public Disclosure of Comments on the Kentucky Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Announcement of public disclosure of comments on the Kentucky Program from the Environmental Protection Agency (EPA), the Department of Agriculture (USDA), and other Federal agencies.

SUMMARY: Before the Secretary of the Interior may approve permanent State regulatory programs submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Secretary has solicited comments of these agencies and is today announcing their public disclosure.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Administrative Record Room, Office of Surface Mining, Region II, 530 Gay Street, S.W., Suite 500, Knoxville, TN

Administrative Record Room, Office of Surface Mining, 1951 Constitution Avenue, Room 153, Washington, D.C. 20240.

Bureau of Surface Mining Reclamation and Enforcement, Capitol Plaza Tower, 6th Floor, Frankfort, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, Old TB Facility, Laffon Street, Madisonville, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, 1632 East Cumberland Avenue, Middlesboro, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, 213 Lovern Street, Hazard, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, 431 South Lake Drive, Prestonburg, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, 165 South Mayo Trail, Pikeville, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, Reclamation Building (Near intersection of East 80, Daniel Boone Parkway, and Hwy. 25), London, Kentucky.

Bureau of Surface Mining Reclamation and Enforcement, 620 West Main Street, Grayson, Kentucky.

V 45 A G 0 1 3 8 0 UMI

FOR FURTHER INFORMATION CONTACT:
Mr. John T. Davis, Assistant Regional Director, State and Federal Programs, Office of Surface Mining, 530 Gay Street, Knoxville, TN 37902, Telephone: (615) 637–8060 or
Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Ave., N.W., Washington, D.C., Telephone: (202) 343–4225.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the Kentucky permanent regulatory program submitted by Kentucky for his review on February 29, 1980. See 45 FR 15948–15950, March 12, 1980; (April 29, 1980), 45 FR 28368–28369; (June 23, 1980), 45 FR 41977–41979. In accordance with Section 503(b)(1) of SMCRA, and 30 CFR 732.13(b)(1) the Kentucky program may not be approved until the Secretary has solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture and the heads of other Federal agencies concerned with or having special expertise relevant to the program as proposed. In this regard, the following Federal agencies were invited to comment on the Kentucky program:

Tennessee Valley Authority.
Advisory Council on Historic Preservation.
Department of Labor: Mine Safety and Health Administration.
Ohio River Basin Commission.
Appalachian Regional Commission.
U.S. Army Corps of Engineers.
Water Resources Council.
Department of Energy.
Department of the Interior: Bureau of Indian Affairs, Bureau of Land Management, Heritage Conservation and Recreation Service, U.S. Geological Survey, Bureau of Mines, U.S. Fish and Wildlife Service, National Park Service.
U.S. Environmental Protection Agency.

Of these agencies invited to comment, OSM received comments from the following offices:

Department of the Army: U.S. Army: Corps of Engineers.
Department of Agriculture: U.S. Forest Service; Soil Conservation Service.
Department of the Interior: Heritage Conservation and Recreation Service: U.S. Fish and Wildlife Service.
Department of Labor: Mine Safety and Health Administration.
Tennessee Valley Authority.
Department of Energy.

These comments are available for review and copying during business hours, at the locations listed above under "Addresses."

Dated: August 6, 1980.

R. Bruce Carroll,
Acting Assistant Director, State and Federal Programs.

[FR Doc. 80-24437 Filed 8-12-80; 8:45 am]
BILLING CODE 4310-05-M

Geological Survey

30 CFR Part 250

Oil, Gas, and Sulphur Operations in the Outer Continental Shelf; Lease Royalty Requirements

AGENCY: U.S. Geological Survey, Interior.

ACTION: Proposed rule.

SUMMARY: The Geological Survey proposes to amend its regulations relating to royalty requirements on outer continental shelf leases. Currently, lease operators are required to pay royalty on oil and gas unavoidably leaked, spilled, vented, flared, or lost in least or unit operations. As a result of changes in departmental policy, royalty on this oil and gas is no longer required.

DATES: Written comments and recommendations should be submitted on or before September 12, 1980.

ADDRESS: Interested persons are invited to submit written comments and recommendations with respect to the proposed regulations. Responses should identify the subject matter and be directed to the Chief, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092.

FOR FURTHER INFORMATON CONTACT:
Price McDonald, Chief, Branch of Offshore Field Operations, Conservation Division, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092, telephone 703/860–7571.

Principal Author

Charles Perrott, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092.

Environmental Impact and Regulatory Analysis

The Department of the Interior has determined that this proposed revision of the provisions of 30 CFR 250.65 and 250.66 is not a major Federal action significantly affecting the quality of the human environment, and, therefore, preparation of an Environmental Impact Statement is not required. The Department has also determined that this proposed rule is not a significant regulatory action and does not require the preparation of a regulatory analysis under Executive Order 12044.

Dated: August 6, 1980.

Joan M. Davenport,
Assistant Secretary—Energy and Minerals.

It is proposed that 30 CFR Part 250, as published on October 26, 1979, 44 FR 61886 be revised as follows:

1. In § 250.65(b), delete the first sentence which reads, "Royalty is due on all oil removed from a reservoir." Section 250.65(b) would read as follows:

§ 250.65 Royalty on oil.

* * * * *

(b) The royalty on oil may be based on production as products are moved from the lease. When conditions warrant, the Director may require royalty to be based on actual monthly production, including products remaining on the leased area. Evidence of all shipments shall be filed with the Director within 5 days (or longer period when approved by the Director) after the oil has been shipped by pipeline or by other means of transportation. That evidence shall be signed by representatives of the lessee and by representatives of the purchaser or the transporter who witnessed the measurement reported. That evidence shall also note determinations of the gravity and temperature of the oil and the percentage of impurities contained in the oil.

2. (a) In § 250.66, delete the first sentence which reads, "Royalty is due on all gas removed from a reservoir."

(b) In § 250.66, second sentence, insert a period following the word "products" the second time it occurs and delete the phrase "removed from the reservoir."

Revised § 250.66 would read as follows:

§ 250.66 Royalty on unprocessed gas.

When gas is sold without processing for the recovery of constituent products, the royalty thereon shall be a percentage, established by the terms of the lease, of the value or amont of the gas and constituent products. The value of wet gas and entrained liquids may be established by adjusting the value of the gas less entrained liquids using a British thermal unit (Btu) or other appropriate adjustment factor. The value shall not be less than that which would accrue by computing royalty in accordance with §§ 250.67 (a) through (d) of this Part.

(43 U.S.C. 1334(a), as amended, 92 Stat. 636–637)

Office of Surface Mining Reclamation and Enforcement

30 CFR Part 924

Permanent Regulatory Program; Public Disclosure of Comments Received From Federal Agencies on the Alabama State Permanent Program

AGENCY: Office of Surface Mining Reclamation and Enforcement (OSM), U.S. Department of the Interior.

ACTION: Announcement of public disclosure of comments on the Alabama program from the Environmental Protection Agency (EPA), the Department of Agriculture (USDA), and other Federal agencies.

SUMMARY: Before the Secretary of the Interior may approve permanent State regulatory programs submitted under Section 503(a) of the Surface Mining Control and Reclamation Act of 1977 (SMCRA), the views of certain Federal agencies must be solicited and disclosed. The Secretary has solicited comments of these agencies, and is today announcing their public disclosure.

ADDRESSES: Copies of the comments received are available for public review during business hours at:

Administrative Record Room, Office of Surface Mining, Region II, 530 Gay Street SW., Suite 500, Knoxville, Tennessee 37902.
Alabama Surface Mining Reclamation Commission, Central Bank Building, 2nd Floor, 811 Second Avenue, Jasper, Alabama
Alabama Surface Mining Reclamation Commission, 100 Third Street, Fort Payne, Alabama
Office of Surface Mining, Room 153, South Interior Building, 1951 Constitution Avenue NW., Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT:
Mr. John T. Davis, Assistant Regional Director, State and Federal Programs, Office of Surface Mining, 530 Gay Street, Knoxville, Tennessee 37902, Telephone: (615) 637–8060.
or
Mr. Carl C. Close, Assistant Director, State and Federal Programs, Office of Surface Mining, U.S. Department of the Interior, 1951 Constitution Avenue, NW., Washington, D.C., Telephone: (202) 343–4225.

SUPPLEMENTARY INFORMATION: The Secretary of the Interior is evaluating the Alabama permanent regulatory program submitted by Alabama for his review on March 3, 1980. See 45 FR 15947–15948, (March 12, 1980) and 45 FR 28367–28368 (April 29, 1980). In accordance with Section 503(b)(1) of SMCRA and 30 CFR 732.13(b)(1) the Alabama program may not be approved until the Secretary has solicited and publicly disclosed the views of the Administrator of the Environmental Protection Agency, the Secretary of Agriculture and the heads of other Federal agencies concerned with or having special expertise relevant to the program as proposed. In this regard, the following Federal agencies were invited to comment on the Alabama program:

Tennessee Valley Authority
Advisory Council on Historic Preservation
Department of Labor: Mine Safety and Health Administration
Ohio River Basin Commission
Appalachian Regional Commission
Department of the Army: U.S. Army Corps of Engineers
Department of Agriculture
U.S. Environmental Protection Agency
Water Resources Council
Department of Energy
Department of the Interior: Bureau of Indian Affairs; Bureau of Land Management; Heritage Conservation and Recreation Service; U.S. Geological Survey; Bureau of Mines; U.S. Fish and Wildlife Service; and National Park Service

Of these agencies invited to comment, OSM received comments from the following offices:

Department of the Army: U.S. Army Corp of Engineers
Department of Agriculture: U.S. Forest Service and Soil Conservation Service
Department of the Interior: Heritage Conservation and Recreation Service; U.S. Fish and Wildlife Service; and National Park Service
Department of Labor: Mine Safety and Health Administration
Tennessee Valley Authority
Department of Energy

These comments are available for review and copying during business hours at the locations listed above under "Addresses."

Dated: August 8, 1980.

R. Bruce Carroll,
Acting Assistant Director, State and Federal Programs.

DEPARTMENT OF EDUCATION

34 CFR Part 100

Hearings on Nondiscrimination Under Programs Receiving Federal Assistance Through the Department of Education, Effectuation of Title VI of the Civil Rights Act of 1964

AGENCY: Department of Education.

ACTION: Notice of hearings.

SUMMARY: The Secretary of Education proposed rules to implement the provisions of Title VI of the Civil Rights Act of 1964, as amended (42 U.S.C. 2000d, *et seq.*), on August 5, 1980 (45 FR 52052). The proposed rules prohibit recipients of Federal financial assistance from denying an equal educational opportunity to students whose primary language is not English and who have limited proficiency in English. The Department of Education will sponsor public hearings September 8 through September 17, 1980 to provide an opportunity for interested citizens and organizations to comment on the proposed rules. Interested persons are invited to attend the hearings and to comment on the proposed rules.

DATES: Public hearings will be held as follows:

City, Time, and Date

San Antonio, Texas—8:30 a.m., Monday, September 8, 1980.
New York, New York—8:30 a.m., Tuesday, September 9, 1980.
Denver, Colorado—8:30 a.m., Wednesday, September 10, 1980.
New Orleans, Louisiana—8:30 a.m., Monday, September 15, 1980.
San Francisco, California—8:30 a.m., Tuesday, September 16, 1980.
Chicago, Illinois—8:30 a.m., Wednesday, September 17, 1980.

ADDRESSES: The locations of the public hearings are:

San Antonio, Texas—Institute of Texan Cultures, 801 South Bowie Street, San Antonio, Texas.
New York, New York—Tisch Hall, Schimmel Auditorium, New York University, 40 West 4th Street, New York, New York.
Denver, Colorado—St. Cajetan Center, Auraria College Campus, 9th and Lawrence Streets, Denver, Colorado.
New Orleans, Louisiana—Board of Education Chambers, 4100 Touro Street, New Orleans, Louisiana.
San Francisco, California—Trustees Auditorium, Asian Art Museum, Tea Garden Drive, Golden Gate Park, San Francisco, California.
Chicago, Illinois—Illinois Room, Chicago Circle Campus, University of Illinois.

750 South Halstead Street, Chicago, Illinois.

FOR FURTHER INFORMATION CONTACT:
Mr. David Leeman, Office for Civil Rights, Department of Education, Washington, D.C. Telephone: (202) 472–4422.

FOR INFORMATION ON PUBLIC HEARINGS CONTACT:

Region I
Thomas J. Burns, Secretary's Regional Representative, John Fitzgerald Kennedy Federal Building, Government Center, Boston, MA 02203; telephone No. 617/223–7500.

Region II
Josue Diaz, Secretary's Regional Representative, Department of Education, Federal Building, 26 Federal Plaza, New York, NY 10007; telephone No. 212/264–4045 (registration for New York hearing).

Region III
Robert Smallwood, Secretary's Regional Representative, Department of Education, Gateway Building, 3535 Market Street, Philadelphia, PA 19104; telephone No. 215/596–1018.

Region IV
Steve Cornett, Secretary's Regional Representative, Department of Education, 101 Marietta Tower Building, Atlanta, GA 30323; telephone No. 404/221–2063.

Region V
Ralph Church, Secretary's Regional Representative, Department of Education, Federal Building, 300 South Wacker Drive, Chicago, IL 60606; telephone No. 312/353–5463 (registration for Chicago hearing).

Region VI
Edward Baca, Secretary's Regional Representative, Department of Education, 1200 Main Tower Building, Dallas, TX 75202; telephone No. 214/767–3626 (registration for San Antonio and New Orleans hearings).

Region VII
Harold Blackburn, Secretary's Regional Representative, Department of Education, Eleven Oak Building, 324 East Eleventh Street, Kansas City, MO 64106; telephone No. 816/374–2276.

Region VIII
James Ballantyne, Secretary's Regional Representative, Department of Education, U.S. Customs House, 721 19th Street, Room 195, Denver, CO 80294; telephone No. 303/837–2442 (registration for Denver hearing).

Region IX
Caroline Gillin, Secretary's Regional Representative, Department of Education, Federal Building, 50 United Nations Plaza, San Francisco, CA 94102; telephone No. 415/556–4920 (registration for San Francisco hearing).

Region X
Allen Apodaca, Secretary's Regional Representative, Department of Education, Arcade Plaza Building, 1321 Second Avenue, Seattle, WA 98101; telephone No. 206/442–0460.

SUPPLEMENTARY INFORMATION: The schedule for each hearing will be as follows:

8:30 a.m. Registration (including pre-registrants).
10:00 a.m. to 10:30 a.m. Orientation.
10:30 a.m. to 1:30 p.m. Public Comment.
1:30 p.m. to 3:00 p.m. Break.
3:00 p.m. to 5:00 p.m. Public Comment.
5:00 p.m. to 7:00 p.m. Break.
6:00 p.m. to 7:00 p.m. Registration (evening session).
7:00 p.m. to 7:30 p.m. Orientation.
7:30 p.m. to 9:00 p.m. Public Comment.

Those wishing to testify should submit a written or oral request to the Secretary's Regional Representative (SRR) at the appropriate regional office. Those who submit requests which are received at least 72 hours prior to the scheduled hearing will be pre-registered and given priority consideration for testimony. Those who register on the day of the hearing will be permitted to testify following presentations of those who pre-register, time permitting. Morning registrants (8:30–10:00 AM) will be scheduled to testify during the morning and afternoon sessions. Those wishing to testify in the evening will register during the evening regisration period (6:00–7:00 PM). There will be no pre-registration for the evening session. The time for testimony in all sessions will be limited and in no instance longer than 15 minutes per person. Sign language interpreters will be present at each hearing. All oral and written testimony will become part of the written record of each hearing. Written comments will be accepted at any time through October 6, 1980. They should be mailed to: Antonio J. Califa, Acting Deputy Assistant Secretary for Legal Standards, Program Support and Litigation, Office for Civil Rights, U.S. Department of Education, Post Office Box 8240, Washington, D.C. 20024.

Dated: August 6, 1980.

Shirley M. Hufstedler,
Secretary of Education.

BILLING Code 4000-01-M

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 61

[FRL 1562-2, Docket No. OAQPS 79-14]

Proposed Policy and Procedures for Indentifying, Assessing, and Regulating Airborne Substances Posing a Risk of Cancer; Advance Notice of Proposed Generic Standards; Public Comment Period

AGENCY: Environmental Protection Agency.

ACTION: Notice of extension of public comment period.

SUMMARY: This notice extends the period for comment on proposed and procedures for identifying, assessing, and regulating carcinogens emitted into the ambient air from stationary sources. The comment period is extended from August 12, 1980 through the public meeting of EPA's Science Advisory Board Subcommittee on Airborne Carcinogens, tentatively scheduled for early November, 1980. Notice of the date by which comments are due will accompany the announcement of the meeting date and location.

DATES: The public comment period on the proposed policy and ANPR will close following the public meeting of EPA's Science Advisory Board Subcommittee on Airborne Carcinogens tentatively scheduled for early November, 1980.

ADDRESSES: All written comments on the proposed policy and ANPR should be addressed to: Central Docket Section, Gallery 3, West Tower, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460. Attn.: OAQPS 79–14 (proposed policy) or A 79–13 (ANPR).

Information on which the proposed policy and ANPR are based as well as the written comments received and transcripts of the public hearings are available for public inspection and copying at the Central Docket Section.

FOR FURTHER INFORMATION CONTACT:
Mr. Joseph Padgett, Telephone 919–541–5204 (FTS 629–5204).

SUPPLEMENTARY INFORMATION: On October 10, 1979, the Environmental Protection Agency proposed in the **Federal Register** (44 FR 58642) a policy and procedures for identifying, assessing, and regulating carcinogens emitted into the ambient air from stationary sources. In the same **Federal Register** (44 FR 58662), EPA published an advance notice of proposed rulemaking (ANPR), soliciting comments on draft generic work practice and operational standards for volatile organic compounds which could be applied quickly to reduce emissions of airborne carcinogens from certain source categories.

Interested individuals were invited to submit written comments on the proposed policy and ANPR by February 21, 1980. This was extended to April 14, 1980 and again to August 12, 1980 in order to afford additional opportunity for public comment.

Based on the written and oral comments received on the proposed policy. EPA has determined that further public discussion of certain major scientific issues is warranted. The format for this discussion will be a public meeting of EPA's Science Advisory Board Subcommittee on Airborne Carcinogens tentatively scheduled for early November, 1980. Once the date for this meeting is determined, an announcement will be published in the **Federal Register**. The meeting announcement will include notice of the comment period deadline and the date of by which material rebutting, responding to, or supplementing written or oral comments submitted at the Science Advisory Board meeting must be submitted to EPA.

Dated: August 8, 1980.

David G. Hawkins,
Assistant Administrator for Air, Noise and Radiation.

Rodney T. Small (Office of Science and Technology), (202) 653–8169; Michael D. Sullivan (Common Carrier Bureau), (202) 632–6450; Richard Taube (Private Radio Bureau), (202) 632–6497; or John Williams (Office of Science and Technology), (202) 632–7073.

SUPPLEMENTARY INFORMATION:

Order

Adopted: August 1, 1980.
Released: August 5, 1980.

In the matter of amendment of Parts 2, 22 and 90 of the Commission's Rules to Allocate Spectrum in the 928–941 MHz Band and to Establish Other Rules, Policies, and Procedures for One-Way Paging Stations in the domestic Public Land Mobile Radio Service and the Private Land Mobile Radio Services.

By the office of Science and Technology:

1. In paragraph 56 of the *Notice of Proposed Rule Making* in this proceeding 45 FR 32013, 32020–21, the Commission stated that it intended to issue a *Supplemental Notice* outlining alternative allocation methods. The comment period established in the original *Notice* was intended to be long enough to encompass comments on the original *Notice* and the *Supplemental Notice*. The Commission has not yet issued the latter document, however, and the August 15 deadline for initial comments is no longer appropriate.

2. In view of the Commission's intention to have a single, consolidated comment period in this proceeding, It is ordered that the time for filing comments and reply comments is Stayed pending issuance of a *Supplemental Notice*, in which the dates for filing will be set.

3. The Secretary shall cause a copy of this *Order* to be published in the **Federal Register**.

S. J. Lukasik,
Chief Scientist.

BILLING CODE 6712-01-M

47 CFR Part 73

[BC Dockets Nos. 80–244; RM–2650]

Amending Rules To Permit Certain Class II Daytime-Only AM Stations (Such as Station WHYT), Situated Between Cochannel U.S. Class I–B Clear Channel Station; Order Extending Time for Filing Reply Comments

AGENCY: Federal Communications Commission.

ACTION: Order.

SUMMARY: This action extends the time for filing reply comments from July 29 to August 8, 1980. This proceeding proposes a uniform 6:00 a.m. sign-on time for certain Class II stations situated between co-channel Class I–B clear channel stations.

DATE: July 29, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C. 20554.

FOR FURTHER INFORMATION CONTACT:
Robert Hayne, (202) 632–6985.

In the matter of Amendment of § 73.99 of the Commission's rules, BC Docket No. 80–244, RM–2650. See 45 FR 40626, June 16, 1980.

Adopted: July 29, 1980.
Released: August 1, 1980.

1. The Commission adopted a *Notice of Proposed Rulemaking* on May 29, 1980, proposing a uniform 6:00 a.m. sign-on time for certain Class II stations situated between co-channel Class I–B clear channel stations. Reply comments are presently due July 29, 1980.

2. On July 22, 1980, counsel for Jefferson-Pilot Broadcasting Company, Inc., licensee of Class I–B Station WBT, Charlotte, North Carolina, filed a request seeking additional time through August 8, 1980 to submit reply comments. In support of its request, counsel states that this additional time is necessary in order to enable its consulting engineer to review certain technical arguments advanced by the Daytime Broadcasters Association to the effect that the early morning skywave service of the Class I–B clear channel stations should not be protected.

3. Since it would be in the public interest to have all material available to the Commission in arriving at a decision in this proceeding, the requested additional time will be granted.

4. Accordingly, it is ordered, that the aforementioned request is granted and the date for filing reply comments is hereby extended through August 8, 1980.

5. This action is taken pursuant to Sections 4(i), 5(d)(1) and 303(r) of the

Communications Act of 1934, as amended, and § 0.281 of the Commission's rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division, Broadcast Bureau.

BILLING CODE 6712-01-M

47 CFR Part 90

[PR Dockets Nos. 80-422; RM-3199; FCC 80-459]

Amending Rules Concerning Bio-Medical Telemetry Operations

AGENCY: Federal Communications Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: This action proposes to allow the use of bio-medical telemetry radio transmissions on frequencies in the 150 MHz band in the Special Emergency Radio Service. The operation will only be allowed beyond 75 miles of urban areas of 500,000 or more population. The telemetry transmissions show the vital life signs of sick or injured persons and are usually sent from ambulances to hospitals for diagnosis and prescribed treatment.

DATES: Comments must be received on or before September 15, 1980 and Reply Comments must be received on or before September 30, 1980.

ADDRESSES: Federal Communications Commission, Washington, D.C., 20554.

FOR FURTHER INFORMATION CONTACT: Richard Taube, Private Radio Bureau, (202) 632-6497.

SUPPLEMENTARY INFORMATION:

In the matter of amendment of Part 90 of the Commission's rules concerning bio-medical telemetry operations, PR Docket No. 80-422, RM-3199.

Adopted: July 23, 1980.

Released: August 11, 1980.

1. Notice of Proposed Rule Making is hereby given in the above-entitled matter. This action responds to a petition for rule making (RM-3199) submitted by the State of Missouri Department of Social Services (Missouri).

2. Missouri proposes that we amend our rules to allow licensees of medical services communication systems in the Special Emergency and Local Government Radio Services to transmit bio-medical telemetry communications [1] in the VHF bands under certain limited conditions. In the Local Government Service, petitioner proposed this rule change for thirty frequencies in the 154–155 MHz band; in the Special Emergency Service, the change is proposed to apply to ten specified frequencies in the 45–47 MHz band, and to eleven specified frequencies in the 155 MHz band.

3. Petitioner proposes that these bio-medical telemetry operations be licensed only in rural communities that are forty miles removed from urban areas of 200,000 or more population except that "itinerant ambulances entering the 40 mile radius" would also be allowed to transmit these telemetry signals. Further, it is proposed to restrict bio-medical telemetry to intermittent operations not to exceed one minute in any five-minute period.

4. In support of its proposal, Missouri states:

"* * * many rural communities are trying to develop better and more effective EMS capabilities by extending medical resources beyond the door of the hospital's emergency department. These rural area services are attempting to phase in Advanced Life Support (ALS) by first training their employees as paramedic-type personnel * * * The Commission's regulations now limit communications necessary to use new capabilities to the UHF MED channels.[2] The obstacle is that of acquiring communications on the UHF channels to allow the paramedics to use their skills to (1) monitor the patient to assess what is wrong, (2) consult with a physician for possible instructions and, if needed, (3) administer stablilzation drugs and treatment * * * UHF channels just for telemetry may be appropriate for urbanized America, but VHF for ambulance-to-hospital communications is all that is needed in our rural areas. Fortunately, many rural services have an adequate VHF radio system that we are proposing adding bio-medical telemetry * * *"

Background

5. The regular use of bio-medical telemetry operations was first permitted by action taken in 1972, in Docket 19261.[3] We noted at that time:

"* * * The Commission has been aware of the importance of this radio technique to the efforts of the medical community to improve prehospitalization treatment for cardiac patients, accident victims, and others for whom emergency care is necessary * * * Developmental telemetry systems have been authorized in both the 150 and 450 MHz bands where they have demonstrated their practicality and their significant potential for advancement to the life saving function of medical facilities. An important example has been the telemetering of electrocardiograms of heart attack victims to enable hospital-based physicians to provide instructions for administering effective preliminary emergency care * * *"

6. Bio-medical telemetry operations are generally limited to operations in the 460 MHz UHF band in the Special Emergency Radio Service.[4] [5] As to permitting these operations in the VHF bands, particularly in the 155 MHz band where a large number of medical services systems operate, we found serious problems. For example, the apparent medical need at that time for continuous carrier operations in bio-medical telemetering was not feasible on the frequencies at VHF which had to be intensively shared. Docket 19261 discussed these and other problems and we stated:

"* * * A few parties sought separate frequencies in the 150 MHz band for these operations instead of, or at least in addition to, the 460 MHz allocations. The argument was that this would permit utilization of their present equipment and tie-in with their regular base station operations for necessary communications related to telemetering activities. The Commission recognizes that these advantages exist for licensees, as do certain economic advantages and technical advantages including more favorable propagation characteristics in the 150 MHz band. The difficulty is that there is not a sufficient number of 150 MHz frequencies available for exclusive telemetry operations. Nor did the comments in this regard produce a reasonable solution. Most suggested that we permit licensees the option to use the hospital frequency 156.34 MHz for telemetry systems. But sharing of a single frequency in a given community would not, in our view, serve to meet anticipated emergency telemetering requirements * * *."

In addition to these issues, the VHF frequencies at the 150–160 MHz range are heavily used in urban areas and cannot normally accommodate the relatively lengthy bio-medical telemetry transmissions.

Discussion

7. Missouri's petition answers some of the concerns that we noted in our consideration of the problems of VHF for bio-medical telemetry. We have additionally learned a great deal from the experience gained in use of this technique by the medical community since 1972. For instance, we indicated that in the early development of this technique continuous carrier operations for extended telemetry transmissions, perhaps for as long as twenty minutes, was considered to be a requisite. Today, however, intermittent telemetry is extensively employed so as to significantly reduce the need for dedicated frequencies. Also, the proposal to limit VHF telemetry to our less populated areas where channel sharing requirements can be expected to be minimal is a much more viable approach in terms of the number of VHF channels that are reasonably available for this function.

8. The comments were largely supportive of Missouri's petition.[6] Arkansas' Department of Health observed:

"If the petition is granted, there will be a better chance of the rural areas, where ambulance transport is a 20–30 minute trip, obtaining Advanced Life Support equipment and personnel. By utilization of radios currently on-board, many services will be able to upgrade their equipment. This will be especially true of those services that have to justify expenditures to either quorum courts or city government."

And for the Illinois Department of Public Health:

"* * * Although our long-range health plans call for eventual conversion to UHF radio, we feel that allowing rural systems to fully utilize their presently completed VHF systems will yield a cost benefit ratio that could make it possible for them to provide ALS/Paramedic services for their small and dispersed populations * * *"

9. Not all of the comments agreed that there were benefits. The Virginia Department of Health took the view that VHF telemetry is undesirable for two reasons:

"* * * to partially upgrade existing VHF systems will create pockets of incompatible systems and generate a general reluctance to take the final step to a coordinated UHF system * * *;" and

"Upgrading a VHF system to provide telemetric communications will not be cost effective when compared to a UHF system * * *."

10. The concerns noted by Virginia are not relevant to our consideration of the petitioner's proposals. Cost comparisons may favor UHF systems in some areas or under certain circumstances. However, these relevant costs are system design issues to be considered by users. Similarly, the operational benefits of a VHF telemetry system against one at UHF should be evaluated from the perspective of licensees. They are in the position to understand and apply local economic and geographic factors to determine how best to meet their medical communication requirements. We intend that our rules provide licensees viable options for bio-medical telemetry systems. It is consistent with this objective to provide available frequencies, as recommended by Missouri, which can enable development of alternative bio-medical telemetry system approaches.

11. Our finding, therefore, is that the petitioner's basic proposals to this end have considerable merit. These proposals would afford many licensees the opportunity they don't have now to utilize an important medical diagnosis and treatment telemetry technique through radio communications. Accordingly, we are proposing rule changes to provide for the operation of VHF bio-medical telemetry systems. At the same time, we do not agree with a number of the specific allocations and requirements proposed by the petitioner.

12. One problem we have is with petitioner's proposal to allow the bio-medical telemetry in the Local Government Service. This is not in accord with the rules and allocation structure for medical services radio operations. Basically, it is contemplated that these operations be licensed in the Special Emergency Service where the rules provide emphasis and flexibility for development of medical communications that can be fully interfaced within regions and from one area to another. This is not feasible where systems are licensed in many radio services. We are aware of a few medical communications systems that operate in radio services other than the Special Emergency Service. However, this is comparatively uncommon and usually reflects older systems that were in place before the Commission took action in 1974 (Docket 19880) to establish a medical services category in the Special Emergency Service. Our understanding is that most, if not all, of these few systems are planning conversion to operations in the Special Emergency Service as local budgets permit. In any event, licensing is permitted in the Special Emergency Services for all persons and organizations involved in medical services operations and we propose to limit VHF bio-medical telemetry to this radio service.

13. We also are modifying the frequencies that petitioner proposes for VHF bio-medical telemetry operations in the Special Emergency Service. Most of the frequencies suggested by Missouri are shared for non-medical services operations including school buses, veterinarians, beach patrols, and other uses. Licensees of medical services systems, therefore, have no practical means to control these diverse types of operations so as to avoid intersystem interference to or from telemetry operations. This is a significant problem as experience has demonstrated that the conduct of telemetry operations on the same frequencies used for voice communications is generally incompatible. The way to effectively deal with this problem is through close monitoring and control of all of the operations being conducted on the frequency. The point of Missouri's proposals is that this can be done in rural areas in medical services operations because there are generally only one or two eligible users and the transmissions are under the control of the licensees. However, this control cannot be exercised on a frequency that is available to other categories of users. We propose, therefore, to limit the bio-medical telemetry operations to the five frequencies that are available exclusively for medical services operations. These are 155.325, 155,340, 155,355, 155.385, and 155.400 MHz. These channels should afford sufficient spectrum in non-urbanized areas to accommodate the anticipated bio-medical telemetry requirements.

14. Missouri's proposed permissible geographic areas of operation for VHF bio-medical telemetry are also being modified. The petitioner has suggested that these operations be allowed within regions forty miles removed from urbanized areas of 200,000 or more population. Arizona Public-Safety Communications Officers Association notes:

"* * * we are concerned about the request for only a 40 mile restricted area rather than the typical 75 miles radius area around major metropolitan areas."

We agree, and the restriction we propose is for seventy-five miles which, as observed by Arizona, is the normal areas separation standard for the 155 MHz band. At the same time, we are proposing to reduce the restricted areas by applying the seventy-five mile limit only to urbanized areas of 500,000 or more population. This approximates the top fifty urbanized areas as developed

[1] Bio-medical telemetry is a widely used medical diagnostic technique that is accomplished through radiocommunications. The technique is used to permit diagnosis of patients before they reach a hospital. A patient's vital life signs are monitored by use of such devices as electrocardiograms. These measuremens are then transmitted by telemetry to a hospital-based physician who makes a diagnosis and prescribes appropriate treatment.

[2] This reference is to the frequencies in the 463/468 MHz band that are available in the Special Emergency Radio Service for medical services operations. See § 90.53 of the Commission's rules.

[3] See Report and Order adopted March 23, 1972 (FCC 72-274; 37 FR 6661).

[4] By action taken in Docket 19880 in 1974 (FCC 74-707; 39 FR 137), the original frequency allocation structure for bio-medical telemetry operations as established in Docket 19261 was modified. The rules now in effect, as adopted in Docket 19880, provide that telemetry operations are primarily permitted on three channel pairs at 463/468 MHz and on four single channels in the 458 MHz band; on a secondary basis to regular two-way voice operations, this technique is also permitted on five additional channels at 463/468 MHz. See § 90.53(b)(13), (19) and (20) of the Commission's rules.

[5] Bio-medical telemetry frequencies for in-hospital and low-power applications of this technique have also been allocated for use in the Business Radio Service (Part 90 of the rules) and on an unlicensed basis under Part 15 of our rules.

[6] Comments were submitted by Arizona Public-Safety Communications Officers Association; Arkansas Department of Health; Illinois Department of Public Health; Memorial Hospital of Carbondale, Illinois; Missouri Division of Health; Virginia Department of Health; and Johnnie Walker Medical Electronics, Inc. of Raytown, Mo.

in the U.S. Census of 1970, a listing of which is shown in Appendix A.

15. Another provision recommended by the petitioner would allow itinerant telemetry operations within the restricted areas. This proposal defeats the intent of the restriction which is to prevent interference to or from the telemetry operations because of heavy use of the VHF channels in the seventy-five mile regions. As a result, we are not including this proposal.

16. Finally, we are relaxing the proposal with respect to the permissible air time for transmission of bio-medical telemetry signals. Petitioner suggested that one-minute of transmission time be allowed in any five-minute period. Experience has shown that this may not be adequate for effective medical diagnosis. We propose to permit telemetry for up to five-minute periods but we request specific comments and suggestions on this aspect.

17. We would also like the comments to address the issue of "interrupt" capability. This results from the necessary use of VHF frequencies in a simplex mode so as to preclude the physician at the hospital having the ability to transmit while the mobile unit is sending. It is not our intent to provide any rule requirement as to this condition. However, we want licensees to consider the problem and, hopefully, we will be able to develop in our report in this proceeding some suggestions as to approaches being used.

Conclusion

18. In consideration of the foregoing, Missouri's petition for amendment of the Commission's rules is granted. Specific rules changes recommended by the petitioner, with modifications as discussed above, are being proposed as follow:

A. The use of F2 or F9 emission is proposed to be authorized on the frequencies 155.325, 155.340, 155.355, 155.385, and 155.400 MHz in the Special Emergency Radio Service for bio-medical telemetry operations;

B. These VHF bio-medical telemetry operations are proposed to be conducted at all locations beyond seventy-five miles of the centers of the top fifty urbanized areas as set forth in the U.S. Census for 1970 (See Appendix A).

C. The transmission of VHF bio-medical telemetry signals is proposed to be permitted for five-minute periods.

19. In accordance with the above, the Petition, RM–3199, submitted by the State of Missouri, Department of Social Services, is granted, and Notice of Proposed Rule Making is hereby given. The proposed amendments are issued pursuant to authority contained in sections 4(i) and 303(r) of the Communications Act of 1934, as amended.

20. All interested persons are invited to file written comments on or before September 15, 1980 and reply comments on or before September 30, 1980. Any person wishing to file a reply to a comment before the close of the formal comment period is encouraged to do so. All relevant and timely comments and reply comments will be considered by the Commission. In reaching its decision, the Commission may take into account information and ideas not contained in the comments, provided that such information or a writing indicating the nature and source of such information is placed in the public file, and provided that the fact of the Commission's reliance on such information is noted in the Report and Order.

21. In accordance with the provisions of 47 CFR 1.419(b), an original and five copies of all comments, replies, pleadings, briefs and other documents filed in this proceeding shall be furnished to the Commission. Members of the public who wish to express their views by participating informally may do so by submitting one or more copies of their comments, without regard to form (as long as the docket number is clearly stated in the heading). Copies of all filings will be available for public inspection during regular business hours in the Commission's Docket Reference Room (Room 239) at its headquarters in Washington, D.C., (1919 M Street NW.).

Federal Communications Commission.

William J. Tricarico,

Secretary.

INTERSTATE COMMERCE COMMISSION

49 CFR Ch. X

[Ex Parte No. 355]

Cost Standards for Railroad Rates; Revised Interpretation; Extension of Comment Period

AGENCY: Interstate Commerce Commission.

ACTION: Revised notice of proposed interpretation of statutory provisions; extension of comment period.

SUMMARY: The present due date for filing comments on the proposed revised interpretation of statutory minimum rail rates provisions (45 FR 48676, July 21, 1980) is August 20, 1980. The nation's railroads have requested a 20 day extension of the filing due date to permit completion of necessary studies on proposed new costing definitions. The Water Transportation Association has sought a 90 day extension. We believe that a 30 day extension is warranted. This will permit the petitioners a total of 72 days since service of our detailed decision on July 9, 1980.

DATE: Comments are now due September 19, 1980.

ADDRESS: An original and 15 copies of comments should be sent to: Office of Proceedings, Room 5340, Interstate Commerce Commission, Washington, D.C. 20423.

FOR FURTHER INFORMATION CONTACT:
Richard Felder or Jane Mackall (202) 275–7693.

Decided: August 6, 1980.

By the Commission, Robert C. Gresham, Acting Chairman.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 80-24428 Filed 8-12-80; 8:45 am]

BILLING CODE 7035-01-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 611

Foreign Fishing Regulations; Northeast Pacific Ocean; Order To Retain Domestic Annual Harvest (DAH)

AGENCY: National Oceanic and Atmospheric Administration (NOAA)/ Commerce.

ACTION: Proposed order.

SUMMARY: This document proposes that the Domestic Annual Harvest (DAH) of Pacific whiting in the fishery conservation zone off the Washington, Oregon, and California coasts shall not be reduced since it appears that U.S. fishermen will fully utilize that portion of the optimum yield.

DATE: Written comments may be submitted until August 28, 1980.

ADDRESS: Comments should be addressed to H. A. Larkins, Acting Director, Northwest Region, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, Washington 98109, telephone (206) 442–7575.

FOR FURTHER INFORMATION CONTACT:
H. A. Larkins (same as above).

SUPPLEMENTARY INFORMATION: On February 10, 1977, a preliminary fishery management plan (PMP) prepared by the Secretary of Commerce was published in the **Federal Register** (42 FR 8578). The PMP established conservation and management measures for the foreign trawl fisheries of the Washington, Oregon, and California region under authority of section 201(g) of the Fishery Conservation and Management Act, 16 U.S.C. 1801 et seq. The PMP was subsequently amended on November 30, 1977 (42 FR 60945), May 4, 1979 (44 FR 26131), and May 16, 1980 (appearing in 45 FR 34003 on May 21, 1980). The Third Amendment to the PMP established an optimum yield (OY) for Pacific whiting of 175,000 metric tons (m.t.), a domestic annual harvest (DAH) of 40,000 m.t. (12,000 m.t. for shore-based processing (DAP) and 28,000 m.t. for joint venture processing (JVP)), and a Total Allowable Level of foreign fishing (TALFF) of 100,000 m.t. Because of uncertainties in stock abundance and DAH, 35,000 m.t. of the optimum yield were held in reserve until better information could be obtained. Provisions were made in the Third Amendment for the Regional Director to release the whiting reserve to TALFF as soon as practicable after July 1 if events and available data justified this action. On July 23, 1980 final action was taken to increase DAH to 55,000 m.t. by taking 15,000 m.t. from the 35,000 m.t. whiting reserve; the remaining 20,000 m.t. of the reserve were added to TALFF.

The Regional Director was also authorized to supplement TALFF, near August 1, with the amount of the whiting DAH which would not be harvested by domestic vessels if available data justified this action. In July, an evaluation of domestic industry revealed that the 12,000 m.t. DAP estimate may be completely utilized; several firms indicated that they may initiate whiting production later in the season and others may increase production above current levels. Inasmuch as it has already been necessary to supplement DAH (JVP) from the whiting reserve and because it appears that the portion of DAH that will be processed by shore-based processors is expected to be fully utilized, there will be no DAH available to TALFF this year.

A 15-day comment period (following publication of this notice) is established and, during this time, pertinent information will be available for public review in the Regional Office (as allowed by 50 CFR Part 603 on Confidentiality of Statistics). Written comments will be accepted during the comment period, and should be submitted to H. A. Larkins, Acting Director, Northwest Region, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, Washington 98109, telephone (206) 442–7575.

Based on the above information, and with the rulemaking authority delegated by the Assistant Administrator, the Regional Director has determined that no part of the 55,000 m.t. whiting DAH shall be added to TALFF.

The Assistant Administrator for Fisheries has determined that this action does not require the preparation of a regulatory analysis under Executive Order 12044.

Signed at Washington, D.C., this 7th day of August 1980.

(16 U.S.C. 1801 *et seq.*)

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

DEPARTMENT OF AGRICULTURE

Soil Conservation Service

CAWACO Resource Conservation and Development Area Critical Area Treatment R.C. & D. Measures, Alabama; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. William B. Lingle, State Conservationist, Soil Conservation Service, 136 South Gay Street, Auburn, Alabama 36830, telephone 205–821–8070.

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that environmental impact statements are not being prepared for the CAWACO Resource Conservation and Development Area Critical Area Treatment Measures in Blount, Chilton, Jefferson, Shelby, and Walker Counties, Alabama.

The environmental assessment of this federally-assisted action indicates that the projects will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. William B. Lingle, State Conservationist, has determined that the preparation and review of environmental impact statements are not needed for these projects.

The measures concern plans for critical area treatment. The planned works of improvement include shaping and sodding, debris basins, diversions, grade stabilization structures, erosion control dams, grassed waterways, tree planting, and others to reduce or control critically eroding areas.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. William B. Lingle, State Conservationist, Soil Conservationist, Soil Conservation Service, 136 South Gay Street, Auburn, Alabama 36830, telephone 205–821–8070. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 12, 1980.

BILLING CODE 3410–16–M

Cross Creek Township Park Critical Area Treatment R.C. & D. Measure, Pennsylvania; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Room 820, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone 717–782–2202.

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Cross Creek Township Park Critical Area Treatment RC&D Measure, Washington County, Pennsylvania.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Graham T. Munkittrick, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for critical area treatment. The planned works of improvement include soil and water conservation practices to stabilize the park area. Practices to be installed include: subsurface drains, a waterway, diversions, streambank protection, grading, and vegetating bare and disturbed areas.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Graham T. Munkittrick, State Conservationist, Soil Conservation Service, Room 820, Federal Building, 228 Walnut Street, Harrisburg, Pennsylvania 17108, telephone 717–782–2202. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 12, 1980.

BILLING CODE 3410–16–M

Forbes Flood Prevention R.C. & D. Measure, North Dakota; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. J. Michael Nethery, State Conservationist, Soil Conservation Service, P.O. Box 1458, Bismarck, North Dakota 58502, telephone 701–255–4011, Extension 421.

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Forbes Flood Prevention R.C. & D. Measure, Dickey County, North Dakota.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. J. Michael Nethery, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of a dike system to protect the City of Forbes from flooding. The planned works of improvement include approximately 4,300 lineal feet of dike with 7-foot maximum height, 10-foot top width, 3 and 4 to 1 horizontal to vertical side slopes. The dike will be located along the north and west limits of the city.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. J. Michael Nethery, State Conservationist, Soil Conservation Service, P.O. Box 1458, Bismarck, North Dakota 58502, telephone 701–255–4011, Extension 421. A combined environmental assessment and FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 12, 1980.

Putnam County Park Critical Area Treatment R.C. & D. Measure, West Virginia; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151.

Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Putnam County Park Critical Area Treatment RC&D measure, Putnam County, West Virginia.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of critical area treatment in order to reduce soil erosion and prevent sediments from entering the stream. The bottom of the waterway will be regarded and the banks will be sloped and reshaped. Rock riprap and vegetative seeding will be used to stabilize the entire area.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151. Sistersville High School Land Drainage R.C. & D. Measure, West Virginia; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151.

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Sistersville High School Land Drainage R.C. & D. Measure, Tyler County, West Virginia.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of a subsurface drainage system to correct the internal drainage problems. The system will be 1,280 feet of 6-inch perforated polyethylene drainage tubing and have a gravel backfill to the ground surface. This will improve infiltration and also provide suitable bedding for the tile.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental

Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151. Williamson-French Creek Fisherman Access R.C. & D. Measure, West Virginia; Environmental Statement

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151.

Pursuant to section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Williamson-French Creek Fisherman Access R.C. & D. Measure, Pleasants County, West Virginia.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of a fisherman access which will permit a more even distribution of fishing pressure on French Creek.

The planned works of improvement include grading and shaping of parking area, guard posts, walk and stairways, and a slide-type boat ramp.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assesament are on file and may be reviewed by contacting Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151. OFFICE OF THE FEDERAL INSPECTOR FOR THE ALASKA NATURAL GAS TRANSPORTATION SYSTEM

[Order No. 2]

Statement of Policy on Legal Status of the "Western Delivery System", as Related to the Alaska Natural Gas Transportation System, and Delegation of Enforcement Authority

Dated: August 6, 1980.

AGENCY: Office of the Federal Inspector for the Alaska Natural Gas Transportation System.

ACTION: Statement of Policy and Delegation of Enforcement Authority.

SUMMARY: The Office of the Federal Inspector (OFI) is an independent establishment of the Executive Branch, established by Reorganization Plan No. 1 of 1979, which was put into effect by Executive Order 12142 of June 21, 1979, 44 FR 36927 (June 25, 1979). This agency is the central focus for Federal activities concerning the planning, construction, and initial operation of the Alaska Natural Gas Transportation System (ANGTS).

This order sets forth the OFI policy pertaining to the application by the Federal Energy Regulatory Commission (FERC) of the Alaska Natural Gas Transportation Act of 1976 (ANGTA) to the "Western Delivery System." In agreeing with the FERC determination of ANGTA applicability, the OFI also enumerates the legal effects of being "related to" the ANGTS. This order also delegates certain ANGTS-related enforcement authority back to appropriate Federal agencies. It is intended to eliminate any confusion concerning the responsibilities of the various Federal agencies, including the OFI, with regard to the Western Delivery System.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Peter Esposito, Office of the General Counsel, Office of the Federal Inspector, ANGTS, Room 2413, Post Office Building, 1200 Pennsylvania Avenue, NW., Washington, DC. 20044, (202) 275–1144.

I. Background

On January 11, 1980, the Federal Energy Regulatory Commission (FERC) issued an order approving applications relating to the importation, sale, and transportation of natural gas from Alberta, Canada, and to the construction of certain "prebuilt" facilities of the Western Leg of the Alaska Natural Gas Transportation System (ANGTS) between Kingsgate, British Columbia and Stanfield, Oregon. On June 13, 1980, by supplemental order the FERC issued a certificate of public convenience and necessity authorizing the construction and operation of a Western Delivery System (WDS).[1] WDS construction will entail connecting the Stanfield end of the prebuilt portion of the ANGTS Western Leg to, and expanding, certain Northwest Pipeline Corporation and El Paso Natural Gas Company facilities. Displacement will effectively "deliver" the Canadian gas to Southern California.

The FERC noted that its consideration of the WDS certificate was "governed by the Alaska Natural Gas Transportation Act" (ANGTA), Pub. L. 94–586, 15 U.S.C. Section 719. *Id.* at 43–46. In light of ANGTA applicability, the FERC issued a supplemental order on June 20, 1980, applying affirmative action conditions to the June 13 certificates. These conditions are

[1] *Northwest Alaskan Pipeline Company, et al.*, FERC Docket Nos. CP78–123, *et al.*, supplemental order issued June 13, 1980.

intended to implement Section 17 of ANGTA.

II. Statement of Policy

Pursuant to Section 202(b) of Reorganization Plan No. 1 of 1979, the OFI has the responsibility to expedite the regulatory processes necessary to the completion of the ANGTS. In this vein the OFI establishes a policy both endorsing the FERC conclusion that ANGTA is applicable to the WDS and enumerating the regulatory effects of this ANGTA applicability.

A. Endorsement of ANGTA Applicability to the WDS

Section 9(a) of ANGTA mandates that "any action which is *necessary or related to* the construction and initial operation of the approved transportation system" [2] be expedited (emphasis added). The same standard is also expressly referenced for, and therefore triggers, the other provisions of Section 9, dealing with administrative procedures, together with Section 8 waiver of law, Section 10 judicial review, and certain other operating sections of ANGTA.

In its certification order, the FERC found that "the WDS * * * is related to the ANGTS since these facilities will be used to transport Alberta gas volumes to the Southern California market as part of the pre-built project." The FERC also concluded that the WDS will "support construction of the ANGTS facilities between Kingsgate and Stanfield, and contribute to the realization of various benefits of pre-building the rest of the ANGTS." Moreover, it was determined that the existence of the WDS was an "essential prerequisite" to, and that denial of the WDS certificate would substantially delay, prebuilding the Kingsgate-to-Stanfield segment.

Based on its own analysis of the FERC order, Section 9(a) of ANGTA, and applicable judicial precedent,[3] the OFI agrees that the WDS is "related to the construction and initial operation" of the ANGTS, and thus is governed by ANGTA and is eligible for treatment pursuant to ANGTA and ANGTA-derivative authorities.

B. Legal Effects of Being "Related to" ANGTS

Generally, the legal effects of being "related to" ANGTS depend upon the specific terms of the authority being applied. If the terms apply to actions "related to" ANGTS, they will be applied to the WDS. If the authority refers specifically to ANGTS, it will not be applicable to actions involving facilities which are merely "related to" ANGTS.

Specifically, the treatment flowing from being "related to" ANGTS includes: (1) expedited agency permit action, Section 9 of ANGTA; (2) expedited and limited judicial review of certain regulatory actions, Section 10 of ANGTA; (3) the availability of supplemental enforcement authority, Section 11 of ANGTA; (4) the application of affirmative action regulations, Section 17 of ANGTA; (5) Federal Inspector coordination of permitting, Section 202(b) of Reorganization Plan No. 1 of 1979; and (6) Federal Inspector responsibility for all functions related to the enforcement of all Federal statutes and regulations and enforcement of terms, conditions and stipulations of Federal authorizations related to the WDS, Section 102 of the Reorganization Plan.

The OFI concludes, however, that being "related to" ANGTS does not trigger the ANGTS-specific provisions in ANGTA, the President's *Decision*, [4] and the Agreement on Principles with Canada.[5] The most important ANGTS-specific provisions not applicable to the WDS are: (1) the Terms and Conditions listed in Section 5 of the President's *Decision*, and (2) the procurement review provisions of the U.S.-Canadian Agreement.

III. Delegation of Authority

In terms of OFI enforcement authority over the WDS, the primary source of field level activity comes from the Interior Department grant of right-of-way across Federal lands. Because that grant, pursuant to Section 28(w) of the Mineral Leasing Act, has already been transmitted to Congress, the Federal Inspector now notes that he is the "authorized officer," the position responsible for enforcement on the face of the grant. Nevertheless, because WDS construction is standard pipeline upgrading, of limited complexity relative to ANGTS itself, the OFI, subject to appropriate OFI oversight, is hereby delegating enforcement authority back to the appropriate Federal agencies, including the Interior Department, to the greatest extent possible pursuant to Section 202(a) of the Reorganization Plan. This delegation does not, however, apply to equal opportunity requirements.

Peter L. Cook,

Acting Federal Inspector.

NATIONAL ENDOWMENT ON THE ARTS AND THE HUMANITIES

Design Arts Panel (Design Demonstration); Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92–463), as amended, notice is hereby given that a meeting of the Design Arts Panel (Design Demonstration) to the National Council on the Arts will meet September 3, 1980 from 9:00 a.m. to 5:30 p.m., and September 4, 1980 from 9:00 a.m. to 5:30 p.m. at Columbia Plaza Office Complex, room 1422, 2401 E Street, N.W., Washington, D.C.

This meeting is for the purpose of Panel review, discussion, evaluation, and recommendation on applications for financial assistance under the National Foundation on the Arts and the Humanities Act of 1965, as amended, including discussion of information given in confidence to the agency by grant applicants. In accordance with the determination of the Chairman published in the **Federal Register** of February 13, 1980, these sessions will be closed to the public pursuant to subsections (c)(4), (6) and 9(b) of section 552b of Title 5, United States Code.

Further information with reference to this meeting can be obtained from Mr. John H. Clark, Advisory Committee Management Officer, National Endowment for the Arts, Washington, D.C. 20506, or call (202) 634–6070.

John H. Clark,

Director, Office of Council and Panel Operations, National Endowment for the Arts.

BILLING CODE 6320-01-M

[Docket 33220]

Yucatan Service Case

Notice to all Parties:

On August 4, 1980 Northwest Airlines filed a motion for a change of date for the oral argument in this proceeding. Northwest stated that the current date of August 13 conflicted with preexisting obligations of its counsel. Answers were filed by the Bureau of International Aviation and Continental Air Lines in opposition to Northwest's proposed three-week postponement.

We have decided, with the informal concurrence of all parties participating in the oral argument, to grant Northwest's motion and postpone oral argument for two days. It is now scheduled for 10:00 a.m. on Friday, August 15, 1980.

Time allotments for argument include questions by the Board and parties should prepare their direct arguments accordingly. Parties may reserve up to 25 percent of their allotted time for rebuttal. Rebuttal will be heard in reverse order of direct argument. The order of appearance and allotments are as follows:

Parties and Time

Continental Air Lines, James T. Lloyd—20 minutes.
Texas International Airlines, Emory N. Ellis—20 minutes.
Houston Parties, Robert E. Cohn—10 minutes.
Eastern Air Lines, Allison Wade—20 minutes.
Northwest Airlines, Ronald D. Eastman—20 minutes.
New Orleans Parties, Michael J. Rapier—10 minutes.
Bureau of International Aviation, William J. Wagner—30 minutes.

In our opinion and order on discretionary review (adopted July 31, 1980 and transmitted to the President on August 1, 1980) we asked parties to address certain specific issues at the oral argument which the Board considers to be of particular importance. In addition to those issues, the Board requests parties to address the potential impact on Washington/Baltimore-Yucatan service of an award to any of the applicants in the Houston-Yucatan market.

Dated in Washington, D.C. on August 7, 1980.

Phyllis T. Kaylor,

Secretary.

BILLING CODE 6335-01-M

DEPARTMENT OF COMMERCE

International Trade Administration

Countertop Microwave Ovens From Japan; Antidumping—Extension of Period for Final Determination and Rescheduling of Antidumping Hearing

AGENCY: United States Department of Commerce.

ACTION: Extension of period for final determination and rescheduling of antidumping hearing.

SUMMARY: The Department of Commerce hereby extends for 60 days the period for final determination and reschedules the antidumping hearing with respect to countertop microwave ovens from Japan. The hearing will be held on September 30, 1980, and the final determination will be made not later than November 21, 1980.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT: Leon McNeill, Office of Investigations, International Trade Administration, Department of Commerce, Washington, D.C. 20230 (202) 377–2438.

SUPPLEMENTARY INFORMATION:

On July 9, 1980, the Department of Commerce determined preliminarily that countertop microwave ovens from Japan were being, or were likely to be, sold at less than fair value within the meaning of section 731, Tariff Act of 1930 (93 Stat. 162, 19 USC 1673) ("the Act"), as regards imports of countertop microwave ovens produced by Tokyo Shibaura Corporation (Toshiba). That notice stated that imports of this merchandise produced by Matsushita Electric Industrial Co., Ltd., Sanyo Electric Co., Ltd. and Sharp Corporation were excluded from the determination.

On July 25, 1980, counsel for Toshiba, requested that the Department extend the period for final determination for 60 days in accordance with section 735(a)(2) of the Act. Although imports of countertop microwave ovens produced by Toshiba do not account for a significant proportion of exports of the merchandise which is the subject of the investigation, it has been determined to grant Toshiba's request for an extension of the period for a final determination since Toshiba is the only manufacturer for which the preliminary determination was affirmative. Counsel for petitioner supports this request. Accordingly, the period for final determination is hereby extended for 60 days to November 21, 1980.

The preliminary action notice also stated that if an interested party requested an opportunity to present oral views in accordance with section 353.47, International Trade Administration Regulations (19 CFR 353.47, 45 Fed. Reg. 8204) a hearing would be held at the U.S. Department of Commerce, Room 6802, 14th and Constitution Avenue, N.W., Washington, D.C., 20230, beginning at 11:00 a.m., August 19, 1980.

Because of the extension of the period for a final determination, the date and time of the hearing have been changed. The hearing will be held at the address and room number shown above beginning at 10:00 a.m. on September 30, 1980. Prehearing briefs must be received in the Office of the Deputy Assistant Secretary for Import Administration, Room 2800A, at the address shown above not later than 5:00 p.m., September 23, 1980.

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

August 8, 1980.

[FR Doc. 80-24441 Filed 8-12-80; 8:45 am]

BILLING CODE 3510-25-M

Portable Electric Typewriters From Japan; Antidumping; Determination of Duty

AGENCY: U.S. Department of Commerce.

ACTION: Early determination of antidumpting duties.

SUMMARY: This notice is to advise the public that pursuant to section 736(c) of the Tariff Act of 1930, as amended (93 Stat. 173, 19 U.S.C. 1673e(c)) the Department of Commerce has determined the amount of antidumping duties to be assessed upon the importation of portable electric typewriters from Japan manufactured by Brother Industries Ltd. (Brother) and Silver Seiko Ltd. (Silver Seiko). Portable electric typewriters produced by these two companies and entered or withdrawn from warehouse on or after January 4 to May 7, 1980, will be assessed antidumping duties in accordance with this determination. This determination will also be the basis for the deposit of estimated antidumping duties on future entries of typewriters produced by Brother and Silver Seiko.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT: Steven S. Lim, Office of Investigations, Import Administration, U.S. Department of Commerce, Room 2124, N.W. Washington, D.C. 20230, telephone (202) 377–1776.

SUPPLEMENTARY INFORMATION:

A. Procedural Background

On May 9, 1980, an Antidumpting Duty Order was published in the **Federal Register** covering imports of portable electric typewriters from Japan (45 FR 30618 and 30619). In accordance with that Order Customs officers were directed to require a deposit of estimated antidumping duties pending liquidation of entries of the portable typewriters subject to the Order for all entries, or withdrawals from warehouse, for consumption. On May 14 and 15, 1980, two manufacturers of these typewriters (Brother Industries, Ltd. and Silver Seiko, Ltd.) requested that the deposit of estimated duties be waived and an early determination of duty be made. Section 736(c) of the Act (93 Stat. 173, 19 U.S.C. 1673e(c)) provides that if we are satisfied as to our ability to determine the foreign market value and the United States price for all of the merchandise which was entered between the date of our preliminary affirmative determination and the International Trade Commission's final determination, within 90 days of the date the Antidumping Order was published, we may permit the posting of bond or other security in lieu of the deposit of estimated antidumping duties.

On May 30, 1980 the Department announced that it was satisfied that it would be able to determine foreign market value and United States Price for all entries of typewriters manufactured by Brother and Silver Seiko, during the relevant time period. Deposit of estimated duty was waived in lieu of security pending the early determination.

B. Scope of the Investigation

All imports of portable electric typewriters produced by Brother and Silver Seiko entered, or withdrawn from warehouse, for consumpton, during the period from January 4 to May 7, 1980 were investigated. For the purposes of this determination, the term "portable electric typewriters" means those provided for in item 676.0510, Tariff Schedules of the United States Annotated.

C. Basis of Comparison—Silver Seiko

For purposes of this determination, the basis of comparison was between purchase price or exporter's sales price, as appropriate, and the adjusted foreign market value of such or similar typewriters on all imports of portable electric typewriters manufactured by Silver Seiko. Purchase price, as defined in section 772(b) of the Tariff Act of 1930, as amended (93 Stat. 181, 19 U.S.C. 1677a(b)), was used for those shipments to the U.S. where the sales were made to unrelated U.S. customers. Exporter's sales price, as defined in section 772(c) of the Act (93 Stat 181, 19 U.S.C. 1677a(c)), was used for those sales by Silver Seiko to a U.S. firm related to it within the meaning of section 771(13) of the Act (93 Stat 180, 19 U.S.C. 1677(13)). Foreign market value was determined in accordance with section 773 of the Act (93 Stat 182, 19 U.S.C. 1677b).

1. *Purchase Price.* Purchase price was calculated on the basis of f.o.b. packed price to the United States, with deductions for inland freight and handling charges. Silver Seiko's selling price to one of its U.S. purchasers was subject to an exchange rate agreement.

Generally, this agreement provides for an adjustment to the selling price of the merchandise to account for fluctuations in the exchange rate. The net selling price, after adjustment for exchange rate fluctuations in accordance with the agreement, was used for sales involving this U.S. purchaser.

2. *Foreign Market Value Compared to Purchase Price.* The foreign market value compared to purchase price for Silver Seiko was calculated on the basis of sales in the home market as of the date the imported typewriters were purchased or agreed to be purchased. Foreign market value was based on the net sales price to the purchasers who purchased in large wholesale quantities, taking into account volume discounts. Adjustment to foreign market value was made for differences in Japanese inland freight. In accordance with Section 773(a)(4)(B) of the Act (93 Stat 183, 19 U.S.C. 1677b(a)(4)(B)) and § 353.15 of the Commerce Regulations (19 CFR 353.15, 45 FR 8194), an adjustment to foreign market value was made for differences in packing costs incurred in sales in the home market and the United States.

Pursuant to section 773(a)(4)(C) of the Act, adjustments to foreign market value were made for differences in physical characteristics of the merchandise being compared. In accordance with section 353.16 of the Commerce Regulations, adjustments were limited to differences in cost of production of the typewriters (i.e., cost of materials and labor).

3. *Exporter's Sales Price.* Exporter's sales price was calculated for Silver Seiko on the basis of the selling price to unrelated U.S. dealers, with deductions for Japanese inland freight, handling charges, ocean freight, brokerage, U.S. inland freight, delivery costs, insurance, commissions, advertising and selling expenses.

4. *Foreign Market Value Compared to Exporter's Sales Price.* Foreign market value compared to exporter's sales price was calculated on the basis of sales to retailers for resale in the home market at the time of exportation of the portable electric typewriters to the United States. Adjustment to foreign market value was made for differences in Japanese inland freight expenses.

Three general categories of adjustments were granted for differences in circumstances of sale. Pursuant to §§ 353.15(a) and 353.15(b) of the Commerce Regulations, adjustments were made to foreign market value for differences in circumstances of sale which bore a direct relationship to the sales under consideration or advertising and other selling expenses assumed by the seller attributable to a later sale by the purchaser. Adjustments were made for certain advertising expenses, warranty and after sales service, packing costs and after sale rebates.

Silver Seiko incurred commission expenses in the United States but not in Japan. Section 353.15(c) of the Commerce Regulations provides, in part;

> * * * reasonable allowances for other selling expenses will be made in cases where a reasonable allowance is made for commissions in one of the markets under consideration and no commission is paid in the other market under consideration, the amount of such allowance being limited to the actual other selling expenses incurred in one market, or the total amount of the commission, whichever is less.

The "other selling expenses" referred to in the quoted language of the Regulation refers to selling expenses other than those found to be directly related or attributable to a later sale by a purchaser of the merchandise under consideration. For Silver Seiko, adjustment to foreign market value was made for "other selling expenses" incurred in the home market, not exceeding the total amount of the commissions in the United States. Section 353.15(c) of the Commerce Regulations also provides for adjustment to foreign market value in the case of exporter's sales price transactions for all actual selling expenses incurred in the home market up to the amount of the selling expenses incurred in the United States. This adjustment is frequently referred to as the exporter's sales price offset. Certain types of advertising expenses which are not appropriate for adjustment under § 353.15 (a) or (b) of the Regulations have been included in the total amount of other actual selling expenses incurred in the home market subject to the exporter's sales price offset. Adjustment to foreign market value has been made for Silver Seiko up to the amount of the non-directly related selling expenses incurred in the United States since such expenses were less than the non-directly related selling expenses incurred in Japan.

Pursuant to section 773(a)(4)(C) of the Act, adjustments to foreign market value were made for differences in physical characteristics of the typewriters being compared. In accordance with sections 353.16 of the Commerce Regulations, adjustments were limited to differences in the cost of production of the typewriters (i.e., cost of materials and labor).

5. *Claims for Adjustments to Foreign Market Value That Have Been Denied.* Counsel for Silver Seiko claimed that the foreign market value of one of its export models should be determined on the basis of constructed value. Counsel for Silver Seiko contended that there were no similar models sold in the home or third country markets. We have determined that the foreign market value for this model should be based upon home market sales of a model which meets the definition of "such or similar" as set forth in Section 771(16) of the Act (93 Stat. 180, 19 U.S.C. 1677(16)). Production of the home market model chosen by the Department for comparison with the U.S. model was discontinued prior to the period of investigation. However, it appears that sales of this model continued during the period of investigation and that those sales were made in the ordinary course of trade. Therefore, the Department selected this model as the basis for comparison with the export model.

Counsel for Silver Seiko also claimed an adjustment based upon the costs associated with changeover of production lines between home market and export models. This claim is not based upon savings in production costs associated with economics of scale. The costs associated with changes in the production line are costs in the nature of general manufacturing overhead which should be allocated over total production. Since the merchandise being compared is substantially identical this claim has been denied.

Silver Seiko also claimed that an adjustment to foreign market value should be made for certain costs in transporting the merchandise from the factory to the central distribution warehouse. This claim was disallowed since it was not shown to be an expense directly related to the sale under consideration.

D. Basis of Comparison—Brother

For purposes of this determination, the basis of comparison was between purchase price or exporter's sales price, as appropriate, and the adjustd foreign market value of such or similar typewriters on all imports of portable electric typewriters manufactured by Brother Industries, Ltd. Purchase price, as defined in section 772(b) of the Act, was used for those shipments to the U.S. where the sales were made to unrelated U.S. customers. Exporter's sales price, as defined in section 772(c) of the Act, was used for those sales by Brother Industries which were made to a U.S. firm related to it within the meaning of section 771(13) of the Act (93 Stat. 180, 19 U.S.C. 1677(13). Foreign market value was determined in accordance with section 773 of the Act.

1. *Purchase Price.* Purchase price was calculated on the basis of the delivered sales price to the United States, with deductions for Japanese inland freight, shipping, ocean freight, brokers and handling charges, United States inland freight and insurance.

2. *Foreign Market Value Compared to Purchase Price.* Brother provided the department with information on actual sales prices of home market models comparable to the export models for sales during the period of investigation. The home market sales were divided into two groups to reflect changes in the list price of the models that occured during the period of this investigation. However, the actual dates of sales in the home market were not provided. In the absence of the dates of sales, foreign market value was calculated on the basis of the weighted averge sales price of comparable home market models, calculated for each of the two distinct time periods within the period of our investigation. Adjustment to foreign market value was made for differences in Japanese inland freight expenses. Adjustments to foreign market value were made for differences in circumstances of sale in accordance with section 773(a)(4)(B) of the Act (93 Stat. 183, 19 U.S.C. 1677b(a)(4)(B)) and § 353.15 of the Commerce Regulations (19 CFR 353.15, 45 FR 8194). Section 353.15(a) of the Regulations provides for adjustment to foreign market value for differences in circumstances of sales which bear a direct relationship to the sales which are under consideration. Section 353.15(b) provides for adjustment to foreign market value for advertising and other selling expenses assumed by the seller that are attributable to a later sale by the purchaser. We have detemined that adjustment to foreign market value is warranted for Brother for warranty expenses, certain types of rebates, packing costs and certain types of direct advertising expenses.

Pursuant to section 773(a)(4)(C) of the Act, adjustments to foreign market value were made for differences in physical characteristics of the typewriters being compared. In accordance with § 353.16 of the Regulations, adjustments were limited to differences in cost of production of the typewriters (i.e. cost of materials and labor).

3. *Exporter's Sales Price.* Exporter's sales prices was calculated for Brother on the basis of the selling price to unrelated U.S. dealers, with deductions, where applicable, for Japanese inland freight, shipping, ocean freight, brokerage and handling charges, U.S. inland freight, insurance, commissions, freight-out (transportation), co-op advertising, overbilling, warranty costs, accrual advertising, bad debt allowances, selling expenses (indirect), direct and indirect advertising, and collection expenses as appropriate.

4. *Foreign Market Value Compared to Exporter's Sales Price.* For the reasons explained above for foreign market value compared to purchase price, the foreign market value compared to exporter's sales price was calculated on the basis of the weighted average sales price of comparable models in the home market for each of the two distinct time periods of our investigation. Adjustments to foreign market value were granted for differences in Japanese inland freight expenses.

Pursuant to §§ 353.15(a) and 353.15(b) of the Commerce Regulations, adjustments were made to foreign market value for differences in circumstances of sale which bore a direct relationship to the sales under consideration or advertising and other selling expenses of Brother attributable to a later sale of the merchandise by a purchaser. Adjustments were made for after sale rebates, certain advertising expenses, packing and warranty expenses. Brother incurred expenses for commissions in the home market and the United States. In accordance with § 353.15(b) of the Commerce Regulations, an adjustment to foreign market value equal to the difference in commissions was allowed. Foreign market value was adjusted for the exporter's sales price offset. Adjustments to foreign market value were also made for differences in physical characteristics of the typewriters being compared.

5. *Claims for Adjustments to Foreign Market Value that Have Been Denied.* In determining foreign market value for purchase price transactions, counsel for Brother requested an adjustment for commissions incurred in the home market. Brother did not incur expenses for commissions in the United States. As explained above, where commissions are incurred in only one market under consideration, adjustment to foreign market value is limited to the amount of "other selling expenses" or the amount of the commissions, whichever is less. Since Brother did not incur selling expenses in the United States in purchase price transactions, no adjustment to foreign market value is warranted.

Counsel for Brother also requested adjustment to foreign market value for promotional expenses. Information presented to the Department during this investigation is insufficient to permit an allowance for this claim.

E. Verification

In accordance with section 776(a) of the Act (93 Stat. 186, 19 U.S.C. 1677e(a)), officials of the Department of Commerce verified all information used in making this determination. The officials were granted access to the books and records of the foreign producers and their U.S. subsidiaries and used traditional verification procedures. These procedures included on site inspection of randomly selected source documents (such as financial statement, various accounting ledgers and proof of payment records such as invoices and cancelled checks) pertinent to this investigation, inspection of promotional materials and material advertisements.

The petitioner submitted information based upon independent market research that indicated that certain prices and expenses claimed by the manufacturers were overstated or understated. Based upon the verifications performed in Japan and the United States, we have determined that no reason exists to disregard the information provided by the manufacturers.

F. Public Hearing

A public hearing notice was published in the **Federal Register** on June 23, 1980 (45 FR 41995). Interested persons have been provided an opportunity to present written and oral views in accordance with § 353.44(e) of the Commerce Regulations (19 CFR 353.44(e), 45 FR 82021).

G. Results of Comparisons of Foreign Market Value and United States Price

Using the above criteria, United States prices (purchase price or exporter's sales price, as the case may be) were found to be lower than the foreign market value of such or similar typewritters. Comparisons were made on all portable electric typewriters produced by Brother and Silver Seiko entered, or withdrawn from warehouse, for consumption on or after January 4, 1980 to May 7, 1980.

Margins were found on 74 percent of sales compared. The weighted average margin found with respect to sales by Silver Seiko was 14.91 percent and with respect to sales by Brother was 5.31 percent.

H. Determination of Antidumping Duties

On the basis of information developed during the ninety day investigation and using the above criteria, I hereby determine that the United States prices of portable electric typewriters from Japan, produced by Brother Industries, Ltd. and Silver Seiko, Ltd. are less than the foreign market values of such or similar typewriters.

In accordance with Section 736(c)(3) of the Act (93 Stat. 173, 19 U.S. C. 1673e(c)(3)) Customs officials will be directed to assess antidumping duties equal to the amount determined by the Department during this proceeding for all entries of portable electric typewriters manufactured by Brother and Silver Seiko entered or withdrawn from warehouse for consumption on or after January 4, 1980 to May 7, 1980. For purposes of the assessment of antidumping duties on the entries subject to this determination under section 736, we also intend that this determination constitute the completion of a review under section 751 of the Act which vests in all interested parties the rights flowing from the completion of such a review.

I. Deposit of Estimated Antidumping Duties

In accordance with Section 736(c)(3) Customs officials are being directed to require at the same time as estimated normal customs duties on the merchandise are deposited, a deposit of

estimated antidumping duties pending liquidations of entries of portable electric typewriters from Japan, for all entries, or withdrawals from warehouse for consumption. The estimated antidumping duty deposit required for entries of the subject merchandise shall be 14.91 percent for Silver Seiko; 5.31 percent for Brother; 4.36 percent for Nakajima All; and 7.55 percent for the subject merchandise produced by all other Japanese manufacturers.

This notice is published pursuant to Section 736(c)(3) of the Act (93 Stat. 172, 19 U.S.C. 1673(e)), and § 353.48 of the Department of Commerce Regulations (19 CFR 353.48, 45 FR 8204).

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

August 7, 1980.

BILLING CODE 3510-25-M

Maritime Administration

Cost Comparison Reviews Scheduled for Commercial or Industrial Activities Performed by Government Personnel in the Maritime Administration

AGENCY: Maritime Administration.

ACTION: Cost comparison review.

SUMMARY: Notice is hereby given that pursuant to Office of Management and Budget Circular A-76 and Department of Commerce Administrative Order 201-41, the Maritime Administration intends to conduct cost comparisons of the following commercial or industrial activities performed by Government personnel in the Maritime Administration and to issue an invitation for bids or requests for proposals after the start date scheduled for each review:

Description of activity	Location	Review start	Completion
Custodial services.	Kings Point, N.Y...	11/03/80	10/30/81
Computer operations.	Washington, D.C...	11/03/80	10/30/81

Each invitation for bids or request for proposals will be announced in the *Commerce Business Daily*. A contract or contracts may or may not result from the cost comparison of each activity.

All interested parties may obtain information regarding the results of the cost comparison of an activity and additional information as required from the following: Mr. Stinson J. Miller, Office of Management and Organization, Maritime Administration, Room 3884, Department of Commerce, Washington, D.C. 20230, Tel: (202) 377-2562.

So ordered by the Assistant Secretary for Maritime Affairs.

Dated: August 6, 1980.

Georgia P. Stamas,

Assistant Secretary.

[FR Doc. 80-24394 Filed 8-12-80; 8:45 am]

BILLING CODE 3510-15-M

National Bureau of Standards

Federal Information Processing Standards 60, 61, 62, 63; Technical Verification Guidance

Under the provisions of Public Law 89-306 (79 Stat. 1127; 40 USC 759(f)) and Executive Order 11717 (38 FR 12315, dated May 11, 1973), the Secretary of Commerce is authorized to establish uniform automatic data processing (ADP) standards. On February 16, 1979, notice was given in the **Federal Register** (44 FR 10098-10101) announcing that the Secretary of Commerce had approved three input/output (I/O) Federal Information Processing Standards (FIPS): (1) I/O Channel Interface, (2) Channel Level Power Control Interface, (3) Operational Specifications for Magnetic Tape Subsystems, designated Federal Information Processing Standards Publication (FIPS PUB) 60, FIPS PUB 61, and FIPS PUB 62, respectively. On August 27, 1979, notice was given in the **Federal Register** (44 FR 50078-50079) announcing that the Secretary had approved a fourth I/O channel level interface standard, Operational Specifications for Rotating Mass Storage Subsystems, designated FIPS PUB 63.

These standards were the subject of corrections and revisions announced in the **Federal Register** on August 27, 1979 (44 FR 50079-50080), August 31, 1979 (44 FR 51294) and December 3, 1979 (44 FR 69317).

On December 11, 1979, notice was given in the **Federal Register** (44 FR 71444-71445) announcing the verification procedures for FIPS PUBS 60, 61, 62, and 63.

On June 25, 1980, notice was given in the **Federal Register** (45 FR 42783-42784) of the interim revision of FIPS PUBS 60-63 as follows:

The Director of the National Bureau of Standards shall, through publication of notices in the **Federal Register**, specify the verification procedures and techniques to be employed and shall conduct or arrange to have conducted this required verification. The Director shall provide, upon request or when he otherwise determines it to be necessary and appropriate, guidance as to whether specific technical interface implementation approaches will meet the verification requirement. Such guidance shall be published in summary form through notices in the **Federal Register**, specifying the manner in which persons may obtain copies of the full guidance provided.

This is the first notice providing specific guidance concerning technical interface implementation approaches. The questions which follow are numbered 1.1, 1.2, * * *. Future notices, if any, will have questions numbered 2.1, 2.2, * * *; 3.1, 3.2, * * *.

FIPS 60, 61, 62, and 63 are intended to achieve full plug-to-plug interchangeability of peripheral components. This general intent is the basis for this guidance.

1.1 Would the verification requirements for FIPS 60-63 be satisfied if there were one adaptor or channel for magnetic tape and another adaptor or channel for rotating mass storage? The two adaptors or channels would not be functionally interchangeable.

FIPS 60-63 verification does not require that each interface that conforms with the subset of these standards applicable for a particular type of peripheral be able to work with all types of peripherals. Thus, the verification requirements for FIPS 60-63 could be satisfied if different adaptors or channels are supplied for the connection of magnetic tape and rotating mass storage subsystems.

1.2 Would the verification requirements for FIPS 60, 61, and 63 be satisfied if there were more than one adaptor or channel to satisfy the requirements of the three classes of rotating mass storage? That is, one rotating mass storage adaptor or channel would not accommodate all three classes; it might accommodate two classes or it might be limited to just one class.

The FIPS 60, 61, and 63 verification requirements do not preclude a different type of adaptor or channel being supplied for each class of rotating mass storage. Thus, the verification requirements for FIPS 60, 61, and 63 could be satisfied if different adaptors were provided for each of the three classes of rotating mass storage.

1.3 Do the verification requirements for FIPS 60-63 consider the second eight bit data byte feature to be optional or must it be provided as a standard feature with all adaptor boxes?

FIPS 60-63 verification does not require implementation of I/O channel features or options not ordinarily used by the classes of peripheral devices being employed or expected to be employed. For example, an I/O channel adaptor used to attach Class A, B, or C Rotating Mass Storage Devices to a Central Processing Unit (CPU) would not be required to provide either the bus extension (two byte wide) feature or the byte multiplexor mode of operation since neither is used with these devices. Specific agency solicitations may require options or features which exceed those required for verification.

1.4 Would the FIPS 60-63 verification requirements be satisfied if the number of device addresses were limited to less than 256 when connecting a peripheral subsystem to a mainframe via an adaptor or channel? (This assumes that only one peripheral sybsystem might be configured per adapted channel.)

Verification of FIPS 60-63 requires the ability to support 256 device addresses and multiple peripheral subsystems. Therefore, the FIPS 60-63 verification requirements would not be satisfied if the number of device addresses were limited to less than 256. With regard to the specific assumption that a capability might be provided that would permit only one peripheral subsystem to be configured per adapted channel, the concern here is that such a restriction would severely constrain the possibilities for possible future system augmentation by precluding the attachment of additional peripherals.

1.5 Would the verification requirements for FIPS 61 be satisfied if all of the FIPS 61 features were not provided when connecting a peripheral subsystem to a mainframe via an adaptor or channel?

Verification of FIPS 61 requires that all specified features be provided.

1.6 Do the verification requirements of FIPS 62 permit the use of the bits designated as "spare" in any sense byte to indicate special, vendor specific or user defined conditions?

For magnetic tape peripheral subsystems, the verification requirements of FIPS 62 will be satisfied if any of sense bits designated by the standard as "spare" are employed to indicate special, vendor specific or user defined conditions. In contrast to this, however, FIPS 62 verification of computer systems requires that the ability to correctly perform all operations not be in any way dependent upon the value of any of the sense bits designated as "spare."

1.7 Does FIPS 60-63 verification require that subsystems containing recorded media be interchangeable, e.g., is it required that a Rotating Mass Storage subsystem that has been recorded when connected to one conforming computer system be capable of being read when connected to any other conforming computer system?

FIPS 60-63 verification requires the capability for plug-to-plug interchangeability of peripheral components based upon the functional, electrical, mechanical, and device specific operational characteristics specified for the I/O channel interface. FIPS 60-63 verification also requires that it be possible to interchange peripheral subsystems (of the same kind) among conforming computer systems and to be able to physically read data recorded from one computer system into any other. However, there is no FIPS 60-63 requirement that the files, file structures, or data recorded by one computer be meaningful to another computer.

Because it is possible to respond fully to the foregoing questions in such a brief fashion, the National Bureau of Standards had decided not to avail itself of the opportunity to summarize the guidance provided for in the interim revision of FIPS PUBS 60-63. The guidance provided in response to questions 1.1 through 1.7 is, therefore, considered complete. Requests for additional FIPS 60-63 verification guidance should be addressed to the Director, Institute for Computer Sciences and Technology, National Bureau of Standards, Washington, D.C. 20234, Attention: FIPS 60-63 Verification Guidance.

Dated: August 7, 1980.

Ernest Ambler,

Director.

BILLING CODE 3510-13-M

National Oceanic and Atmospheric Administration

American Cetacean Society; Marine Mammal Permit Application; Correction

Notice was published in the **Federal Register** on July 21, 1980 (45 FR 48682), that an application had been filed with the National Marine Fisheries Service by the American Cetacean Society for a scientific research permit under the provisions of the Marine Mammal Protection Act and the Endangered Species Act. The Applicant name and address is corrected to read as follows:

1. Applicant:

a. Name: Mr. Gregory Dean Kaufman (P254)

b. Address: The American Cetacean Society, Maui Chapter, P.O. Box 1518, Kihei, Maui, Hawaii 96753.

Dated: August 6, 1980.

Richard B. Roe,

Acting Director, Office of Marine Mammals and Endangered Species, National Marine Fisheries Service.

[FR Doc. 80-24395 Filed 8-12-80; 8:45 am]

BILLING CODE 3510-22-M

National Oceanic and Atmospheric Administration

Coastal Zone Management Advisory Committee; Public Meeting

Pursuant to section 10(a)(2) of the Federal Advisory Committee Act, 5 U.S.C. App. 1, notice is hereby given of the meeting of the Coastal Zone Management Advisory Committee (the "Committee") on Thursday and Friday, August 21-22, 1980. The meeting will commence at 9:00 am.m. on August 21, and 9:00 a.m. on August 22. The meetings will be held at the Page I Building, Naval Conference Room, 2001 Wisconsin Avenue, NW. Washington, D.C.

The meeting will be open to public observation and approximately 25 seats will be available. Interested persons are invited to attend and participate in the meeting, subject to the procedures which follow. From approximately 2:30 p.m. until 3:30 p.m. on August 22, persons will be permitted to make oral statements to the Committee which are relevant to topics on the agenda. The Chairperson retains the prerogative to place limits on the duration of oral statements and discussions. Persons wishing to make oral statements should notify the Committee Control Officer in advance of the meeting. A written version of an oral statement or a written statement may be submitted to the Committee Control Officer before or after the meeting, or may be mailed within five days to: Coastal Zone Management Advisory Committee, National Oceanic and Atmospheric Administration, 3300 Whitehaven Street, NW., Washington, D.C. 20235 Attn: Ms. JoAnn Chandler, Committee Control Officer, CZM Advisory Committee. All statements received in typewritten form will be distributed to the Committee for consideration with the minutes of the meeting. Inquiries may be directed to the Committee Staff at (202) 634-4249.

The items for Committee discussion at the meeting will include the following:

August 21

9:00 A.M. Call to Order Barbara Fegan, Chairperson, Swearing in of New Member
9:15 A.M. Public Access to Federal Lands
10:45 A.M. Energy Siting
12:30 P.M. Lunch
2:00 P.M. Special Area Management Plans
4:00 P.M. Discussion
5:00 P.M. Adjourn

August 22

9:00 A.M. Federal Infrastructure

11:00 A.M. Discussion
12:00 Noon Lunch
1:30 P.M. Hazards
2:30 P.M. Public Statements (if any)
3:30 P.M. Adjourn

The entire meeting wil be devoted to an analysis and comment upon the Federal Coastal Programs Review. Several Office of Coastal Zone Management staff members will provide background information and answer questions concerning each of the topics listed above.

Dated August 8, 1980.

William Matuszeski,

Acting Assistant Administrator, Coastal Zone Management, National Oceaic and Atmospheric Administration.

BILLING CODE 3510-08

DEPARTMENT OF EDUCATION

Office for Civil Rights; Proposed Fiscal Year 1981 Annual Operating Plan; Request for Comments

AGENCY: Department of Education.

ACTION: Request for comments on annual operating plan for fiscal year 1981.

SUMMARY: The Secretary of Education invites comments on the proposed Fiscal Year 1981 Annual Operating Plan for the Office of Civil Rights.

DATES: Interested persons are invited to submit comments, suggestions, and objections regarding the proposed plan on or before September 29, 1980.

ADDRESS: Written comments should be addressed to Cynthia Brown, Assistant Secretary for Civil Rights, Department of Education, (Rm. 5000, Switzer Bldg.), 400 Maryland Avenue SW., Washington, D.C. 20202.

FOR FURTHER INFORMATION CONTACT: John Hodgdon, (202) 426-6917.

SUPPLEMENTARY INFORMATION: The basis purpose of the Office for Civil Rights (OCR) is to insure that no person is unlawfully discriminated against by Federal education fund recipients in the delivery of services or the provision of benefits on the basis of his or her race, national origin, handicap, sex or age. Covered under these authorities are 50 State education agencies, 16,000 local education agencies, 3,200 institutions or higher education, 50 State rehabilitation agencies and their subrecipients, as well as other institutions such as libraries and museums which receive education funds. The job of protecting the civil rights of 12 million minorities, 4 million handicapped and 26 million women who attend public schools or postsecondary institutions rests almost exclusively with OCR, as does the responsibility of guaranteeing these rights for potential students.

OCR's strategy to insure compliance with civil rights guarantees involves two basic types of activities: compliance activities and technical assistance activities. Many of OCR's compliance activities are required by various statutes, regulations and court orders (complaint investigations, ESAA pregrant reviews, *Lau* plan monitoring, and monitoring State higher education system desegregation). OCR engages in two other types of compliance activities (compliance reviews and remedial plan monitoring) that give it wider discretion as to the level of effort made and the recipients selected for coverage. OCR's approach is to concentrate its investigative activities on those recipients which are believed to be in serious noncompliance with a major civil rights requirement.

Through the transfer of information, materials and skills, OCR encourages recipients to voluntarily comply with, and beneficiaries to understand their rights under, civil rights statutes. OCR staff, including headquarters staff and the Regional Technical Assistance Staff, Department of Education (ED) program offices and contracted personnel are the major vehicles used by OCR to deliver technical assistance.

During FY 1980, OCR developed a policy on the enforcement of Title IX as it relates to intercollegiate athletics. During FY 1981, OCR will commence investigations of all complaints it has received alleging violations of Title IX in the area of intercollegiate athletics. A total of 123 such complaints, which were filed with OCR during the last several years, are currently pending. The investigations will not only cover the specific allegations cited in the complaints but will be expanded in scope so that thorough reviews of the entire intercollegiate athletics programs of the affected institutions can be made.

The following narrative and tables describe the activities that OCR plans for FY 1981.

I. Regional Investigatory Activities

A total of 415 investigative staff years will be assigned to compliance and enforcement work in FY 1981 as follows:

	Investigator time	
	Staff years	Percent
Complaint investigations	259	62
Compliance reviews	82	20
ESAA pregrant reviews	47	11
Lau monitoring	20	5
Adams monitoring	8	2
Total	415	100

A. Complaint Investigations

Table 1 shows projected complaint receipts, closures, and opening and ending inventories by jurisdiction. In order to determine the level of investigative staff resources required to process these complaints, the following projections were made.

—OCR will have a pending caseload of 2,144 complaints as of October 1, 1980.
—During FY 1981, OCR will receive 4,272 complaints.
—During FY 1981, OCR will close 4,452 complaints.
—OCR will have a pending caseload of 1,964 complaints as of October 1, 1981.

Based on these projections, 258 investigative years will be allocated to complaints.

B. Compliance Reviews

A total of 82 investigator years will be available to conduct compliance reviews in FY 1981. This activity will include completing reviews started in previous years, monitoring remedial action plans resulting from reviews conducted in previous years, and initiating new reviews.

The issues to be covered in the reviews conducted during FY 1980 are presented in Table 2. These issues were identified on the basis of survey results, findings from previous complaint investigations and compliance reviews, and related research findings. Table 2 also indicates the amount of investigative years to be assigned to each issue. Shortly after the beginning of each quarter of FY 1981, OCR will make available to the public, upon request, information on the specific types of compliance reviews it will initiate during that quarter.

C. ESAA Pregrant Reviews

OCR is responsible for reviewing applications for funding under the Emergency School Aid Act (ESAA). ESAA funds are used to encourage the voluntary elimination, reduction, or prevention of minority group isolation, and to aid school children in overcoming educational disadvantages. ESAA pregrant reviews ensure that the practices of grant applicants conform to certain civil rights requirements prior to the awarding of Federal funds. In FY 1981, 47 investigator years will be allocated to conduct 665 ESAA pregrant reviews.

D. Mandated Monitoring Activities

During FY 1981, OCR will review recipients to determine whether they are complying with the terms of compliance agreements. These activities will include *Adams* higher education desegregation and *Lau* plan monitoring.

1. *Adams* Higher Education Desegregation Plan Monitoring—OCR is currently monitoring higher education desegregation plans of six States. In FY 1981, eight investigator years will be allocated to monitoring the desegregation activities of these States. Additional reviews will be completed during this period, and it is expected that monitoring of additional plans will commence in FY 1981.

2. *Lau* Plan Monitoring—OCR is required to monitor the implementation of *Lau* plans by recipients. In FY 1981, 20 investigator years will be allocated to monitoring 50 such plans.

E. Summary

Table 3 summarizes the allocation of investigative years by recipient groups. Table 4 summarizes the allocation by jurisdiction.

II. Technical Assistance Activities

Over 20,000 education institutions which receive federal funds must comply with a number of complex civil rights requirements. Because of the numbers involved, OCR is unable to investigate the policies or practices of each recipient. In order to encourage these institutions to voluntarily comply with the law, OCR, either through headquarters or regional staff, provides technical assistance to recipients, and works with ED program staff to help recipients understand their civil rights obligations. These assistance activities complement OCR's compliance activities by extending the range of OCR's impact beyond those recipients who are directly covered by an OCR investigation and by enabling OCR to accomplish its mission more efficiently and effectively. By combining a forceful compliance review program with an effective assistance program, OCR will be able to make substantial progress toward achieving broad compliance with civil rights guarantees.

A total of 125 technical assistance staff years will be available in FY 1981 to provide consultation, conduct on-site visits, participate in workshops and respond to telephone and written requests for information and materials. This effort will be provided by OCR staff, including both headquarters staff and Regional Technical Assistance Staff, as well as contracted personnel. OCR expects to respond to about 85,000 requests for civil rights technical assistance from recipients, beneficiaries, State and local officials, and other Federal agencies. As part of its technical assistance program OCR intends to distribute 700,000 publications, save recipients $30 million based upon Section 504 cost-effective program accessibility strategies, help OCR complete 250 complaint investigations and compliance reviews, conduct 760 workshops and conclude 2,200 on-site visits to recipients.

III. Program Management Activities

In order to effectively carry out its compliance, enforcement and technical assistance activities, OCR conducts a comprehensive legal, management and evaluation program that includes:

—Formulating regulations, policies, and investigation manuals;
—Providing technical guidance on cases and reviews referred from regional offices;
—Conducting hearings before Administrative Law Judges on the compliance of Federal fund recipients with civil rights requirements;
—Monitoring State higher education desegregation and *Lau* plans;
—Meeting with school district representatives, college and university officials, complainants, and civil rights groups to discuss OCR activities;
—Conducting OCR national surveys and data collection projects to obtain information on recipients and beneficiary populations;
—Operating a data base management system to assure that complaint processing times are met; and
—Providing basic training to new investigators as well as training on policy initiatives for experienced investigators and legal staff.

Table 1.—*Fiscal Year 1981 Annual Operating Plan*

[Projected fiscal year 1981 complaint workload]

	Title VI, race/national origin	Title IX	Section 504	Age	Total
Pending Oct. 1, 1980	472/107	707	836	22	2,144
Fiscal year projected receipts	1111/256	612	2008	85	4,272
Fiscal year 1981 closures (total)	1024/267	1247	1870	44	4,452
Pending Oct. 1, 1981	559/96	272	974	63	1,964

NOTE.—The October 1, 1980, project pending complaint was distributed in proportion to the complaint distribution existing as of May 31, 1980. Projected fiscal year receipts were distributed according to the proportions each jurisdiction represented in the complaints received from October 1, 1979, to May 31, 1980. Similarly, the projected fiscal year 1981 closures were distributed according to the proportions each jurisdiction represented in the closures occurring between October 1, 1979, and May 31, 1980.

Table 2.—*Fiscal Year 1981 Annual Operating Plan*

[Compliance reviews scheduled]

Issue	Description of violation	Investigator years planned
Elementary and Secondary Education: Identification of and Services to Limited English Proficiency (LEP) Children.	Discrimination against non-English speaking (NES) or limited English proficiency (LEP) children.	5
Within School Discrimination: Classroom Assignments, Tracking and Ability Grouping, Special and Physical Education, and Secondary School Athletics.	Discriminatory assignment of students on the basis of race, national origin, sex and/or handicap to courses (including industrial arts and home economics), classrooms, special programs. (Special programs would include those for the educable mentally retarded as well as those for the gifted or talented, e.g., advanced mathematics or sciences.) This issue would also cover biased counseling and appraisals of students as well as unequal opportunities involving athletics.	9
School Discipline: Expulsions and Suspensions	Discriminatory disciplinary treatment of students on the basis of race, national origin, sex and/or handicap.	6
Vocational Education: Access, Admissions and Job Placement.	Discrimination of the basis of race, national origin, sex and/or handicap in vocational education programs and courses.	13
Special Purpose Schools: Program Availability and Least Restrictive Environment.	Discrimination in admissions, accessibility, treatment or employment in State administered special purpose schools on the basis of race, national origin, sex and/or handicap.	7
Unserved Special Education	Discrimination in the provision of a free and appropriate education on the basis of handicap. These efforts will include several joint reviews of State education agencies with the Office of Special Education and Rehabilitative Services (ED).	4
School Segregation	Discriminatory assignment of students to schools on the basis of race or national origin.	6

Table 2.—*Fiscal Year 1981 Annual Operating Plan—Continued*

[Compliance reviews scheduled]

Issue	Description of violation	Investigator years planned
Postsecondary Education: Program Accessibility for the Handicapped.	Lack of program accessibility and accommodations for handicapped students in postsecondary school programs.	6
Graduate and Professional Schools: Admissions	Discrimination on the basis of sex in admissions to graduate and professional schools.	13
Intercollegiate Athletics: Overall Program Equality [1].	Lack of comparable intercollegiate athletic facilities and programs for women based on their interests and abilities.	2
Vocational Rehabilitation Services	Discrimination in the provision of services and benefits to severely mentally and physically handicapped individuals, and/or discrimination on the basis of race, national origin and/or sex in the provision of educational services and benefits.	3
Higher Education Desegregation	Completion of compliance reviews of State higher education systems to determine whether they continue to bear the vestiges of their former segregated status.	7

[1] Two investigator staff years are being developed to compliance reviews in addition to the investigation of complaints in this area.

Table 3.—*Fiscal Year 1981 Annual Operating Plan*

[Investigative years allocated to each type of recipient]

Type of recipient	Complaints	Compliance reviews	ESAA pregrant reviews	Monitoring		Total	Percent

IV. Invitation to Comment

Interested persons are invited to submit comments and recommendations regarding the proposed plan. Written comments and recommendations may be sent to the address given at the beginning of this document. All comments received on or before the end of the comment period will be considered in the development of the final plan.

All comments submitted in response to the proposed plan will be available for pubic inspection, during and after the comment period, at the Department of Education, Room 4094, Switzer Building, 330 C Street, SW., Washington, D.C., between the hours of 9:00 a.m. and 5:00 p.m., Monday through Friday of each week except Federal holidays.

Dated: August 8, 1980.

Shirley M. Hufstedler,

Secretary of Education.

BILLING CODE 4000-01-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Blarney Castle Oil Co.; Action Taken on Consent Order

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of action taken and opportunity for comment on consent Order.

SUMMARY: The Economic Regulatory Administration of the Department of Energy announces action taken to execute a Consent Order and provides an opportunity for public comment on the Consent Order.

DATES: Effective date: July 30, 1980
Comments by: September 12, 1980.

ADDRESS: Send comments to William D. Miller, Central District Manager of Enforcement Department of Energy, 324 East 11th Street; Kansas City, Missouri 64106.

FOR FURTHER INFORMATION CONTACT: Jeannine C. Fox, Chief, Refined Products Programs Management Branch, 324 East 11th Street, Kansas City, Missouri 64106, (phone) 816–374–5932.

SUPPLEMENTARY INFORMATION: On July 11, 1980 the Office of Enforcement executed a Consent Order with Blarney Castle Oil Company, of Bear Lake, Michigan. Under 10 CFR 205.199J(b), a Consent Order which involves a sum of less than $500,000 in the aggregate, excluding penalties and interest, becomes effective upon its execution.

I. The Consent Order

Blarney Castle Oil Company (Blarney), with its home office located in Bear Lake, Michigan, is a firm engaged in the marketing of motor gasoline to resellers and end-users, and is subject to the Mandatory Petroleum Price and Allocation Regulations at 10 CFR, Parts 210, 211, 212. To resolve certain civil actions which could be brought by the Office of Enforcement as a result of its audit of Blarney, the Office of Enforcement and Blarney Castle Oil Company have entered into a Consent Order.

The Consent Order encompasses Blarney's sales of covered products during the period March 1, 1979 through July 31, 1979.

II. Disposition of Refunded Overcharges

In this Consent Order, Blarney agrees to refund, in full settlement of any civil liability with respect to actions which might be brought by the Office of Enforcement, arising out of the transactions specified in I. above, the sum of $26,836.23. Refunded overcharges (including interest) will be in the form of price rollbacks with respect to sales of regular and premium gasoline.

Other Comments: The ERA invites interested persons to comment on the terms, conditions or procedural aspects of this Consent Order.

You should send your comments to William D. Miller, Central District Manager of Enforcement, Department of Energy, 324 East 11th Street, Kansas City, Missouri 64106. You may obtain a free copy of this Consent Order by writing to the same address or by calling 816–374–5932.

You should identify your comments on the outside of your envelope and on the documents you submit with the designation, "Comments on Blarney Consent Order." We will consider all comments we receive by 4:30 p.m., local time, on or before September 12, 1980. You should identify any information or data which, in your opinion, is confidential and submit it in accordance with the procedures in 10 CFR 205.9(f).

Issued in Kansas City, Missouri on the 31st day of July 1980.

Concurrence: David Jackson,

Chief Enforcement Counsel.

William D. Miller,

District Manager of Enforcement.

[FR Doc 80-24406 Filed 8-12-80; 8:45 am]

BILLING CODE 6450-01-M

ENVIRONMENTAL PROTECTION AGENCY

[FRL-1564-8]

Denial of Application for a Fuel Additive Waiver; Conservation Consultants of New England, Inc.

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice of decision.

SUMMARY: Pursuant to section 211(f)(4) of the Clean Air Act (Act), as amended, 42 U.S.C. 7545(f)(4), the Administrator of EPA is denying the waiver requested by Conservation Consultants of New England, Inc. for a one-to-one mixture of methanol and ethanol at 10 percent, by volume, and unleaded gasoline. The waiver is denied because the applicant failed to establish that the methanol/ethanol mixture in unleaded gasoline will not cause or contribute to a failure of any 1975 or subsequent model year vehicle to comply with the emission standards to which it was certified under the Act.

PUBLIC DOCKET: Copies of information on this waiver application are available for inspection in public docket EN–80–7 at the Central Docket Section (A–130) of the Environmental Protection Agency, Gallery I-West Tower, 401 M Street, SW, Washington, D.C. 20460, between the hours of 8:00 a.m. and 4:00 p.m. As provided in 40 CFR Part 2, a reasonable fee may be charged for copying services.

FOR FURTHER INFORMATION CONTACT: Thomas E. Moore, Attorney-Advisor, Field Operations and Support Division (EN–397), Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460, (202) 472–9367.

DECISION OF THE ADMINISTRATOR:

I. Introduction

Section 211(f)(1) of the Act makes it unlawful, effective March 31, 1977, for any manufacture of any fuel or fuel additive to first introduce or increase the concentration in use of any fuel or fuel additive for use in light duty motor vehicles manufactured after model year 1974 which is not substantially similar to any fuel or fuel additive utilized in the certification of any model year 1975, or subsequent model year, vehicle or engine under section 206 of the Act. Section 211(f)(4) of the Act provides that the Administrator of EPA may waive the prohibitions of section 211(f)(1) upon application of any fuel or fuel additive manufacturer if the Administrator determines that the applicant has established that such fuel or fuel additive will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliace by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. If the Administrator does not act to grant or deny an application within 180 days, of its receipt, the waiver shall be treated as granted.

An application for a waiver was submitted by Conservation Consultants of New England, Inc. (Conservation) on February 13, 1980 to allow the blending of a 10 percent, by volume, mixture of a one-to-one ratio of methanol to ethanol (i.e., 5 percent methanol and 5 percent ethanol making up the 10 percent mixture) with 90 percent, by volume, unleaded gasoline.[1] The 180 day review period terminates on August 11, 1980.

A **Federal Register** notice was published April 29, 1980 (45 FR 28484), acknowledging receipt of Conservation's application.[2] The notice also solicited comments and data from other interested parties on Conservation's methanol/ethanol mixure in unleaded gasoline.

Conservation concluded from the information it submitted in support of its application that the blend of 90 percent, by volume, unleaded gasoline and of 10 percent, by volume, of a methanol/ethanol mixture and its emission products do not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system

[1] Conservation's methanol/ethanol mixture at the 10 percent, by volume, concentration would not lie within the definition of "substantially similar" contained in the June 2, 1978 **Federal Register**, 43 FR 24131, or the proposed definition in the March 10, 1979 **Federal Register**, 44 FR 16033.

[2] In this same application, Conservation applied for waivers for two other mixtures of methanol/ethanol combinations which were subsequently withdrawn. Conservation also withdrew its application for a waiver for methanol at 10 percent, by volume, in 90 percent, by volume, unleaded gasoline. 45 FR 47725, July 16, 1980.

is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act.

II. Summary of the Decision

I have determined that Conservation has not met the burden established under section 211(f)(4) necessary to obtain a waiver to blend a one-to-one methanol/ethanol mixture in unleaded gasoline at 10 percent, by volume. The data which Conservation and other interested parties have submitted are not sufficient to establish that the methanol/ethanol and unleaded gasoline blend will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. I hereby deny the waiver requested by Conservation for its methanol/ethanol mixture at 10 percent, by volume, in unleaded gasoline. All section 211(f) prohibitions remain in effect. Conservation or any other manufacturer is free to reapply for a waiver under section 211(f)(4) provided additional data are submitted on Conservation's methanol/ethanol and unleaded gasoline blends.

III. Method of Review

In order to obtain a waiver for a fuel or fuel additive (hereinafter, "fuel or fuel additive" will be collectively referred to as "additive") the applicant must establish that the additive and its emission products will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such system or device is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant section 206 of the Act. This burden, which Congress has imposed on the applicant, if interpreted literally, is virtually impossible to meet as it requires the proof of a negative proposition, i.e., that no vehicle will fail to meet emission standards with respect to which it has been certified. Taken literally, it would require the testing of every vehicle. Recognizing that Congress contemplated a workable waiver provision, some mitigation of this stringent burden was deemed necessary. For the purposes of the waiver provision, EPA has previously indicated that reliable statistical sampling and fleet testing protocols may be used to demonstrate that an additive under consideration would not cause or contribute to failure or emission standards by vehicles in the national fleet (see, Waiver Decision on Tertiary Butyl Alcohol (TBA), 44 FR 10530 (1979)).[3]

Emissions data submitted in support of a waiver request are analyzed by appropriate statistical methods in order to characterize the effect that an additive will have on emissions.[4] The statistical tests applied to the emission data provided in support of a waiver request for an additive which is expected to have an instantaneous emissions effect are: a Paired Difference Test, Sign of Difference Test, and a Deteriorated Emissions Test (a test which compares the deteriorated emissions with the emission standards).[5] These statistical tests are described in Appendix 1 to this decision.

An alternative to providing the amount of data necessary to enable the statistical tests to be performed is to make judgments based upon a reasonable theory regarding emissions effects and to support these judgments with confirmatory testing. If there exists a reasonable theory which predicts the emission effects of an additive, an applicant may only need to conduct a sufficient amount of testing to demonstrate the validity of such theory. This theory and confirmatory testing then form the basis from which the Administrator may exercise his judgment on whether the additive will cause or contribute to a failure of any emission control device or system to achieve compliance by the vehicle with emission standards. In addition to emissions data, EPA also reviews data on materials compatibility, driveability, fuel composition and specifications. This information is necessary to fully characterize an additive and to determine whether such additive will cause or contribute to a failure of vehicles to comply with appropriate emission standards. Such failure could result if driveability is impaired. Driveability problems such as lean misfire and repeated starting lead to increased emissions. Materials compatibility problems could lead to failure of fuel systems which are designed to precise tolerances. Deviations beyond these tolerances could result in greater emissions. Volatility specifications could demonstrate a tendency for high evaporative losses.

IV. Analysis

A. *Exhaust Emission Data.* Exhaust emission data were submitted on six vehicles tested on a base fuel and an equal parts mixture of ten percent, by volume, methanol/ethanol and 90 percent unleaded gasoline.[6] Numerical results of the three statistical tests are summarized in Appendix 2. Tests 1 and 2 are designed to determine whether the methanol/ethanol mixture contributes to a failure of vehicles to meet emission standards. Test 3 is designed to determine if the methanol/ethanol mixture will cause the failure of vehicles to meet emission standards.

With regard to the application of the Paired Difference Test (Test 1) and the Sign of Difference Test (Test 2) for exhaust emissions, the data are not completely sufficient to reach a definitive conclusion as to the effect the methanol/ethanol mixture will have on exhaust emissions. To be able to utilize the Paired Difference Test to arrive at a conclusion, for each pollutant, the upper bound of the confidence interval must be equal to or less than ten percent of the applicable standard, e.g., with a HC standard of 1.5 grams per mile, the upper bound of the interval must be 0.15 or less, when the interval contains zero. In this instance, the interval for HC contained zero but its upper bound exceeded 10% of the HC standard. For CO and NO_x, the data demonstrate no adverse effect.

Since the results of the first test are not completely conclusive and the results of the second test do not conclusively demonstrate the existence or non-existence of an adverse effect, it is not possible to determine with a measure of certainty that this mixture will not contribute to the failure of vehicles to meet emission standards.

The minumum number of samples necessary to apply the Deteriorated Emissions Test (Test 3) is eight. Consequently, there are insufficient data to determine whether the methanol/ethanol mixture will cause vehicles to fail to meet emission standards according to this test.

B. *Evaporative Emissions.* In order to make a determination under section 211(f)(4) data normally must be provided. No data for evaporative emissions on this methanol/ethanol mixture were submitted. Notwithstanding the policy that EPA will consider engineering arguments in lieu of sufficient test data to make its waiver determinations, there still must be some accompanying confirmatory test data on the emission effects on which to base a determination. No such data were submitted. Based on evaporative emission data available on other alcohol/gasoline blends, EPA suspects that evaporative emissions would likely increase with this methanol/ethanol mixture. But without any data, a definitive conclusion regarding the magnitude of any possible effect cannot be made.

C. *Other Technical Issues*—1. *Materials Compatibility.* No information on materials compatibility has been provided. Consequently, no determination regarding materials compatibility can be made with certainty. Such information is important since methanol is chemically active and may exhibit compatibility problems with components of a vehicle's fuel systems. Any future application for such fuels containing methanol should be supported with materials compatibility data.

2. *Driveability.* Driveability may be a problem at higher concentrations (e.g. 10–15 percent) of methanol/ethanol because of the increasing oxygen content of the fuel. As the oxygen content increases, the air/fuel ratio shifts outside the vehicle design specifications (enleanment). Poor driveability can lead to repeated starting which can increase emissions. No conclusion regarding driveability can be drawn because Conservation did not submit any driveability data.

VII. Findings and Conclusions

I have determined that Conservation has not established that its blend of 10 percent, by volume, of a one-to-one ratio methanol/ethanol mixture and 90 percent, by volume, of unleaded gasoline, will not cause or contribute to a failure of any emission control device or system (over the useful life of any vehicle in which such device or system is used) to achieve compliance by the vehicle with the emission standards with respect to which it has been certified pursuant to section 206 of the Act. I hereby deny the waiver requested by Conservation for its one-to-one ratio methanol/ethanol mixture blended into unleaded gasoline at 10 percent, by volume. The applicant, or any other fuel or fuel additive manufacturer, may reapply for this mixture in the event that additional relevant data become available.

This is a final Agency action. Jurisdiction to review this action lies exclusively in the U.S. Court of Appeals for the District of Columbia Circuit. Section 307(b)(1) judicial review of this action is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit by August 13, 1980. Under section 307(b)(2) today's action may not be challenged later in a separate judicial proceeding brought by the Agency to enforce the statutory prohibitions.

Dated: August 8, 1980.

Douglas M. Costle,
Administrator.

Appendix 1—Statistical Criteria

The following is a brief description of the statistical tests used to characterize the emission effects of an additive:

(1) The Paired Difference Test

For each vehicle tested on a base fuel and on the waiver fuel or fuel additive, the difference between the waiver fuel or fuel additive emissions and the base fuel emissions is calculated. A 90 percent confidence interval is constructed for the mean differences. If the resulting interval lies entirely below zero it is indicative of no adverse effect from this waiver fuel or fuel additive. If the entire interval is above zero, it is indicative of an adverse effect from the waiver fuel or fuel additive. If the interval contains zero, there is arguably no difference between the base fuel and the waiver fuel or fuel additive with regard to emissions provided the confidence interval is small.

(2) The Sign of Difference Test

For each vehicle tested with a base fuel and the waiver fuel or fuel additive, the sign of the emission difference between the waiver fuel or fuel additive emissions and a base fuel emissions is ascertained. This test is designed to determine whether the number of vehicles demonstrating an increase (+) in emissions with the waiver fuel or fuel additive significantly (at a 90 percent confidence level) exceeded those showing a decrease (−) in emissions with the waiver fuel or fuel additive.

(3) The Deteriorated Emissions Test

For each vehicle, the effect the waiver fuel or fuel additive had on emissions is determined. Any change in emissions, either positive or negative, attributable to the waiver fuel or fuel additive is added to the 50,000 mile certification emission value of the certification emission vehicle which the test vehicle represented. This incremented 50,000 mile emission value is compared to emissions standards to determine if it did or did not exceed the standards. Either a pass or fail is assigned accordingly. The pass/fail results are analyzed using a one-sided sign test.

The Paired Difference Test and the Sign of Difference Test are designed to determine whether the waiver fuel or fuel additive has an adverse effect on emissions as compared to the base fuel. Each characterizes a different aspect of adverse effect. The Paired Difference Test determines the mean difference in emissions between the base fuel and the waiver fuel or fuel additive. The Sign of Difference Test assesses the number of vehicles indicating an increase or decrease in emissions. The two tests are considered together in evaluating whether an adverse effect exists to assure that a mean difference determination is not unduly influenced by very high or very low emission results from only a few vehicles.

The Deteriorated Emissions Test analysis indicates whether the waiver fuel or fuel additive causes a vehicle to fail to meet emission standards. This test examines each vehicle's emission performance as compared to each pollutant standard. It is useful to perform this analysis even if the first two analyses indicate the waiver fuel or fuel additive has no adverse effect. The analysis indicates whether the emissions from any particular type of vehicles or special emission control technologies are uniquely sensitive to the waiver fuel or fuel additive, thus causing vehicles to fail to meet emission standards. This effect could be masked in the previous analyses which consider the emissions results as a group without distinguishing the emissions impact on subgroups.

Appendix 2—Numerical Summary of the Statistical Tests

1. Paired Difference Test

Listed below are the 90 percent confidence intervals around the mean difference between the base fuel and the

[3] No data were provided by Conservation or other commenters on the impact of this methanol/ethanol mixture on three-way catalyst technology. While this omission was not the basis for the denial of the instant application, future waiver applications should include test results showing the effect of the methanol/ethanol mixture on a representative number of vehicles with three-way catalysts. These types of vehicles should be included since vehicles of this type have been certified pursuant to section 206 of the Act and such technology will be used more extensively in post-1980 model year vehicles.

[4] The tests which are appropriate to characterize the emission effects of an additive depend on whether the additive is expected to have an instantaneous effect or a long-term deteriorative effect on emissions, or both. If a long-term deteriorative effect is expected, then 50,000 mile durability testing and/or materials compatibility testing would also be necessary. The results would be analyzed using the tests used in the MMT decision (see 43 FR 41424 (1978)). Experience with other oxygenated hydrocarbon additives leads EPA to believe that the mixture at issue in this decision would probably have an instantaneous effect. Thus, the method of review set out in the decision, which is designed to test instantaneous effects, would apply. The Conservation mixture may also exhibit long-term deteriorative effects on fuel system components. Therefore, any future waiver application should be supported with materials compatibility testing.

[5] These tests may only be performed when sufficient data are available.

[6] The data were submitted by Texaco, Inc. The vehicles are fully described in Table 1 of the Characterization Report.

methanol/ethanol blended fuel emission level.

a. Hydrocarbons (HC)—0.12 to 0.20
b. Carbon Monoxide (CO)—4.01 to 0.63
c. Oxides of Nitrogen (NO_x)—0.32 to 0.20

2. Sign of Difference Test

Set out below is the percent confidence that the methanol/ethanol mixture will cause an increase in the emissions over the base fuel emissions based on the observed increases in emissions out of the total vehicles tested (in parentheses are the number of observed increases out of the total sample size.) [7]

a. HC (3/5) 50.0 percent confidence of an increase [8]
b. CO (2/6) 10.9 percent confidence of an increase
c. NO_x (1/6) 1.6 percent confidence of an increase

3. Deteriorated Emissions Test

Listed below are the number of vehicles whose incremental 50,000 mile emission values exceed emission standards.

a. HC—none out of six
b. CO—none out of six
c. NO_x—none out of six

Characterization Report

Summary

This paper presents an analysis of the emission data presented in support of the request from Conservation Consultants of New England, Inc. (Conservation) for a waiver of the prohibition from the introduction into commerce of an equal parts mixture of methanol and ethanol at a concentration of 10 percent, by volume in 90 percent, by volume, unleaded gasoline. Included are a description of the sources of test data, the statistical analysis of the data, and a discussion of the conclusion drawn.

Sources of Test Data

EPA has received back-to-back Federal Test Procedure (FTP) exhaust emissions data on oxidation catalyst vehicles from Texaco, Incorporated.[9] A description of the vehicles tested is contained in Table 1.

Texaco submitted data on six 1978, 1979, and 1980 oxidation catalyst vehicles comparing FTP exhaust emissions on an unleaded Texaco base fuel versus a fuel blended with the methanol/ethanol mixture having physical and chemical specifications similar to the base fuel.

Analytic Procedures

This section reviews several procedures designed to examine the emissions effects of the methanol/ethanol mixture containing fuel compared to the base fuel. They are:

(1) Paired Difference Test
(2) Sign of Difference Test
(3) Comparison of Deteriorated Emissions with Standards (Deteriorated Emissions Test)

(1) Paired Difference Test

For each vehicle tested on a base fuel and a waiver fuel, the difference between the waiver fuel emissions and the base fuel emissions was calculated. A 90 percent confidence interval was construed for the mean of these differences for each pollutant.

This method of establishing 90 percent confidence intervals on the mean difference implicitly assumes emissions follow a normal distribution. While this requirement may not be exactly met, the method is robust enough to withstand some deviation from the normality assumption. This interval can be interpreted as: In approximately 90 experiments out of 100, one is confident that the interval so constructed would include the true value of the mean emission difference (i.e., the waiver fuel effect). If the resulting entire interval is below zero, it is indicative of a decrease in emissions from the methanol/ethanol mixture; if the entire interval is above zero, it is indicative of an increase in emissions from the waiver fuel.

If the interval contains zero, there is arguably no difference between the base fuel and the waiver fuel emission levels provided this interval is reasonably small. Since the length of the confidence interval can be large in the case of a small sample size, any interval containing zero must be sufficiently small that its upper limit does not exceed 10 percent of the applicable emission standard to reasonably contend that no increase in emissions has occurred.

In order to assure that intervals covering zero are small enough, sufficient samples must be taken. Since the interval length varies inversely with the sample size, an increase in sample size would decrease the interval length. If the interval length were sufficiently small, one of three possible results would occur:

(i) The entire interval would lie below zero;

(ii) The interval would include zero and the upper limit would be lower than 10 percent of the applicable emission standard; or

(iii) The entire interval would lie above zero. In general, the result is dependent on the location of the sample mean. Any of the three results would permit a definitive conclusion to be drawn. Hereafter, the situation in which a confidence interval includes zero, but has an upper limit above 10 percent of the standard will be referred to as having "insufficient data to reach a definitive conclusion."

Therefore, this procedure considers an increase in emissions from the methanol/ethanol mixture to exist when this confidence interval lies entirely above zero. A lack of an increase in emissions is said to exist if it contains zero while the upper limit does not exceed 10 percent of the applicable standard, or if the interval lies entirely below zero.

For the purposes of this procedure, replicate tests on any one vehicle and fuel were averaged to provide a single data point in the analyses. Each vehicle carried an equal weight in the determination of the confidence interval.

The results of this procedure are shown in Table 2. While the intervals contain zero for each pollutant, the upper limit of the HC interval exceeds 10% of the applicable standard. Therefore, there are insufficient data to reach a definitive conclusion.

(2) Sign of Difference Test

For each vehicle tested with a base fuel and the methanol/ethanol mixture, the sign of the emission difference between the methanol/ethanol mixture fuel emissions and base fuel emissions was ascertained. The sign of these differences was considered. This non-parametric test was designed to determine whether the number of cars demonstrating an increase (+) in emissions with the methanol/ethanol mixture significantly (at a 90% confidence level) exceeded those showing a decrease (−) in emissions with the methanol/ethanol mixture.

In each test for each pollutant, the null hypothesis was that the median emission level for that pollutant was the same for both the base and the methanol/ethanol mixture fuel. The alternative hypothesis for hydrocarbons (HC), carbon monoxide (CO), and oxides of nitrogen (NOx) was that the median emissions level for the methanol/ethanol mixture was higher than that of the base fuel.

The number of vehicles for which an increase in emissions was observed was calculated. If there were no inherent differences in emission levels attributable to the methanol/ethanol mixture, the expected proportion of instances in which an increase between fuels would occur for any pollutant would be 0.5. Thus a large proportion of observed increases in emission levels for a pollutant would indicate an increase in emissions from the methanol/ethanol mixuture. Similarly, a small proportion of increases in emission levels would indicate a reduction in emissions from the methanol/ ethanol mixture.

To be able to recognize large and small proportion increases (compared with 0.5) with confidence a sufficient sample size is required.

Table 3 shows the results of this procedure. While no increase or decrease can be shown with high certainty, the results are very sensitive to sample size. Thus one or two additional samples could radically perturb the results, and no definitive conclusion can be drawn.

(3) Deteriorated Emissions Test

In order to determine whether the methanol/ethanol mixture would cause the failure of any vehicle to meet emission standards during its useful life, a one-sided sign test to evaluate compliance using projected 50,000 mile emission levels was performed. This statistical procedure assumes that the difference in emission levels between the base fuel and the methanol/ethanol mixture for a particular vehicle either remains constant or becomes larger over the useful life of the vehicles. Hence, it is assumed the minimum difference has been observed.

Projected 50,000 mile emission levels for each vehicle were obtained by using average FTP results and 50,000 mile certification data.

To apply the procedure, the differences in emissions are added to the projected 50,000 mile emission levels. If the resulting figure is greater than the standards on any pollutant to which the vehicle is certified, then the vehicle is said to have failed the emission standard. If the number of such vehicle failures equals or exceeds the statistically determined critical number, the fleet is said to have failed this statistical procedure.

The test was designed such that the risk of failing the statistical procedure would be at least 90% if 25% or more of the represented fleet failed to meet Federal emission standards for the methanol/ethanol mixture.[10]

The risk of failing this procedure is high for small sample sizes but decreases when the sample size is increased. under this procedure, the critical number (the smallest number of projected test failures for a given sample size which would constitute a failure of the criterion) for a sample size of eight would be one. A sample of less than eight would be insufficient information to apply the procedure.

Although the number of vehicles tested was not sufficient to apply this test to the data, the number of failures are set out in Table 4. Because only six vehicles were tested, there are insufficient data to make any determination of whether the methanol/ethanol mixture causes vehicles to fail to meet emission standards.

Evaporative Emissions

Due to its polar nature, as measured by its dipole moment and dielectric constant, the addition of methanol to gasoline (which is non-polar) increases front-end volatility (as measured by American Society for Testing and Materials (ASTM) D–86 or D–216 distillation), Reid Vapor Pressure (RVP) vapor/liquid ratio (V/L)). Increases in front-end volatility and RVP have correlated with increased evaporative hydrocarbon emissions. This was particularly evident from the 1978 Gasohol (10% ethanol/gasoline) testing done by EPA and others where evaporative losses increased approximately 50%. Methanol increases volatility and RVP to a greater degree than a comparable concentration of ethanol in gasoline. Since Conservation's mixture is a mixture of methanol and ethanol, it would be expected to produce higher evaporative losses than Gasohol but less than a 10% methanol mixture.

However, no vehicular data of any kind were submitted or obtained to evaluate the change in evaporative emissions resulting from the addition of the methanol/ethanol mixture to unleaded gasoline. Therefore, EPA cannot determine to what extent the methanol/ethanol mixture will affect evaporative emissions.

Materials Compatibility

Materials compatibility is of concern with alcohol and alcohol(s) gasoline blends. Past experience with methanol has indicated particular problems with elastomeric materials. The methanol/ethanol mixture's effects on automotive materials would be expected to be worse than those for ethanol/gasoline but less than those for methanol/gasoline. There were, however, no data submitted to indicate what effect the methanol/ethanol mixture would have on metallic and non-metallic components used in the fuel system. Thus, no conclusion can be made. Any future application should be supported by materials compatibility testing with particular emphasis on elastomeric materials (see Sun's Waiver Decision, 44 FR 37074; and Beker's Waiver Decision and Characterization Report, 45 FR 26122, and 45 FR 32760).

Driveability

Driveability may be adversely affected by the addition of the methanol/ethanol mixture to unleaded gasoline. It is well known that if water enters the blend then phase separation is likely and that engine performance is impaired or impossible on the more dense water/alcohol phase.

Also, too much enleanment from alcohol addition will result in hard starting and poor running. The current consensus is that the enleanment resulting from the addition of 10% ethanol is the approximate maximum before encountering a significant number of driveability problems. However, DOE test vehicles were operated on 10% methanol/gasoline and only encountered driveability problems as a result of phase separation or materials compatibility problems, not enleanment.

Again, the applicant has not provided any specific vehicular data from which the effect on driveability can be determined. Therefore, no conclusions can be made regarding the effect the methanol/ethanol blend has on driveability. Such data should be included in any future application.

Conclusions

The exhaust emission data presented on this methanol/ethanol mixture were not sufficient to draw any definitive conclusions regarding the extent of the impact this mixture will have on exhaust emissions.

Evaporative emissions may increase with the methanol/ethanol blend, but no data were presented to guage the magnitude of any increase beyond the inferred prediction of a larger increase than with a comparable ethanol concentration.

The methanol/ethanol addition to gasoline may also increase the probability of phase separation which could lead to poor engine performance with a resulting increase in emissions. Additionally, there exists the strong

[7] For this test, an increase in emissions exists when the emission level for the waiver fuel is greater than the emission level for the base fuel and is assigned a (+). Similarly, a lower emissions level for the waiver fuel than the base fuel is a decrease in emissions and is assigned a (−).

[8] This test for HC only had five observations because data from one of the vehicles did not indicate any directional change.

[9] Back-to-back FTP testing involves measuring, sequentially, the emissions from a particular vehicle, first operated on a base fuel not containing the waiver request fuel or fuel additive and then on the base fuel containing the waiver requests fuel or fuel additive.

[10] The table of critical values for this test are shown in Appendix 3.

V 4 5 A G 1 3 8 0 UMI

possibility that this mixture may also exhibit materials compatibility problems which could also lead to a degradation of performance and a resulting increase in both exhaust and evaporative emissions.

In summary, there are insufficient data to conclude that the methanol/ethanol mixture at 10 percent, by volume, in unleaded gasoline will not cause or contribute to the failure of vehicles to meet emission standards.

Table 1.—*Description of Test Vehicles*

BILLING CODE 6560-01-M

[FRL 1568-4; OPTS-51107]

Polymer of Mixed Alkylacrylates; Receipt of Premanufacture Notice

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1) of the Toxic Substances Control Act (TSCA) requires any person who intends to manufacture or import a new chemical substance to submit a premanufacture notice (PMN) to EPA at least 90 days before manufacture or import commences. Section 5(d)(2) requires EPA to publish in the Federal Register certain information about each PMN within 5 working days after receipt. This Notice announces receipt of a PMN and provides a summary.

DATE: Written comments by September 19, 1980.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington. DC 20460, 202-755-8050.

FOR FURTHER INFORMATION CONTACT: David Dull, Premanufacturing Review Division (TS-794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St., SW, Washington, D.C. 20460, 202/426-2601.

SUPPLEMENTARY INFORMATION: Section 5(a)(1) of TSCA (90 Stat. 2012 (15 U.S.C. 2604)), requires any person who intends to manufacture or import a new chemical substance to submit a PMN to EPA at least 90 days before manufacture or import commences. A "new" chemical substance is any substance that is not on the Inventory of existing substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the Federal Register of May 15, 1979 (44 FR 28558). The requirement to submit a PMN for new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

EPA has proposed premanufacture notification rules and forms in the Federal Register issues of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764). These regulations, however, are not yet in effect. Interested persons should consult the Agency's Interim Policy published in the Federal Register of May 15, 1979 (44 FR 28564) for guidance concerning premanufacture notification requirements prior to the effective date of these rules and forms. In particular, see page 28567 of the Interim Policy.

A PMN must include the information listed in Section 5(d)(1) of TSCA. Under section 5(d)(2) EPA must publish in the Federal Register nonconfidential information on the identity and use(s) of the substance, as well as a description of any test data submitted under section 5(b). In addition, EPA has decided to publish a description of any test data submitted with the PMN and EPA will publish the identity of the submitter unless this information is claimed confidential.

Publication of the section 5(d)(2) notice is subject to section 14 concerning disclosure of confidential information. A company can claim confidentiality for any information submitted as part of a PMN. If the company claims confidentiality for the specific chemical identity or use(s) of the chemical, EPA encourages the submitter to provide a generic use description, a nonconfidential description of the potential exposures from use, and a generic name for the chemical. EPA will publish the generic name, the generic use(s), and the potential exposure descriptions in the Federal Register.

If no generic use description or generic name is provided, EPA will develop one and after providing due notice to the submitter, will publish an amended Federal Register notice. EPA immediately will review confidentiality claims for chemical identity, chemical use(s), the identity of the submitter, and for health and safety studies. If EPA determines that portions of this information are not entitled to confidential treatment, the Agency will publish an amended notice and will place the information in the public file, after notifying the submitter and complying with other applicable procedures.

After receipt, EPA has 90 days to review a PMN under section 5(a)(1). The section 5(d)(2) Federal Register notice indicates the date when the review period ends for each PMN. Under section 5(c), EPA may, for good cause, extend the review period for up to an additional 90 days. If EPA determines that an extension is necessary, it will publish a notice in the Federal Register.

Once the review period ends, the submitter may manufacture the substance unless EPA has imposed restrictions. When the submitter begins to manufacture the substance to the Inventory. After the substances is added to the Inventory, any company may manufacture it without providing EPA notice under section 5(a)(1)(A).

Therefore, under the Toxic Substances Control Act, a summary of the data taken from the PMN is published herein.

PMN 80-179.

Close of Review Period. October 19, 1980.

Manufacturer's Identity. E. I. du Pont de Nemours & Co., 1007 Market St., Wilmington, DE 19898.

Specific Chemical Identity. Claimed confidential. Generic name provided: Polymer of mixed alkylacrylates.

The following summary is taken from data submitted by the manufacturer in the PMN.

Use. Protective coating.

Production Estimates. (Kilograms per year)

First year—145,000
Second year—227,000
Third year—454,000

Physical/Chemical Properties.

Viscosity (Gardner-Holdt)—V-X.
Percent Solids (Gravimetric)—68-70.
Color (Gardner 1933 number scale)—4 max.

Toxicity Data.

Skin irritation (rabbits)—Mild to no skin irritation.

Eye irritation (rabbits)—Slight to mild eye irritant.

Acute and toxicity (rats)—Low toxicity.

Approximate lethal dose (ALD) (rats)—25,000 mg/kg.

Exposure.

Activity per site and potential route(s)	Number of potentially exposed workers	Maximum duration of exposure
Manufacturing:		
Dermal	3 per shift	8 hour per shift, 2 shifts per day, 252 days per year.
Inhalation	3 per shift	8 hour per shift, 2 shifts per day, 252 days per year.
Customer:		
Dermal	8 per shift	8 hour per shift, 2 shifts per day, 242 days per year.
Inhalation	8 per shift	8 hour per shift, 2 shifts per day, 242 days per year.

Environmental Release/Disposal. E. I. du Pont de Nemours states that release of the PMN substance to the environment will be minimal and incidental. Disposal of waste products will by be recycling (80 percent) and by incineration.

Interested persons may, on or before September 19, 1980, submit to the Document Control Officer (TS-793), Rm. E-447, Office of Pesticides and Toxic Substances, 401 M St. SW., Washington, D.C. 20460, written comments regarding this notice. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-51107]" and the PMN number. Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday, excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: August 5, 1980.

D. G. Bannerman,

Acting Deputy Assistant Administrator for Chemical Control.

2(Substituted)Ethylamine Fractionation Forecuts-Phosphonomethylated and Its Sodium Salts; Receipt of Premanufacture Exemption Application

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: Section 5(a)(1)(A) of the Toxic Substances Control Act (TSCA) requires any person intending to manufacture or import a new chemical substance for a commercial purpose in the United States to submit a premanufacture notice (PMN) to EPA at least 90 days before he commences such manufacture or import. Under Section 5(h) the Agency may, upon application, exempt any person from any requirement of section 5 to permit such person to manufacture or process a chemical for test marketing purposes. Section 5(h)(6) requires EPA to issue a notice of receipt of any such application for publication in the Federal Register. This notice announces receipt of an application for an exemption from the premanufacture reporting requirements for test marketing purposes and requests comments on the appropriateness of granting the exemption.

DATE: The Agency must either appove or deny the application by September 5, 1980. Persons should submit written comments on the applications no later than August 28, 1980.

ADDRESS: Written comments to: Document Control Officer (TS-793), Office of Pesticides and Toxic Substances, Environmental Protection Agency, 401 M St. SW., Washington, D.C. 20460, 202-755-8050.

FOR FURTHER INFORMATION CONTACT: Carolyn Brown, Premanufacturing Review Division (TS-794), Office of Pesticides and Toxic Substances, Environmental Protection Agency, Washington, D.C. 20460, 202-426-3980.

SUPPLEMENTARY INFORMATION: Under Section 5 of TSCA (90 Stat. 2012 (15 U.S.C. 2604)), any person who intends to manufacture or import a new chemical substance for commercial purposes in the United States must submit a notice to EPA before the manufacture or import begins. A "new" chemical substance is any chemical substance that is not on the Inventory of existing chemical substances compiled by EPA under Section 8(b) of TSCA. EPA first published the Initial Inventory on June 1, 1979. Notice of availability of the Initial Inventory was published in the Federal Register on May 15, 1979 (44 FR 28558). The requirement to submit a PMN for

new chemical substances manufactured or imported for commercial purposes became effective on July 1, 1979.

Section 5(a)(1) requires each PMN to be submitted in accordance with section 5(d) and any applicable requirement of chemical substances that are subject to testing rules under section 4. Section 5(b)(2) requires additional information in PMN's for substances which EPA, by rules under section 5(b)(4), has determined may present unreasonable risks of injury to health or the environment.

Section 5(h), "Exemptions," contains several provisions for exemptions from some or all of the requirements of section 5. In particular, section 5(h)(1) authorized EPA, upon application, to exempt persons from any requirement of section 5(a) or section 5(b) to permit the persons to manufacture or process a chemical substance for test marketing purposes. To grant such an exemption, the Agency must find that the test marketing activities will not present any unreasonable risk of injury to health or the environment. EPA must either approve or deny the application within 45 days of its receipt, and the Agency must publish a notice of its disposition in the **Federal Register**. If EPA grants a test marketing exemption, it may impose restrictions on the test marketing activities.

Under section 5(h)(6), EPA must publish in the **Federal Register** a notice of receipt of an application under section 5(h)(1) immediately after the Agency receives the application. The notice identifies and briefly describes the application (subject to section 14 confidentiality restrictions) and gives interested persons an opportunity to comment on it and whether EPA should grant the exemption. Because the Agency must act on the application within 45 days, interested persons should provide comments within 15 days after the notice appears in the **Federal Register**.

EPA has proposed Premanufacture Notification Requirements and Review Procedures published in the **Federal Register** of January 10, 1979 (44 FR 2242) and October 16, 1979 (44 FR 59764) containing proposed premanufacture rules and notice forms. Proposed 40 CFR 720.15 (44 FR 2288) would implement section 5(h)(1) concerning exemptions for test marketing and includes proposed 40 CFR 720.15(c) concerning the section 5(h)(6) **Federal Register** notice. However, these requirements are not yet in effect. In the meantime, EPA has published a statement of Interim Policy published in the **Federal Register** of May 15, 1979 (44 FR 28564) which applies to PMN's submitted prior to promulgation of the rules and notice forms.

Interested persons may, on or before August 28, 1980, submit to the Document Control Officer (TS-793), Rm. E-447, Office of Pesticides and Toxic Substances, 401 M St. SW., Washington, D.C. 20460, written comments regarding these notices. Three copies of all comments shall be submitted, except that individuals may submit single copies of comments. The comments are to be identified with the document control number "[OPTS-59032]". Comments received may be seen in the above office between 8:00 a.m. and 4:00 p.m., Monday through Friday excluding holidays.

(Sec. 5, 90 Stat. 2012 (15 U.S.C. 2604))

Dated: August 7, 1980.

Douglas G. Bannerman,

Acting Deputy Assistant Administrator for Chemical Control.

TME 80—36.

Close of Review Period. September 5, 1980.

Manufacturer's Identity. Claimed confidential.

Specific Chemical Identity. Claimed confidential. Generic name provided: 2(Substituted)ethylamine fractionation forecuts-phosphonomethylated and its sodium salts.

The following summary is taken from data submitted by the manufacturer in the test marketing exemption application.

Use. Scale inhibitor.

Physical/Chemical Properties

	Aqueous solution	
	Sodium salt of a phosphonate	Sodium salt of a phosphonate in methanol
Color	3.5	3.0.
Appearance and Odor	Clear amber liquid with bland odor.	Clear golden liquid with bland odor.
Reid Vapor pressure at 100° F	68.58 mmHg	121.92 mmHg.
Flash point	163° F PMCC	87° F PMCC.
Viscosity at 60° F	46.27 CTS	9.54 CTS.
Specific gravity at 60° F	1.328	1.162.
pH	5.0	4.9.
Corrosivity to carbon steel	0.0933 ipy	0.0657 ipy.
Corrosivity to aluminum	0.0302 ipy	0.0129 ipy.

Production Estimates. The submitter plans to produce 20,000 pounds in three batches of the new phosphonate which will be part of 100,000 pounds of the formulated product needed for the test market. The test market period will be eight months.

Toxicity Data. There were no data submitted with the application but the submitter stated that the following tests are being undertaken and results will be forwarded to the Agency upon completion:

Acute oral LD_{50} toxicity (albino rats).

Acute dermal LD_{50} toxicity (albino rabbits).

Primary skin irritation (albino rabbits), and

Eye irritation (albino rabbits).

Exposure. The manufacturer states that four employees will be involved during the manufacturing process but expects no significant exposure to the substance. During the time of potential exposure, the submitter states that supervision will be provided and protective equipment will be worn.

BILLING CODE 6560-01-M

FEDERAL COMMUNICATIONS COMMISSION

[BC Dockets Nos. 80-406—80-408; File Nos. BPCT-781222LC]

American Telecasters, Inc., et al.; Hearing Designation Order

Adopted: July 16, 1980.

Released: August 7, 1980.

In re application of American Telecasters, Inc., Greensboro, N.C. BC Docket No. 80-406, File No. BPCT-781222LC; Greensboro Telecasting Corp., Greensboro, N.C., BC Docket No. 80-407, File No. BPCT-790507KF; James Thrash, Greensboro, N.C., BC Docket No. 80-408, File No. BPCT-790507KH.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has before it the above-captioned mutually exclusive applications for authority to construct a new commercial television broadcast station on Channel 48, Greensboro, North Carolina.

Preliminary Matters

2. Greensboro Telecasting Corp. ("GTC") has an application for a subscription television (STV) authorization pending before the Commission. This application will not be consolidated for hearing in this proceeding, however. STV is essentially an entertainment format indistinguishable from other entertainment packages except that it is supported directly by viewers' subscriptions rather than by advertising revenues. Accordingly, the Commission's reluctance to compare applicants on the basis of entertainment formats expressed in George E. Cameron, Jr. Communications, 71 FCC 2d 460 (1979), provides ample precedent for precluding consideration of STV proposals in otherwise routine hearings on applications for television construction permits.

American Telecasters, Inc.

3. American Telecasters, Inc. ("Telecasters") estimates that it will require an estimated $406,259 to construct its proposed station and an additional $64,450 to operate the station for three months. To meet these costs, applicant relies upon the following funds:

Existing capital	$49,900
Pre-paid equipment costs	77,000
Stock subscriptions	77,600
North Carolina Mutual Life Loan	250,000
Bank loan	250,000
Programming contracts	274,040
Total	$978,540

4. Telecasters' reliance on $274,040 in programming contracts to demonstrate its financial qualifications is misplaced. The present television financial standard requires an applicant to demonstrate the ability to construct a proposed station and operate it for three months without reliance on advertising or other broadcast revenue. *New Financial Qualifications Standard for Broadcast Television Applicants*, 72 FCC 2d 784 (1979). Further Telecasters has provided no documentation tending to substantiate the availability of a $250,000 bank loan to finance its proposal. Finally, the applicant has not submitted any documentation tending to demonstrate the availability of $77,600 in stock subscriptions as required in Question 4, Section III, FCC Form 301. Accordingly, an appropriate issue will be specified exploring Telecasters' financial qualifications.

5. The Community leader survey contained in Telecasters' ascertainment showing does not identify any of the community leaders interviewed. This information is required by Question and Answer 20 of the *Primer on Ascertainment of Community Problems by Broadcast Applicant*, 27 FCC 2d 650 (1971), and its complete omission precludes the Commission from finding that Telecasters' ascertainment effort is in substantial compliance with the *Primer, supra*. Accordingly, an issue will be specified inquiring into the sufficiency of Telecasters' ascertainment efforts.

Greensboro Telecasting Corp.

6. Review of GTC's financial showing reveals that approximately $773,394 will be required to construct and operate its proposed station for three months. To meet this cost, GTC relies upon funds to be provided by its principals in the form of loans and stock subscriptions. GTC has failed to provide balance sheets demonstrating the ability of it principals to supply the funds in question. Accordingly, an issue will be specified exploring applicant's financial qualifications.

James Thrash

7. Examination of James Thrash's financial showing indicates that roughly $2,340,000 will be required to construct his proposed station and operate it for three months. Mr. Thrash relies upon his personal assets and a $3,100,000 loan commitment from the Wachovia Bank and Trust Company to demonstrate his financial qualifications. Mr. Thrash's application does not, however, contain a balance sheet, and therefore it cannot be determined that he has sufficient net liquid assets to commit to funding his proposed station. Furthermore, the letter submitted to demonstrate the availability of the Wachovia Bank and Trust Company loan fails to indicate the rate of interest to be charged or the collateral required as specified in Question 4(e), Section III of FCC Form 301. Accordingly, an issue will be specified exploring the availability of the funds applicant relies upon to meet his financial qualifications.

Conclusion and Order

8. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

9. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to American Telecasters, Inc.:

(a) The source and availability of additional funds over and above the $376,900 indicated; and

(b) Whether, in light of the evidence adduced pursuant to (a) above, the applicant is financially qualified.

2. To determine with respect to the ascertainment efforts of American Telecasters, Inc.:

(a) The identity of each community leader interviewed;

(b) The groups represented by each community leader interviewed; and

(c) Whether, in light of the evidence adduced pursuant to (a) and (b) above, applicant is qualified to be a Commission licensee.

3. To determine with respect to Greensboro Telecasting Corp.:

(a) The sources and availability of the funds applicant relies upon to demonstrate its financial qualifications; and

(b) Whether, in light of the evidence adduced pursuant to (a) above, applicant is financially qualified.

4. To determine with respect to James Thrash:

(a) The source and availability of the funds applicant relies upon to demonstrate his financial qualifications; and

(b) Whether, in light of the evidence adduced pursuant to (a) above, applicant is financially qualified.

5. To determine which of the proposals would, on a comparative basis, best serve the public interest.

6. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications, if any, should be granted.

10. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

11. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the

publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division.

[FR Doc. 80-24451 Filed 8-12-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Dockets Nos. 80-344—80-346; File Nos. BPH-790326AE etc.]

Bradley, Hand, and Triplett et al.; Hearing Designation Order

Adopted: June 25, 1980.

Released: August 7, 1980.

In re applications of Daniel B. Bradley, Owen W. Hand and Wendell A. Triplett d.b.a. Bradley, Hand, and Triplett, Ocean City, New Jersey, BC Docket No. 80-344, File No. BPH-790326AE, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 276 feet; JM Communications, Ocean City, New Jersey, BC Docket No. 80-345, File No. BPH-790803AB, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 300 feet; Ocean City Radio of New Jersey, Inc., Ocean City, New Jersey, BC Docket No. 80-346, File No. BPH-790806AB, Req: 98.3 MHz, Channel 252, 3.0 kW (H&V), 288.3 feet, for a construction permit for a new FM station.

1. The Commission, by the Chief, Broadcast Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications of Bradley, Hand, and Triplett (BHT), JM Communications (JM), and Ocean City Radio of New Jersey, Inc. (Ocean) for a construction permit for a new FM station.

2. *BHT.* Applicants for new broadcast stations are required by § 73.3580(f) of the Commission's rules to give local notice of the filing of their applications. They must then file with the Commission the statement described in § 73.3580(h) of the rules. We have no evidence that BHT published the required notice. To remedy this deficiency, BHT will be required to publish local notice of its application if it has not already done so and to file a statement of publication with the presiding Administrative Law Judge.

3. Analysis of the financial data submitted by BHT reveals that $76,487 will be required to construct the proposed station and operate for three months, itemized as follows:

Equipment down payment	$19,332
Equipment payments with interest (4 months)	3,640
Land	3,000
Buildings	5,000
Loan interest (5 months)	2,458
Miscellaneous	19,750
Operating costs (3 months	23,307
Total	76,487

To meet this requirement BHT intends to rely solely upon a loan of $59,000 from one of its partners, Wendell A. Triplett. Since the applicant has shown only $59,000 available to meet a requirement of $76,487, a limited financial issue will be specified.

4. BHT indicates that it plans to locate its main studio 0.25 miles southwest of the proposed community of license, Ocean City. The applicant has failed, however, to formally request that we waive § 73.1125 of the Commission's Rules nor has it demonstrated good cause for locating the main studio site outside of Ocean City. An appropriate issue will, therefore, be specified.

5. Ronald L. Oberholtzer, an alleged former employee of one of BHT's partners, Owen Hand, filed an informal objection to BHT's application. Oberholtzer claimed that BHT should not receive a Commission license because of a contractual dispute between him and Hand. Additionally, the objection asserted that an additional radio station in the Ocean City area would be economically depressing. Oberholtzer's allegations are not adequately documented, thereby failing to raise a substantial and material question of fact. Accordingly, the objection will be denied.

6. *JM.* The applicant indicated that one of its principals, Jacqueline E. Pryor, is an alien and will control 20% of the corporation's stock. Ms. Pryor will also serve as a director and officer of the corporation. An issue will therefore be specified to determine whether JM is in violation of Section 310(b)(3) of the Communications Act of 1934, as amended.

7. An area resident, Mary Juliana, filed an informal objection to all of the applicants' proposals, claiming that an additional radio tower would result in adverse health effects to the population. The objection is not sufficiently documented and therefore fails to raise a substantial and material question of fact. Accordingly, the objection will be denied.

8. *Other issues.* Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to any of the applicants.

9. Except as indicated by the issues specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

10. Accordingly, it is ordered, that, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine with respect to BHT:

(a) The source and availability of additional funds over and above the $59,000 indicated; and

(b) In light of the evidence adduced pursuant to (a) above, whether the applicant is financially qualified to construct and operate the proposed station.

2. To determine whether BHT's proposal to locate its transmitter outside the proposed community of license complies with Section 73.1125 of the Commission's Rules and, if not, whether circumstances exist which warrant a waiver of the rule.

3. To determine whether JM Communication's proposal complies with Section 310(b)(3) of the Communications Act of 1934, as amended.

4. To determine which of the proposals would, on a comparative basis, best serve the public interest.

5. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

11. It is further ordered, that BHT file a statement of publication of local notice of its application with the presiding Administrative Law Judge, in accordance with § 73.3580(f) of the Commission's rules.

12. It is further ordered, that Ronald L. Oberholtzer's informal objection to BHT's application and Mary Juliana's informal objection to the BHT, JM and Ocean applications are denied.

13. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

14. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594(g) of the Commission's rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the rules.

Federal Communications Commission.

Chief, Broadcast Facilities Division.

[FR Doc. 80-24450 Filed 8-12-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket No. 80-425, File No. BPCT-5149; BC Docket No. 80-426, File No. BPCT-5242]

Cleveland Television Corp. and Channel 19, Inc. (Shaker Heights, Ohio); Applications Designated for Consolidated Hearing on Stated Issues

Adopted: July 29, 1980.

Released: August 5, 1980.

By the Chief, Broadcast Bureau:

1. The Commission, by the Chief, Broadcast, Bureau, acting pursuant to delegated authority, has under consideration the above-captioned mutually exclusive applications, filed by Cleveland Television Corporation (CTC),[1] and Channel 19, Inc. (Channel 19)[2] for a new commercial television station on channel 19, allocated to Cleveland, Ohio;[3] a Motion to Dismiss the Channel 19 application filed October 19, 1979 by CTC, and related pleadings; a petition for leave to amend the Channel 19 application filed November 15, 1979; oppositions to the petition for leave to amend filed by both CTC and Gaylord; an informal objection to the Channel 19 application filed March 19, 1979 by Doubleday Broadcasting Company, Inc. (Doubleday); and other related filings.

2. All parties were informed by staff letter dated June 22, 1979 that amendments filed after July 31, 1979 would be "considered only upon a showing of good cause for late filing or pursuant to Sections 1.65 or [73.3514]." Channel 19 filed a petition for leave to amend and an amendment to its application on November 15, 1979, citing a need to clarify the intentions of its preferred stockholders as to their participation in the station. Oppositions to the petition were filed by both CTC and Gaylord, citing lack of a "good cause" showing for the late amendment. The proffered amendment contains the following: revisions to paragraphs 9 (Capital structure) and 20(d) (legal qualifications) of the application, a statement on stock conversion rights, amended Articles of Incorporation, a statement of the intent of an earlier amendment, and financial statements of stockholders Maltz, Hirsch and Wilson. The allegation presented in the petition for leave to amend is inadequate to demonstrate "good cause" for the late amendment. *See Sands Broadcating Corp.*, 22 RR 2d 106, 110 (1961); *accord, Western Connecticut Broadcasting Co.*, 69 F.C.C. 2d 1890, 1892–3 (1978). Accordingly, we shall reject the amendment as being untimely filed, and deny the petition for leave to amend (see para. 10, *infra*).

3. Cleveland is the community of license of Malrite Broadcasting, Inc.'s (Malrite) radio stations WHK and WMMS(FM). Milton Maltz, John R. Wilson and Carl E. Hirsch are principals in Malrite and were common stockholders in the Channel 19 application as originally filed. Subsequent to the filing of the original application and before the date designated for final amendments, Channel 19 amended its application to change Messrs. Maltz, Wilson and Hirsch to preferred stockholders with no voting rights, except as required by Ohio law. Their stock was to be convertible into voting common stock only in the event Commission rules and policies permitted such ownership. Shares would also be convertible should any of the stockholders divest themselves of any interest in an AM and/or FM station in the Cleveland market. The CTC motion to dismiss alleges that this preferred stockholder status is not sufficient to remove conflict with 47 CFR 73.636 (the multiple-ownership rule) and that the three stockholders still plan to exercise control over the station through their financial support by an advantageous equipment lease arrangement with a Malrite television station in North Carolina.

4. Section 73.636(a)(1) sets out a policy against granting a television construction permit to an applicant with principals who, directly or indirectly, own, operate, or control an AM or FM radio station licensed to the same community as its proposed television station. However, because Channel 19 filed its application before September 13, 1979, it is subject to Note 8 of the Rule, which provides that applications for UHF television facilities will be considered on a case-by-case basis in order to determine whether common ownership, operation, or control of the stations in question would be in the public interest. *Notice of Proposed Rule Making in BC Docket 79-233*, 44 FR 55603 (1979). An issue will be designated to determine whether common ownership of WHK and WMMS(FM) and the proposed television station would be consistent with the public interest, and the CTC motion to dismiss will be denied (see para. 11, *infra*).

5. The captioned proposals, although for different communities, would serve substantial areas in common. Consequently, in addition to determining, pursuant to Section 307(b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service, a contingent comparative issue will also be specified.

6. Doubleday has submitted a pleading which will be considered as an informal objection to the Channel 19 application pursuant to §73.3587 of the Rules. The pleading is a response to Metroplex Communications of Missouri, which opposed minor changes to Doubleday's Station WWWK(FM), Granite City, Illinois, and calls the opposition "harassment." Metroplex Communications, of Missouri has virtally identical ownership with Metroplex Communications, a 50 percent stockholder in Channel 19. The Commission granted the minor changes requested by Doubleday on January 16, 1980 (FCC 80-19) and considered the Metroplex opposition on its merits. In light of this resolution and the fact that the objection contributes no significant information to the Cleveland proceeding, we find no merit to the informal objection in the instant case.

7. Except as indicated in the issues specified below, the Commission finds Cleveland Television Corporation and Channel 19, Inc. legally, financially, technically and otherwise qualified to operate as proposed. Since these applications are mutually exclusive, the

[1] On July 6, 1979, CTC stated its intention to file a request for subscription television (STV) authorization. We have no record of any STV application for this channel.

[2] Channel 19 proposes Shaker Heights, Ohio as its community of license, although this frequency is allocated to Cleveland. Shaker Heights is located within 15 miles of Cleveland, and thus Channel 19's application complies with Section 73.607(b) of the Commission's Rules relating to availability of channels and is acceptable for filing for the Cleveland allocation.

[3] Gaylord Broadcasting Company of Ohio (Gaylord) was an applicant for this frequency (File No. BPCT-5241). Gaylord requested voluntary dismissal from the proceeding and, on July 14, 1980, submitted the affidavit of no consideration required by Section 73.3525(d) of the Rules. Reference to Gaylord's pleadings are to those filed while Gaylord had standing as an applicant in this case.

Commission is unable to make the statutory finding that grant of these applications will serve the public interest, convenience and necessity. The applications must, therefore, be designated for hearing in a consolidated proceeding on the issues set out below.

8. Accordingly, It is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the captioned applications Are designated for hearing in a consolidated proceeding, to be held before an Administrative Law Judge at a time and place specified in a subsequent Order, upon the following issues:

1. To determine with respect to Channel 19 the extent of common ownership, operation and control between stations WHK and WMMS(FM) and the proposed television station, and whether said ownershiup would be in the public interest.

2. To determine the areas and populations which would receive primary television service (Grade B or better) from CTC and Channel 19, and other primary television service to such areas and populations.

3. To determine, in light of Section 307 (b) of the Communications Act of 1934, as amended, which of the proposals would best provide a fair, efficient and equitable distribution of radio service.

4. To determine, in the event it is concluded that a choice between the applications should not be based on considerations relating to Section 307(b) of the Act, which of the proposals would, on a comparative basis, best serve the public interest.

5. To determine, in light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

9. It is further ordered, That the informal objection filed by Doubleday Broadcasting, Inc., is denied.

10. It is further ordered, That the petition for leave to amend filed by Channel 19, Inc., is denied and its amendment of October 19, 1979 Is dismissed as unacceptabe for filing.

11. It is further ordered, That the Motion to Dismiss filed by Cleveland Television Corporation is denied.

12. It is further ordered, That, since the application of Channel 19 shows substantial ownership by minority interests, this proceeding shall be expedited.

13. It is further ordered, That, to avail themselves of the opportunity to be heard, the applicants shall, pursuant to Section 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

14. It is further ordered, That the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Chief, Broadcast Facilities Division.

[FR Doc. 80-24400 Filed 8-12-80; 8:45 am]

BILLING CODE 6712-01-M

[BC Docket No. 80-419, File No. BPH-10,375, et al.]

Radio Lubbock, Inc., et al.; Applications Designated for Consolidated Hearing on Stated Issues

Adopted: July 28, 1980.

Released: August 4, 1980.

In the matter of applications of Radio Lubbock, Inc., Lubbock, Texas, Req: 102.5 MHz, Channel 273 100 kW (H&V), 230 feet (BC Docket No. 80-419, File No. BPH-10,375) REX Broadcasting Corporation, Lubbock, Texas, Req: 102.5 MHz, Channel 273 100 kW (H&V), 750 feet (BC Docket No. 80-420, File No. BPH-10,463) Robert E. Clark tr/as WESTERN Broadcasting Co., Lubbock, Texas, Req: 102.5 MHz, channel 273 78 kW (H&V), 240 feet (BC Docket No. 80-421, File No. BPH-10,522); for construction permit for a new FM station; hearing designation order.

1. The Commission, by the Chief, Broadcast Bureau, has before it for consideration: (i) the above-captioned mutually exclusive applications; (ii) a motion to dismiss the application of Rex Broadcasting Corporation (hereinafter "Rex") filed by Radio Lubbock, Inc. (hereinafter "Radio Lubbock"); (iii) a petition to specify issues filed by Radio Lubbock; and (iv) responsive pleadings.[1]

2. *Radio Lubbock.* Analysis of the financial data submitted by Radio Lubbock indicates that it has failed to comply with the explicit conditional language contained in the June 12, 1978 loan commitment letter for $200,000 from the First National Bank of Abilene which Radio Lubbock is relying upon as its sole source of funds to meet its needs of $122,500 to construct and operate the station for three months without revenue. The bank letter states:

> This commitment is in effect only if Mr. Larry Ackers and Mr. Bill Fox are the controlling stockholders in Radio Lubbock, Inc., and are in charge of its operation.

On December 19, 1979, Radio Lubbock amended its application to show that the corporate treasury purchased Mr. Fox's entire interest of 25,000 shares. Thus, he no longer retains the status of a controlling shareholder as required by the terms of the bank letter. Therefore, a general financial issue will be specified.

3. *Other Matters.* Rex's application, as filed on March 3, 1977 listed the following stock ownership: Jim Slone, 49%; Thomas Chandler, 10.5%; Robert Chandler, 10.5%; Estate of Rex Nicholson, 20%; and Philip Richardson, 10%. On February 6, 1978 the application was amended to reflect the following stock ownership; Jim Slone, 62.5%; Thomas Chandler, 12.5%; Robert Chandler, 12.5% and Philip Richardson, 12.5%. Radio Lubbock's motion to dismiss contends that the transaction reported on February 6, 1978 constitutes a major change under § 73.3573(b) of the Rules requiring that the application be assigned a new file number.[2] Consequently, petitioner claims the application should be dismissed as patently inconsistent with § 1.227(b)(1) [3] of our Rules. In applying § 73.3573(b), the Commission determines whether the transaction in question would require the filing of a long form (FCC Form 314 or 315) assignment or transfer application. Generally, such an application is not required where less than a controlling interest (50 percent) is being transferred and, as a result of the transaction, 50 percent or more of the total ownership interest will not be held by a person or persons whose qualifications have not been passed upon. *Gaffney Broadcasting, Inc.*, 55 FCC 2d 388, 35 RR 2d 1607, 1609 (1976); *Clay Broadcasters, Inc.* FCC 71-284, released March 15, 1971, 21 RR 2d 442 (1971). For purposes of applying the new file number rule to applications for construction permits, the requirement that any new controlling party has been "passed upon" means that the party was an original party to the application when it was originally filed. In the instant case, only 20% of the applicant's stock was transferred, and the transferees were original parties to the application. Consequently, a new file number will not be assigned.

4. Section 73.210 of the Commission's Rules requires that the main studio of an FM station be located within the city of license, but that on a showing of good cause the main studio may be located outside that community. Rex proposes to locate its main studio approximately one mile south of Lubbock. The applicant has not submitted any information to justify the proposed studio location. Therefore, we conclude an issue is warranted to determine whether Rex's proposal complies with § 73.210 of the Rules.

5. Western amended its application several times after the time for filing pre-designation amendments had expired. The factors the Commission considers in determining whether good cause for acceptance of untimely amendments [4] has been satisfied include whether: (i) the applicant acted with due diligence; (ii) the proposed amendment was not required by the voluntary act of the applicant; (iii) modification or addition of issues or parties would be necessitated; (iv) the proposed amendment would interrupt the orderly conduct of the designation process or necessitate an additional hearing; (v) the other parties will be unfairly prejudiced; and (vi) the applicant will gain a competitive advantage. *See, e.g. Rose Broadcasting Company*, 68 FCC 2d 1242, 43 RR 2d 1317 (1978); *Athens Broadcasting Co., Inc.*, 37 FCC 2d 374, 25 RR 2d 483 (Rev. Bd. 1972); *Erwin O'Connor Broadcasting Co.*, 22 FCC 2d 140, 18 RR 2d 820 (Rev. Bd. 1970). On September 8, 1978 Western filed an amendment disclosing that it had contracted to assign the license of its AM station KDAV, Lubbock, Texas. Although the amendment was filed long after the deadline for filing of amendments as a matter of right pursuant to § 1.522(a) of the Rules, it will be accepted for filing pursuant to the requirements of the § 1.65 of the Rules, but in accordance with our usual practice will not be allowed to improve the comparative status of Western. *Cypress Communications, Inc.*, 47 RR 2d 132 (Broadcast Bureau 1980).[5]

6. Radio Lubbock and Rex propose independent programming while Western proposes to duplicate the programming of its commonly-owned AM station KDAV, Lubbock, Texas during 20 percent of its broadcast time. Therefore, evidence regarding program duplication will be admissible under the standard comparative issue. When duplicated programming is proposed, the showing permitted under the standard comparative issue will be limited to evidence concerning the benefits to be derived from the proposed duplication which could offset its inherent inefficiency. *Jones T. Sudbury*, 8 FCC 2d 360, 10 RR 2d 114 (1967).

7. Data submitted by the applicants indicate that there would be a significant difference in the size of the areas and populations which would receive service from the proposals. Consequently, for the purpose of comparison, the areas and populations which would receive FM service of 1 mV/m or greater intensity, together with the availability of other primary aural services in such areas, will be considered under the standard comparative issue, for the purpose of determining whether a comparative preference should accrue to any of the applicants.

8. Except as indicated by the issue specified below, the applicants are qualified to construct and operate as proposed. However, since the proposals are mutually exclusive, they must be designated for hearing in a consolidated proceeding on the issues specified below.

9. Accordingly, It is ordered, That, pursuant to Section 309(e) of the Communications Act of 1934, as amended, the applications are designated for hearing in a consolidated proceeding, at a time and place to be specified in a subsequent Order, upon the following issues:

1. To determine whether Radio Lubbock, Inc., is financially qualified to construct and operate the proposed facility for three months.

2. To determine whether the proposal of Rex Broadcasting Corporation is in compliance with § 73.210 of the Commission's Rules with respect to location of the main studio.

3. To determine which of the proposals would, on a comparative basis, best serve the public interest.

4. To determine, in the light of the evidence adduced pursuant to the foregoing issues, which of the applications should be granted.

10. It is further ordered, that the motion to dismiss filed by Radio Lubbock, Inc., is denied.

11. It is further ordered, that the petition to specify issues is denied.

12. It is further ordered, that the petition for leave to amend filed by Rex Broadcasting Corporation is granted, and the amendment is accepted; the petitions for leave to amend filed by Robert E. Clark t/a Western Broadcasting Company are granted and the amendments are accepted to the extent indicated above and denied in all other respects.

13. It is further ordered, that, to avail themselves of the opportunity to be heard, the applicants herein shall, pursuant to § 1.221(c) of the Commission's Rules, in person or by attorney, within 20 days of the mailing of this Order, file with the Commission in triplicate a written appearance stating an intention to appear on the date fixed for the hearing and to present evidence on the issues specified in this Order.

14. It is further ordered, that the applicants herein shall, pursuant to Section 311(a)(2) of the Communications Act of 1934, as amended, and § 73.3594 of the Commission's Rules, give notice of the hearing (either individually or, if feasible and consistent with the Rules, jointly) within the time and in the manner prescribed in such Rule, and shall advise the Commission of the publication of such notice as required by § 73.3594(g) of the Rules.

Federal Communications Commission.

Jerold L. Jacobs,

Chief, Broadcast Facilities Division, Broadcast Bureau.

[FR Doc. 80-24401 Filed 8-12-80; 8:45 am]

BILLING CODE 6712-01-M

---

[1] The Radio Lubbock application was tendered on January 3, 1977, the Rex application was tendered on March 3, 1977, and the application of Robert E. Clark, t/a Western Broadcasting Co. (hereinafter "Western") was tendered on April 26, 1977. The Radio Lubbock application appeared on public notice of cut-off effective July 11, 1977. The Rex and Western applications appeared on public notice of cut-off effective May 4, 1978. Accordingly, the amendent and predesignation issue pleadings procedures of former §§ 1.522 and 1.584 of the Rules were applicable and the parties filed numerous issue pleadings and amendments. However, pursuant to the Commission's *Report and Order* in re *Revised Procedures for the Processing of Contested Broadcast Applications; Amendments of Part 1 of the Commission's Rules*, 72 FCC 2d 202, 45 RR 2d 1220 (1979), which directed the deletion of all issue pleadings in pending cases, the matters sought to be raised by the parties in issue pleadings and amendments have not been considered herein. Accordingly, an opportunity to seek to raise any allegations contained in the issue pleadings herein will be afforded the parties post designation pursuant to § 1.229.

[2] Section 73.3573(b) provides in part: A new file number will be assigned to an application for a new station * * * when it is amended so as to result in an assignment or transfer of control * * * which in the case of an authorized station, would require the filing of an application * * * on FCC Form 314, 315 (long form).

[3] Section 1.227(b)(1) provides that no application will be consolidated for hearing with a previously filed application if not substantially complete and tendered for filing by the cut-off date of the previously filed application.

[4] At the time Western filed it amendments, § 1.522(a) of the Rules allowed applications to be amended as a matter of right within 30 days after the cut-off date for the last-filed application. The rule as modified, is now set forth in § 73.3522(a) of the Rules.

[5] Western's July 21, 1978 amendment to report Commission approval and consummation of the assignment of KILO(FM), Colorado Springs, Colorado, is mooted by the withdrawal of David Pinkston as 50 percent partner in Western, and will be dismissed.

FEDERAL RESERVE SYSTEM

B.P. Corp.; Proposed Retention of Credit-Related Insurance Activities

B.P. Corp., Clinton, Iowa, has applied, pursuant to section 4(c)(8) of the Bank

Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR 225.4(b)(2)), for permission to continue to directly engage in credit-related insurance activities.

Applicant states that it would continue to directly engage, as agent, in the sale of credit life, accident and health insurance made in connection with extensions of credit by its subsidiary bank, Iowa State Savings Bank, Clinton, Iowa. These activities would be performed from offices of Applicant in Clinton, Iowa, and the geographic area to be served is a twenty-five mile radius around Clinton, Iowa. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consumation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or grants in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Borad of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 5, 1980.

Board of Governors of the Federal Reserve System, August 5, 1980.

Cathy L. Petryshyn,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Century Banks, Inc.; Acquisition of Bank; Proposal To Engage in Insurance Activities

Century Banks, Inc., Fort Lauderdale, Florida, has applied for the Board's approval under section 3(a)(3) of the Bank Holding Company Act (12 U.S.C. 1842(a)(3)) to acquire 80 per cent or more of the voting shares of State Bank of Apopka, Apopka, Florida, a proposed new bank. The factors that are considered in acting on the application are set forth in section 3(c) of the Act (12 U.S.C. 1842(c)).

Century Banks, Inc., Fort Lauderdale, Florida, has also applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) for permission to engage through its subsidiary, CBI Insurance Agency, Inc., in the sale as agent or broker of credit life insurance. These activities would be performed from the office of State Bank of Apopka and the geographic area to be served is northwestern Orange County, Florida. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweight possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicits of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Atlanta.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 4, 1980.

Board of Governors of the Federal Reserve System, August 5, 1980.

Cathy L. Petryshyn,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

Kanawha Investment Co.; Proposed Retention of Kanawha Insurance Agency

Kanawha Insurance Co., Kanawha, Iowa, has applied, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.(b)(2) of the Board's Regulatory Y (12 CFR 225.4(b)(2)), for permission to continue to engage in the sale of general insurance through its subsidiary, Kanawha Insurance Agency, Kanawha, Iowa.

Applicant states that the subsidiary would continue to engage in the sale of general insurance in a town with a population of less than 5,000. These activities would be performed from offices of Applicant's subsidiary in Kanawha, Iowa, and the geographic areas to be served are Hancock County, the top tier of townships in Wright County and the eastern edge of Kossuth County. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consumption of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency,.that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition., conflicts of interests, or unsound banking practices." Any request for a hearing on this question must be accompanied by a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of the proposal.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 5, 1980.

BILLING CODE 6210-01-M

Bank Holding Companies; Proposed de novo Nonbank Activities

The bank holding companies listed in this notice have applied, purusant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8) and section 225.4(b)(1) of the Board's Regulation Y (12 CFR) 225.4(b)(1), for permission to engage *de novo* (or continue to engage in an activity earlier commenced *de novo*), directly or indirectly, solely in the activities indicated, which have been determined by the Board of Governors to be closely related to banking.

With respect to each application, interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest, or unsound banking practices." Any comment on an application that requests a hearing must include a statement of the reasons a written presentation would not suffice in lieu of a hearing, identifying specifically any questions of fact that are in dispute, summarizing the evidence that would be presented at a hearing, and indicating how the party commenting would be aggrieved by approval of that proposal.

Each application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank indicated for that application. Comments and requests for hearings should identify clearly the specific application to which they relate, and should be submitted in writing and received by the appropriate Federal Reserve Bank not later than September 5, 1980.

A. *Federal Reserve Bank of Atlanta* (Robert E. Heck, Vice President) 104 Marietta Street, N.W., Atlanta, Georgia 30303:

Southeast Banking Corporation, Miami Florida (trust company and investment advisory activities; Florida): To engage through its subsidiary, Southeast Banks Trust Company, N.A., in activities that may be carried on by a trust company, including activities of a fiduciary, investment advisory, agency, or custodian nature. These activities would be conducted from an office in Fort Pierce, Florida, serving St. Lucie County, Florida.

B. *Federal Reserve Bank of Chicago* (Franklin D. Dreyer, Vice President) 230 South LaSalle Street, Chicago, Illinois 60690:

Continental Illinois Corporation, Chicago, Illinois (real property leasing; nationwide): To engage, through its subsidiary, Continental Illinois Energy Development Corporation, in leasing personal and real property and acting as agent, broker, adviser in leasing such property where the leases serve as the functional equivalent of an extension of credit to the lessee of the property. Such leases will relate primarily to energy development and exploration projects. These activities would be conducted from an office located in Houston, Texas, serving the entire United States.

C. *Other Federal Reserve Banks: None.*

Board of Governors of the Federal Reserve System.

Cathy L. Petryshyn,

Assistant Secretary of the Board.

BILLING CODE 6210-01-M

FEDERAL TRADE COMMISSION

Early Termination of the Waiting Period of the Premerger Notification Rules

AGENCY: Federal Trade Commission.

ACTION: Granting of request for early termination of the waiting period of the premerger notification rules.

SUMMARY: British Petroleum Ltd. is granted early termination of the waiting period provided by law and the premerger notification rules with respect to the proposed acquisition of all stock of Selection Trust Ltd. The grant was made by the Federal Trade Commission and the Assistant Attorney General in charge of the Antitrust Division of the Department of Justice in response to a request for early termination submitted by both parties. Neither agency intends to take any action with respect to this acquisition during the waiting period.

EFFECTIVE DATE: August 4, 1980.

FOR FURTHER INFORMATION CONTACT:

Naomi Licker, Attorney, Premerger Notification Office, Bureau of Competition, Room 303, Federal Trade Commission, Washington, D.C. 20580 (202) 523-3894.

SUPPLEMENTARY INFORMATION:

Section 7A of the Clayton Act, 15 U.S.C. § 18a, as added by Title II of the Hart-Scott-Rodino Antitrust Improvements Act of 1976, requires persons contemplating certain mergers or acquisitions to give the Commission and Assistant Attorney General advance notice and to wait designated periods before consummation of such plans. Section 7A(b)(2) of the Act permits the agencies, in individual cases, to terminate this waiting period prior to its expiration and requires that notice of this action be published in the Federal Register.

By direction of the Commission

James A. Tobin,

Acting Secretary.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

National Institutes of Health

National Cancer Institute; Meetings for the Review of Grant Applications

Pursuant to Public Law 92-463, notice is hereby given of the meetings of committees advisory to the National Cancer Institute.

These meetings will be open to the public to discuss administrative details or other issues relating to committee business as indicated in the notice. Attendance by the public will be limited to space available.

These meetings will be closed to the public as indicated below in accordance with the provisions set forth in Sections 552b(c)(4) and 552b(c)(6), Title 5, U.S. Code and Section 10(d) of Public Law 92-463, for the review, discussion and evaluation of individual grant applications. These applications and the discussions could reveal confidential trade secrets or commercial property such as patentable material, and personal information concerning individuals associated with a the applications, the disclosure of which would constitute a clearly unwarranted invasion of personal privacy.

Mrs. Marjorie F. Early, Committee Management Officer, NCI, Building 31, Room 4B43, National Institutes of Health, Bethesda, Maryland 20205 (301/496-5708) will furnish summaries of the meetings and rosters of committee members, upon request. Other information pertaining to the meeting can be obtained from the Executive Secretary indicated. Meetings will be held at the National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205, unless otherwise stated.

Name of committee: Large Bowel and Pancreatic Cancer Review Committee (Large Bowel Subcommittee).
Dates: September 3-5, 1980.
Place: 10th Floor Dining Room, Prudential Building, Houston, Texas.
Times:
Open: September 3, 7:30 p.m.—8 p.m.
Closed: September 3, 8 p.m.—adjournment.
September 4, 8:30 a.m.—adjournment.
September 5, 8:30 a.m.—adjournment.
Closure reason: To review grant applications.
Executive secretary: Vincent J. Cairoli, Ph.D.
Address: Westwood Building, Room 855, National Institutes of Health.
Phone: 301/496-7194.

(Catalog of Federal domestic assistance Nos. 13.393, 13.394, 13.395, project grants in cancer cause and prevention research; cancer detection and diagnosis research and cancer treatment research, National Institutes of Health.)

Name of committee: Bladder and Prostatic Cancer Review Committee (Bladder Subcommittee).
Dates: September 8-9, 1980.
Place: Ramada Inn, 225 William F. McClellan Highway, East Boston, Massachusetts 02128.
Times:
Open: September 8, 1 p.m.—1:30 p.m.
Closed: September 8, 1:30—5 p.m. September 9, 8:30 a.m.—adjournment.
Closure reason: To review grant applications.

Agenda: To review the role of the National Cancer Advisory Board.
Executive Secretary: Dr. William A. Walter.
Address: Building 31, Room 10A03, National Institutes of Health.
Phone: 301/496-5147.

Name of committee: Board of Scientific Counselors, Division of Cancer Control and Rehabilitation.
Dates of meeting: September 18-19, 1980, 9 a.m.—adjournment.
Place of meeting: Building 31C, Conference Room 6, National Institutes of Health.
Open for the entire meeting:
Agenda: To review planning for several projects and the reorganization of the Division.
Executive Secretary: Dr. Robert G. Burnight.
Address: Blair Building, Room 7A17, National Institutes of Health.
Phone: 301/427-8630.

Name of committee: Bladder and Prostatic Cancer Review Committee.
Dates of meeting: September 22, 1980, 8:30 a.m.—adjourment.
Place of meeting: Roswell Park Memorial Institute, 666 Elm Street, Buffalo, N.Y.
Open for the entire meeting:
Agenda: Annual Program Review of the National Prostatic Project.
Executive Secretary: Dr. Andrew Chiarodo.
Address: Westwood Building, Room 853, National Institutes of Health.
Phone: 301/496-7194.

Name of committee: National Cancer Advisory Board Subcommittee on Centers and Contruction.
Dates of meeting: September 25-26, 1980, 8:30 a.m.—adjournment.
Place of meeting: Marriott Hotel, 2 Pooks Hill Road, Bethesda, Md.
Open for the entire meeting:
Agenda: To review guidelines for cancer centers.
Executive Secretary: Dr. Donald M. Pitcairn.
Address: Westwood Building, Room 832, National Institutes of Health.
Phone: 301/496-7491.

Name of committee: Board of Scientific Counselors, Division of Cancer Cause and Prevention.
Dates of meeting: September 29-30, 1980, 9 a.m.—adjournment.
Place of meeting: Building 31C, Conference Room 9, National Institutes of Health.
Open for the entire meeting:
Agenda: To discuss the extramural program of the Division.
Executive Secretary: Dr. David Howell.
Address: Building 31, Room 11A04, National Institutes of Health.
Phone: 301/496-6927.
Dated: August 1, 1980.

DEPARTMENT OF THE INTERIOR

Office of the Secretary

Performance Review Board Appointments

AGENCY: Department of the Interior.

ACTION: Notice of Performance Review Board appointments.

SUMMARY: This Notice provides the names of those individuals who have been appointed to serve as members of five of the Department of the Interior Performance Review Boards. The publication of these appointments is required by Section 405(a) of the Civil Service Reform Act of 1978 (Pub. L. 95-454; 5 U.S.C. 4314(c)(4)).

DATE: These appointments are effective on August 13, 1980.

FOR FURTHER INFORMATION CONTACT:

Morris A. Simms, Director of Personnel, Office of the Secretary, Department of the Interior, Room 5201, 1800 C Street, NW., Washington, D.C. 20240, Telephone number 343-6761.

Assistant Secretary—Energy and Minerals PRB: Doyle, G. Frederick, Chairperson (Replaces Joseph S. Cragwall)
Assistant Secretary—Policy, Budget and Administration PRB: Alan D. Powers (Replaces Lester P. Silverman)
Assistant Secretary—Indian Affairs PRB: Theodore Krenzke; Chairperson; Maurice W. Babby (Replaces Rick Lavis)
Assistant Secretary—Land and Water Resources PRB: Eugene Hinds (Replaces Joe Hall)
Solicitor PRB: Robert Uram, Chairperson; Gary Widman (Replaces John Leshy)

Dated: August 7, 1980.

William L. Kendig,

Deputy Assistant Secretary of the Interior.

BILLING CODE 4310-10-M

Geological Survey

Proposed Notice to Lessees and Operators, Outer Continental Shelf (OCS) Regions

AGENCY: U.S. Geological Survey, Department of the Interior.

ACTION: Proposed notice to lessees and operators in the Outer Continental Shelf concerning produced oil and gas exempt from royalty requirements.

SUMMARY: The purpose of this Notice is to solicit comments on the proposed Notice to Lessees and Operators (NTL). The proposed NTL would exempt from royalty payments all oil and gas unavoidably leaked, spilled, vented, flared or lost in OCS lease or unit operations, and is being issued so that royalty requirements comply with legal interpretations resulting from recent litigation. Currently, the only OCS producing areas are the Gulf of Mexico OCS and the Pacific OCS.

DATES: Comments must be received on or before September 12, 1980.

ADDRESSES: Responses should identify the subject matter and be directed to the Deputy Division Chief for Offshore Minerals Regulation, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092.

FOR FURTHER INFORMATION CONTACT:

Mr. Price McDonald, Chief, Branch of Offshore Field Operations, U.S. Geological Survey, National Center, Mail Stop 640, Reston, Virginia 22092, telephone 703/860-7571.

Robert L. Rioux

Deputy Division Chief, Offshore Minerals Regulation Conservation Division.

Proposed Notice to Lessees and Operators of Federal Oil and Gas Leases in the Outer Continental Shelf (OCS)

Royalty Payment Exemptions for Oil and Gas Produced From OCS Leases

This Notice supersedes the Gulf of Mexico's Notice 78–5 dated March 20, 1978 (and the Pacific OCS Area's NTL entitled "Royalty Payments on Oil and Gas Lost" dated November 1, 1974).

I. General

Effective June 1, 1974, royalty is not due on the following oil and/or gas production on OCS leases.

A. For All OCS Leases

1. Royalty is not due on oil that the Deputy Conservation Manager determines to have been unavoidably leaked, spilled, or lost in lease or unit operations.

2. Royalty is not due on gas that the Deputy Conservation Manager determines to have been unavoidably vented, flared, or lost in lease or unit operations.

B. For OCS Leases Issued Prior to June 1, 1974

For leases issued prior to June 1, 1974, in addition to the exemptions from royalty listed in part A, royalty is not due on gas used for purposes of production from operations upon the lease or unit area.

Royalty is due on all other oil and gas production, including production that is avoidably lost, and oil or gas used for purposes of production from and operations upon the lease or unit area. Gas used for reinjection within the same lease or unit is not liable for royalty until the time it is finally produced.

II. Definitions

A. "Unavoidably lost" production shall mean that oil or gas which is lost because of line failures, equipment malfunctions, blowouts, fires, or otherwise if the Deputy Conservation Manager determines that said loss did not result from the negligence or the failure of the lessee or operator to take all reasonable measures to prevent and/or to control the loss. Unavoidably vented or flared gas includes flaring approved by the Deputy Conservation Manager.

B. "Avoidably lost" production shall mean the venting or flaring of produced gas without the authorization, approval, ratification, or acceptance of the Deputy Conservation Manager and the loss of produced oil or gas as a result of (1) negligence on the part of the lessee or operator; (2) the failure of the lessee or operator to take all reasonable measures to prevent and/or to control the loss; (3) the failure of the lessee or operator to comply fully with the applicable lease terms, regulations, OCS Orders, or the prior written orders of the Deputy Conservation Manager; or (4) any combination of the foregoing.

III. Volume Determination

If separate measurements are not available for gas and/or oil volumes that are flared, vented, spilled, and avoidably or unavoidably lost, these volumes shall be estimated by comparison with the last measured throughput, well production tests, or such other methods as may be approved by the Deputy Conservation Manager. The volume and value of all oil and gas on which royalty is due shall be reported on Form 9–153, Monthly Report of Sales and Royalty. Payments therefore shall be reported on Form 9–614–A, Rental and Royalty Remittance Advice. All volumes of oil and gas produced shall be reported on Form 9–152, Monthly Report of Operations.

IV. Refunds

Lessees and operators who submitted royalty payments under the provisions of Gulf of Mexico NTL 74–14, NTL 74–20, and NTL 78–5 or under Pacific OCS Area NTL's dated June 28, 1974, and November 1, 1974, may apply for a refund of those payments made for (1) oil that was unavoidably leaked, spilled, or lost and (2) gas that was unavoidably vented, flared, or lost. Applications for refunds shall be in form of a letter signed by an authorized officer or agent of the lessee/operator and for *each individual lease* shall include:

1. The lease prefix code and lease number.

2. The specific month and year.

3. The product code (01, 02, 03, 04, 41, or 43) used in the reports and payments previously submitted.

4. The volume of exempt oil and/or gas previously reported and the amount of the refund requested.

5. The total amount of refund requested for each lease as a subtotal.

6. The total amount of the refund requested for all leases as a grand total.

Additional instructions in regard to the filing and contents of said applications may be obtained by contacting the Deputy Conservation Manager having jurisdiction over the lease or leases involved.

[FR Doc. 80-24436 Filed 8-12-80; 8:45 am]

BILLING CODE 4310-31-M

Bureau of Land Management

[OR 5546]

Oregon; Proposed Continuation of Withdrawal

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by Public Land Order 4839 on June 1, 1970, be continued in its entirety for a 20-year period, pursuant to section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714. The withdrawn land is described as follows:

Willamette Meridian

Revested Oregon and California Railroad Grant Land

T. 10 S. R. 1 E.,
Sec. 31, fractional NW¼NW¼, NE¼NW¼, and N½NE¼.

The area described contains 158.44 acres in Linn County, Oregon.

The purpose of the withdrawal is to protect the public recreation and scientific study values within the Rogers Mountain Petrified Wood Area. The land is currently segregated from location and entry under the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

On or before September 22, 1980, all persons who wish to submit comments, suggestions, or objections in connection with the proosed withdrawal continuation may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned before September 22, 1980. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. Public hearings are scheduled and conducted in accordance with BLM Manual Sec. 2351.16B.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for; and an agreement is reached on the concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final determination on the continuation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: August 4, 1980.

Harold A Berends,

Chief, Branch of Lands and Minerals Operations.

[FR Doc. 80-24461 Filed 8-12-80; 8:45 am]

BILLING CODE 4310-84-M

[OR 8754]

Oregon; Proposed Continuation of Withdrawl

The Bureau of Land Management, U.S. Department of the Interior, proposes that the existing land withdrawal made by Public Land Order 5229 on July 14, 1972, be continued in its entirety for a 20-year period, pursuant to section 204 of the Federal Land Policy and Management Act of October 21, 1976, 90 Stat. 2751, 43 U.S.C. 1714. The withdrawn land is described as follows:

Willamette Meridian

Revested Oregon and California Railroad Grant Land

T. 15 S., R. 1 W.,
Sec. 29, W½SW¼SW¼;
Sec. 30, S½SW¼NE¼, N½SE¼, NE¼SW¼SE¼, and SE¼SE¼;
Sec. 31, E½E½NE¼, and NW¼NE¼NE¼;
Sec. 32, W½W½NW¼.

The area described contains 260 acres in Lane County, Oregon.

The purpose of the withdrawl is to protect the recreational values within the Shotgun Recreation Site. The land is currently segregated from location and entry under the public land laws generally, including the mining laws, but not the mineral leasing laws. No change is proposed in the purpose or segregative effect of the withdrawal.

On or before September 22, 1980, all persons who wish to submit comments, suggestions, or objections in connection with the proposed withdrawl continuation may present their views in writing to the undersigned authorized officer of the Bureau of Land Management.

Notice is hereby given that an opportunity for a public hearing is afforded in connection with the proposed withdrawal continuation. All interested persons who desire to be heard on the proposal must submit a written request for a hearing to the undersigned before September 22, 1980. Upon determination by the State Director, Bureau of Land Management, that a public hearing will be held, a notice will be published in the **Federal Register** giving the time and place of such hearing. Public hearings are scheduled and conducted in accordance with BLM Manual Sec. 2351.16B.

The authorized officer of the Bureau of Land Management will undertake such investigations as are necessary to determine the existing and potential demands for the land and its resources. He will review the withdrawal rejustification to insure that continuation would be consistent with the statutory objectives of the programs for which the land is dedicated; the area involved is the minimum essential to meet the desired needs; the maximum concurrent utilization of the land is provided for; and an agreement is reached on the concurrent management of the land and its resources. He will also prepare a report for consideration by the Secretary of the Interior, the President, and Congress, who will determine whether or not the withdrawal will be continued and if so, for how long. The final dtermination on the contiunation of the withdrawal will be published in the **Federal Register**. The existing withdrawal will continue until such final determination is made.

All communications in connection with this proposed withdrawal continuation should be addressed to the undersigned officer, Bureau of Land Management, U.S. Department of the Interior, P.O. Box 2965, Portland, Oregon 97208.

Dated: August 4, 1980.

Harold A. Berends,

Chief, Branch of Lands and Minerals Operations.

BILLING CODE 4310-84-M

INTERSTATE COMMERCE COMMISSION

[Ex Parte No. MC-122]

Motor Carriers; Intercorporate Hauling; Discontinuance of Proposed Policy Statement

AGENCY: Interstate Commerce Commission.

ACTION: Notice of discontinuance of proposed policy statement.

SUMMARY: The Commission is discontinuing its consideration of a Proposed Policy Statement on compensated intercorporate hauling (44 FR 42838, July 20, 1979). The Commission takes this action because Congress preempted the subject in the Motor Carrier Act of 1980.

DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT:
Melvin B. Werner (202) 275–7987;
or
Edward E. Guthrie (202) 275–7691.

SUPPLEMENTARY INFORMATION: This proceeding was initiated by a notice served on July 16, 1979, and published at 44 FR 42838, July 20, 1979.

The notice incorporated a staff report entitled "Evaluation of Intercorporate Hauling Regulation," dated May 1979. The report found a need to modify or eliminate existing restrictions against compensated intercorporate hauling (CIH) operations. The notice proposed to authorize these operations where parent-subsidiary ownership is at a level of 80 percent or greater. General regulatory power given to the Commission in 49 U.S.C. 10321(a) formed the basis for the proposal.

Public comments were requested, and the Commission, after considering the comments, determined that action should be withheld pending Congressional action on proposed motor carrier reform legislation. Section 9 of the Motor Carrier Act of 1980 (Pub. L. 96–296, 94 Stat. 793) specificially addresses the area of CIH operations. It amends 49 U.S.C 10524 by enabling companies to intiate CIH operations where there exists 100-percent ownership of a subsidiary by a parent corporation, subject to certain notice requirements. The legislation has definitively resolved the matters considered in this proceeding and effectively preempts Commission action in the area.

The Motor Carrier Act of 1980 imposes certain conditions on CIH operations. By notice served July 2, 1980, in Ex Parte No. MC–122 (Sub-No. 1), *Implementation of Intercorporate Hauling Reform Legislation*, 45 FR 45526

(July 3, 1980), the Commission adopted interim procedures under which compliance may be made with Section 9 of the Motor Carrier Act of 1980, and requested comments on their suitability as final rules. Given the preemption of the area under consideration in the lead proceeding in this docket and the Commission's implementation of legislation in that regard, no further action is necessary or proper in this proceeding. Accordingly, it is discontinued.

This decision does not significantly affect the quality of the human environment or the conservation of energy resources.

Decided: August 6, 1980.

By the Commission. Chairman Gaskins, Vice Chairman Gresham, Commissioners, Stafford, Clapp, Trantum, Alexis, and Gilliam.

Agatha L. Mergenovich,

Secretary.

Correction

In FR Doc. 80-14162 appearing at page 30723 in the issue of Friday, May 9, 1980, on page 30725, first column, line 18, "Omah" should be corrected to read "Omaha".

BILLING CODE 1505-01-M

[Ex Parte No. MC-43]

Lease and Interchange of Vehicles by Motor Carrier

Decided: July 28, 1980.

Casket Distributers, Inc. (MC-135152), lessor, has filed an application for approval of contract carrier rental contract No. 4-8015 with National Casket Co., of Lancaster, KY, lessee, under Paragraph (d) of Section 1057.41 of the Lease and Interchange of Vehicles Regulations (49 CFR Part 1057).

Findings:

1. Applicant prior to filing the application had converted to a common carrier.

2. Paragraph (d) of Section 1057.41 authorizes only contract carriers to lease equipment to shippers with Commission approval. Common carriers are not authorized to do so.

It is ordered:

1. The application for approval for contract carrier rental contract No. 4-8015 is dismissed.

By the Commission, Motor Carrier Leasing Board, Board Members Joel E. Burns, Robert S. Turkington, John H. O'Brien.

Agatha L. Mergenovich,

Secretary.

[FR Doc. 80-24406 Filed 8-12-80; 8:45 am]

BILLING CODE 7035-01-M

Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the Federal Register on July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application must follow the rules under 49 CFR 1100.247(B). Applications may be protested *only* on the grounds that applicant is not fit, willing, and able to provide the transportation service and to comply with the appropriate statutes and Commission regulations. A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Chandler, Eaton, and Liberman. Liberman not participating.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

Transporting *general commodities* (except used household goods, hazardous or secret materials, and sensitive weapons and munitions), for the United States Government, between points in the U.S.

[FR Doc. 80-24409 Filed 8-12-80; 8:45 am]

BILLING CODE 7035-01-M

Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after July 3, 1980, are governed by Special Rule 247 of the Commission's Rules of Practice, see 49 CFR 1100.247. Special rule 247 was published in the Federal Register on July 3, 1980, at 45 FR 45539.

Persons wishing to oppose an application, must follow the rules under 49 CFR 1100.247(B). A copy of any application, together with applicant's supporting evidence, can be obtained from any applicant upon request and payment to applicant of $10.00.

Amendments to the request for authority are not allowed. Some of the applications may have been modified prior to publication to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.g., unresolved common control, fitness, water carrier dual operations, or jurisdictional questions) we find, preliminarily, that each applicant has demonstrated its proposed service warrants a grant of the application under the governing section of the Interstate Commerce Act. Each applicant is fit, willing, and able to perform the service proposed, and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulations. Except where noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In the absence of legally sufficient protests in the form of verified statements filed within 45 days of publication of this decision-notice (September 29, 1980) (or, if the application later becomes unopposed) appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notice that the decision-notice is effective. Within 60 days after publication an applicant may file a verified statement in rebuttal to any statement in opposition.

To the extent that any of the authority granted may duplicate an applicant's other authority, the duplication shall be construed as conferring only a single operating right.

By the Commission, Review Board Number 2, Members Chandler, Eaton, and Liberman.

Agatha L. Mergenovich,

Secretary.

Note.—All applications are for authority to operate as a motor common carrier in interstate or foreign commerce over irregular routes, unless noted otherwise. Applications for motor contract carrier authority are those where service is for a named shipper "under contract".

MC 105808 (Sub-11F), filed July 23, 1980. Applicant: PLYMOUTH ROCK TRANSPORTATION CORPORATION, 1230 Massachusetts Avenue, Boston, MA 02125. Representative: Frank J. Weiner, 15 Court Square, Boston, MA 02108. Transporting *general commodities* (except classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment) (1) over regular routes, serving all points in RI as off-route points in connection with carrier's otherwise authorized regular-route operations, and (2) over irregular routes, between points in MA and RI, on the one hand, and, on the other, points in NJ and PA.

Note.—Applicant currently holds authority to serve all points in RI (except points in Washington County and those points in Kent County, RI, west of RI Hwy 102), and points in Bergen, Essex, Hudson, Hunterdon, Mercer, Middlesex, Monmouth, Morris, Passaic, Somerset, Union, and Warren Counties, NJ. By this application applicant seeks to provide single-line service in substitution of joint/line service.

MC 107839 (Sub-192F), filed July 28, 1980. Applicant: DENVER-ALBUQUERQUE MOTOR TRANSPORT, INC., 2121 East 67th Ave., Denver, CO 90216. Representative: David E. Driggers, Suite 10, 1600 Lincoln Center, 1660 Lincoln Street, Denver, CO 80264. Transporting *food or kindred products* as described in Item 20 of the Standard Transportation Commodity Code Tariff, between points in Finney County, KS, on the one hand, and, on the other, points in AL, FL, GA, MS, NC, SC, and TN.

MC 110098 (Sub-187F), filed July 25, 1980. Applicant: ZERO REFRIGERATED LINES, 1400 Ackerman Road (Box 20380), San Antonio, TX 78220. Representative: T. W. Cothren (same address as applicant). Transporting *meats, meat products and meat by-products and articles distributed by meat-packing houses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates* 61 M.C.C. 209 and 766 (except hides and commodities in bulk), between the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, on the one hand, and, on the other, those points in the U.S. in and west of MI, OH, KY, MO, AR, and LA (except AK and HI).

MC 117119 (Sub-829F), filed July 28, 1980. Applicant: WILLIS SHAW FROZEN EXPRESS, INC., P.O. Box 188, Elm Springs, AR 72728. Representative: L. M. McLean (same address as applicant). Transporting *meat, meat products, meat by-products, and articles distributed by meat-packing houses,* as described in sections A and C of Appendix I to the Report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS to points in the U.S.

MC 119789 (Sub-709F), filed July 24, 1980. Applicant: CARAVAN REFRIGERATED CARGO, INC., P.O. Box 226188, Dallas, TX 75266. Representative: James K. Newbold, Jr. (same address as applicant). *Meat, meat products and meat byproducts, and articles distributed by meat-packing houses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, to points in the U.S. (except AK and HI).

MC 121568 (Sub-43F), filed July 21, 1980. Applicant: HUMBOLDT EXPRESS, INC., 345 Hill Ave., Nashville, TN 37210. Representative: James G. Caldwell (same address as applicant). Over regular routes, transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Memphis, TN, and Texarkana, TX: from Memphis over Interstate Hwy 40 to junction Interstate Hwy 30, then over Interstate Hwy 30 to Texarkana, and return over the same route, serving all intermediate points, (2) between Memphis, TN, and Jonesboro, AR, over U.S. Hwy 63, serving all intermediate points; and (3) serving those points in AR on and north of U.S. Hwy 70 as off-route points in connection with applicant's existing regular-route authority.

MC 138308 (Sub-120F), filed July 24, 1980. Applicant: KLM, INC., Old Highway 49 South, P.O. Box 6098, Jackson, MS 39208. Representative: Donald B. Morrison, P.O. Box 22628, Jackson, MS 39205. Transporting *meats, meat products and meat by-products and articles distributed by meat packinghouses* as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, to points in AL, AZ, AR, CA, CO, FL, GA, ID, LA, MS, MT, NV, NM, NC, OK, OR, SC, TN, TX, UT, WA and WY.

MC 138328 (Sub-120F), filed July 28, 1980. Applicant: CLARENCE L. WERNER, d.b.a. WERNER ENTERPRISES, I–80 & Hwy 50, P.O. Box 37308, Omaha, NE 68137. Representative: Donna Ehrlich (same as applicant). *General commodities* (except commodities in bulk, those requiring special equipment, commodities of unusual value, classes A and B explosives, and household goods as defined by the Commission), between points in the United States, restricted to traffic originating at or destined to the facilities used by Ardan, Inc.

MC 140829 (Sub-369F), filed July 28, 1980. Applicant: CARGO, INC., P.O. Box 206, U.S. Hwy 20, Sioux City, IA 51102. Representative: David L. King (same address as applicant). Transporting *meats, meat products, and meat byproducts, and articles distributed by meat-packing houses* as described in sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates,* 61 M.C.C. 209 and 766 (except commodities in bulk), from the facilities of Iowa Beef Processors, Inc., at or near Holcomb, KS, to points in the U.S.

MC 145818 (Sub-2F), filed July 24, 1980. Applicant: AMERICAN TRANSPORT, INC., 4915 N. Lincoln Blvd., Oklahoma City, OK 73105. Representative: C. L. Phillips, Room 248, Classen Terrace Bldg., Oklahoma City, OK 73106. Transporting (1) *farm grain bins, buildings, aeration equipment, and auguring equipment,* and (2) *materials, equipment, and supplies* used in the manufacture of the commodities in (1) above, between points in SD, ND, IA, MN, WI, IL, IN, MO, AR, LA, TX, OK, KS, NE, NM, CO, WY, and MT, under continuing contract(s) with Agra Sun Systems, Inc., and Wholesale Farm Supply, both of Oklahoma City, OK, and Conrad-American, Inc., of Houghton, IA.

MC 150148 (Sub-1F), filed July 23, 1980. Applicant: KANAWHA CARTAGE COMPANY, a corporation, 85 East Gay Street, Columbus, OH 43215. Representative: Homer W. Hanna, Jr., 1510 Kanawha Boulevard East, P.O. Box 2311, Charlestown, WV 25328. Transporting *alcoholic beverages,* and *equipment and supplies* used by alcoholic beverage control stores and agencies, between Charlestown, WV, on the one hand, and, on the other points in WV, under continuing contract(s) with the West Virginia Alcohol Beverage Control Commission, of Charlestown, WV.

Volume No. OP3–005

Decided: August 1, 1980.

By the Commission, Review Board No. 2, Members Chandler, Eaton and Liberman.

BILLING CODE 7035-01-M

Permanent Authority Decisions; Decision-Notice

The following applications, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's *Rules of Practice* (49 CFR § 1100.247). These rules provide, among other things, that a petition for intervention, either in support of or in opposition to the granting of an application, must be filed with the Commission within 30 days after the date notice of the application is published in the **Federal Register**. Protests (such as were allowed to filings prior to March 1, 1979) *will be rejected.* A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that it (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(1) setting forth the specific grounds upon which it is made, including a detailed statement of petitioner's interest, the particular facts, matters, and things relied upon, including the extent, if any, to which petitioner (a) has solicited the traffic or business of those supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace. The Commission will also consider (a) the nature and extent of the property, financial, or other interest of the petitioner, (b) the effect of the decision which may be rendered upon petitioner's interest, (c) the availability of other means by which the petitioner's interest might be protected, (d) the extent to which petitioner's interest will be represented by other parties, (e) the extent to which petitioner's participation may reasonably be expected to assist in the development of a sound record, and (f) the extent to which participation by the petitioner would broaden the issues or delay the proceeding.

Petitions not in reasonable compliance with the requirements of the rule may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission indicating the specific rule under which the petition to intervene is being filed, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Section 247(f) provides, in part, that an applicant which does not intend to timely prosecute its application shall promptly request that it be dismissed, and that failure to prosecute an application under the procedures of the Commission will result in its dismissal.

If an applicant has introduced rates as an issue it is noted. Upon request, an applicant must provide a copy of the tentative rate schedule to any protestant.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

Any authority granted may reflect administrative acceptable restrictive amendments to the service proposed below. Some of the applications may have been modified to conform to the Commission's policy of simplifying grants of operating authority.

Findings: With the exception of those applications involving duly noted problems (e.g., unresolved common control, unresolved fitness questions, and jurisdictional problems) we find, preliminarily, that each common carrier applicant has demonstrated that its proposed service is required by the present and future public convenience and necessity, and that each contract carrier applicant qualifies as a contract carrier and its proposed contract carrier service will be consistent with the public interest and the transportation policy of 49 U.S.C. 10101. Each applicant is fit, willing, and able properly to perform the service proposed and to conform to the requirements of Title 49, Subtitle IV, United States Code, and the Commission's regulation. Except where specifically noted, this decision is neither a major Federal action significantly affecting the quality of the human environment nor a major regulatory action under the Energy Policy and Conservation Act of 1975.

In those proceedings containing a statement or note that dual operations are or may be involved we find, preliminarily and in the absence of the issue being raised by a petitioner, that the proposed dual operations are consistent with the public interest and the transportation policy of 49 U.S.C. 10101 subject to the right of the Commission, which is expressly reserved, to impose such terms, conditions or limitations as it finds necessary to insure that applicant's operations shall conform to the provisions of 49 U.S.C. 10930(a) [formerly section 210 of the Interstate Commerce Act].

In the absence of legally sufficient petitions for intervention, filed within 30 days of publication of this decision-notice (or, if the application later becomes unopposed), appropriate authority will be issued to each applicant (except those with duly noted problems) upon compliance with certain requirements which will be set forth in a notification of effectiveness of the decision-notice. To the extent that the authority sought below may duplicate an applicant's other authority, such duplication shall be construed as conferring only a single operating right.

Applicants must comply with all specific conditions set forth in the following decision-notices within 30 days after publication, or the application shall stand denied.

Note.—All applications are for authority to operate as a common carrier, by motor vehicle, in interstate or foreign commerce, over irregular routes, except as otherwise noted.

MC 200 (Sub-457F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *aluminum, steel, and vinyl siding,* and *materials, equipment and supplies* used in the distribution and installation of the foregoing commodities (except commodities in bulk), (1) from the facilities of Wolverine Aluminum, at or near Jackson, MI, to points in NC, ND, NH, SC, SD, TN, and UT, restricted to traffic originating at the named origin and destined to the indicated destinations, and (2) serving Jackson, MI, as an off-route point in connection with carrier's regular-route authority.

MC 200 (Sub-458F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *starch* (except in bulk), from Kansas City, MO, to Hanover, PA, restricted to traffic originating at the named origin and destined to the indicated destination.

MC 200 (Sub-459F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *toilet preparations,* from the facilities of Vi-Jon Laboratories, Inc., at or near San Leandro, CA, to points in NV, restricted to traffic originating at the named origin and destined to the indicated destinations.

MC 200 (Sub-460F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *clothing,* from points in CA to Cleveland, OH, and Fall River, MA, restricted to traffic originating at the named origins and destined to the indicated destinations.

MC 200 (Sub-461F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *data processing devices, duplicating equipment, copying equipment,* and *materials and supplies* used in the manufacture and distribution of all the foregoing commodities, from the facilities of A. B. Dick Co., at or near Manchester, NH, to Niles, IL, restricted to traffic originating at the named origin and destined to the indicated destination.

MC 200 (Sub-462F), filed June 18, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *iron and steel nuts, bolts, and washers,* between the facilities of Sterling Bolt Co., at or near Dallas and Houston, TX, Tulsa, OK, and Omaha, NE, on the one hand, and, on the other, points in the U.S. (except AK and HI), restricted to traffic originating at and destined to the indicated points.

MC 200 (Sub-463F), filed June 19, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *plastic sheet and plate,* from the facilities of Impact Extrusions, at or near Grand Prairie, TX, to the facilities of Triangle Plastics at or near Winthrop, IA, restricted to traffic originating at the named origin and destined to the indicated destination.

MC 200 (Sub-464F), filed June 19, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the facilities of Riegel Textile at or near Maryville, MO, as an off-route point in connection with applicant's regular-route authority, restricted to traffic originating at the named origin and destined to the indicated destinations.

MC 200 (Sub-465F), filed June 23, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), from the facilities of Colgate-Palmolive Corp., at Jeffersonville, IN, to Atlanta, GA, New Orleans, LA, Memphis, TN, Birmingham, AL, Jacksonville, FL, Greenville, SC, and Raleigh, NC, restricted to traffic originating at the named origin and destined to the indicated destinations.

MC 200 (Sub-466F), filed June 23, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *such commodities* as are dealt in by wholesale, retail, and chain grocery and food business houses, between the facilities of Safeway Stores, at or near Dallas and Denison, TX, and Chester and Richmond, VA, restricted to traffic originating at and destined to the indicated destinations.

MC 200 (Sub-467F), filed June 23, 1980. Applicant: RISS INTERNATIONAL CORPORATION, P.O. Box 100, 215 W. Pershing Road, Kansas City, MO 64141. Representative: H. Lynn Davis (same address as applicant). Transporting *rubber hose,* between the facilities of Uniroyal, Inc., at or near Red Oak, IA, and Maryville, MO, on the one hand, and, on the other, points in the U.S. (except AK and HI), restricted to traffic originating at and destined to the indicated points.

MC 531 (Sub-447F), filed April 18, 1980. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs, P.O. Box 14048, Houston, TX 77021. Representative: Wray E. Hughes (same address as applicant). Transporting *liquid, petroleum and petroleum products* in bulk, in tank vehicles, from the facilities of Exxon Company, U.S.A. at or near Baton Rouge, LA, to points in the U.S. (except AK and HI).

MC 531 (Sub-448F), filed April 18, 1980. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs, P.O. Box 14048, Houston, TX 77021. Representative: Wray E. Hughes (same address as applicant). Transporting *liquid chemicals,* in bulk, in tank truck vehicles, from the facilities of Reichhold Chemical Company at Tuscaloosa, AL, to points in the U.S. (except AK and Hi).

MC 531 (Sub-450F), filed June 23, 1980. Applicant: YOUNGER BROTHERS, INC., 4904 Griggs, P.O. Box 14048, Houston, TX 77021. Representative: Wray E. Hughes (same address as applicant). Transporting *liquid chemicals,* (except cryogenics), in bulk,

in tank vehicles, from Troy, MI, to points in CA, OR, and WA.

MC 2960 (Sub-40F), filed June 19, 1980. Applicant: ENGLAND TRANSPORTATION COMPANY OF TEXAS, INC., 2301 McKinney St., Houston, TX 77023. Representative: E. Larry Wells, P.O. Box 45538, Dallas, TX 75245. Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between Dallas, TX, on the one hand, and, on the other, points in TX, restricted to traffic moving in foreign commerce.

MC 9291 (Sub-15F), filed May 6, 1980. Applicant: CARROL BALL TRANSPORT, INC., 312 E. Market, Centerville, KS 66014. Representative: Clyde N. Christey, Ks Credit Union Bldg, 1010 Tyler, Suite Suite 110L, Topeka, KS 66612. Transporting *iron and steel articles and mechanical tubing,* from the facilities of Maverick Tube Corp, at or near Union, MO, to points in IA, KS, NE, AR, OK and TX.

MC 9291 (Sub-16F), filed May 6, 1980. Applicant: CARROL BALL TRANSPORT, INC., 312 E. Market, Centerville, KS 66014. Representative: Clyde N. Christey, Ks Credit Union Bldg., 1010 Tyler Suite 110L, Topeka, KS 66612. Transporting *such commodities* as are dealt in or used by manufacturers and distributors of containers (except commodities in bulk), between the facilities of Hoover Universal, Inc., Beverage Bottling Div., at or near Lenexa, KS, on the one hand, and, on the other, points in OK and NE.

MC 11220 (Sub-211F), filed May 18, 1980. Applicant: GORDONS TRANSPORTS, INC., 185 West McLemore Avenue, Memphis, TN 38101. Representative: James J. Emigh, P.O. Box 59, Memphis, TN 38101. Transporting *iron and steel articles* from Dover, OH, to points in AL, AR, GA, IL, IN, IA, KS, KY, LA, MI, MN, MO, MS, NE, OK, PA, SC, TN, TX, WI, and WV.

MC 17000 (Sub-24F), filed June 18, 1980. Applicant: HOHENWALD TRUCK LINES, INC., P.O. Box 196, Hohenwald, TN 38462. Representative: Robert L. Baker, 618 United American Bank Bldg., Nashville, TN 37219. Transporting *automotive parts and commodities* used in the manufacture and distribution of automotive parts, between Linden, TN, on the one hand, and, on the other, points in NY and IN.

MC 19201 (Sub-139F), filed June 23, 1980. Applicant: PENNSYLVANIA TRUCK LINES, INC., 49th St. and Parkside Ave., Philadelphia, PA 19131. Representative: S. Berne Smith, P.O. Box 1166, Harrisburg, PA 17108. Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between Cleveland, Columbus, and Toledo, OH, Detroit, MI, St. Louis, MO, Chicago, IL, Elkhart and Indianapolis, IN, and Louisville, KY, on the one hand, and, on the other, points in IL, IN, KY, and the Lower Peninsula of MI, OH, those points in PA on the west of U.S. Hwy 15, and WV, and (2) between Cincinnati, OH, on the one hand, and, on the other, points in IL, the Lower Peninsula of MI, OH, those in PA on and west of U.S. Hwy 15, and WV, restricted in (1) and (2) to traffic having a prior or subsequent movement by rail or water.

MC 29910 (Sub-266F), filed June 19, 1980. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th St., Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood Ave., Fort Smith, AR 72902. Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving the facilities of Jacobsen Textron at or near Prentiss, MS, as an off-route point in connection with applicant's otherwise authorized regular-route operations.

MC 29910 (Sub-267F), filed June 19, 1980. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th St., Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood Ave., Fort Smith, AR 72902. Transporting *lumber, lumber products,* and *wood products,* from Navajo, MN, to points in the U.S. (except AK and HI), restricted to traffic originating at the facilities of Navajo Forest Products Industries.

MC 29910 (Sub-268F), filed June 23, 1980. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th St., Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood Ave., Fort Smith, AR 72902. Transporting *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between the facilities of Huffy Corporation, at or near Ponca City, OK, on the one hand, and, on the other, points in the U.S. (except AK and HI), restricted to traffic originating at or destined to the facilities of Huffy Corporation.

MC 29910 (Sub-269F), filed June 17, 1980. Applicant: ARKANSAS-BEST FREIGHT SYSTEM, INC., 301 South 11th St., Fort Smith, AR 72901. Representative: Don A. Smith, P.O. Box 43, 510 North Greenwood Ave., Fort Smith, AR 72902. Transporting *general commodities* (except those of unusual value, classes A and B explosives household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), serving Houma and Thibodaux, LA, as off-route points in connection with carrier's otherwise authorized regular-route operations.

Note.—Applicant intends to tack the sought rights to its existing regular route authority.

MC 47171 (Sub-168F), filed April 18, 1980. Applicant: COOPER MOTOR LINES, INC., P.O. Box 2820, Greenville, SC 29602. Representative: Harris G. Andrews (same address as applicant). Transporting *general commodities* except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commdities in bulk, and those requiring special equipment), between the facilities of Richardson Company at points in the United States east of a line beginning at the mouth of the Mississippi River, and extending along the Mississippi River to its junction with the western boundary of Itasca County, MN, then northward along the western boundaries of Itasca and Koochiching Counties, MN, to the international boundary line between the United States and Canada.

BILLING CODE 7035-01-M

Motor Carrier Temporary Authority Applications

The following are notices of filing of applications for temporary authority under Section 10928 of the Interstate Commerce Act and in accordance with the provisions of 49 CFR 1131.3. These rules provide that an original and two (2) copies of protests to an application may be filed with the Regional Office named in the **Federal Register** publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the **Federal Register.** One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the ICC Regional Office to which protests are to be transmitted.

Note.—All applications seek authority to operate as a common carrier over irregular routes except as otherwise noted.

Motor Carriers of Property

The following applications were filed in Region 2. Send protests to: ICC, Federal Reserve Bank Bldg., 101 N. 7th St. Room 620, Philadelphia, PA 19106.

Secretary.

[FR Doc. 80-24407 Filed 8-12-80; 8:45 am]
BILLING CODE 7035-01-M

Volume No. 25

Petitions, applications, finance matters (including temporary authorities), alternate route deviations, intrastate applications, Gateways, and Pack & Crate.

Petitions for Modification, Interpretation or Reinstatement of Motor Carrier Operating Rights Authority

The following petitions seek modification or interpretation of existing motor carrier operating rights authority, or reinstatement of terminated motor carrier operating rights authority.

All pleadings and documents must clearly specify the suffix numbers (e.g., M1 F, M2 F) where the docket is so identified in this notice.

The following petitions, filed on or after March 1, 1979, are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a *petition to intervene either with or without leave* must be filed with the Commission within 30 days after the date of publication in the **Federal Register** with a copy being furnished the applicant. Protests to these applications will be *rejected.*

A petition for intervention without leave must comply with Rule 247(k) which requires petitioner to demonstrate that if (1) holds operating authority permitting performance of any of the service which the applicant seeks authority to perform, (2) has the necessary equipment and facilities for performing that service, and (3) has performed service within the scope of the application either (a) for those supporting the application, or, (b) where the service is not limited to the facilities of particular shippers, from and to, or between, any of the involved points.

Persons unable to intervene under Rule 247(k) may file a petition for leave to intervene under Rule 247(l). In deciding whether to grant leave to intervene, the Commission considers, among other things, whether petitioner has (a) solicited the traffic or business of those persons supporting the application, or, (b) where the identity of those supporting the application is not included in the published application notice, has solicited traffic or business identical to any part of that sought by applicant within the affected marketplace. Another factor considered is the effects of any decision on petitioner's interests.

Samples of petitions and the text and explanation of the intervention rules can be found at 43 FR 50908, as modified at 43 FR 60277.

Petitions not in reasonable compliance with these rules may be rejected. Note that Rule 247(e), where not inconsistent whith the intervention rules, still applies. Especially refer to Rule 247(e) for requirements as to supplying a copy of conflicting authority, serving the petition on applicant's representative, and oral hearing requests.

MC 4405 (Sub-295(MIF) (notice of filing of petition to remove restrictions), filed June 23, 1980. Petitioner: DEALERS TRANSIT, INC., P.O. Box 236, Tulsa, OK 74101. Representative: Thomas J. Van Osdel, 502 First National Bank Bldg., Fargo, ND 58126. Petitioner holds a motor *common carrier* certificate in MC 4405 (Sub-295), issued March 30, 1960, authorizing transportation, over irregular routes, of *trailers and trailer chassis*, other than those designed to be drawn by passenger automobiles, in initial movements, in truckaway and driveway service, from the site of the Fruehauf Trailer Company (Independent Metal Products) plants at Fresno, CA to points in the United States (except AK and HI); *truck-tractors*, in secondary movements, in driveaway service, only when drawing trailers moving in initial movements in driveaway service, from the site of the Fruehauf Trailer Company (Independent Metals Products) plant at Fresno, CA to points in AZ, NV, OR, and VT, *truck and trailer bodies* from the site of the Fruehauf Trailer Company (Independent Metal Products) plant at Fresno, CA to points in the United States (except AK and HI). By the instant petition, petitioner seeks to modify the above authority by removing the plantsite restrictions.

MC 19105 (Sub-51(MIF) (notice of filing of petition to modify territory description), filed June 13, 1980. Petitioner: FORBES TRANSFER COMPANY, INC., P.O. Box 3544, Wilson, NC 27893. Representative: Lawrence E. Lindeman, 1032 Pennsylvania Building, Pennsylvania Ave. & 13th St., N.W., Washington, DC 20004. Petitioner holds motor *common carrier* authority in certificate no. MC 19105 (Sub-51) issued February 28, 1979 authorizing transportation, over irregular routes, of *malt beverages*, in containers, from Williamsburg, VA to points in NC in and east of Granville, Durham, Chatham, Lee, Harnett, Cumberland and Robeson Counties, NC. By the instant petition, petitioner seeks to modify the territory description so as to read from Williamsburg, VA to points in NC.

MC 30374 (Sub-23) (M1F) (notice of filing of petition to modify certificate), filed June 23, 1980. Petitioner: TRI-STATE TRANSPORTATION CO., INC., P.O. Box 488, Bellmawr, NJ 08031. Representative: Michael R. Werner, 167 Fairfield Rd., P.O. Box 1409, Fairfield, NJ 07006. Petitioner holds a motor common carrier certificate in MC 30374 (Sub-23), issued October 19, 1976, authorizing the transportation, over irregular routes, of *wearing apparel*, loose, on hangers, between Baltimore and Frederick, MD, on the one hand, and, on the other points in Washington, DC, commercial zone and those in Fairfax County, VA. By the instant petition, petitioner seeks to modify the authority so as to read: (1) *wearing apparel*, on hangers and in cartons, (2) *materials, supplies and equipment* used in the manufacture of wearing apparel, and (3) *department store merchandise* moving in mixed loads with (1) and (2), between Baltimore and Frederick, MD, on the one hand, and, on the other, points in Fairfax County, VA, and Washington, DC.

MC 50935 (Sub-11) (M1F) (notice of filing of petition to modify certificate), filed June 18, 1980. Petitioner: WOLVERINE TRUCKING COMPANY, 1020 Doris Road, Pontiac, MI 48057. Representative: Robert E. McFarland, 999 West Big Beaver Road, Suite 1002, Troy, MI 48084. Petitioner holds Motor Common Carrier Certificate MC 50935 (Sub-11), issued November 16, 1966, which authorizes transportation over irregular routes of: *malt beverages*, from Detroit, Michigan, to points in Kentucky, except those in Warren County, and those in that part of Kentucky on and east of a line beginning at the Kentucky-Virginia state line and extending along Kentucky Highway 932 to junction U.S. Highway 119, thence along U.S. Highway 119 to junction Kentucky Highway 15 near Whitesburg, Kentucky, thence along a line extending from Jackson through Olive Hill, Kentucky, to Portsmouth, Ohio, with no transportation for compensation on return except as otherwised authorized. By the instant Petition, Petitioner seeks to modify the authority by deleting the word *malt* from the commodity description.

MC 50935 (Sub-16) (M1F) (notice of filing to delete a restriction), filed June 9, 1980. Petitioner: WOLVERINE TRUCKING COMPANY, 1020 Doris Rd., Pontiac, MI 48057. Representative: Robert E. McFarland, 999 West Big Beaver Rd., Suite 1002, Troy, MI 48084. Petitioner holds motor *common carrier* certificate in MC 50935 (Sub-16F), issued March 5, 1979, authorizing transportation, over irregular routes, of *malt beverages*, from the facilities of Pabst Brewing Company at Peoria, IL, to Detroit and Saginaw, MI, and Toledo, OH, and from the facilities of Pabst Brewing Company at Milwaukee, WI, to Toledo, OH. By the instant petition, petitioner seeks to modify the authority by deleting the plantsite restriction at Milwaukee, WI.

MC 59135 (Subs-13, 17, 19, 22, 25, 26, 27, 29, 32, 34, 39F and 40F) (M1F) (notice of filing of petition for modification), filed June 17, 1980. Petitioner: RED STAR EXPRESS LINES OF AUBURN, INC., 24-50 Wright Avenue, Auburn, NY 13021. Representative: Edward J. Kiley, 1730 M Street, NW, Washington, DC 20036. Petitioner holds motor *common carrier* certificates in MC-59135, issued November 20, 1953; (Sub-13), issued July 25, 1967; (Sub-17), issued August 6, 1965; (Sub-19), issued April 20, 1966; (Sub-22), issued October 3, 1968; (Sub-25), issued August 15, 1969; (Sub-26), issued May 5, 1969; (Sub-27), issued October 11, 1972; (Sub-29), issued August 21, 1979; (Sub-32), issued October 23, 1978; (Sub-34), issued May 15, 1978; (Sub-39), issued November 8, 1979; and (Sub-40), issued October 17, 1979, respectively. As pertinent to this petition for modification, all of these Certificates of Public Convenience and Necessity authorize services to be performed over regular routes, transporting *general commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk and those requiring special equipment). The regular route authority contained in the lead Certificate authorizes services to be performed in the States of NY and NJ, together with authority to serve intermediate points in specifically identified off-route points; (Sub-13) authorizes services to be performed in NY together with service at intermediate points and specifically identified off-route points; (Sub-17) authorizes

services to be performed in NY, NJ, VT and MA, together with authorized service at intermediate points in specifically identified off-route points; (Sub-19) authorizes services to be performed in NY and MA, together with authorization to serve intermediate points and specifically identified off-route points; (Sub-22) authorizes services to be performed in MD, DE, and PA, together with authorizations to serve intermediate points in specifically identified off-route points; (Sub-25) authorizes services to be performed in PA and NY, together with authorizations to serve intermediate points and specifically identified off-route points; (Sub-26) authorizes services to be performed in MA and CT, together with authorizations to serve intermediate points and specifically identified off-route points; (Sub-27) authorizes services to be performed in RI, VT, NY, NH and ME, together with authorization to serve intermediate points and specifically identified off-route points; (Sub-29) authorizes services to be performed in NY, together with authorization to serve intermediate points and specifically identified off-route points; (Sub-32) authorizes services to be performed in MA and VT; (Sub-34) authorizes services to be performed in NY together with authorization to serve intermediate points and specifically identified off-route points; (Sub-39) authorizes services to be performed in PA and NY together with authorization to serve intermediate points and specifically identified off-route points; (Sub-40) authorizes services to be performed in NY, PA and MD, together with authorization to serve intermediate points and specifically identified off-route points.

The purpose of this petition insofar as the lead Certificate is as follows: substitution of authority to serve all intermediate points for authority to serve specifically identified intermediate points; substitution of authority to serve all points in NY and NJ as off-route points for authority to serve specifically identified off-route points in NY and NJ; Sub 13—substitution of authority to serve all points in NY as off-route points for authority to serve specifically identified off-route points in NY; Sub 17—substitution of authority to serve all intermediate points for authority to serve specifically identified intermediate points; substitution of authority to serve all points in NY, NJ, VT and MA as off-route points for authority to serve specifically identified off-route points in NY, NJ, VT, and MA; Sub 19—substitution of authority to serve all intermediate points for authority to serve specifically identified intermediate points; substitution of authority to serve all points in NY and MA as off-route points for authority to serve specifically identified off-route points in NY and MA; Sub 22—substitution of authority to serve all points in MD and DE as off-route points for authority to serve specifically identified off-route points in MD and DE; Sub 25—substitution of authority to serve all points in PA and NY as off-route points for authority to serve specifically identified off-route points in PA and NY and the deletion of the territorial restruction; Sub 26—substitution of authority to serve all points in MA and CT as off-route points for authority to serve specifically identified off-route points in MA and CT and deletion of the territorial restriction; Sub 27—substitution of authority to serve all intermediate points; substitution of authority to serve all points in RI, MA, ME, NH, VT, and NY as off-route points in authority to serve specifically identified off-route points in RI, MA, ME, NH, VT, and NY; Sub 2—substitution of authority to serve all points in NY as off-route points for authority to serve specifically identified off-route points in NY; Sub 32—substitution of authority to serve all points in MA and VT as off-route points for authority to serve specifically identified off-route points in MA and VT; Sub 34—substitution of *general commodities* with the usual Commission exceptions for the present commodity authorized; substitution of authority to serve all points in NY as off-route points for authority to serve specifically identified off-route points in NY; Sub 39F—deletion of the territorial restriction and substitution of authority to serve all points in PA and NY as off-route points for specifically identified off-route points in PA and NY; and *Sub 40F*—substitution of authority to serve all intermediate points; substitution of authority to serve all points in NY, PA, MD as off-route points for authority to serve specifically identified off-route points in NY, PA and MD.

MC 102616 (Sub-1, paras (1)-(3), (5)-(13), (16)-(26), 281, 339, 348, 352, 360, 370, 376 (40), (41), 440, 443, 476, 477, 478, 479, 485, 497(57), (61), 514, 520, 556, 569(78), (79), 577(82)-(86), 592, 604, 617, 624, 629, 630, 661, 667, 677, 747, 766, 773, 834 (221)-(242), (247), (248), (275)-(281), (321)-(323), (341), (342), (349)-(355), (374), (382), 864, 867, 941, 944, 949, 954, 969, 971, 973, E1-E21, E33-E35, E46, E48, E50, E52, E53, E57, E58, E59, E62-E64, E85, E92, E94-E99, E101, E111, E130, E132-E141, E144-E179, E181-E204, E207-E228, E235-E238, E241-E262, E264-E334, E336-E343, E346-E367, E369-E417, E419-E449) (M1F), filed June 30, 1980. Petitioner: COASTAL TANK LINES, INC., 250 North Cleveland-Massillon Road, Akron, Ohio 44313. Representative: Attorney Fred H. Daly, Hanna & Cullen, 2550 M St. N.W., Washington, D.C. 20037. Petitioner generally holds authority as a common carrier as follows: Various commodities in bulk, in tank vehicles, primarily chemicals and petroleum products, from and to points in the New England States, the Mid Atlantic States, the Central States and the Southeastern States and from those areas to the Midwest, the Southwest and the Western States. By the instant petition it seeks to remove the one-way haul restriction implicit in the scope of the subject authorities by adding at the end of the last sentence of each grant the phrase: "and in the reverse direction."

MC 110325 (Sub-3) (M1F) (notice of filing of petition to delete restriction and add joinder point), filed June 9, 1980. Petitioner: TRANSCON LINES, P.O. Box 92220, Los Angeles, CA 90009. Representative: Wentworth E. Griffin, Midland Building, 1221 Baltimore Avenue, Kansas City, MO 64105. Petitioner holds Motor *Common Carrier* Certificate MC 110325 (Sub-3) issued May 3, 1960, which authorizes transportation over alternate routes of: *general commodities*, (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, and *oilfield equipment and supplies:* Between junction U.S. Hwy 60 and AZ Hwy 71 near Aguila, AZ, and Albuquerque, NM, serving no intermediate points, but with the right to tack at Albuquerque, and serving the junction of U.S. Hwy 60 and AZ Hwy 71 for the purpose of joinder only; From junction U.S. Hwy 60 and AZ Hwy 71 over AZ Hwy 71 to Congress Junction, AZ, then over U.S. Hwy 89 to junction Alternate U.S. Hwy 89, then over U.S. Hwy 89 or Alternate U.S. Hwy 89 to junction U.S. Hwy 66 near Ash Fork or Flagstaff, AZ, and then over U.S. Hwy 66, through Winslow and Holbrook, AZ and Gallup, NM, to Albuquerque, and return over the same route. Between Albuquerque, NM and Oklahoma City, OK, serving no intermediate points, but with the right to tack at Albuquerque: From Albuquerque over U.S. Hwy 66, through Santa Rosa and Tucumcari, NM and Amarillo, TX to Oklahoma City, and return over the same route. Restriction: The routes specified in the two paragraphs immediately above shall be

used, in conjunction with other authorized routes, solely for the movement of shipments to or from points in CA. *General commodities*, (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment, and of *government-owned compressed gas trailers*, loaded with compressed gas (other than liquefied petroleum gas) or empty: Between Wichita, KS and junction U.S. Hwy 60 and AZ Hwy 71, near Aguila, AZ, serving no intermediate points; From Wichita over U.S. Hwy 54 to Tucumcari, NM, then over U.S. Hwy 66 to junction U.S. Hwy 89, near Ash Fork, AZ, then over U.S. Hwy 89 to junction Alternate U.S. Hwy 89 (also from junction U.S. Hwy 66 and Alternate U.S. Hwy 89, near Flagstaff, AZ, over Alternate U.S. Hwy 89 to junction U.S. Hwy 89), then over U.S. Hwy 89 to Congress Junction, AZ, and then over AZ Hwy 71 to junction U.S. Hwy 60, near Aguila, and return over the same route. Restriction: The service authorized immediately above is subject to the restriction that such route shall be used in conjunction with other authorized routes solely for the movement of shipments to and from points in CA. By the instant Petition, Petitioner seeks to delete the restrictions and add Flagstaff, AZ as a joinder point in the route between junction U.S. Hwy 60 and AZ Hwy 71, near Aguila, AZ and Albuquerque, NM.

MC 110325 (Sub-14) (M1F) (notice of filing of petition to delete a restriction), filed June 16, 1980. Petitioner: TRANSCON LINES, P.O. Box 92220, Los Angeles, CA 90009. Representative: Wentworth E. Griffin, Midland Bldg., 1221 Baltimore Ave., Kansas City, MO 64105. Petitioner holds motor *common carrier* certificates in MC 110325 (Sub-14), issued March 6, 1957, authorizing transportation, over regular routes, as pertinent, *general commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk and those requiring special equipment), (a) between Memphis, TN and Pine Bluff, AR, serving all intermediate points, between Memphis, TN and Little Rock, AR, including Little Rock, restricted to traffic moving to or from Memphis, TN; from Memphis over U.S. Hwy 70 to Little Rock, AR, then over U.S. Hwy 65 to Pine Bluff and return over the same route, (b) between Memphis, TN and Pine Bluff, AR, serving all intermediate points, restricted to traffic moving to or from Memphis, TN; from Memphis over U.S. Hwy 70 to junction AR Hwy 11, then over AR Hwy 11 to Stuttgart, AR, then over U.S. Hwy 79 to Pine Bluff, and return over the same route. By the instant petition, petitioner seeks to delete the restriction which reads "restricted to traffic moving to or from Memphis, TN."

MC 112148 (Sub-1) (M1F) (notice of filing of petition to modify certificate), filed February 11, 1980. Petitioner: WORSTER-IOWA, INC., Gay Rd., North East, PA 16428. Representative: William J. Taylor (same address as applicant). Petitioner holds a motor *common carrier* Certificate in MC 112148 (Sub-1) issued November 13, 1973, authorizing transportation, as pertinent, over irregular routes, of *meats, meat products, and meat by-products, and articles distributed by meat packinghouses, as described in sections A and C of Appendix I to the report in Descriptions of Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk, in tank vehicles), from the plant site and storage facilities utilized by Wilson Foods Corporation, at or near Cherokee, IA, to points in the Lower Peninsula of MI, restricted to the transportation of traffic originating at the plant site and storage facilities utilized by Wilson Foods Corporation at or near Cherokee, IA. By the instant petition, petitioner seeks to add Hygrade Foods Products Corp. as an additional user of the Cherokee, IA storage facilities.

MC 112989 (Sub-95F) (M1F) (notice of petition to modify certificate), filed June 10, 1980. Petitioner: WEST COAST TRUCK LINES, INC., 85647 Highway 99 South, Eugene, OR 97405. Representative: John W. White, Jr. (same address as applicant). Petitioner holds a motor *common carrier* Certificate in MC 112989 (Sub-95F) issued February 7, 1980, authorizing transportation over irregular routes, of *aluminum sheet and aluminum plates*, from the facilities of Kaiser Aluminum & Chemical Corporation, at Ravenswood, WV, to points in OR, WA, CA, ID, AZ, UT, WY, MT, NV, and TX. By the instant petition, petitioner seeks to delete the above commodity description and substitute in lieu thereof "aluminum articles."

MC 115789 (Sub-4) (M1F) (notice of petition to modify permit), filed June 20, 1980. Petitioner: LOWTHER TRUCKING COMPANY, INC., P.O. Box 3117 C.R.S., Rock Hill, SC 29730. Representative: Lawrence E. Lindeman, 425 13th St. NW., Suite 1032, Washington, DC 20004. Petitioner holds a motor *contract carrier* Permit in MC-115789 (Sub-4) issued July 29, 1980, authorizing transportation over irregular routes, of (a) *fabricated pipe and fittings*, and (b) *materials, equipment and supplies* used in the manufacture, erection, and maintenance of the commodities named in (a) above (except commodities in bulk), between the facilities of ITT Grinnell Industrial Piping, Inc., at or near Kernersville, NC, on the one hand, and, on the other, points in the U.S. (except AK, HI, and NC), under a continuing contract(s) with ITT Grinnell Industrial Piping, Inc., of Kernersville, NC. By the instant petition, petitioner seeks (1) to modify the commodity description by deleting (a) above and substituting in lieu thereof "(a) fabricated steel, aluminum, pipe and fittings"; and (2) to modify the territorial description to include the facilities of Carolina Grating Company, Inc., to Carolina Fabricators, Inc., at points in York County, SC to the base, and also as additional contracting shippers.

MC 130216 (Sub-1F), filed April 10, 1980, previously noticed in the Federal Register issue of July 7, 1980. Applicant: IL PROGRESSO ITALO-AMERICANO PUBLISHING CO., INC., 260 Audubon Ave., New York, NY 10033. Representative: Larsh B. Mewhinney, 555 Madison Ave., New York, NY 10022. To engage in operations, in interstate or foreign commerce, as a *broker*, at New York, NY, and Emerson, NJ, in arranging for the transportation, by motor vehicle, of *passengers and their baggage*, in charter and special operations, between points in the U.S. (including AK and HI).

Note.—The purpose of this republication is to include Emerson, NJ as an office facility.

Republications of Grants of Operating Rights Authority Prior to Certification Notice

The following grants of operating rights authorities are republished by order of the Commission to indicate a broadened grant of authority over that previously noticed in the Federal Register.

An original and one copy of a petition for leave to intervene in the proceeding must be filed with the Commission on or before September 12, 1980. Such pleading shall comply with Special Rule 247(e) of the Commission's *General Rules of Practice* (49 CFR 1100.247) addressing specifically the issue(s) indicated as the purpose for republication, and including copies of intervenor's conflicting authorities and a concise statement of intervenor's interest in the proceeding setting forth in detail the precise manner in which it has been prejudiced by lack of notice of the authority granted. A copy of the pleading shall be served concurrently upon the carrier's representative, or carrier if no representative is named.

MC 24379 (Sub-21) (M1F) (notice of petition to modify certificate), filed May 2, 1980. Petitioner: LONG TRANSPORTATION COMPANY, 14510 W. Eight Mile Rd., Oak Park, MI 48237. Representative: Donald G. Hichman (same address as applicant). Petitioner holds a motor *common carrier* Certificate in MC 24379 (Sub-21) issued July 26, 1976, authorizing transportation, over (A) regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, and those requiring special equipment), (1) between Harrisburg, PA, and Burlington, NJ, from Harrisburg over U.S. Hwy 422 to junction Interstate Hwy 276 (Pennsylvania Turnpike), then over Interstate Hwy 276 to junction U.S. Hwy 13, then over U.S. Hwy 13 to Bristol, PA, and then Bristol-Burlington Toll Bridge to Burlington, and return over the same route; (2) between Harrisburg, PA, and junction U.S. Hwy 202 and Interstate Hwy 276, from Harrisburg over US. Hwy 322 to junction U.S. Hwy 30, then over U.S. Hwy 30 to junction U.S. Hwy 202, then over U.S. Hwy 202 to junction Interstate Hwy 276, and return over the same route; (3) between Harrisburg, PA, and junction U.S. Hwys 30 and 322, from Harrisburg over PA Hwy 230 to junction U.S. Hwy 30, then over U.S. Hwy 30 to junction U.S. Hwy 322, and return over the same route; (4) between Norristown, PA, and Lambertville, NJ, over U.S. Hwy 202; (5) between junction U.S. Hwys 30 and 202, and Palmyra, NJ, from junction U.S. Hwys 30 and 202 over U.S. Hwy 30 to Philadelphia, PA, and then over Tacony-Palmyra Bridge to Palmyra, and return over the same route; (6) between junction Interstate Hwy 276 (Pennsylvania Turnpike) and U.S. Hwy 422, and Philadelphia, PA over U.S. Hwy 422; and (7) between Bristol, PA, and Philadelphia, PA, over U.S. Hwy 13; (B) regular routes, of *general commodities* (except those of unusual value, classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) between junction U.S. Hwy 22 and NJ Hwy 24 near Phillipsburg, NJ, and New York, NY, from junction U.S. Hwy 22 and NJ Hwy 24 over NJ Hwy 24 to junction U.S. Hwy 46, then over U.S. Hwy 46 to George Washington Bridge, then over George Washington Bridge to New York, and return over the same route; (2) between Ridgefield Park, NJ, and Deepwater, NJ, over the New Jersey Turnpike; (3) between Netcong, NJ, and Montague, NJ, over U.S. Hwy 206; (4) between Hasbrouck Heights, NJ, and Mahwah, NJ over NJ Hwy 17; (5) between Newark, NJ, and Hasbrouck Heights, NJ, from Newark over NJ Hwy 21 to junction NJ Hwy 3, then over NJ Hwy 3 to junction NJ Hwy 17, and then over NJ Hwy 17 to Hasbrouck Heights, and return over the same route; (6) between Fort Lee, NJ, and Alpine, NJ, over U.S. Hwy 9W; (7) between Somerville, NJ, and Lambertville, NJ, over U.S. Hwy 202; (8) between Wayne, NJ, and Montague, NJ, from Wayne over NJ Hwy 23 to junction NJ Hwy 521, then over NJ Hwy 521 to Montague, and return over the same route; (9) between Netcong, NJ, and Hammonton, NJ, from Netcong over U.S. Hwy 206 to junction NJ Hwy 54, then over NJ Hwy 54 to Hammonton, and return over the same route; (10) between Ridgefield, NJ, and Woodbridge, NJ, from Ridgefield over U.S. Hwy 1 to junction NJ Hwy 35, then over NJ Hwy 35 to Woodbridge, and return over the same route; (11) between junction NJ Hwy 35 and U.S. Hwy 1 near Woodbridge, NJ, and Trenton, NJ, over U.S. Hwy 1; (12) between Woodbridge, NJ, and Cape May, NJ, over U.S. Hwy 9; (13) between Hightstown, NJ, and Ocean Grove, NJ over NJ Hwy 33; (14) between South Amboy, NJ, and Point Pleasant, NJ, from South Amboy over NJ Hwy 35 to junction NJ Hwy 549, then over NJ Hwy 549 to Point Pleasant, and return over the same route; (15) between North Brunswick, NJ, and Seaville, NJ, from North Brunswick over U.S. Hwy 130 to junction NJ Hwy 551, then over NJ Hwy 551 to junction NJ Hwy 49, then over NJ Hwy 49 to junction NJ Hwy 50, then over NJ Hwy 50 to Seaville, and return over the same route; (16) betwen Penns Grove, NJ, and Atlantic City, NJ, from Penns Grove over NJ Hwy 48 to junction U.S. Hwy 40, then over U.S. Hwy 40 to Atlantic City, and return over the same route; (17) between Palmyra, NJ, and Point Pleasant, NJ, from Palmyra over NJ Hwy 73 to junction NJ Hwy 70, then over NJ Hwy 70 to junction NJ Hwy 88, then over NJ Hwy 88 to Point Pleasant, and return over the same route; (18) between junction NJ Hwys 70 and 73, and Atlantic City, NJ, from junction NJ Hwys 70 and 73 over NJ Hwy 73 to junction U.S. Hwy 30, then over U.S. Hwy 30 to Atlantic City, and return over the same route; (19) between Hammonton, NJ, and Millville, NJ, from Hammonton over NJ Hwy 54 to Millville, and return over the same route; (20) between Camden, NJ, and junction NJ Hwy 47 and U.S. Hwy 9, from Camden over NJ Hwy 42 to junction U.S. Hwy 130, then over U.S. Hwy 130 to junction NJ Hwy 47, then over NJ Hwy 47 to junction U.S Hwy 9, and return over the same route; and (21) between junction U.S. Hwy 130 and New Jersey Hwy 42 near Camden, NJ, and Atlantic City, NJ, from junction U.S. Hwy 130 and NJ Hwy 42 over NJ Hwy 42 to junction U.S Hwy 322, and then over U.S. 322 to Atlantic City, and return over the same route; (C) regular routes, of *general commodities* (except commodities in bulk,, classes A and B explosives, and household goods as defined by the Commission) (except in connection with traffic moving between Newark, NJ, and points in the New York, NY commercial zone, as defined by the Commission, on the one hand, and, on the other, Tuxedo Park, NY, and points in Rockland County, NY, on which traffic the only exception to general commodities is commodities in bulk), (1) between Newark, NJ, and Highland, NY, from Newark over U.S. Hwy 1 to junction U.S. Hwy 46, then over U.S. Hwy 46 to junction U.S. Hwy 9W, then over U.S. Hwy 9W to Highland, and return over the same route; (2) between junction U.S. Hwys 1 and 46, and junction U.S. Hwys 202 and 9W, from junction U.S. Hwys 1 and 46 over U.S. Hwy 46 to junction NJ Hwy 23, then over NJ Hwy 23 to junction U.S. Hwy 202, and then over U.S. Hwy 202 to junction U.S. Hwy 9W, and return over the same route; (3) between Newark, NJ, and Poughkeepsie, NJ, from Newark over U.S. Hwy 1 to the Hudson River crossings to NY, then over such crossings to NY, then over U.S. Hwy 9 to Poughkeepsie, and return over the same route; (4) between junction U.S. Hwy 9W and Tappan Zee Bridge, and junction U.S. Hwy 9 and Tappan Zee Bridge, from junction U.S. Hwy 9W and Tappan Zee Bridge over Tappan Zee Bridge to junction U.S. Hwy 9, and return over the same route; (5) between Highland, NY, and Poughkeepsie, NY, over Highland-Poughkeepsie Bridge; (6) between New York, NY, and White Plains, NY, from New York over NY Hwy 100 to junction NY Hwy 119, then over NY Hwy 119 to White Plains and return over the same route; (7) between Tarrytown, NY, and junction NY Hwys 100 and 119 over NY Hwy 119; and (8) between New York, NY and Stamford, CT, over U.S. Hwy 1, and return over the same route; (D) regular routes: Service in connection with routes specified in Section (a) is authorized at Burlington, Lambertville, and Palmyra, NJ, but restricted against the provision of service at those points in the commercial zones thereof which are located outside of NJ; and service at all other points on the routes specified in Section (A) above is authorized for purposes of joinder only with the authority granted herein; and service is

also authorized at Harrisburg, PA, for puposes of joinder with carrier's regular-route authority held September 15, 1958, so restricted that all service set forth above in connection with the routes specified in Section (A) above shall have the same inherent limitations set forth in carrier's underlying irregular-route authority which for convenience, is restated as follows: Between points in NJ, on the one hand, and, on the other, points authorized September 15, 1958, to be served by carrier on its regular routes, including off-route points appurtenant thereto, west of the PA–NJ State line, serving Harrisburg, PA, as a point of joinder only with the authority granted herein and the regular-route authority held by carrier September 15, 1958; (E) regular routes: Service in connection with routes specified in Section (B) above is authorized at all intermediate and off-route points in NJ, with no service authorized at those parts of the commercial zones of any NJ points authorized in Section (B) above which are located outside of NJ, service in connection with the routes specified in Section (c) above is authorized at the intermediate and off-route points in the New York, NY, Commercial zone, as defined by the Commission, those in that part of Westchester County, NY, not included in such commercial zone, that part of CT on and west of CT Hwy 104, those in Putnam County, NY, on and south of NY Hwy 55, those in Ulster County, NY, on the U.S. Hwy 9W south of Highland, NY, including Highland, those in Orange County, NY, on U.S. Hwy 9W, those in Hudson County, NJ, not included in the New York, NY, Commercial zone, those in Essex County, NJ, those in Rockland County, NY, Kingston and Tuxedo Park, NY, and Teaneck, Elizabeth, and Bound Brook, NJ, so restricted that all service set forth above in connection with the routes specified in Section (B) and Section (C) above shall have the same inherent limitations set forth in carrier's underlying irregular-route authority which is restated as follows: (1) between Newark, NJ, and points in NJ in the New York, NY Commercial zone, as defined by the Commission, on the one hand, and, on the other, points in NJ, restricted to traffic moving to and from points to be served by carrier west of the NJ–PA State line, (2) between points in the New York, NY, Commercial zone, as defined by the Commission and those in that part of Westchester County, NY, not included in such commercial zone, and those in that part of CT on and west of CT Hwy 104, (3) between points in the territory described immediately above in (2), on the one hand, and, on the other, points in Putnam County, NY, and those in Dutchess County, NY, on and south of NY Hwy 55, and those in Ulster County, NY, on U.S. Hwy 9W south of Highland, NY, including Highland, and those in Orange County, NY, on U.S. Hwy 9W, and those in Hudson County, NJ, not included in the New York Commercial Zone, and those in Essex County, NJ, and Kingston, NY, Teaneck, Elizabeth, Rahway, and Bound Brook, NJ, and (4) between Newark, NJ, and points in the New York, NY Commercial zone, as defined by the Commission, on the one hand, and, on the other, Tuxedo Park, NY, and points in Rockland County, NY; and (F) irregular routes, of *general commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in NJ, on the one hand, and, on the other, points authorized September 15, 1958, to be served by carrier on its regular routes, including off-route points appurtenant thereto, west of the PA–NJ State line, serving Harrisburg, PA, as a point of joinder only with the irregular-route authority granted in Section (F) above and the regular-route authority held by carrier September 15, 1958, restricted in Section (F) to the following conditions: (a) carrier shall not, pursuant to the irregular-route authority contained in Section (F) above, transport shipments moving between any points authorized to be served by it in the regular-route operations authorized herein, and (b) the authority granted in Section (F) above and that now held by carrier between the same points shall be construed as comprising a single operating right and shall not be severable by sale or otherwise. By the instant petition, petitioner seeks to delete the following restrictions from the above authority: (1) In Section D: "but restricted against the provision of service at those points in the commercial zones thereof which are located outside of New Jersey; and service at all other points on the route sepecified in Section (A) above is authorized for purposes of joinder only with the authority granted herein; and service is also authorized at Harrisburg, Pa., for purposes of joinder with carrier's regular-route authority held September 15, 1958, so restricted that all service set forth above in connection with the routes specified in Section (A) above shall have the same inherent limitations set forth in carrier's underlying irregular-route authority which, for convenience, is restated as follows: Betwen points in New Jersey, on the one hand, and, on the other, points in Putnam County, NY, and those in Dutchess County, NY, on and south of NY Hwy 55, and those in Ulster County, NY, on U.S. Hwy 9W south of Highland, NY, including Highland, and those in Orange County, NY, on U.S. Hwy 9W, and those in Hudson County, NJ, not included in the New York Commercial Zone, and those in Essex County, NJ, and Kingston, NY, Teaneck, Elizabeth, Rahway, and Bound Brook, NJ, and (4) between Newark, NJ, and points in the New York, NY Commercial zone, as defined by the Commission, on the one hand, and, on the other, Tuxedo Park, NY, and points in Rockland County, NY; and (F) irregular routes, of *general commodities* (except those of unusual value, classes A and B explosives, livestock, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), between points in NJ, on the one hand, and, on the other, points authorized September 15, 1958, to be served by carrier on its regular routes, including off-route points appurtenant thereto, west of the PA–NJ State line, serving Harrisburg, PA, as a point of joinder only with the irregular-route authority granted in Section (F) above and the regular-route authority held by carrier September 15, 1958, restricted in Section (F) to the following conditions: (a) carrier shall not, pursuant to the irregular-route authority contained in Section (F) above, transport shipments moving between any points authorized to be served by it in the regular-route operations authorized herein, and (b) the authority granted in Section (F) above and that now held by carrier between the same points shall be construed as comprising a single operating right and shall not be severable by sale or otherwise. By the instant petition, petitioner seeks to delete the following restrictions from the above authority: (1) In Section D: "but restricted against the provision of service at those points in the commercial zones thereof which are located outside of New Jersey; and service at all other points on the route sepecified in Section (A) above is authorized for purposes of joinder only with the authority granted herein; and service is also authorized at Harrisburg, Pa., for purposes of joinder with carrier's regular-route authority held September 15, 1958, so restricted that all service set forth above in connection with the routes specified in Section (A) above shall have the same inherent limitations set forth in carrier's underlying irregular-route authority which, for convenience, is restated as follows: Betwen points in New Jersey, on the one hand, and, on the other, points authorized September 15, 1958 to be served by carrier on its regular routes, including off-route points appurtenant thereto, west of the Pennsylvania–New Jersey State line, serving Harrisburg, Pa., as a point of joinder only with the authority granted herein and the regular-route authority held by carrier September 15, 1958." (2) In Section E: "with no service authorized at those parts of the commercial zone of any New Jersey points authorized in Section (B) above which are located outside of New Jersey." (3) In Section E: "so restricted that all service set forth above in connection with the routes specified in Section (B) and Section (C) above shall have the same inherent limitations set forth in carrier's underlying irregular-route authority which is restated as follows: (1) between Newark, N.J., and points in New Jersey in the New York, N.Y., Commercial Zone, as defined by the Commission, on the one hand, and, on the other, points in New Jersey, restricted to traffic moving to and from points to be served by carrier west of the New Jersey–Pennsylvania State line, (2) between points in the New York, N.Y., Commercial Zone, as defined by the Commission, and those in that part of Westchester County, N.Y., not included in such commercial zone, and those in that part of Connecticut on and west of Connecticut Highway 104, (3) between points in the territory described immediately above in (2), on the one hand, and, on the other, points in Putnam County, N.Y., and those in Dutchess County, N.Y., on and south of New York Highway 55, and those in Ulster County, N.Y., on U.S. Highway 9W south of Highland, N.Y., including Highland, and those in Orange County, N.Y., on U.S. Highway 9W, and those in Hudson County, N.J., not included in the New York Commercial Zone, and those in Essex County, N.J., and Kingston, N.Y., Teaneck, Elizabeth, Rahway, and Bound Brook, N.Y., and (4) between Newark, N.J., and points in the New York, N.Y., Commercial zone, as defined by the Commission, on the one hand, and, on the other, Tuxedo Park, N.Y., and points in Rockland County, N.Y." (4) In Section F: "September 15, 1958." (5) In Section F: "including off-route points appurtenant thereto, west of Pennsylvania–New Jersey State line, serving Harrisburg, Pa., as a point of joinder only with the irregular-route authority granted in Section (F) above and the regular-route authority held by carrier September 15, 1958." (6) In Section F: "Restriction: the service authorized in Section (F) above is subject to the following conditions: Carriers shall not, pursuant to the irregular-route authority contained in Section (F) above, transport shipments moving between any points authorized to be served by it in the regular-route operations authorized herein."

FF–64) (M1F), notice of filing of petition to modify permit filed March 21, 1980. Petitioner: P. O. W. FREIGHT SYSTEMS, INC., 994 Williams St., Longmeadow, MA 01106. Representative: James M. Burns, 1383 Main St., Suite 413, Springfield, MA 01103. Petitioner holds a Freight Forwarder Permit in FF–64, issued July 10, 1980, authorizing as pertinent, operations in interstate or foreign commerce as a Freight Forwarder of *commodities generally*, from points in CT, ME, MA, NH, NJ, NY, PA, RI, and VT, to points in OH, PA, and WV. By the instant petition, petitioner seeks to modify the territorial description to read "between points in CT, ME, NY, MA, NH, NJ, PA, RI, and VT, on the one hand, and, on the other, points in OH, PA, and WV.

Broker, Water Carrier and Freight Forwarder Operating Rights Applications

The following applications are governed by Special Rule 247 of the Commission's General Rules of Practice (49 CFR 1100.247). These rules provide, among other things, that a protest to the granting of an application must be filed with the Commission within 30 days after the date of notice of filing of the application is published in the **Federal Register**. Failure to seasonably file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest under these rules should comply with Section 247(e)(3) of the rules of practice which requires that it set forth specifically the grounds upon which it is made, contain a detailed statement of protestant's interest in the proceeding (including a copy of the specific portions of its authority which protestant believes to be in conflict with that sought in the application, and describing in detail the method—whether by joinder, interline, or other means—by which protestant would use such an authority to provide all or part of the service proposed), and shall specify with particularity the facts, matters, and things relied upon, but shall not include issues of allegations phrased generally, protests not in reasonable compliance with the requirements of the rules my be rejected.

W–303 (Sub-2F), filed February 1, 1980. Applicant: WESTERN TRANSPORTATION CO., a corporation, P.O. Box 3869, Portland, OR 97208. Representative: Paul M. Donovan, 1511 K St., NW., Washington, DC 20005. Authority sought to operate as a *common carrier*, by water, in interstate or foreign commerce, transporting *general commodities*, by non-self-propelled vessels with the use of separate towing vessels and by towing vessels in the performance of general towage between all ports and points in WA on the Strait of Juan De Fuca, Strait of Georgia, Haro Strait, Rosario Strait, Admirality Inlet, Puget Sound and tributary waterways on the one hand, and, on the other, all ports and points in OR and WA on the Columbia River and its tributaries below Bonneville, Dam, but not including the Willamette River above Pulp, OR, all ports and points in OR and WA, on the Columbia River from below Bonneville, Dam to Priest Rapids, WA, all ports and points in WA and ID on the Snake River, from its confluence with the Columbia River to Asotin, WA, and all ports and points in ID on the Clearwater River from its confluence with the Snake River to the Lewiston Memorial Bridge, at Lewiston, ID.

Note.—(1) Dual operations may be involved. (2) Under the provisions of 49 CFR 1106.5(a)(6), this proceeding is considered to be a major regulatory action under the provisions of the Energy Policy and Conservation Act. Applicant has submitted evidence under the provisions of 49 CFR 1106.7(a) and a statement of energy impact will be included in the decision disposing of this proceeding.

Motor Carrier Alternate Route Deviations

The following letter-notices to operate over deviation routes for oprating convenience only have been filed with the Commission under the Deviation Rules—Motor Carrier of Passengers (49 CFR 1042.2(c)(9)).

Protests against the use of any proposed deviation route herein described may be filed with the Commission in the manner and form provided in such rules at any time, but will not operate to stay commencement of the proposed operations unless filed on or before September 12, 1980.

Each applicant states that there will be no significant effect on either the quality of the human environment or energy policy and conservation.

Motor Carriers of Passengers

MC 61599 (Deviation No. 15), TRAILWAYS SOUTHEASTERN LINES, INC., Suite 415, 1500 Jackson St., Dallas, TX 75201, filed July 25, 1980. Carrier proposes to operate as a *common carrier*, by motor vehicle, of *passengers and their baggage*, and *express* and *newspapers* in the same vehicle with passengers over deviation routes as follows: From Columbia, SC over SC Hwy 277 to junction Interstate Hwy 77, then over Interstate Hwy 77 (using portions of US Hwy 21 where Interstate Hwy 77 is incomplete) to junction SC Hwy 160 near Fort Mill, SC, and return over the same route for operating convenience only, with the right of access wherever there is an interchange at a junction with its presently certificated route. Also access routes via US Hwy 21 and Lee Blvd. to and from Rock Hill, SC. The notice indicates that the carrier is presently authorized to transport passengers and the same property over a pertinent service route as follows: From Columbia, SC over US Hwy 321 to Rockton, SC, then over SC Hwy 34 to Winnsboro, SC, then over US Hwy 321 to Chester, SC, then over SC Hwy 72 to junction SC Hwy 901, then over SC Hwy 901 to Rock Hill, SC, then over US Hwy 21 to unnumbered hwy, then over unnumbered hwy to Fort Mill, then over SC Hwy 160 to junction Interstate Hwy 77 and return over the same route.

Permanent Authority Notices, Substitution Applications: Single-Line Service for Existing Joint-Line Service

The following applications, filed on or after April 1, 1979, are governed by the special procedures set forth in Part 1062.2 of Title 49 of the Code of Federal Regulations (49 CFR 1062.2). These proposals are published as "service sought" (as opposed to decision-notices), because in each case it appears questionable as to whether all or part of the authority sought should be issued, weighing applicant's evidence under 49 CFR 1062.2. (For example, questions may be raised relating to applicant's contentions concerning why the involved joint-line service has been cancelled or is in a state of deterioration which warrant a decision on the merits, regardless of whether the application is opposed.)

The rules provide, in part, that carriers may file petitions with this Commission for the purpose of seeking intervention in these proceedings. Such petitions may seek intervention either with or without leave as discussed below. However, all such petitions must be filed in the form of verified statements, and contain all of the information offered by the submitting party in opposition. Petitions must be filed with the Commission within 30 days of publication of this decision-notice.

Petitions for intervention without leave (i.e., automatic intervention), may be filed only by carriers which are, or

have been, participating in the joint-line service sought to be replaced by applicant's single-line proposal, and then only if such participation has occurred within the one-year period immediately proceeding the application's filing. Only carriers which fall within this filing category can base their opposition upon the issue of the public need for the proposed service.

Petitions for intervention with leave may be filed by any carrier. The nature of the opposition, however, must be limited to issues other than the public need for the proposed service. The appropriate basis for opposition, i.e., applicant's fitness, may include challenges concerning the veracity of the applicant's supporting information, and the bona-fides of the joint-line service sought to be replaced (including the issue of its substantiality). Petitions containing only unsupported and undocumented allegations will be rejected.

Petitions not in reasonable compliance with the requirements of the rules may be rejected. An original and one copy of the petition to intervene shall be filed with the Commission, and a copy shall be served concurrently upon applicant's representative, or upon applicant if no representative is named.

Further processing steps will be by Commission notice, decision, or letter which will be served on each party of record. *Broadening amendments will not be accepted after the date of this publication.*

MC 150996F, filed April 1, 1980. Applicant: FRANK GONZALEZ, d.b.a. RELIABLE DRIVE-AWAY, 125 Given Place, Montebello, CA 90640. Representative: Frank Gonzalez (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, in interstate or foreign commerce, over irregular routes, transporting *motor vehicles* owned by other persons or entities, between points in the U.S. (except AK and HI).

By the Commission.

Agatha L. Mergenovich,

Secretary.

BILLING CODE 7035-01-M

[Docket No. AB-1 (Sub-75F)]

Chicago and North Western Transportation Company—Abandonment—Between Merrillan and Marshfield, Wis.; Findings

Notice is hereby given pursuant to 49 U.S.C. 10903 that by a decision decided June 19, 1980, a finding, which is administratively final; was made by the Commission Review Board Number 5, stating that, the public convenience and necessity permit the abandonment by the Chicago and North Western Transportation Company of its track extending from milepost 0.0 near Merillan to milepost 37.5 near Marshfield, in Jackson, Clark and Wood Counties, WI, provided that (1) conditions for the protection of employees as discussed in *Oregon Short Line R. Co.-Abandonment Goshen*, 360 I.C.C. 91 (1979), will be imposed; (2) applicant shall keep intact all of the right-of-way underlying the track, including all of the bridges and culverts, for a period of 180 days from August 2, 1980, to permit any state or local government agency or other interested party to negotiate the acquisition for public use of all or any portion of the right-of-way; and (3) applicant shall make available to present users of the line a conveniently located public team track. A certificate of abandonment will be issued to the Chicago and North Western Transportation Company based on the above-described finding of abandonment, 30 days after publication of this notice, unless within 30 days from the date of publication, the Commission further finds that:

(1) A financially responsible person (including a government entity) has offered financial assistance (in the form of a rail service continuation payment) to enable the rail service involved to be continued. The offer must be filed and served no later than 15 days after publication of this Notice; and

(2) It is likely that such proffered assistance would:

(a) Cover the difference between the revenues which are attributable to such line of railroad and the avoidable cost of providing rail freight service on such line, together with a reasonable return on the value of such line, or

(b) Cover the acquisition cost of all or any portion of such line of railroad.

If the Commission so finds, the issuance of a certificate of abandonment will be postponed for such reasonable time, not to exceed 6 months, as is necessary to enable such person or entity to enter into a binding agreement, with the carrier seeking such abandonment, to provide such assistance or to purchase such line and to provide for the continued operation of rail services over such line. Upon notification to the Commission of the execution of such an assistance or acquisition and operating agreement, the Commission shall postpone the issuance of such a certificate for such period of time as such an agreement (including any extensions or modifications) is in effect. Information and procedures regarding the financial assistance for continued rail service or the acquisition of the involved rail line are contained in the Notice of the Commission entitled "Procedures for Pending Rail Abandonment Cases" published in the Federal Register on March 31, 1976, at 41 FR 13691, as amended by publication of May 10, 1978, at 43 FR 20072. All interested persons are advised to follow the instructions contained therein as well as the instructions contained in the above-referenced decision.

Agatha L. Mergenovich,

Secretary

BILLING CODE 7035-01-M

INTERNATIONAL TRADE COMMISSION

[303-TA-14 (Peliminary)]

Animal Identification Tags From New Zealand; Institution of Preliminary Countervailing Duty Investigation and Scheduling of Conference

Investigation instituted. Following receipt of a petition on August 1, 1980, filed by Y-Tex Corporation, Cody, Wyoming, a domestic producer of plastic animal identification tags, the United States International Trade Commission on August 5, 1980, instituted a preliminary countervailing duty investigation under section 303 of the Tariff Act of 1930, as amended by section 103 of the Trade Agreements Act of 1979, to determine whether there is a reasonable indication that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of allegedly subsidized imports from New Zealand of plastic animal identification tags provided for in item 666.00 of the Traffic Schedules of the United States. This investigation will be subject to the provisions of Part 207 of the Commission's *Rules of Practice and Procedure* (19 CFR 207, 44 FR 76457) and, particularly, Subpart B thereof, effective January 1, 1980.

Written submissions. Any person may submit to the Commission on or before August 27, 1980, a written statement of information pertinent to the subject matter of the investigation. A signed original and nineteen copies of such statements must be submitted.

Any business information which a submitter desires the Commission to treat as confidential shall be submitted separately and each sheet must be clearly marked at the top "Confidential Business Data." Confidential submission must conform with the requirements of

section 201.6 of the Commission's *Rules of Practice and Procedure* (19 CFR 201.6). All the written submissions, except for confidential business data, will be available for public inspection.

Conference. The Director of Operations of the Commission has scheduled a conference in connection with the investigation for August 22, 1980, at the U.S. International Trade Commission Building, 701 E. Street, NW., Washington, D.C. Parties wishing to participate in the conference should contact the staff investigator, Mr. William Schechter (202-523-0300). It is anticipated that parties in support of the petition for countervailing duties and parties opposed to such petition will each be collectively allocated one hour within which to make an oral presentation at the conference. Further details concerning the conduct of the conference may be obtained from Mr. Schechter.

Inspection of petition. The petition filed in this case is available for public inspection at the Office of the Secretary, U.S. International Trade Commission, and at the New York City office of the U.S. International Trade Commission located at 6 World Trade Center.

Issued: August 8, 1980.

Kenneth R. Mason,

Secretary.

BILLING CODE 7020-02-M

[Investigation No. 337-TA-89]

Certain Apparatus for the Continuous Production of Copper Rod; Import Investigation

Notice is hereby given that a Complaint was filed with the U.S. International Trade Commission on July 29, 1980, and amended on August 1, 1980, and August 5, 1980, under section 337 of the Tariff Act of 1930 (19 U.S.C. 1337) on behalf of Southwire Company of Carrollton, Georgia, alleging that unfair methods and unfair acts exist in the importation into the United States of certain apparatus for the continuous production of copper rod, or in their sale, because the apparatus are being made in accordance with the claims of U.S. Letters Patent 4,129,170. The Complaint alleges that the effect or tendency of the unfair methods of competition and unfair acts is to destroy or substantially injure an industry, efficiently and economically operated, in the United States.

Complainant requests that the Commission, after a full investigation has been conducted, order permanent exclusion from entry into the United States of the imports in question and provide all other necessary and proper relief. Complainant also requests that the Commission conduct expedited proceedings and issue a temporary exclusion order prohibiting entry into the United States of the imports in question.

Having considered the complaint, the Commission on August 11, 1980, ordered that—

(1) Pursuant to subsection (b) of section 337 of the Tariff Act of 1930 (19 U.S.C. 1337(o)), an investigation be instituted to determine whether there is reason to believe that there is a violation and whether there is a violation of subsection (a) of section 337 in the unauthorized importation of certain apparatus for the continuous production of copper rod, or in their sale, by reason that such apparatus are made in accordance with the claims of U.S. Letters Patent 4,129,170, the effect or tendency of which is to destroy or substantially injure an industry, efficiently and economically operated, in the United States;

(2) That for the purposes of this investigation so instituted, the following are hereby named as parties upon which this notice of investigation shall be served:

(a) The complainant is: Southwire Company, 126 Fertilla Street, Carrollton, Ga. 30119.

(b) The respondents are the following companies alleged to be engaged in the unauthorized importation of such articles into the United States, or in their sale, and are parties upon which the complaint is to be served:

Fried. Krupp G.m.b.H., Essen, Federal Republic of Germany.

Krupp International Inc., 550 Mamaroneck Avenue, Harrison, N.Y. 10528.

(c) Donald Dinan and Brocke Murdock, Unfair Import Investigations Division, U.S. International Trade Commission, 701 E Street N.W., Washington, D.C. 20436, shall be the Commission investigative attorneys, parties to this investigation; and

(3) Donald K. Duvall, Chief Administrative Law Judge, U.S. International Trade Commission, shall designate the presiding officer who is instructed to issue a recommended determination as to temporary relief by September 28, 1980, and the Commission hereby shortens to five (5) days the period for filing exceptions to the recommended determination and for filing alternative findings of fact and conclusions of law under section 210.54 of the Commission's Rules.

The presiding officer shall also establish a schedule for oral presentations concerning the remedy, bonding, and public interest considerations for the purpose of creating an administrative record to be certified to the Commission by September 26, 1980. In addition to appearances and oral presentations on the remedy, bonding, and public interest considerations, the presiding officer shall provide for a pre-hearing briefing schedule to be published in the Federal Register soliciting the written views of any persons interested in this phase of the investigation. The transcript of the oral presentations, the pre-hearing briefs, and the other written comments will comprise the administrative record concerning remedy, bonding, and the public interest factors to be certified to the Commission. The Commission shall issue its determination on temporary relief by October 29, 1980.

The complaint is available for inspection by interested persons at the Office of the Secretary, U.S. International Trade Commission, 701 E Street NW., Washington, D.C. 20436, and in the Commission's New York Office, 6 World Trade Center, Suite 655, New York, N.Y. 10048.

By order of the Commission.

Issued: August 12, 1980.

Kenneth R. Mason,

Secretary.

Certain Steel Wire Nails From Korea; Import Investigation

Determination

On the basis of the record [1] developed in this investigation, the Commission [2] determines, pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C 1673d(b)), that an industry in the United States is not materially injured and is not threatened with material injury, and the establishment of an industry in the United States is not materially retarded, by reason of imports of certain steel wire nails from Korea, provided for in items 646.25 and 646.26 of the Tariff Schedules of the United States, which are covered by the U.S. Department of Commerce determination of sales at less than fair value (LTFV).

Background

The Commission instituted this investigation effective May 19, 1980, following receipt of notice by the Department of Commerce that certain steel wire nails from Korea are being sold at LTFV. Notice of the institution of the Commission's investigation and of the hearing to be held in connection therewith was duly given by posting copies of the notice in the Office of the Secretary, U.S. International Trade Commission, Washington, D.C., and in the Commission's New York City Office, located at 6 World Trade Center, and by publishing the notice in the **Federal Register** on May 23, 1980 (45 FR 34941).

The hearing was held in Washington, D.C., on July 9 and 10, 1980, and all persons who requested the opportunity were permitted to appear in person or by counsel.

Views of Chairman Bill Alberger, Vice Chairman Michael J. Calhoun, and Commissioner Paula Stern

On the basis of the record developed in investigation number 731–TA–26 (Final), we determine pursuant to section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d), that an industry in the United States is not materially injured or threatened with material injury, nor is the establishment of an industry materially retarded [3] by reason of imports of nails from the Republic of Korea, which are covered by the U.S. Department of Commerce's determination of sales at less than fair value.[4]

Domestic Industry

To begin an analysis of the impact on a domestic industry of imports sold in the United States at less than fair value, the Commission must first define the relevant industry. As a general rule, the term "industry" is defined in section 771(4)(A) of the Trade Agreements Act of 1979 (hereinafter referred to as the Trade Act), as,

[T]he domestic producers as a whole of a like product, or those producers whose collective output of the like product constitutes a major proportion of the total domestic production of that product.

The term "like product" is defined in section 771(10) as,

[A] product which is like, or in the absence of like, most similar in characteristics and uses with the article subject to an investigation.

Thus, the starting point for an analysis of the relevant industry is the proper identification of the imported article subject to the investigation and the proper identification of the "like product."

The Department of Commerce determination of less-than-fair-value sales covers those articles entering the United States under items 646.25 and 646.26 of the Tariff Schedules of the United States (TSUS), which includes brads, nails, spikes, staples, and tacks of one-piece construction, made of round steel wire. TSUS item 646.25 provides for these articles which are under 1-inch in length and less than 0.065 inchs in diameter. Item 646.26 provides for these articles which are 1-inch or more in length and 0.065 inches or more in diameter.

While the technical scope of the Department of Commerce determination covers more than nails, the Department found LTFV sales only with respect to certain steel wire nails. Those items actually found to be entering at LTFV are electro-galvanized nails which account for 52.8 percent of LTFV imports; bright nails which account for 14.8 percent; phosphate coated nails which account for 10.2 percent; vinyl coated nails, 10.1 percent; cement coated nails, 8.8 percent; hot dipped galvanized nails, 1.5 percent; blued nails, 1.4 percent; and miscellaneous nails, 0.4 percent. As a result, these nails are the articles subject to the investigation and the subject of our determination. For the most part, the imported nails in question are distinguishable from each other by their coatings and the consequent specialized uses which their coatings permit. The one exception is bright nails, which are not coated but are processed to give them a clean, smooth surface.[5]

Footnotes continued on next page

[1] The record is defined in sec. 207.2(j) of the Commission's Rules of Practice and Procedure (19 CFR 207.2(j)).

[2] Commissioners Moore and Bedell dissenting.

[3] Since there is an established domestic industry, the question of material retardation of the establishment of an industry is not at issue.

[4] This case comes before us as a result of a final affirmative determination of less than fair value sales by the Department of Commerce. On December 6, 1977, the President approved implementation by the Department of the Treasury of the Trigger Price Mechanism to monitor import prices of steel mill products. (The TPM was suspended in March 1980 in response to the filing of antidumping petitions by U.S. Steel Corporation relating to certain carbon steel products from European countries.) Production costs of steel mill products in Japan formed the basis of the trigger prices because Japan is considered to be the most efficient producer in the world. Imports priced below those prices were viewed as potential sales at less than fair value and when substantial quantities of such steel mill products entered the United States, an antidumping investigation could be "triggered" by the Department of the Treasury on its own motion. The Department's trigger price investigation of U.S. imports of certain steel wire nails from the Republic of Korea covered the 7-month period from May 1 through November 23, 1979. The investigation involved 33 Korean companies which shipped steel wire nails to the United States. On the basis of its investigation, the Department of the Treasury determined that 22 of these Korean companies shipped quantities of steel wire nails below the applicable trigger prices. Accordingly, on April 20, 1979, the Department of Treasury initiated an antidumping investigation, excluding the 11 companies not found to be selling below the trigger price. (On January 2, 1980, under the authority of the Government Reorganization Act (Reorganization Plan No. 3), the Department of Commerce succeeded to the authority of the Department of the Treasury in this matter.) The Department of Commerce investigation of U.S. imports of certain steel wire nails from the Republic of Korea covered the 4-month period from December 1, 1978 through March 31, 1979. This investigation included 12 of the 22 Korean producers mentioned above which accounted for 73 percent by value of nails imported into the United States from the Republic of Korea during the period of investigation. Fair value comparisons were made on approximately 64 percent by value of all nails shipped from the Republic of Korea to the United States during the period of investigation. As a result of these comparisons, two companies were found to have no margins and four companies had *de minimus* margins. These six companies were found not to be selling below fair value.

In addition, the Department of Commerce determined that some of the 11 firms originally excluded from the investigation may be trading companies which might be subject to the possible imposition of antidumping duties to the extent that the nails they exported were manufactured by firms found to have made sales at LTFV. Furthermore, other Korean manufacturers that exported to the United States during May 1979 through March 1979 would also be subject to any antidumping order resulting from an affirmative finding.

[5] Nails are galvanized with a zinc coating to prevent rust and corrosion. Two methods are commonly used to galvanize nails: electro-galvanizing and hot-galvanizing. Electro-galvantized nails are coated with a pure coating of zinc of a controlled thickness, attainable because of the electrical coating process. Hot-galvanized nails are coated with zinc by dipping them, which results in a thicker layer of zinc, presumably affording greater resistance to rust and corrosion. In the hearing, there was debate about the comparative advantages of the two processes for galvanizing nails. Evidence collected during the investigation indicates, however, that nails galvanized by one process perform as well as those galvanized by the other process in certain circumstances.

Phosphate coated nails are covered with a layer of phosphorous, which makes them easier to drive. They are used for dry-wall construction. Green-vinyl nails are coated with a poly-vinyl chloride lacquer, which makes the nails easier to drive and promotes a greater adherence to the wood. Cement coating is a process whereby nails are dipped in a resin mixture. The heat generated when this nail is driven into wood causes the cement coating to fuse, which thereby forms a bond with the wood. And, finally, blued nails are annealed and are preferred by some carpenters for sanitary reasons.

Approximately fifty domestic firms produce steel wire nails which include nails that are like the LTFV imports. In 1979, electro-galvanized nails accounted for 1.1 percent of domestic production of steel wire nails; bright nails accounted for 44.3 percent; cement coated nails for 20.9 percent; and hot galvanized for 25.1 percent. Phosphate coated, vinyl coated, blued, and other miscellaneous nails accounted for the remaining 8.5 percent of production.

There are two general types of domestic producers of steel wire nails: large integrated companies that make steel rod, draw it into wire, and then make nails from the wire and smaller, nonintegrated firms that make nails from purchased steel rod or wire. Eight known integrated firms accounted for about two-thirds of total production in 1977.

It is our view that there are seven domestic like products, which, for all practical purposes, are identical to the seven imported articles described above. We also find that since at least one type of these specific nails is produced by every domestic steel wire nail producer, the domestic industry, that is "the domestic producers as a whole of a like product," is comprised of all producers of steel wire nails.

In certain circumstances, the general definition of industry in section 771(4)(A) can be superseded to allow producers of the like product located within a particular geographic area to be treated as a distinct industry. This modification of the general definition of industry is provided for in section 771(4)(C), which states in relevant part:

(C) Regional Industries.—In appropriate circumstances, the United States, for a particular product market, may be divided into 2 or more markets and the producers within each market may be treated as if they were a separate industry if—

(i) the producers within such market sell all or almost all of their production of the like product in question in that market, and

(ii) the demand in that market is not supplied, to any substantial degree, by producers of the product in question located elsewhere in the United States.

Footnotes continued from last page

In this case, domestic producers of steel wire nails in the 10 western states of Arizona, California, Colorado, Idaho, Nevada, Montana, Oregon, Utah, Washington and Wyoming have argued for treatment as an industry under section 771(4)(C). We find that the two requirements for qualifying as a regional industry are met by the steel wire nail producers in these states. First, section 771(4)(C)(i) requires that producers within the regional market must sell all or almost all of their production of the subject like product in that market. The staff estimates that in 1979 shipments made by western regional producers to customers within the region accounted for more than 80 percent of all nail shipments for those producers. Because of high transportation costs, most shipments of steel wire nails in the United States are made to customers located within 500 miles of the plant. Second, section 771(4)(C)(ii) requires that regional demand must not be supplied to any substantial degree by producers of steel wire nails located in other parts of the country. Evidence on the record indicates that shipments of nails into the western region by producers located outside the region was about 1.5 percent of western consumption in 1979.

Establishing that producers in the western states have met the two statutory criteria for qualifying as a regional industry does not necessarily lead to the treatment of these producers as a regional industry. Treatment under section 771(4)(C) is a discretionary matter for the Commission to decide as this section provides for such treatment "in appropriate circumstances." Virtually no guidance is given the Commission in deciding when "appropriate circumstances" exist which warrant the treatment of regional producers as a separate industry. There is no instruction within the statute nor any implicit standard on the face of the statute. Moreover, both the legislative history and the Statements of Administrative Action are silent on this question. Therefore, it would seem the Commission has broad discretion in exercising this permissive authority. In viewing the statute as a whole, we view at least two considerations to be implicit in the notion of "appropriate circumstances": First, a particular region should account for a significant share of domestic consumption and production. Second, the condition of producers of the like product in the region should be worse than that of the industry at large.

The first consideration prevents imposition of duties on imports sold in the entire national market when their negative impact is limited to a very small segment of that market. The second consideration recognizes the appropriateness of focusing on a regional industry only where a smaller group of producers is suffering more than all producers as a whole.

With regard to the first consideration, evidence in this investigation reveals that producers in these 10 states account for approximately 20 percent of the domestic production of steel wire nails and that the region accounts for about 20 percent of total domestic consumption. Regarding the second consideration, while the domestic industry as a whole is experiencing a downward trend, producers in the 10 western states are experiencing a sharper decline. The western region's profitability is substantially lower than that of the industry as a whole. The ratio of less-than-fair-value imports to domestic consumption was significantly greater in the 10 western states. Furthermore, the level of inventories of producers in these states has been considerably higher than the level of producers' inventories within the entire industry.

Therefore, it is our view that appropriate circumstances exist for treating producers of steel wire nails in the 10 western states as a separate regional industry pursuant to section 771(4)(C). Indeed, in view of the facts, treatment under section 771(4)(C) provides the domestic industry its best case for relief.

While the matter of import concentration is treated in the context of material injury under section 771(4)(C) of the Trade Act, we shall address it here because, as a practical matter, it operates as a further consideration elucidating our treatment of a regional industry in this investigation.[6] The data obtained in this investigation indicate that approximately 43 percent of the LTFV imports entered the United States through this region. We must, therefore, determine whether 43 percent should be considered a concentration of such imports within the meaning of the statute.

In *Carbon Steel Plate from Taiwan*, which was considered under a different law containing a similar provision, Vice Chairman Alberger and Commissioner Stern stated:

[B]ecause cases before the Commission are likely to involve different factual

[6] Vice Chairman Calhoun, while concurring in the analysis, believes it inappropriate to view the notion of concentration as a factor bearing on a finding of regional industry. In his view, section 771(4)(C) establishes concentration as a factor bearing solely on the question of whether there is material injury to a regional industry.

circumstances, a precise mathematical formula will not always be reliable in determining the minimum percentage which constitutes sufficient concentration.[7]

There may be instances in which shipments of less than 50 percent may be considered a concentration of the subsidized or dumped imports within the region. In our view, this investigation is such a case.

The legislative history indicates that concentration can be found to exist where the ratio of the LTFV imports to consumption is clearly higher in the regional market than in the rest of the U.S. markets.[8] Although we do not have sufficient data to determine the approximate shares of U.S. consumption which the other regional markets represent, the record indicates that the western region constitutes only 20 percent of total U.S. consumption, although 43 percent of the Korean LTFV imports enter there. It might seem that the greatly disproportionate share of imports in this region is a function of a statistical aberration caused by the fact that a large portion of the LTFV imports enter this country through ports on the West Coast. However, as we have noted earlier, because of the high cost of land transportation associated with shipping steel wire nails, nails tend to be distributed within a 500 mile radius. Thus, it would appear that the overwhelming majority of steel wire nails entering the West Coast ports are actually sold within the ten western states under consideration.

Therefore, since the volume of dumped imports amounts to twice what could be expected if such imports were to be distributed evenly nationwide, we find that there is a concentration of the LTFV imports in the western regional market.

Material injury

Section 735(b) of the Tariff Act of 1930 provides for a Commission final determination as to material injury or threat thereof. Under section 771(7)(B), in making such a final determination—

> [T]he Commission shall consider, among other factors—
> (i) The volume of imports of the merchandise which is the subject of the investigation,
> (ii) The effect of imports of that merchandise on prices in the United States for like products, and
> (iii) The impact of imports of such merchandise on domestic producers of like products.

In addition, section 771(4)(D), directs the Commission to assess the effect of subsidized imports in relation to the domestic production of a like product—

> [I]f available data permit the separate identification of production in terms of such criteria as production process or the producers' profits.

If this is not possible, then—

> [T]he effect of the . . . dumped imports shall be assessed by the examination of the production of the narrowest group or range of products, which includes a like product, for which the necessary information can be provided.

Furthermore, since we have found that producers in the ten western states should be treated as a regional industry, section 771(4)(C) adds the further requirement that material injury, or threat of material injury, to that region can only be found where such injury is experienced by "the producers of all or almost all of the production within that market."[9]

In the unanimous preliminary determination in this case, the Commission found a "reasonable indication of injury."[10] In that case there were four factors which pointed to the possibility of injury and which required particular attention in the final investigation. Those factors were price depression, market penetration, shipments, and profits, particularly in the western states.

Pricing information shows that the average net selling prices for nails from Korean companies found to be selling at LTFV[11] were generally lower during the period of investigation than those of the comparable U.S.-produced nails. However, the price of both imported and domestically produced nails generally increased in the period 1978–79. The largest price differences were on the electro-galvanized and green-vinyl nails, which were not produced in any meaningful volume in the United States until 1979. Just under fifty-three percent of LTFV nails were electro-galvanized which are very costly to produce in the United States due to EPA regulations.[12] The green-vinyl nails were another large import item and, although they were developed by a domestic company, the demand for them, particularly in the western states far exceeded domestic capacity to produce them at least until 1979.[13] Thus, we do not find a causal relationship between the LTFV imports and any restraint on the upward movement of prices for nails.

There are also signs that the U.S. industry is undergoing some fundamental changes in its composition that have had an impact on pricing. Since 1976, six new non-integrated firms with improved productivity have entered the industry. The additional capacity of these plants, plus some capacity expansions in other firms, resulted in almost 60,000 tons of additional annual nail-producing capability (on a five-day operating basis) during 1977–79.

These new U.S. firms are aggressively seeking to gain market share by offering extensive product lines (which some integrated producers do not offer) and by adopting pricing strategies that in some cases do not cover costs of production. For example, a sales manager for two of the new U.S. firms stated at the public hearing that faced with current market conditions—

> We had three choices: We could keep production up in order to hold on to our market share even if that meant selling at a loss; we could cut production in the hope of maintaining prices; or we could get out of the business. We chose to maintain production. With our substantial investment in new plant equipment, we could not afford to sacrifice our market position and our skilled employees. We had to think of our future in the nail business, but obviously we cannot sustain these losses on an indefinite basis.[14]

Another of the new firms, Tree Island Steel Co., has adopted a marketing strategy of by-passing middlemen to offer end-users a more attractive price.[15] The entry of these firms into the market and the overall decline in consumption in 1979 created a situation in which there was considerably more U.S. capacity than the market could absorb without a substantial drop in imports from all sources.

[9] Vice Chairman Calhoun feels section 771(4)(C) adds concentration as a second requirement. See footnote 1 on page 11.

[10] Investigation No. AA1921–Inq.–26, Certain Steel Wire Nails from the Republic of Korea, May 1979. Vice Chairman Calhoun did not participate in the preliminary determination.

[11] The Department of Commerce investigation covered the four-month period from December 1, 1979 through March 31, 1979, and involved twelve of the 22 Korean producers found to be selling below trigger price. Another eleven companies had already been found not to be selling below trigger price. Of the twelve companies, six were found to be selling at less than fair value. The LTFV margins ranged from 1.3 to 11.5. Five of the six companies are located in the Masan free trade zone in Korea and constitute nearly all of the LTFV imports.

[13] Domestic production is now increasing to meet this demand for green-vinyl nails.

[14] Testimony of Mr. Ed Knapp, Sales Manager for Virginia Wire & Electric Co. and Florida Wire & Nail Co., Tr. p. 264.

[15] See Transcript, p. 198.

Profits generally declined both on a national and regional basis between 1977 and 1979. The total aggregate gross margin for all U.S. producers operating during 1977–79 fell from more than 8 percent in 1977 to 4.4 percent in 1979. In the western region, profits show an even sharper declining trend. However, much of this, on both a national and regional basis, can be attributed to the changes in the nail industry discussed above. New firms have entered the market since 1977, incurring significant start-up costs. At the same time, some of the older, less efficient firms have been going out of business due to their chronic noncompetitive position in the market which began well before the period that the domestic industry alleged injury.

U.S. consumption of nails, which is closely related to overall construction activity, rose each year since the 1975 recession until 1979 when an estimated decline of about 11 percent occurred. U.S. producers' shipments followed a similar trend increasing from 354,000 short tons in 1977 to 355,000 in 1978 before dropping to an estimated 348,000 tons in 1979. The impact of increasing import competition (from non-LTFV sources) can be seen, however, in the fact that the U.S. producers' share of the market declined from 58 percent in 1975 to 44 percent in 1978, before rising to an estimated 50 percent in 1979.

The most dramatic change in data from the preliminary affirmative case is in market penetration. The Department of Commerce finding of LTFV sales excludes 17 Korean firms, eleven of which were not selling below applicable trigger prices and 6 of which were specifically found not to be selling at LTFV. These 17 firms apparently account for the bulk of increases in imports from Korea, since data on the 5 largest producers, the Masan companies, show sharp declines since 1977, and questionnaire data show parallel declines for imports from Korea from other than the 17 excluded firms. These declines in imports began prior to the present investigation, and also prior to the initiation of trigger prices. The market penetration of LTFV imports declined by more than 50 percent both nationally and in the western states from 1977 to 1979. This decline seems to be continuing in 1980.

Further, the 14 customers contacted by the Commission and alleged to have purchased Korean imports in lieu of U.S. nails were unable to confirm that sales had in fact been lost specifically to imports from LTFV suppliers. We have therefore found no causal link between the condition of the industry and the LTFV imports.

There are other factors which indicate the relative stability of the nail industry in the United States. Production rose by 10 percent from 1977 to 1978 and remained constant in 1979. Inventories remained relatively stable between 1977 and 1979, but rose in the first quarter of 1980 resulting in part from the 1979 decline in consumption. Employment increased from 1,827 in 1977 to 1,882 in 1978. It fell to 1,867 in 1979; however, worker output per hour increased from 149 pounds in 1978 to 156 in 1979. Thus, while the number of workers decreased by 0.7 percent, worker productivity increased by 5 percent.

Many of the problems we have discussed in the nail industry are explained by the recession in the housing market. As noted, the consumption of steel wire nails is closely related to the construction industry. Statistics indicate that in the last decade (1969–79) the consumption of steel wire nails has followed the same cycle as construction, at least through 1976. During the period of decline in housing starts in 1979, the nail industry suffered a derivative period of decline affecting its profitability.

It was argued by counsel for the domestic producers that the substantial reduction in LTFV exports to the United States from the five Masan companies is merely a temporary and ill-disguised attempt to affect the outcome of this dumping case. They speculate that if the Commission "condones the Koreans tactic"[16] it would open an immense loophole in the administration of the antidumping act. While we recognize that these firms may presently have excess capacity, we cannot determine, on the basis of pure conjecture, that this excess capacity will necessarily be directed at the United States upon the termination of this investigation. There must be some independent corroborating evidence before we can conclude that this withdrawal from the market has been done in bad faith. Moreover, the decline in LTFV imports began before the initiation of any antidumping proceedings, and plausible alternative causes in explanation of this decline were presented to the Commission at the hearing and in the written submissions of the respondents.

For these reasons, we determine that the U.S. industry is not materially injured or threatened with material injury by reason of LTFV imports from Korea.

Findings of Fact

Section 771(7)(B) of the Tariff Act of 1930 requires the Commission to consider (1) the volume of the subject imports, (2) their effect on the domestic price of the like product, and (3) their impact on the domestic producers of the like product. In section 771(7)(C), the act further specifies a series of economic factors that the Commission must include in these considerations. Our findings of fact on each of these factors follows:

A. Volume of Imports

1. Imports from Korea increased from 1,500 tons, or less than 0.5 percent of imports in 1973, to 109,000 tons or 25 percent of imports in 1978. There was a corresponding decrease in Japan's share of imports due in part to the fact that there was shift in Japanese-owned nail producing facilities from Japan to the Masan free trade zone in Korea. (See Report at p. A–29)

Imports into the western states from Korea increased from 0.5 percent of total western imports in 1973 to 55 percent of imports in 1978. (See Report at p. A–31)

2. Imports from Korea decreased 109,000 short tons in 1978 to 92,000 short tons in 1979, a drop of 16 percent. They show a further decrease of 20 percent during January-March 1980 when compared to the corresponding period in 1979. (See Report at p. A–29)

In 1979 imports from Korea into the western states decreased to 53 percent of total imports in that region. (See Report at p. A–31)

3. U.S. imports of nails from the 5 Masan companies[17] declined from 51,000 tons in 1977, to 23,000 tons in 1979, representing a decrease of 55 percent. As a share of total imports from Korea, imports from the 5 Masan companies declined from 61 percent in 1977, to 25 percent in 1979. Information on the first quarter of 1980 indicates another decline to 18 percent of total imports from Korea. (See Report at p. A–29)

Estimated imports from the 5 Masan companies into the western region declined from 19 percent of imports in 1977 to 11 percent in 1979. (See Report at p. A–31)

4. Imports from the 5 Masan companies declined from 6.9 percent of apparent U.S. consumption in 1977 to 3.4 percent of consumption in 1979. (See Report at p. A–29)

Import to consumption ratios in the western states for nails from the five Masan companies decreased to 7.1 percent in 1979. (See Report at p. A–31)

[16] Post-hearing brief of Tree Island Steel, Inc., July 15, 1980, pp. 7–10.

[17] These 5 firms accounted for nearly all imports found to be at LTFV.

V 45 A G 13 80 UMI

B. Effects of LTFV Imports on U.S. Prices

5. The average net selling prices for the four types of nails compared were lower for imports from LTFV suppliers than those of the comparable U.S.-produced nails on both a national and regional basis. However, the margins of underselling were the largest on those nails which were not produced in commerical quantities in the United States until 1979. (See Report at p. A–35)

6. The price of domestic nails rose during the period January 1978-March 1980 on both a national and regional basis; in the case of 16-penny bright common nails by as much as 20 percent. (See Report at p. A–34)

7. Several customers alleged to have purchased LTFV nails in lieu of U.S. nails indicated that the Korean nails they purchased were for the most part nails which were unavailable domestically. Although they indicated Korean imports were competitively priced, this was only one of several variables involved in their decision to purchase nails. In addition many indicated that some domestic nails are priced competitively with Korean nails. Many of these customers were located in the western region. (See Report at pp. A–44–48)

C. Impact on the Affected Industry

8. U.S. production rose by 10 percent between 1977 and 1978 and remained stable in 1979. (See Report at p. A–16) In the western states production increased to 60,000 tons in 1979. (See Report at p. A–16)

9. Employment increased from 1,827 in 1977 to 1,882 in 1978 and then dropped slightly to 1,867 in 1979. However, for this same time period, productivity increased from 142 pounds per hour in 1977 to 156 pounds per hour in 1979, an increase of 10 percent. (See Report at pp. A–22–23) Employment increased between 1977 and 1979 to 282 workers in the western states region. (See Report at p. A–23)

10. U.S. producers capacity to produce steel wire nails rose each year during 1977–79, whether considered on a national or a regional basis. The ratio of production to capacity declined from 1978 to 1979 because production did not increase while capacity rose by 6 percent. (See Report at p. A–17)

11. The ratio of gross profits to net sales declined between 1977 and 1979. This can be attributed in large part of the start-up costs of the several new producers that began operations in this period. (See Report at p. A–24) Gross profit information for the western states is confidential.

12. There have been nine new or expanded steel wire nail production facilities in the United States since 1976. Four of these new or expanded firms are located in the western region. (See Report at p. A–13)

13. Many of the financial problems of the nail industry can be attributed to the housing recession. (See Report at p. A–13)

14. U.S. producers' shipments increased between 1977 and 1978, but declined somewhat in 1979. (See Report at p. A–18) Shipments in the western states increased since 1977.

15. Apparent U.S. consumption increased from 739,000 short tons in 1977 to 759,000 short tons in 1978, but then declined sharply by 11 percent in 1979 to an estimated 675,000 short tons. Apparent consumption in the western region remained stable in the period January-March 1980 when compared with the same period 1980. (See Report at p. A–22)

16. Inventories remained stable in relation to production during 1977–79. (See Report at p. A–21)

17. There was insufficient data available to the Commission to enable us to analyze the factors cash flow, wages, ability to raise capital, and investments.

Conclusions of Law

1. A regional industry exists as defined by section 771(4)(C) of the Tariff Act of 1930 comprised of the producers of steel wire nails operating in the States of Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming.

2. The domestic industry producing steel wire nails, whether considered on a national or regional basis, is not being materially injured, and is not threatened with material injury, by reason of the imports of those nails from Korea which are covered by the LTFV determination of the U.S. Department of Commerce.

Statement of Reasons for the Affirmative Determination of Commissioners George M. Moore and Catherine M. Bedell

In order for the Commission to reach an affirmative determination in this investigation under section 735(b) of the Tariff Act of 1930 (19 U.S.C. 1673d(b)), it is necessary to find that an industry in the United States is materially injured, or is threatened with material injury, or the establishment of an industry in the United States is materially retarded, by reason of imports of the steel wire nails from Korea which the U.S. Department of Commerce has determined are being sold in the united States at less than fair value (LTFV).

The Domestic Industry

In this investigation we consider the relevant domestic industry against which the impact of imports at LTFV must be measured to consist of the facilities of the domestic steel wire nail producers located in the Western States region of the United States.[18]

Section 771(4)(C) of the Tariff Act of 1930 (19 U.S.C. 1677(4)(C)) provides as follows:

> In appropriate circumstances, the United States, for a particular product market, may be divided into 2 or more markets and the producers within each market may be treated as if they were a separate industry if—
> (i) The producers within such market sell all or almost of their production of the like product in question in that market, and
> (ii) The demand in that market is not supplied, to any substantial degree, by producers of the product in question located elsewhere in the United States.
>
> In such appropriate circumstances, material injury, the threat of material injury, or material retardation of the establishment of an industry may be found to exist with respect to an industry even if the domestic industry as a whole, or those producers whose collective output of a like product constitutes a major proportion of the total domestic production of that product, is not injured, if there is a concentration of subsidized or dumped imports into such an isolated market and if the producers of all, or almost all, of the production within that market are being materially injured or threatened by material injury, or if the establishment of an industry is being materially retarded, by reason of the subsidized or dumped imports.

The record indicates that appropriate circumstances exist for treating the Western States region as a separate industry. Producers within the region sell more than 80 percent of their production of nails therein, principally because nails are heavy and costly to transport long distances, and only about 1.5 percent of consumption in that region is supplied by companies located elsewhere.[19] The "concentration of subsidized or dumped imports" criterion is met in that about 43 percent of imports from LTFV suppliers enter the Western States although that region accounts for only 20 percent of total U.S. consumption.[20]

Because of the small number of reporting firms, much of the economic data collected by the Commission on the Western industry is confidential. To avoid disclosure of such information, we will discuss only general trends and make comparisons with national data.

[18] Arizona, California, Colorado, Idaho, Montana, Nevada, Oregon, Utah, Washington, and Wyoming.
[19] Report, p. A–33, and data submitted by U.S. producers.
[20] Report, pp. A–32 and A–22.

As a preface, we point out that our determination of material injury to the Western regional industry by reason of LTFV imports from Korea takes into consideration the vulnerable position of the Western producers brought about by an expansion of domestic capacity and a concurrent decline in demand for nails. The adverse effect of the present recession on nail producers has left them particularly susceptible to injury from unfair import competition.

Sales at Less Than Fair Value

In its investigation covering the 4-month period from December 1, 1978, through March 31, 1979, the Commerce Department found sales at less than fair value by six Korean companies. Five of these companies were Japanese-owned concerns operating in the Mason Free Trade Zone. The LTFV margins found by Commerce for these five companies range from 5.5 percent to 11.5 percent. The average LTFV margin found for the six company, Kuk Dong, was 1.3 percent.

Material Injury by Reason of LTFV Imports

Section 771(7)(A) defines "material injury" as harm which is not inconsequential, immaterial, or unimportant. In making its determination with respect to material injury, the Commission is required, pursuant to section 771(7)(B) to consider, among other factors, the volume of the subject imports, the effect of such imports on prices in the United States for like products, and the impact on the domestic producers of like products.

Volume of LTFV imports.—Section 771(7)(C)(i) directs that, in evaluating the volume of imports, "the Commission shall consider whether the volume of imports of the merchandise, or any increase in that volume, either in absolute terms or relative to production or consumption in the United States, is significant."

Imports from Korea in the Western region increased from less than 0.5 percent of total imports in that region in 1973 to 53 percent in 1979. in 1977, imports from the five Masan companies, which accounted for nearly all sales found by Commerce to be at LTFV, represented an estimated 46 percent of total imports from Korea in the Western region. In 1978 and 1979 they accounted for an estimated 32 percent and 21 percent, respectively. About 43 percent of total LTFV imports from the Masan companies entered the Western region, or about 22,000 tons in 1977, 19,000 tons in 1978, and 10,000 tons in 1979. While such imports have declined, they still represented more than 7 percent of apparent Western consumption in 1979, a year in which U.S. producers accounted for only about 37 percent of consumption.[21] Moreover, it was likely that the sharp decline in imports in 1979 was at least partly the result of this antidumping investigation.

The effect of the LTFV imports on prices.—In evaluating the impact of the subject imports on U.S. prices for like products, section 771(7)(C)(ii) requires the Commission to consider whether there has been significant price undercutting by the imported merchandised and whether the effect of such imports has caused significant price depression or price suppression.

In this investigation, it is evident that U.S. producers' prices have been suppressed by reason of LTFV imports from Korea. This price suppression is reflected in the financial performance of Western nail producers, which declined each year during 1977–79 and was significantly poorer than that of producers located outside of the Western region. Losses were reported in both 1978 and 1979. One of the main reasons for declining gross profits was the inability of domestic producers to raise the price of their product to keep pace with the increasing costs of raw material, labor, and energy.[22] Producers' prices did rise between January 1978 and March 1980, but the increase was much less than the rate of increase in the Bureau of Labor Statistics (BLS) price index for iron and steel, which rose by 26.8 percent in that period. For example, the largest increase for the four types of nails examined was in the price of the 16-penny bright common nails, which rose by 19.9 percent, significantly less than the increase in the BLS producer price index for iron and steel products. In addition, U.S. producers' prices for the electro-galvanized and green-vinyl sinker nails examined rose much less than prices for bright and cement-coated nails. Electro-galvanized and green-vinyl nails accounted for more than 60 percent of total LTFV imports of nails during Commerce's investigation, indicating that price suppression is particularly evident for these major types of nails imported at LTFV. A comparison of domestic and import prices for the four types of nails on which the Commission collected information shows that LTFV imports from Korea generally undersold U.S.-produced nails for the eight quarters in which comparable data were available, in one instance by as much as 39 percent. Overall, the margins of underselling approximated the average LTFV margins, which ranged from 1.3 percent to 11.5 percent.[23]

The impact of the LTFV imports on the affected industry.—In the examination of the impact of the LTFV imports on the affected domestic industry, section 771(7)(C)(iii) directs the Commission to evaluate all relevant economic factors which have a bearing on the state of the industry.

As mentioned above, the financial experience of Western producers on their nail operations deteriorated each year during 1977–79. We found other convincing indicators of material injury to the Western region in the underutilization of domestic production capacity and in the high level of U.S. producers' inventories. While capacity rose during 1977–79, utilization of that capacity declined each year and was consistently lower than the comparable figures for producers nationwide.[24] Coupled with this increase in unused capacity was a rapid increase in inventories that continued into the first quarter of 1980. By March of that year, Western producers' inventories had more than doubled in comparison with the level at the end of 1977. as a share of production, Western region inventories have been high than national inventories since 1978.[25] While declining consumption had some effect on producers' falling capacity utilization and growing inventories, nevertheless, in 1979, the 7 percent ratio of LTFV imports to consumption in the Western region was a direct cause of material injury to the U.S. industry.

Moreover, the Commission was able to confirm that several U.S. producers had lost sales to imports from Korea. While it was difficult for most customers to specifically identify imports from LTFV suppliers, questionnaire data indicated that the Korean producers selling at LTFV had supplied at least a portion of the imports in question.[26]

In this investigation, the demonstrated price suppression, sizable inventory buildup, declining profitability and capacity utilization, confirmed lost sales, and significant penetration of LTFV imports in the Western region lead us to the determination that the injury caused by the LTFV imports is more than inconsequential, immaterial, or unimportant.

Conclusion

On the basis of the foregoing considerations, we conclude that an industry in the United States is

LEGAL SERVICES CORPORATION

Grants and Contracts

August 8, 1980

The Legal Services Corporation was established pursuant to the Legal Services Corporation Act of 1974, Pub. L. 93-355a, 88 Stat. 378, 42 U.S.C. 2996-2996*l*, as amended, publ. L. 95-222 (December 28, 1977). Section 1007(f) provides: "At least thirty days prior to the approval of any grant application or prior to entering into a contract or prior to the initiation of any other project, the Corporation shall announce publicly * * * such grant, contract, or project * * *."

The Legal Services Corporation hereby announces publicly that it is considering the grant application submitted by:

Legal Aid of Western Oklahoma, Inc., in Oklahoma City, Oklahoma, to serve Alfalfa, Beaver, Blaine, Cimmaron, Custer, Dewey, Ellis, Grant, Harper, Kingfisher, Major, Roger Mills, Texas, Washita, Woods and Woodward Counties.

Interested persons are hereby invited to sumit written comments or recommendations concerning the above application to the Regional Office of the Legal Services Corporation at: Legal Services Corporation, Denver Regional Office, 1726 Champa Street, Suite 500, Denver, Colorado 80202.

Clinton Lyons,

Director Office of Field Services.

BILLING CODE 6820-35-M

NUCLEAR REGULATORY COMMISSION

[Dockets Nos. 50-254, 50-265]

Commonwealth Edison Co., Iowa-Illinois Gas & Electric Co.; Issuance of Amendments to Facility Operating Licenses and Negative Declaration

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 57 and 52 to Facility Operating License Nos. DPR-29 and DPR-30, issued to Commonwealth Edison Company (acting for itself and on behalf of the Iowa-Illinois Gas and Electric Company), which revised Technical Specifications for operation of the Quad Cities Nuclear Power Station Unit Nos. 1 and 2 (the facility) located in Rock Island County, Illinois. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications, Appendix B, so that the 2°F per hour temperature change limit does not apply during changes in the mode of condenser cooling. In addition, administrative changes have been made to the facility's environmental monitoring reporting requirements to bring this in conformance with current practice.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of the amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has prepared an environmental impact appraisal for this action and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action other than that which has already been predicted and described in the Commission's Final Environmental Statement for the facility.

For further details with respect to this action, see (1) the application for amendment dated February 2, 1978, (2) Amendment No. 57 to License No. DPR-29, Amendment No. 52 to DPR-30, and (3) the Commission's Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. and at the Moline Public Library, 504-17th Street, Moline, Illinois 61265. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 6th day of August 1980.

For the Nuclear Regulatory Commission.

T. A. Ippolito,

Operating Reactors Branch No. 2, Division of Licensing.

BILLING CODE 7590-01-M

[Docket No. STN. 50-482-A]

Kansas Gas & Electric Co., Kansas City Power & Light Co., and Kansas Electric Power Cooperative, Inc.; Receipt of Information for Antitrust Review of Operating License Application

The Kansas Gas and Electric Company, acting for itself, Kansas City Power and Light Company and Kansas Electric Power Cooperative, Inc., filed information for Antitrust Review of an Operating License Application, dated May 6, 1980. This information was filed pursuant § 2.101 of the Commission's rules and regulations and is in connection with the plans of Kansas Gas and Electric Company, Kansas City Power and Light Company and Kansas Electric Power Cooperative, Inc. to operate a pressurized water reactor located on a site in Coffey County, Kansas. This reactor has been designated as the Wolf Creek Generating Station, Unit No. 1.

The portion of the application filed contains antitrust information for review pursuant to NRC Regulatory Guide 9.3 to determine whether there have been any significant changes since the completion of the antitrust review at the construction permit stage.

On completion of staff antitrust review of the above-named application, the Director of Nuclear Reactor Regulation will issue an initial finding as to whether there have been "significant changes" under section 105c(2) of the Act. A copy of this finding will be published in the **Federal Register** and will be sent to the Washington and local public document room and to those persons providing comments or information in response to this notice. If the initial finding concludes that there have not been any significant changes, request for reevaluation may be submitted for a period of 60 days after the date of the **Federal Register notice.** The results of any reevaluation that are requested will also be published in the **Federal Register** and copies sent to the Washington and local public document room.

A copy of the information for Antitrust Review for Operating License Application is available for public examination and copying for a fee at the Commission's Public Document Room, 1717 H Street NW, Washington, D.C. and at the local public document room in the Coffey County Courthouse, Burlington, Kansas 66839.

Any person who desires additional information regarding the matter covered by this notice or who wishes to have his views considered with respect to significant changes related to antitrust matters which have occurred in the licensee's activities since the construction permit antitrust review for the above-named plant should submit such requests for information or views to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555 Attention: Chief, Utility Finance Branch, Office of Nuclear Reactor Regulation, on or before September 22, 1980.

Dated at Bethesda, Md., this 10th day of July 1980.

For the Nuclear Regulatory Commission.

B. J. Youngblood,

Chief, Licensing Branch No. 1, Division of Licensing.

[FR Doc. 80-22156 Filed 7-22-80; 8:45 am]

BILLING CODE 7590-01-M

[Dockets Nos. 50-277, 50-278]

Philadelphia Electric Co., et al., Issuance of Amendments to Facility Operating Licenses

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendments Nos. 72 and 70 to Facility Operating Licenses Nos. DPR-44 and DPR-56, issued to Philadelphia Electric Company, Public Service Electric and Gas Company, Delmarva Power and Light Company, and Atlantic City Electric Company, which revised Technical Specifications for operation of the Peach Bottom Atomic Power Station, Units Nos. 2 and 3 (the facility) located in York County, Pennsylvania. The amendments are effective as of the date of issuance.

The amendments revise the Technical Specifications regarding suppression pool temperature limits for routine startup and power operation conditions and for periods of testing which add heat to the suppression pool.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated August 1, 1978, (2) Amendments Nos. 72 and 70 to Licenses Nos. DPR-44 and DPR-56, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, DC and at the Government Publications Section, State Library of Pennsylvania, Education Building, Commonwealth and Walnut Streets, Harrisburg, Pennsylvania. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Md., this 1st day of August 1980.

BILLING CODE 7590-01-M

[Docket Nos. 50-443 and 50-444]

Public Service Co. of New Hampshire, et al.; Issuance of Amendment To Construction Permits

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 3 to Construction Permit No. CPPR-135 and Amendment No. 3 to Construction Permit No. CPPR-136 issued to the Public Service Company of New Hampshire, The United Illuminating Company, Central Maine Power Company, Central Vermont Public Service Corporation, Fitchburg Gas and Electric Light Company, Montaup Electric Company, New Bedford Gas & Edison Light Company, New England Power Company, Town of Hudson, Massachusetts, Light and Power Department, Vermont Electric Cooperative, Inc., Bangor Hydro-Electric Company, Massachusetts Municipal Wholesale Electric Company, Maine Public Service Company and Taunton Municipal Lighting Plant. The amendments reflect changes in ownership and transfer of shares of the Seabrook Station, Units 1 and 2 (the facility), located in Rockingham County, New Hampshire. The amendments are effective as of their date of issuance.

These amendments provide for the addition of New Hampshire Electric Coop, Inc., and the reinstatement of The Connecticut Light and Power Company as applicants for all licenses previously requested, and the transfer of partial ownership shares as noted in the construction permit amendments for these applicants and for ten other continuing applicants.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendments contained in Public Service Company of New Hampshire's letters, dated May 16, 1979, and March 14, 1980; (2) Amendment Nos. 1 and 2 to Construction Permit No. CPPR-135; (3) Amendment Nos. 1 and 2 to Construction Permit No. CPPR-136; and (4) the Commission's letter to Public Service Company of New Hampshire and the related Safety Evaluation attached thereto. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW, Washington, D.C. and at the Exeter Public Library, Front Street, Exeter, New Hampshire 03833.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland this 6th day of August, 1980.

Applications for Licenses To Export/Import Nuclear Facilities or Materials

Pursuant to 10 CFR 110.70(b) "Public Notice of Receipt of an Application," please take notice that the Nuclear Regulatory Commission has received the following applications for export/import licenses. A copy of each application is on file in the Nuclear Regulatory Commission's Public Document Room

located at 1717 H St., N.W., Washington, D.C.

A request for a hearing or a petition for leave to intervene may be filed by August 28, 1980. Any request for hearing or petition for leave to intervene shall be served by the requestor or petitioner upon the applicant, the Executive Legal Director, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, the Secretary, U.S. Nuclear Regulatory Commission and the Executive Secretary, Department of State, Washington, D.C. 20520.

In its review of applications for license to export production or utilization facilities, special nuclear material or source material, noticed herein, the Commission does not evaluate the health, safety or environmental effects in the recipient nation of the facility or material to be exported.

Dated August 6, 1980 at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

Joseph D. LaFleur,

Acting Director, Office of International Programs.

BILLING CODE 7590-01-M

International Atomic Energy Agency Draft Safety Guide; Availability of Draft for Public Comment

The International Atomic Energy Agency (IAEA) is developing a limited number of internationally acceptable codes of practice and safety guides for nuclear power plants. These codes and guides will be developed in the following five areas: Government Organization, Siting, Design, Operation, and Quality Assurance. The purpose of these codes and guides is to provide IAEA guidance to countries beginning nuclear power programs.

The IAEA codes of practice and safety guides are developed in the following way. The IAEA receives and collates relevant existing information used by member countries. Using this collation as a starting point, an IAEA working group of a few experts then develops a preliminary draft. This preliminary draft is reviewed and modified by the IAEA Technical Review Committee to the extent necessary to develop a draft acceptable to them. This draft code of practice or safety guide is then sent to the IAEA Senior Advisory Group which reviews and modifies the draft as necessary to reach agreement on the draft and then forwards it to the IAEA Secretariat to obtain comments from the Member States. The Senior Advisory Group then considers the Member State comments, again modifies the draft as necessary to reach agreement and forwards it to the IAEA Director General with a recommendation that it be accepted.

As part of this program, Safety Guide SG–D9, "Design Aspects of Radiological Protection for Nuclear Power Plants," has been developed. An IAEA working group, consisting of Mr. R. Hock of the Federal Republic of Germany; Mr. B. F. Chamany of India; and Mr. P. A. Solari of the United Kingdom developed the initial draft of this Safety Guide from an IAEA collation during a meeting on April 17–20, 1978. The working group modified the initial draft at meetings on October 16–20, 1978, and May 27–June 6, 1980, and we are soliciting public comment on Revision 3 of the Guide. Comments on this draft received by September 19, 1980, will be useful to the U.S. representatives to the Technical Review Committee and Senior Advisory Group in evaluating its adequacy prior to the next IAEA discussion.

Single copies of this draft may be obtained by a written request to the Director, Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 522(a))

Dated at Rockville, Md., this 4th day of August 1980.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Standards Development.

Mixed Oxide Fuel; International Nuclear Fuel Cycle Evaluation

Order

On December 23, 1977 and May 8, 1978 the Commission issued orders terminating GESMO and recycle related proceedings. See CLI–77–33, 6 NRC 861 and CLI–78–10, 7 NRC 711. In those orders the Commission committed itself to reexamine its decision following the completion of the International Nuclear Fuel Cycle Evaluation (INFCE).

In early 1980 INFCE was completed. On May 2, the Commission wrote to Stuart E. Eizenstat, Assistant to the President for Domestic Affairs and Policy, requesting the Administration's views on whether its nonproliferation policies had changed since October 4, 1977, the date Mr. Eizenstat, speaking on behalf of the President, had recommended to the NRC that it terminate GESMO and recycle related proceedings. The Commission also requested the Administration's views on whether the GESMO proceeding should be reopened.

On July 14, 1980 Mr. Eizenstat responded asserting that the views expressed in his letter of October 4, 1977 continue to be those of the Administration. He also stated: "it is the view of the President that the GESMO proceedings should remain terminated and that a reopening of GESMO would be inimical to national security and contrary to the non-proliferation and foreign policy interests of the United States."

Before making its decision the Commission invites the parties to these proceedings and any other interested persons to provide comments to the Commission on the issues raised by the Eizenstat letter. In particular, the Commission invites comments on:

—Whether the Commission should reopen GESMO and other recycle-related licensing proceedings;
—What action, if any, the Commission should take regarding the license applications listed above which relate to the commercial reprocessing of nuclear material;
—Whether the Commission should consider any other actions related to this subject.

Comments should be submitted to the Secretary, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Chief, Docketing and Service Branch by September 29, 1980.

It is so ordered.

Dated at Washington, D.C., this 7th day of August, 1980.

For the Commission.

Samuel J. Chilk,

Secretary of the Commission.

[FR Doc. 80-24402 Filed 8-12-80; 8:45 am]

BILLING CODE 7590-01-M

[Byproduct Material License No. 50–17838–01 EA–80–24]

Providence Hospital, Radioactive Materials Licensees; Order Imposing Civil Monetary Penalties

I

Providence Hospital, 3200 Providence Drive, Anchorage, Alaska, (the "licensee"), is the holder of Byproduct Material License No. 50–17838–01 (the "license") issued by the Nuclear Regulatory Commission (the "Commission"). License No. 50–17838–01 authorizes the licensee to receive, acquire, possess, and transfer radioactive materials in accordance with the conditions specified therein, and is due to expire on March 31, 1983.

II

A special inspection of the license's activities under the license was conducted on January 28 and 29, 1980, at the licensee's facility in Anchorage, Alaska. As a result of this inspecton, it appears that the licensee has not conducted its activities in full compliance with the conditions of its license and with the requirements of the Nuclear Regulatory Commission's "Standards for Protection Against Radiation," Part 20, Title 10, Code of Federal Regulations. A written Notice of Violation was served upon the licensee by letter dated May 7, 1980, specifying the items of noncompliance in accordance with 10 CFR 2.201. A Notice of Proposed Imposition of Civil Penalties dated May 7, 1980, was served concurrently upon the licensee in accordance with Section 234 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2282) and 10 CFR 2.205, incorporating by reference the Notice of Violation, which stated the nature of the items of noncompliance and the provisions of Nuclear Regulatory Commission regulations and license conditions.

An answer dated May 31, 1980, to the Notice of Violation and the Notice of Proposed Imposition of Civil Penalties was received from the licensee.

III

Upon consideration of the answers received and the statements of fact, explanation, and argument in denial of the allegations of noncompliance and in protest of the imposition of penalties contained therein, as set forth in Appendix A to this Order, the Director of the Office of Inspection and Enforcement has determined that the penalties proposed for the items of noncompliance designated in the Notice of Violation should be imposed, except for Item 3, which is remitted.

IV

In view of the foregoing and pursuant to Section 234 of the Atomic Energy Act of 1954, as amended (42 U.S.C. 2282) and 10 CFR 2.205, It is hereby ordered that: The licensee pay civil penalties in the total amount of One Thousand Five Hundred Dollars within twenty-five days of the date of this Order, by check, draft, or money order, payable to the Treasurer of the United States, and mailed to the Director of the Office of Inspection and Enforcement.

V

The licensee may, within twenty-five days of the date of this Order, request a hearing. A request for a hearing shall be addressed to the Secretary to the Commission, U.S.N.R.C., Washington, D.C. 20555. A copy of the hearing request shall also be sent to the Executive Legal Director, U.S.N.R.C., Washington, D.C. 20555. If a hearing is requested, the Commission will issue an order designating the time and place of hearing. Upon failure of the licensee to request a hearing within twenty-five days of the date of this Order, the provisions of this Order shall be effective without further proceedings and, if payment has not been made by that time, the matter may be referred to the Attorney General for collection.

VI

In the event the licensee requests a hearing as provided above and a hearing is held, the issues to be considered at such hearing shall be:

(a) whether the licensee was in noncompliance with the Commission's regulations and the conditions of the license as set forth in the Notice of Violation referenced in Section III above, with the exception of Item 3, which is remitted; and,

(b) whether, on the basis of such items of noncompliance, this Order should be sustained.

Dated this 5th day of August 1980 at Bethesda, Maryland.

For the Nuclear Regulatory Commission.

R. C. DeYoung,

Deputy Director, Office of Inspection and Enforcement.

Appendix A To Order Imposing Civil Penalties Evaluations and Conclusions

For each item of noncompliance and associated civil penalty identified in the Notice of Violation (dated May 7, 1980), the original item of noncompliance is restated and the Office of Inspection and Enforcement's evaluation and conclusion regarding the licensee's responses to each item (two responses dated May 31, 1980) is presented.

Statement of Noncompliance

1. 10 CFR 20.207(b), "Storage and control of licensed material in unrestricted areas," requires that licensed material in an unrestriced area be tended under constant surveillance and under the immediate control of the licensee. 10 CFR 20.105(b), "Permissible levels of radiation in unrestricted areas," limits the radiation level in an unrestricted area from a radioactive source such that an individual could not receive a dose in excess of 2 millirems in any one hour or 100 millirems in any seven consecutive days.

Contrary to the above requirements, after removing ten iridium-192 seed from a patient on December 29, 1979, a licensee physician placed the seeds in an unlocked lead container and moved them to an adjacent anteroom where several relatives were waiting to see the patient. The physician then returned to the patient's room for approximately 30 minutes to perform necessary post removal tasks, leaving the iridum seeds unattended.

Subsequently, the ten iridium-192 seeds totaling approximately 3.0 mCi were determined to be lost. On January 29, 1980, an NRC inspector found 9 of the seeds under the access stairway to the hospital truck pier adjacent to the dumpster. He also found one seed in a vacuum clearner. Hospital personnel had access to the areas where the seeds were found. The dose rate from the seeds exceeded two millirems per hour at one foot.

This violation constituted an occurrence related to health and safety (Civil Peanlty—$1,000.)

Evaluation of Licensee Response

This item of noncompliance contains two parts involving the separate requirements of 10 CFR 20.207(b) and 20.105(b). The licensee denies the part of the citation pertaining to 10 CFR 20.207(b), "Storage and Control of licensed material in unrestricted areas." Essential element of this ctitation are: (a) Was NRC licensed radioactive material involved? (b) Was the material unattended? and (c) Was the area an unrestricted area?

The answers to (a) and (b) are yes, but the licensee maintains that the anteroom in question was actually a restricted area, with access controlled by the hospital staff. This position is further strenghtened by photographs of signs posted in the area declaring the area a restricted area and announcing the presence of radioactive material. It thus appears that the anteroom in question was likely a restricted area.

However, the licensee did lose ten iridium seeds which were eventually found in an unrestricted area. Nine iridium-192 seeds remained for a period of time, possibly as long as 31 days, in the unrestricted area under the steps adjacent to the truck pier outside the hospital. This area is an unrestricted area as defined in 10 CFR Part 20, and the material there was not "tended under constant surveillance and under the immediate control of the licensee." Also, a single seed was found in a vacuum cleaner located in another unrestricted area, and had likely been there for a considerable time.

There also was a period of time when all 10 iridium-192 seeds were in the hospital, in all probability on the floor and in vaccum cleaners. During this period, the seeds again were likely neither in a restricted area nor were they under the control of any individual who is authorized by the NRC license to use these radioactive materials.

The licensee also denies the second part of the citation pertaining to 10 CFR 20.105(b), "Permissible levels of radiation in unrestricted areas." Essential elements of this citation are: (a) Was NRC licensed radioactive material involved? (b) Did radiation levels exist which if an individual were continuously present in the area could result in his receiving a dose in excess of two millirems in any one hour or in excess of 100 millirems in any seven consecutive days? and (c) Was the area involved an unrestricted area?

This item of noncompliance relates to the ten seeds subsequent to their loss. In response to (a) above, there is no question that the one seed found in the vacuum cleaner in use in the hospital and the nine seeds found under the steel steps adjacent to the truck pier outside the hospital were NRC licensed material. They were part of a shipment of iridium-192 seeds received at Providence Hospital on December 24, 1979 from Alpha Omega Services, Paramount, California. They were used in treatments at Providence Hospital and subsequently lost.

With respect to (b), above, the nine seeds found under the stairway adjacent to the truck pier outside the hospital emmitted radiation levels of 16 millirems/hr at one foot. Therefore, if an individual were continuously present, it could result in his receiving a dose of 16 millirems in one hour if he were located one foot away from the nine seeds. This is greater than 2 mrem in any one hour. In addition, if an individual were continuously present for seven consecutive days, it could result in his receiving a dose in excess of 100 millirems. In either event, the levels of 10 CFR 20.105(b) were exceeded.

Finally, with respect to (c), above, both areas where the iridium seeds were eventually found were unrestricted areas.

The licensee questions the application 20.105(b) in the circumstances of this case. The licensee suggests that the use of the word "or" in the regulations allows the licensee to meet either requirement imposed (i.e., 2 millirems per hour or 100 millirems in any consecutive seven day period) and thus meet the regulation.

This argument is irrelevant because, at the dose rate actually measured at one foot, both the requirements of the regulations and hence the regulation itself, were violated.

The licensee further questions the application of this regulation in the circumstances of this case in that the licensee seems to imply that the application of the regulation requires an analysis of the actual exposures in each instance. This is not so. The regulation prohibits certain *radiation levels*. If the potential exists for individuals to be exposed to the radiation levels at or above those specified in the regulation for the time period prescribed, the regulation is violated. Whether personnel exposure in fact occurred is irrelevent. In this case, the licensee had no idea where the iridium seeds were located. The seeds could have adhered to clothing or been placed in a pocket resulting in significant exposures at contact. The Staff reported radiation levels at one foot to provide a measure of the levels involved. This instance had the clear potential to expose individuals for times and at levels in excess of the regulation and this determines the violation. The language of the Statement of Consideration issued with the regulations is clear in this regard:

These levels are believed to be sufficiently low to assure that there is *no reasonable probability* of individuals in unrestricted areas receiving exposures in excess of 10 percent of the permissible levels for restricted areas

under any circumstances. (24 Fed. Reg. 3527, May 12, 1958, Emphasis supplied.)

The licensee further challenges the citations against 10 CFR 20.105(b) and 10 CFR 20.207(b) on the ground that the sources were lost and therefore compliance with those regulations was not required. Every licensee is responsible for meeting the requirements of Part 20 in any of the activities it conducts with materials under license. If the licensee misplaces or loses the licensed material, that loss constitutes an act of possession, use, transfer and the regulatory requirements of Part 20 apply to the lost material. Any other approach has the illogic of permitting the licensee to commit a transgression in fact, i.e., a loss, without there being any legal violation. The regulations were not promulgated with that intent. "The intention of the section [i.e., § 20.207] is to assure that proper controls are maintained over licensed radioactive material *at all times.*" (40 Fed. Reg. 26679, June 15, 1975, Emphasis supplied). And so the licensee errs when it argues that materials lost are not materials subject to regulations, i.e., materials possessed, used or transferred.

The licensee in his response also describes various parts of the NRC regulations such as the maximum annual dose permitted to an individual member of the general public, 20.105(a); permissible radiation levels permitted on packages of radioactive materials during transportation, 10 CFR Part 71; and requirements for posting and controlling high radiation areas, 10 CFR 20.203(c). None of those regulations have any bearing on citations for 20.105(b) and 20.207(b).

Conclusion

Noncompliance with 10 CFR 20.207(b) and 10 CFR 20.105(b) existed for the period of time when the seeds were lost at the hospital. The information presented by the licensee does not provide a basis for modification of this enforcement action. The item as stated in the Notice of Violation is an item of noncompliance.

Statement of Noncompliance

2. 10 CFR 20.201(b), "Surveys," requires each licensee to make such surveys as may be necessary for him to comply with the regulations in this part. As used in the regulations in this part, "Survey" means an evaluation of the radiation hazards incident to the use of radioactive materials.

Contrary to this requirement, surveys conducted during the period of January 15, 1980 to January 29, 1980, subsequent to the loss of the iridium–192 seeds, were not adequate to detect radiation levels in unrestricted areas in excess of the limits specified in 10 CFR 20.105(b).

This violation contributed to an occurence related to health and safety. (Civil Penalty—$500.)

Evaluation of Licensee Response

The licensee denies this item of noncompliance. Essential elements in this citation are: (a) Was NRC licensed material involved? (b) Was a survey required? (c) With what part of the regulations was the survey intended to ensure compliance? (d) Was a survey made? and (e) Was the survey adequate to ensure compliance with the regulation? With respect to (a), the radioactive material involved was the same 10 iridium–192 seeds described earlier. In response to (b) and (c), a radiation survey was required by 10 CFR 20.201(b), and the survey was intended to ensure compliance with 10 CFR 20.105(b). In response to (d), a survey was made by the licensee.

However, with respect to (e) above, the licensee argues that its surveys were adequate and no violation of 20.201(b) took place. A survey is of little value if it is not adequate to accomplish the desired end. In this case, the intent of the survey was to detect 10 iridium–192 seeds encased in a single nylon ribbon approximately six inches long, containing a total of approximately 3.0 millicuries of iridum–192. That quantity of radioactive material (10 seeds) will result in radiation dose rates of approximately 18 millirems per hour at one foot, approximately 4 millirems per hour at two feet, and approximately 1 millirem per hour at 4 feet. The survey was also to ensure compliance with the limits expressed in 20.105(b) which are 2 millirems in any one hour (2 millirems per hour in this case) and 100 millirems in any 7 consecutive days which calculates to be approximately 0.6 millirem per hour if a continuous, uniform rate of delivery is assumed. Thus the radiation levels which the survey was intended to detect are well defined.

The licensee in his response takes the position that his surveys were made with a standard portable Geiger-Mueller counter, and that his surveys did not detect the seeds. Since the NRC inspector used a more sensitive instrument and was successful in locating the sources, the licensee says, in effect, the NRC is requiring that all licensees procure these more sensitive instruments.

Conventional portable Geiger-Mueller instruments measure normal natural radiation background at less than 0.1 milliren per hour and the meter indicates full scale on the most sensitive range at 0.5 millirem per hour. Thus, the instruments available to the hospital were sufficiently sensitive to detect the radiation levels of interests in this situation. For example, one seed would indicate a dose rate of approximately 2 millirems per hour at one foot.

In any loss such as this, there is always the possibility that the radioactive material has fallen to the floor, and has been picked up or moved about during cleaning and other housekeeping activities. Thus, floors cleaning equipment and waste receptacles are prime candidates for survey. Providence Hospital in a letter to the NRC dated January 22, 1980 described surveys of the patient's rooms, the incinerator, mops and linen, laundry and adjacent areas. That letter further mentions the possibility that the seeds may have been transferred in some way to the general hospital hallways, swept up and discarded. However,this possibility evidently was not followed up. A radiation survey with the instruments possossed by the hospital would have easily detected the seeds while they were in the vacuum cleaner bag, and a careful radiation survey of the area around the dumpster outside the hospital would have detected the seeds. A careful-radiation survey with the hospital's instruments should have detected the one seed in the vacuum cleaner. One seed emits a radiation level of about 1.8 millirems per hour at one foot, which would be off-scale on the most sensitive range of the Hospital's instrument. Even assuming some shielding by the vacuum cleaner, such radiation levels should be detectable with a standard Geiger-Mueller instrument.

One of the licensee's survey instruments was actually used to finally locate the seeds under the steel stairway outside the hospital. Using that instrument a hospital employee quickly found and recovered 9 seeds in the nylon ribbon.

The licensee contends that the NRC position in this situation will require all licensee to obtain very sensitive instruments. That is not the case. The instrument used is only one aspect of a survey. The Geiger-Mueller instruments owned by the hospital were adequate for the required survey when used properly. As stated by the licensee in his response, the NRC has accepted those instruments in previous inspections. The NRC will also accept those standard Geiger-Mueller instruments as adequate in future inspections. Such instruments are standard in medical institutions across the United States. However,

materials users who are forced to share the

adequate instruments do not ensure adequate surveys unless properly used.

Conclusion

The licensee's existing instrumentation was adequate for the required surveys. We conclude that, if diligent radiation surveys has been conducted, the seeds would have been found by the licensee. Thus, we conclude that the radiation surveys that were conducted by the licensee were not adequate. The item as stated in the Notice of Violation is an item of noncompliance.

Statement of Noncompliance

3. 10 CFR 20.402(a), "Reports of theft or loss of licensed material," requires that each licensee reported by telephone to the Director of the Nuclear Regulatory Commission Inspection and Enforcement Regional Offices listed in Appendix D [of Part 20] immediately after its occurrence becomes known to the licensee, any loss or theft of licensed material in such quantities and under such circumstances that it appears to the licensee that a substantial hazard may result to persons in unrestricted areas.

Contrary to the above requirement, although it was determined on January 15, 1980 that ten iridium–192 seeds were lost, the appropriate Regional NRC Office was not notified until January 17, 1980.

This is an infraction. (Civil Penalty—$200.)

Evaluation of Licensee Reponse

The licensee denies this item. The discrepancy in the seed count was noted on January 15, 1980. After some search and survey, the hospital attempted to notify the Region V office of the NRC in Walnut Creek, California of the loss by telephone, within 24 hours, on January 16, 1980. The hospital was not successful in reaching the Region V office. The call placed by the hospital went to a Federal Government Switchboard which is not manned except during normal daytime working hours. The hospital was unaware of the correct 24 hour number currently in use by the Region V office for such notifications. This was so even though the correct number had been published in the Federal Register on November 5, 1979. See 44 FED Reg. 63515. Therefore, the actual notification was not received by the NRC until January 17, 1980.

The licensee states that there is no definition of "immediate" in the NRC Regulations. That "immediate" notification should be prompt and in no event later than 24 hours is supported by Section 20.403 where immediate notification is required in some cases, and 24 hour notification is required for less significant matters. A reading of that Section leads to the conclusion that "immediate" notification should be made in less than 24 hours. The licensee, in fact, attempted its first notification within 24 hours but was unsuccessful due to the circumstances discussed above.

The licensee argues incorrectly that no substantial hazard could result to persons in the unrestricted area from the loss of 3 millicuries of iridium–192. While the radiation dose rates at some distance are not excessive, the possibility exists of the seeds adhering to clothing, being placed in a pocket, or otherwise ending up on or near the surface of a body. Such a situation could result in injury to that person. Loss of the iridium seeds was a situation which could result in substantial hazard and therefore required immediate notification of the NRC under 10 CFR 20.402(a).

Finally, the licensee appears to ascribe some significance to the arrival of the NRC inspector at the licensee's facility, twelve days after notification. The purpose of notification is not necessarily to permit the immediate dispatch of an NRC inspector. Its purpose is in fact, to permit an assessment of the incident to be made and to insure that the licensee is responding properly. A proper response by the licensee in this instance would have included surveys adequate to find the lost seeds. When the licensee's response on this area proved inadequate, an inspector was sent to the facility to review the situation.

Conclusion

Although the violation occurred, Providence Hospital did make an effort to make the required notification and did actually notify the NRC within 48 hours. On this basic, the $200 civil penalty is remitted.

Errata to Regulatory Guide; Issuance and Availability

The Nuclear Regulatory Commission has issued errata to Regulatory Guide 1.59, Revision 2, "Design Basis Floods for Nuclear Power Plants." Since August 1977, when Revision 2 to this guide was issued, new information that affects the Probable Maximum Flood (PMF) isolines for the Upper Ohio River for drainage areas 10,000 and 20,000 square miles has been identified. The new information has resulted in two revised figures and two revised sheets of PMF data. These changes do not have any significant impact on the Design Basis Flood for existing plants.

Requests for single copies of these errata should be directed to the Distribution Services Section, Division of Technical Information and Document Control, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

(5 U.S.C. 552 (a))

Dated at Rockville, Maryland this 5th day of August 1980.

For the Nuclear Regulatory Commission.

Robert B. Minogue,

Director, Office of Standards Development.

BILLING CODE 7590-01-M

[Docket No. PRM–30–56]

Gulf Nuclear, Inc.; Denial of Petition for Rulemaking

AGENCY: U.S. Nuclear Regulatory Commission.

ACTION: Denial of Petition for rulemaking.

By letter dated April 12, 1979, Mr. Walter P. Peeples, Jr., on behalf of Gulf Nuclear, Inc., filed with the Nuclear Regulatory Commission a petition for rulemaking.

The Petition

The petitioner proposed that the Nuclear Regulatory Commission be divided into two separate entities—one area would cover power reactors, uranium mining, nuclear weapons manufacturing, nuclear fuel processors and any area that deals with fissile materials; the second area would deal with byproduct materials. (Note: Nuclear weapons manufacturing is a responsibility of the Department of Energy rather than the Nuclear Regulatory Commission.)

Basis for Request

In support of his petition, Mr. Peeples stated five propositions that he felt were adequate justification for consideration of his proposal:

1. Fissile materials used in power production and the production of nuclear weapons require far more stringent rules than those required of byproduct material users and licensees. This includes regulations concerning shipment and use of these materials. Because the U.S. Nuclear Regulatory Commission is a single entity, all rules pertain to both types of licensees.

2. The majority of effort of the U.S. NRC is devoted to fissile materials creating enormous costs and efforts to control. The majority of the licensees are byproduct materials users who are forced to share the cost burden exhibited in U.S. NRC fees.

3. The staff and leadership of the U.S. NRC devotes the majority of its time to expended energy related to power reactors which creates undue burdens on byproduct materials users.

4. A division of responsibility by NRC would create a positive effect on the general public by making them aware that there are different types of radioactive materials, easing some of the political pressure on the NRC.

5. Because of the present makeup of NRC controlling both areas, the public apprehension toward power reactors has a tendency to force over-regulation of byproduct materials because both are jointly referred to as simply "radioactive materials". This detracts from the ability to point out the positive nature of public benefits derived from both types of materials. Since NRC fails to distinguish between the two types of materials, undue burdens in transportation and publicity force byproduct materials users to defend a position they are not totally familiar with. Petitions and regulations, including regulatory guides, are frequently opposed or incorrectly interpreted because of lack of distinction between the two types of materials.

In summary, the NRC staff responses are based on published statements related to (1) legislative mandates, (2) judicial guidelines, and (3) statutory responsibilities for regulating civilian nuclear activities. Many parts of the NRC rules are devoted to regulating production and utilization facilities, including nuclear reactors and facilities for processing irradiated special nuclear material. Other parts are devoted to regulating byproduct materials, source materials, or special nuclear materials. Several parts cover both fissile materials and other nuclear materials.

An example of this last case is the NRC's regulation, "Fees for Facilities and Materials Licenses and Other Regulatory Services Under the Atomic Energy Act of 1954, as Amended," 10 CFR Part 170. The fees charged for licensing and inspection services by the NRC are based on guidelines that determine whether or not the NRC may charge a fee for a particular service and what the maximum fee may be. The NRC is generally obliged to impose the fees allowed by the guidelines where it is fair and equitable to do so and is limited by the requirement that a consistent and fundamentally fair fee structure must accord equal treatment to similarly situated recipients of agency service for nuclear facilities, fissile materials, and other radioactive materials.

A copy of "NRC Staff Responses to Petitioner's Justification Statements) PRM 30–56," is available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Single copies of the document may be obtained on request from the Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Request for Comments on Petition

A notice of filing of petition for rulemaking was published in the **Federal Register** on May 17, 1979 (44 FR 28896). The comment period expired July 16, 1979. Eleven letters of comment were received in response to the notice. Two of the letters opposed the proposal and nine letters supported the proposal.

Several persons commented generally that NRC regulations which cover both fissile materials and byproduct materials result in administrative burdens, confusion, and added costs for byproducts materials users. Application of pertinent NRC regulatory requirements in a graded approach, i.e., applied to an extent consistent with their importance to safety, can reduce burdens and costs for persons complying with the requirements. In many instances, the NRC's regulations grant relief from safeguards reporting requirements for small quantities of byproduct material and grant relief from both safeguards and criticality safety controls for small quantities of fissile material.

Two persons commented on the costs of NRC licensing and inspection fees and the beneficiaries of NRC services. Fees associated with fissile material licensing and inspection activities (and all other fee categories) are based on the sum on the average of the direct and indirect costs that the NRC incurs in furnishing the services for a member of the class of identifiable recipients for which the fees are assessed. Excluded from consideration for recovery are budgeted regulatory costs that are part of a program conducted on behalf of the public.

One person expressed the opinion that the inclusion of 10 CFR Part 34, "Licenses for Radiography and Radiation Safety Requirements for Radiographic Operations," within the scope of 10 CFR Part 21, "Reporting of Defects and Noncompliance," is not ncessary. The NRC's regulations in 10 CFR Part 21 implement section 206 of the Energy Reorganization Act of 1974, as amended. Part 21 requires, among other things, that information reasonably indicating that a licensed activity or basic component supplied to such activity fails to comply with the Atomic Energy Act of 1954, as amended, or any applicable rule, regulation, order, or license of the NRC relating to substantial safety hazards, or contains a defect which could create a substantial safety hazard should be reported. Incident and overexposure reporting requirements had been in existence in Commission regulations for a number of years before enactment of the Energy Reorganization Act of 1974 (which contains section 206) in October 1974.

That person also expressed the opinion that the inclusion of industrial radiography licensees in 10 CFR 71.12, "General License for Shipment in DOT Specification Containers, in Packages Approved for Use by Another Person, and in Packages Approved by a Foreign National Competent Authority," is not necessary. It is the general licensees delivering licensed radioactive material to a carrier for transport under the authority of 10 CFR 71.12(b) who must assure themselves and the NRC that the subject packages are as described in the packages approvals and that they are used, tested, and maintained in accordance with both the general and specific portions of an approved quality assurance program. (The NRC must exercise its regulatory authority through its general licensees who use package approvals because the NRC has no general enforcement powers over package manufacturers or package owners unless they possess and use licensed radioactive material. They would, however, be subject to 10 CFR Part 21, "Reporting of Defects and Noncompliance.")

A copy of "Abstracts of Comments and Staff Reponses: Proposal that Nuclear Regulatory Commission Be Divided into Two Separate Entities—Docket No. PRM 30–56," is available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. Single copies of the comment analysis may be obtained on request from the Office of Standards Development, U.S. Nuclear Regulatory Commission, Washington, D.C. 20555.

Assigned Functions

The Energy Reorganization Act of 1974, as amended, was enacted by the Congress and approved as Public Law 93–438 on October 11, 1974.

Title II of that Act established the Nuclear Regulatory Commission and transferred to the Nuclear Regulatory Commission all the licensing and related regulatory functions of the Atomic Energy Commission.

In assigning those functions within the Nuclear Regulatory Commission, the Congress not only distinguished between nuclear reactors and other licensed facilities and nuclear materials, but also gave due and proper emphasis to functions which are vital to the public health and safety and the safe and

efficient operation of both nuclear reactors and other licensed activities.

Sec. 203(b) of that Act provides that the Director of Nuclear Reactor Regulation shall perform such functions as the Commission shall delegate including principal licensing and regulation involving all facilities and materials licensed under the Atomic Energy Act of 1954, as amended, associated with the construction and operation of nuclear reactors licensed under the Atomic Energy Act of 1954, as amended.

Sec. 204(b) of the Energy Reorganization Act of 1974, as amended, provides that the Director of Nuclear Material Safety and Safeguards shall perform such functions as the Commission shall delegate including principal licensing and regulation involving facilities and materials licensed under the Atomic Energy Act of 1954, as amended, associated with the processing, transport, and handling of nuclear materials, including the provision and maintenance of safeguards against threats, theft, and sabotage of such licensed facilities and materials. The Nuclear Regulatory Commission has used the flexibility provided by Sec. 204(b) of the Energy Reorganization Act of 1974, as amended, to establish within the Office of Nuclear Material Safety and Safeguards the Division of Fuel Cycle and Material Safety to perform those licensing and regulatory activities which pertain to the processing, transport, and handling of nuclear materials off the nuclear reactor site.

The Energy Reorganization Act of 1974, as amended, provides no authority under which the Nuclear Regulatory Commission, on its own initiative, may transfer any licensing or related regulatory function to a new or established agency of the Federal Government.

Alternative Organization Forms

Alternative organization forms for nuclear regulation have been considered in recent studies conducted on or for the Nuclear Regulatory Commission.

Sec. 306 of the Energy Reorganization Act of 1974, as amended, required the Comptroller General of the United States to audit, review, and evaluate the implementation of the provisions of Title II of that Act by the Nuclear Regulatory Commission not later than sixty months after the effective date of that Act and submit to the Congress a report on his audit.

In the Comptroller General's report to Congress, "The Nuclear Regulatory Commission: More Aggressive Leadership Needed," EMD–80–17, dated January 15, 1980, the General Accounting Office (GAO) identified an alternative (separating NRC into separate policymaking and regulatory agencies) similar to the petitioner's proposal.

GAO noted that separation of NRC into two agencies could build on the strengths of both the commission and the single administrator forms of nuclear regulation. Policymaking on critical unresolved nuclear regulation issues could continue under the commission form with the advantage of multimember deliberations. At the same time, day-to-day regulation of nuclear activities could proceed under an agency headed by a single administrator with prospects for better management of these day-to-day activities.

GAO discussed this alternative with a cross-section of people knowledgeable of nuclear regulation, including representatives of Government, the nuclear industry, public interest groups, and academia. Opinion on the alternative ranged from active interest to a belief that it represents an unnecessary proliferation of Federal regulatory agencies.

GAO chose not to recommend any alternative to strengthening the present commission because none of the alternative forms appeared to have a clear-cut advantage. In conclusion, GAO stated:

> Ultimately, the Congress must consider the advantages and disadvantages of various organizational forms and decide on the organizational structure which, on balance, best represents what the Congress wants for nuclear regulation.

Grounds for Denial

The Commission has given careful consideration to petition for rule making PRM 30–56 and the public comments received thereon and has decided to deny the petition on the grounds that, given the structure of the Energy Reorganization Act of 1974, as amended, it is clear that Congress intended the newly created Nuclear Regulatory Commission to have licensing and related regulatory authority not only over nuclear reactors, uranium milling, nuclear fuel processing and reprocessing, and other areas dealing with fissile materials but also have this same authority over byproduct materials. The NRC itself cannot ". . . separate the United States Nuclear Regulatory Commission into two separate entities . . ." Such a separation could only be accomplished in either of two ways: (1) enactment of legislation by the U.S. Congress, the method by which the existing NRC was created; or (2) through implementation of an Executive Reorganization Plan pursuant to 5 U.S.C. 901 *et seq.*

A copy of the petition for rule making and copies of the letters of comment and the Commission's letter of denial are available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C.

Dated at Bethesda, Md. this 25th day of July, 1980.

For the Nuclear Regulatory Commission,

William J. Dircks,

Acting Executive Director for Operations.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 34–17051; File No. SR–MSRB–80–7]

Municipal Securities Rulemaking Board; Proposed Rule Change by Self-Regulatory Organization

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), notice is hereby given that on August 4, 1980, the above-mentioned self-regulatory organization filed with the Securities Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

On March 28, 1980, the Securities and Exchange Commission (the "Commission") approved certain amendments to the provisions of rule G–15 relating to customer confirmations

(Securities Exchange Act Release No 16707) File (No. SR–MSRB–79–6). In response to the request of the Board, the Commission delayed the effective date of the amendments for six months from the date of Commission approval, or until September 24, 1980. The Board hereby respectfully requests that the Commission extend the effective date of the amendments until December 1, 1980.

In addition, the Board respectfully requests that the Commission also delay the effective date until December 1, 1980 of certain amendments to rules G–12 and G–15 which were approved by the Commission on May 27, 1980.*(Securities Exchange Act Release No. 16844) (File No. SR–MSRB–80–1).

These amendments are also currently scheduled to become effective on September 24, 1980.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

Purpose of Proposed Rule Change

The amendments approved by the Commission on March 28, 1980 effected several changes to rule G–15 on customer confirmations. The amendments modified rule G–15 to require that a confirmation of a transaction effected on the basis of dollar price, including a transaction in "dollar bonds," include not only the dollar price at which the transaction was effected, but also the lowest of the resulting yield to premium call, par option, or maturity. In addition, the amendments require municipal securities dealers, when confirming transactions involving callable securities, to include on the confirmation a statement indicating that the yield shown may be affected by the exercise of a call provision, and that information concerning call provisions will be provided upon request. Reference should be made to the text of the amendments contained in file No. SR–MSRB–79–6 for the precise changes effected by the amendments; a discussion of the purpose of the amendments is also contained in that filing.

As indicated above, the amendments will become effective on September 24, 1980. The Board provided for a delayed effective date in order to permit municipal securities dealers sufficient time to make necessary changes in their data processing systems and customer confirmation forms. The purpose of this filing is to request the Commission to grant an extension of the effective date of the amendments, until December 1, 1980. The Board is making this request as a result of its consideration of several recent requests from municipal securities dealers who indicated that an extension of time was necessary in order to enable them to implement the computer processing changes necessitated by the amendments.

With respect to the request for a delay in the effective date for the amendments to rules G–12 and G–15 approved by the Commission on May 27, 1980, the Board notes that it originally requested that the effective date for these amendments be made the same as the effective date for the other amendments, so that municipal securities brokers and municipal securities dealers could make all the required computer changes at one time, and thereby reduce the costs associated with the implementation of the amendments. For the same reason, the Board requests that the effective date of the amendments approved by the Commission on May 27, 1980 also be delayed until December 1, 1980.

Basis Under the Act for Proposed Rule Change

The Board is requesting the extension of time pursuant to section 15B(b)(2)(C) of the Securities Exchange Act of 1934, as amended (the "Act"), which directs the Board to propose and adopt rules

> * * * designed to prevent fraudulent and manipulative acts and practices, to promote just and equitable principles of trade, to foster cooperation and coordination with persons engaged in regulating, clearing, settling, processing information with respect to, and facilitating transactions in municipal securities, to remove impediments to and perfect the mechanism of a free and open market in municipal securities, and, in general to protect investors and the public interest * * *.

Comments Received From Members, Participants or Others on Proposed Rule Change

The changes effected by the amendments have been the subject of industry discussion since June 1978 when the Board issued its first notice soliciting comments on proposed changes to rule G–15. The Board subsequently issued an exposure draft in September 1979 which was the focus of considerable attention. No commentator suggested in response to the Board's various solicitations of comments or the publication of the notice of filing in Securities Exchange Act Release No. 15938 (June 19, 1979) that the 6-month delay in the effective date would not provide sufficient time for the implementation of the amendments.

However, subsequent to the approval of the amendments by the Commission, several municipal securities dealers have commented to the Board that the 6-month period would not provide sufficient time for them to modify their computer processing systems in order to comply with the requirements of the amendments. These municipal securities dealers have apparently encountered difficulties in acutally modifying their computer processing systems. *See,* for example, the comment letters of Merrill Lynch, Pierce, Fenner & Smith Incorporated and the Public Securities Association. In addition to these two letters, the Board and its staff have also received oral requests that the Board consider extending the effective date from several other municipal securities dealers. These municipal securities dealers have requested extensions ranging from two months, to accomplish the technical modifications needed to present the required information on customer confirmations, to eighteen months, to accomplish broader, system-wide changes that will, among other matters, facilitate compliance with the amendments.

As a result of these requests for an extension, the Board has considered the matter and decided to request an extension of the effective date for the amendments in question from September 24, 1980 to December 1, 1980. The Board is of the view that such an extension is necessary and appropriate, and sufficient, to enable municipal securities brokers and municipal securities dealers to make the technical reprogramming changes necessitated by the amendments. The Board further believes that such an extension will permit municipal securities brokers and municipal securities dealers planning more extensive changes to their computer systems to devise interim measures that will permit them to comply with the requirements, while the major system changes are in process.

Burden on Competition

The granting of the requested extensions will not impose a burden on competition because it will result in all municipal securities brokers and municipal securities dealers having additional time to implement the amendments. The Board recognizes, however, that extending the date to December 1, 1980, rather than some later date, may have a diffierent impact on different municipal securities brokers and municipal securities dealers. The Board believes that, to the extent that the selection of the December 1, 1980 date has such an impact, it is necessary and appropriate in view of the important purposes served by the amendments. *See* File No. SR–MSRB–79–6 and File No. SR–MSRB–80–1.

V 45 A G 13 80 UMI

On or before September 17, 1980, or within such longer period (i) as the Commission may designate up to 90 days of such date if it finds such longer period to be appropriate and publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will:

(A) By order approve such proposed rule change, or

(B) Institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file 6 copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, NW., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 3, 1980.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

August 6, 1980.

BILLING CODE 8010-01-M

Boston Stock Exchange, Inc.; Applications for Unlisted Trading Privileges and of Opportunity for Hearing

August 6, 1980.

The above named national securities exchange has filed applications with the Securities and Exchange Commission pursuant to Section 12(f)(1)(B) of the Securities Exchange Act of 1934 and Rule 12f-1 thereunder, for unlisted trading privileges in the following stocks:

Atlantic City Electric, Common Stock, $3 Par Value (File No. 7-57)
Audiotronics Corp., Common Stock, $1 Par Value (File No. 7-5712)
C.H.B. Foods, Inc., Common Stock, $1 Par Value (File No. 7-5713)
C P National Corp., Common stock $5 Par Value (File No. 7-5714)
Earth Resources Co., Common Stock, No Par Value (File No. 7-5715)
Energy & Utility Shares, Inc., Common Stock, $1 Par Value (File No. 7-5716)
Gulf Resources & Chemical Corp., Common Stock, $.10 Par Value (File No. 7-5717)
Juniper Petroleum Corporation, Common Stock, $.10 Par Value (File No. 7-5718)
National Patent Development Corp., Common Stock, $.01 Par Value (File No. 7-5719)
Pennsylvania Engineering Corp., Common Stock, $.10 Par Value (File No. 7-5720)
Standard Metals Corp., Common Stock, $.03 Par Value (File No. 7-5721)
Technical Tape, Inc., Common Stock, $1 Par Value (File No. 7-5722)
Thermo Electron Corp., Common Stock, $1 Par Value (File No. 7-5723)[1]
Unimax Group, Inc. (The) Common Stock, $.75 Par Value (File No. 7-5724)
WTC, Inc., Common Stock, No Par Value (File No. 7-5725)
Western Financial, Common Stock, $1 Par Value (File No. 7-5726)
Wilson Brothers, Common Stock, $1 Par Value (File No. 7-5727)

These securities, subject to the exception noted above, are listed and registered on one or more other national securities exchanges and are reported on the consolidated transaction reporting system.

Interested persons are invited to submit on or before August 27, 1980 written data, views and arguments concerning the above-referenced applications. Persons desiring to make written comments should file three copies thereof with the Secretary of the Securities and Exchange Commission, Washington, D.C. 20549. Following this opportunity for hearing, the Commission will approve the applications if it finds, based upon all the information available to it, that the extensions of unlisted trading privileges pursuant to such applications are consistent with the maintenance of fair and ordererly markets and the protection of investors.

For the Commission, by the Division of Market Regulation, pursuant to delegated authority.

Shirley E. Hollis,

Assistant Secretary.

EQUAL EMPLOYMENT OPPORTUNITY COMMISSION.

"FEDERAL REGISTER" Citation of Previous Announcement: S-1502-80.

PREVIOUSLY ANNOUNCED TIME AND DATE OF MEETING: 9:30 a.m. (Eastern time), Tuesday, August 12, 1980.

CHANGE IN THE MEETING: The following matter was added to the agenda for the closed portion of the meeting:

Proposed Decision in Charge No. TMR4-0557.

A majority of the entire membership of the Commission determined by recorded vote that the business of the Commission required this change and that no earlier announcement was possible.

In favor of change:

Eleanor Holmes Norton, Chair.
Daniel El Leach, Vice Chair.
Ethel Bent Walsh, Commissioner.

CONTACT PERSON FOR MORE INFORMATION: Treva I. McCall, Acting Executive Officer, Executive Secretariat, at (202) 634-6748.

This Notice Issued August 8, 1980.

2

FEDERAL MINE SAFETY AND HEALTH REVIEW COMMISSION.

August 8, 1980.

TIME AND DATE: 10 a.m., Wednesday, August 13, 1980.

PLACE: Room 600, 1730 K Street NW., Washington, D.C.

STATUS: Open.

MATTERS TO BE CONSIDERED: The Commission will consider and act upon the following:

1. Missouri Gravel Company, Docket No. LAKE 80-83-M (Petition for Discretionary Review).

It was determined by a unanimous vote of Commissioners that the Commission business required that a meeting be held on this matter and no earlier announcement of the meeting was possible.

CONTACT PERSON FOR MORE INFORMATION: Jean Ellen, 202-653-5632.

FEDERAL RESERVE SYSTEM.

TIME AND DATE: 10 a.m., Monday, August 18, 1980.

PLACE: 20th Street and Constitution Avenue NW., Washington, D.C. 20551.

STATUS: Closed.

MATTERS TO BE CONSIDERED:

1. Proposed purchases, under competitive bidding, of computer equipment within the Federal Reserve System.
2. Proposed salary structure adjustments at Federal Reserve Banks.
3. Request by the Government Accounting Office for Board comment on a draft report concerning federal examinations of financial institutions.
4. Personnel actions (appointments, promotions, assignments, reassignments, and salary actions) involving individual Federal Reserve System employees.
5. Any agenda items carried forward from a previously announced meeting.

CONTACT PERSON FOR MORE INFORMATION: Mr. Joseph R. Coyne, Assistant to the Board, (202) 452-32-04.

Dated: August 8, 1980.

SECURITIES AND EXCHANGE COMMISSION.

"FEDERAL REGISTER" CITATION OF PREVIOUS ANNOUNCEMENT: 45 FR 52549, August 7, 1980.

STATUS: Closed meeting/open meeting.

PLACE: Room 825, 500 North Capitol Street, Washington, D.C.

DATE PREVIOUSLY ANNOUNCED: Monday, August 4, 1980.

CHANGES IN THE MEETING: Rescheduling.

The following closed meeting scheduled for August 12, 1980, at 10 a.m. has been rescheduled for Monday, August 11, 1980, at 2 p.m.

The subject matter of the closed meeting scheduled for Monday, August 11, 1980, at 2 p.m., will be:

Access to investigate files by Federal, State, or Self-Regulatory Authorities.
Litigation matter.
Freedom of Information Act appeal.
Formal order of investigation.
Subpoena enforcement action.
Institution and settlement of administrative proceedings of an enforcement nature.
Institution of administrative proceeding and injunctive action.
Institution of injunctive actions.
Institution of injunctive action and access to investigate files by Federal, State, or Self-Regulatory Authorities.
Opinion.
Administrative proceeding of an enforcement nature.
Freedom of Information Act appeals and requests for Confidential treatment.
Personnel security matter.
Litigation matter.

The following open meeting scheduled for Wednesday, August 13, 1980, at 10 a.m. has been rescheduled for Thursday, August 21, 1980, at 10 a.m.

The subject matter of the open meeting scheduled for Thursday, August 21, 1980, at 10 a.m., will be:

1. Consideration of whether to grant the application of Joel L. Halpern to become associated with Donald Sheldon & Co., Inc., a registered broker-dealer, as a registered representative. For further information, please contact David P. Tennant at (202) 272–2945.
2. Consideration of whether to affirm action, taken by the Duty Officer, granting Professor Thomas K. McCraw, Graduate School of Business Administration, Harvard University, access to Commission minutes from 1933 to 1940 and correspondence of Commissioners Landis and Douglas. For further information, please contact Shirley Hollis at (202) 272–2600.
3. Consideration of whether to adopt amendments to Regulation S–K and certain forms and rules under the Securities Act of 1933 and the Securities Exchange Act of 1934 relating to the filing of exhibits to certain frequently used forms. For further information, please contact Joseph G. Connally, Jr. at (202) 272–3097.
4. Consideration of whether to grant the request of Randolph Phillips, pursuant to the Government in the Sunshine Act, for a copy of an official Commission minute dated June 16, 1980. For further information, please contact Myrna Siegel at (202) 272–2430.
5. Consideration of whether to adopt a rule setting forth procedures for determining requests for confidential treatment under the Freedom of Information Act. For further information, please contact Harlan W. Penn at (202) 272–2454.
6. Consideration of whether to propose for public comment a rule under the Public Utility Holding Company Act of 1935 (the "Act") which, if adopted, would exempt certain non-utility subsidiaries of registered holding companies from the duties, obligations, and liabilities imposed under the 1935 Act on a subsidiary company, if no more than 50% of the voting securities or other voting interests of any such company are owned, directly or indirectly, by any one or more registered holding companies. For further information, please contact Grant G. Guthrie at (202) 523–5156.

The closed meeting scheduled for Wednesday, August 13, 1980, has been rescheduled for Thursday, August 21, 1980, following the 10 a.m. open meeting.

The subject matter of the closed meeting will be:

Institution of injunctive actions.

Chairman Williams and Commissioners Evans and Friedman determined that Commission business required the above changes and that no earlier notice thereof was possible.

At times changes in Commission priorities require alterations in the scheduling of meeting items. For further information and to ascertain what, if any, matters have been added, deleted or postponed, please contact: Nancy Wojtas at (202) 272–2178.

Part II

Federal Emergency Management Agency

Disaster Relief, Public Assistance

V 45 A G 13 80 UMI

FEDERAL EMERGENCY MANAGEMENT AGENCY

44 CFR Part 205

[Docket No. FEMA-DR 205]

Disaster Assistance: Public Assistance (Subpart E)

AGENCY: Federal Emergency Management Agency, disaster response and recovery.

ACTION: Final rule.

SUMMARY: The Federal Emergency Management Agency is in the process of revising its regulations which implement the Disaster Relief Act of 1974. This document revises the regulations concerning public assistance. The regulations provide policies and guidelines for determinations of eligibility of applicants for public assistance, eligibility of work, and eligibility of costs of the Disaster Relief Act of 1974, Pub. L. 93-288, as amended. The existing rule is expanded to incorporate certain material published previously in the FEMA Eligibility Handbook, DRR-2. Portions of the material have been revised to clarify existing policy and procedures.

EFFECTIVE DATE: For declarations of major disasters or emergencies made after September 12, 1980.

FOR FURTHER INFORMATION CONTACT: Gene Morath, Office of Public Assistance, Disaster Response and Recovery, Federal Emergency Management Agency, Washington, D.C. 20472, Telephone: (202) 634-7835.

SUPPLEMENTAL INFORMATION: A notice issued in the **Federal Register** on May 2, 1979, establishing CFR Title and Chapter for FEMA regulations (Title 44, Chapter I, Federal Emergency Management Agency, with Subchapters A-E) indicated that Disaster Assistance would be Subchapter D, Parts 200-299. On September 28, 1979, FEMA published a Notice of Transfer and Redesignation that transferred the Federal Disaster Assistance Regulations from 24 CFR Parts 2200-2205 to 44 CFR Part 200 *et seq.* The regulations implementing the Disaster Relief Act of 1974, Pub. L. 93-288 (44 CFR Part 205), are in the process of reorganization and revision. On November 1, 1979, the then Acting Director for Disaster Response and Recovery published in the **Federal Register** (44 FR 63061) a proposed rule to revise and recodify the material concerning eligibility for public assistance in the existing 44 CFR 205 as a new Subpart E. The rule is expanded to incorporate material previously published in the FEMA Eligibility Handbook, DRR-2. Portions of the material have been revised to clarify existing policy and procedures. Comments were invited to December 31, 1979. In addition, copies were sent to each State official responsible for disaster operations.

A total of 124 responses were received concerning the proposed Subpart E. The comments received can be summarized as those (1) editorial in nature; (2) suitable for incorporation in Handbooks but not regulations; (3) not relevant to Subpart E but which could be considered as another appropriate subpart of the regulations; (4) requesting changes to conform ot OMB Circular 74-4; (5) proposing mandatory consultation by FEMA with applicants prior to taking any grant action; (6) questioning whether the Regional Director has mandatory or discretionary authority in withholding funding in no-action alternatives; (7) requesting clarification of the grant-in-lieu concept; (8) those challenging the eligibility aspects of the snow removal reimbursement policy (more specific comments concerning responses in each of these categories are discussed in the succeeding paragraphs); and (9) suggesting changes which have been incorporated in the final rule.

(1) Editorial Comments: Our editors who have final review of each draft rule for clarity of expression have reviewed each such comment and have incorporated those which, in our judgement, result in improvements when compared to the proposed rule.

(2) Handbooks: Some suggestions that examples or clarification be included in Subpart E can best be accommodated by appropriate coverage in FEMA Handbooks. Any suggestion requesting a change of mandatory policies or procedures has been considered as pertainng to 44 CFR Subpart E. Coverage in handbooks of such suggestions is not appropriate and none has been scheduled.

(3) Other FEMA Regulations: Suggestions pertaining to other subparts of 44 CFR 205, or other FEMA regulations, were referred to the responsible FEMA staff member for consideration in appropriate rulemaking.

(4) OMB Circular 74-4: Based on our review of the Eligibility of Cost section of the regulations and OMB Circular 74-4, we have modified Section 205.76 to conform to the circular, except for certain indirect costs identified as administrative expenses. We advised the Office of Management and Budget (OMB) by letter of March 27, 1980, that we would incorporate some changes at this time and consult with them, further, concerning the treatment of certain indirect costs. FEMA and its predecessor agencies, the Federal Disaster Assistance Administration (FDAA) and the Office of Emergency Preparedness (OEP), have maintained the position that not allowing such indirect costs was consistent with the provision of the Disaster Relief Act of 1974. Public Law 93-288 provides that Federal disaster assistance be supplementary to the efforts of State and local governments and also provide that such governments commit a reasonable amount of their own funds towards alleviating the damage caused by the disaster. To avoid further delay, we are publishing Section 205.76 as a final rule at this time subject to future amendment as the results of our discussions with OMB.

(5) Mandatory Consultation: Suggestion was made that, prior to approval of any grant or loan, the FEMA Regional Director must consult with the applicant and with the Governor's Authorized Representative. The FEMA workload for individual projects of disaster assistance to local or State governments, or to other eligible grantees, varies depending upon occurrence of major disasters or emergencies, but ranges from 20,000 to 40,000 projects per year. A recent sampling of about 10,000 projects revealed that ninety-two percent were for under $25,000 per project. Our present FEMA policies and procedures require that each Damage Survey Report (DSR) be prepared based on field surveys by Federal/State inspectors escorted by a local representative. These DSR's are reviewed by Federal engineers, FEMA program officers and by State program officers before each project application (P/A) is submitted. Each P/A is submitted by the applicant and approved by the Governor's Authorized Representative before the Regional Director approves the project application and obligates FEMA funding. At every point in these procedures, the State on behalf of the eligible grantee may appeal any decision or action taken. Considering the numerous projects comprising the FEMA workload and the opportunities for consultation already provided by the existing procedures, the FEMA Associate Director for Disaster Response and Recovery has determined that further mandatory consultations are not justified. Therefore, those suggestions have been rejected.

(6) No Action Alternative: Questions have been posed as to whether the Regional Director has mandatory or discretionary authority in withholding

FEMA funding requested by an eligible grantee through the State. Under Section 303(a)(4), Public Law 93-288, the Federal Coordinating Officer is responsible for assisting "local citizens and public officials in promptly obtaining assistance to which they are entitled." However, the Regional Director may approve a FEMA grant or loan only when he determines that such action is legal and proper under the Act and 44 CFR. He has no discretion to disapprove any grant or loan arbitrarily and capriciously, but he may not approve grants or loans which he is unable to justify.

(7) Grant-in-Lieu (GIL): Suggestions were made that the proposed rule be modified to support the position taken by claimants in a recent appeal on behalf of a private nonprofit hospital. The FEMA General Counsel has already made a legal review of the issues involved and has supported the language of the proposed rule. Therefore, no change is contemplated. However, further examples and explanations will be incorporated in the next revision of the FEMA Eligibility Handbook to avoid any misunderstanding of the correct interpretation of the GIL concept.

(8) Emergency Snow Removal: Ninety-four responses to this proposed rulemaking commented on principles in 44 CFR 205 Subpart E pertaining to emergency snow removal. These included 20 from State officials; 68 from local officials; five from members of Congress; and one from the Federal Highway Administration. Sixty-six of the sixty-eight local responses were from Illinois and most were very similar in phraseology and content to a sample letter sent to heads of local governments by the Illinois Director of Emergency Services. Considering these numerous comments and the fact that the 1979-1980 winter season has passed, the Associate Director decided to reserve the following paragraphs: 44 CFR 205.72(f); 44 CFR 205.74(c)(6); and 44 CFR 205.76(d)(4). After further review of the comments received on emergency snow removal assistance as the result of this proposed rulemaking, the Associate Director expects to consult with individuals representing local and State governments who have participated in past Federal programs of emergency snow removal assistance or who have raised many of the issues in these comments. A final rule for these reserved paragraphs is scheduled for publication prior to the next snow season.

(9) Suggestions Accepted and Reflected in the Final Rule: There were numerous suggestions or changes in wording to clarify or to modify sections in the proposed rule which have been accepted with modifications in the final rule. Since these changes should satisfy the respondent and do not constitute major changes of policies or procedures, they are not discussed further in these paragraphs. In most cases they clarify or expand on concepts expressed in the proposed rulemaking.

A Finding of Inapplicability of section 102(2)(c) of the National Environmental Policy Act of 1969 has been made in accordance with "Procedures for Protection and Enhancement of Environmental Quality." Interested parties may obtain and inspect copies of this Finding of Inapplicability at the Office of the Rules Docket Clerk of the Federal Emergency Management Agency in Washington, D.C. 20472.

The regulation is in consonance with the provisions of the Executive Order dated November 16, 1979, and does not impose an unnecessary burden on the small business sector of the economy.

The regulation does not impact adversely on the central cities, suburban communities, or non-metropolitan communities.

As provided in Executive Order 12044 dated March 23, 1968, the regulation does not have any significant economic consequences on the general economy, individual industries, geographic regions, or levels of government.

Subpart "G" (Sections 205.75-205.79) entitled Disaster Preparedness Assistance has been replaced by Part 300 of this Chapter, added February 29, 1980, 45 FR 13464. Also, 205.100-205.104 were added December 11, 1979 at 44 FR 71793 and were designated Subpart G, Fire Suppression Assistance. Sections 205.75-205.79 should be removed and 205.100-205.104 remain in effect as current Subpart G.

Accordingly, 44 CFR Part 205 of the Federal Disaster Assistance Regulations is revised by deleting §§ 205.29-205.32, 205.33(b), 205.52-205.55, 205.57, and 205.75 through 205.79 (titled subpart G), and by adding a new Subpart E (Public Assistance), §§ 205.70 through 205.76, as follows:

Subpart E—Public Assistance

Sec.

205.70 General.
205.71 Definitions.
205.72 Applicant eligibility.
205.73 General work eligibility.
205.74 Emergency work.
205.75 Permanent work.
205.76 Eligibility of costs.

Authority: Sec. 601, Disaster Relief Act of 1974, as amended, Pub. L. 93-288, 88 Stat. 163 (42 U.S.C. 5201); Executive Order 12148 (44 FR 43239); and Delegation of Authority.

Subpart E—Public Assistance

§ 205.70 General.

This subpart provides policies and guidelines for determinations of eligibility of applicants for public assistance, eligibility of work, and eligibility of costs of Pub. L. 93-288, as amended. It includes criteria for determining eligibility of assistance under Sections 305, 306, 402, 403, 415, 416, 418, and 419 of Pub. L. 93-288, as amended. Refer also to Subparts J, K, and M, and to 44 CFR Parts 9 and 10 of these regulations for additional guidance related to eligibility determinations.

§ 205.71 Definitions.

(a) "Educational institution" means:

(1) Any elementary school as defined by section 801(c) of the Elementary and Secondary Education Act of 1965;

(2) Any secondary school as defined by section 801(h) of the Elementary and Secondary Education Act of 1965; or

(3) Any institution of higher education as defined by section 1201 of the Higher Education Act of 1965.

(b) "Predisaster condition" means the state of repair or serviceability of a facility immediately prior to the disaster, taking into consideration prior damages, age, deterioration, and any limitations upon its operation.

(c) "Predisaster design" means the size and capacity of a facility when the major disaster occurred, taking into account its major features, as originally placed in service but updated by any modernization or expansion of the facility, prior to the major disaster, to provide added capacity for public services.

(d) "Private nonprofit facility" means any private nonprofit educational, utility, emergency, medical, and custodial care facility, including those for the aged or disabled, and those on Indian reservations.

(1) "Educational facilities" means classrooms plus related supplies, equipment, machinery, and utilities of an educational institution necessary or appropriate for instructional, administrative, and support purposes, but does not include:

(i) Buildings, structures and related items used primarily for athletic exhibitions, contests, games or other events for which admission is charged to the general public, such as athletic stadiums, gymnasiums, and swimming pools.

(ii) Buildings, structures and related items used primarily for religious purposes or primarily in connection with any part of the program of a divinity school, or department of divinity, as

defined by Section 1201 of the Higher Education Act of 1965.

(2) "Utility" means buildings, structures, or systems of any power, energy, telephone, water supply, sewage collection and treatment, or other similar public service. An irrigation system is not a "utility".

(3) "Emergency facility" means those buildings, structures, or systems used primarily to provide emergency services, such as fire protection, ambulance, or rescue, to the general public.

(4) "Medical facility" means any hospital, outpatient facility, rehabilitation facility, or facility for long term care, as defined by the Associate Director, and any similar facility offering diagnosis or treatment of mental or physical injury or disease, including the administrative and support facilities essential to the operation of such medical facilities even if not contiguous.

(5) "Custodial care facility" means those buildings, structures, or systems including those for essential administration and support, which are used to provide institutional care for such persons as the aged and disabled; such persons do not require day-to-day care by doctors or by other professionals but do require close supervision and some physical constraints of their daily activities.

(e) "Private nonprofit organization" means any nongovernmental agency or entity that currently has:

(1) An effective ruling letter from the U.S. Internal Revenue Service, granting tax exemption under section 501 (c), (d), or (e) of the Internal Revenue Code of 1954, or

(2) Satisfactory evidence from the State that the non-revenue producing organization or entity is a nonprofit one organized or doing business under State law.

(f) "Standards" as used in this subpart means codes, specifications, or standards.

§ 205.72 Applicant eligibility.

(a) "Within the disaster area designated by the Associate Director, State or local governments, as defined in 44 CFR 205, Subpart A, are eligible applicants.

(b) Private nonprofit organizations or institutions, owning and operating educational, utility, emergency, medical or custodial care facilities, are eligible applicants.

(c) An Indian tribe (or authorized tribal organization or Alaskan village or organization, which exists for public service,) is also an eligible applicant. In those cases where the State is unable or unwilling to process a project application on its behalf, such applicant may submit its project application directly to the Regional Director.

(d) A public entity is eligible for assistance when its requests are submitted by a State or a political subdivision of the State. Organizations which are formed for a public purpose and whose direction and funding are provided primarily by one or more political subdivisions of the State are normally considered to be public entities.

(e) Any rural community or unincorporated town or village may be eligible when an application for Federal assistance is made by a State or a political subdivision of the State on its behalf.

(f) [Reserved]

(g) Under Public Law 93–288 grants to eligible applicants are discretionary and are based on FEMA grant approval for proposed work and subject to any conditions upon which that grant approval was based.

§ 205.73 General work eligibility.

(a) *General.* To be eligible for financial assistance, an item of work must:

(1) Be for a purpose set forth in the Act and these regulations.

(2) Be required as the result of the major disaster or emergency, and

(3) Be located within a disaster area designated by the Associate Director.

(b) *Work under other Federal agency programs.* Disaster assistance under the Act is not available for work which other Federal agencies may fund under their own statutory authorities, except under unusual circumstances approved by the Regional Director. When another Federal agency (OFA) has authority and the necessary funds available to restore facilities damaged or destroyed by a major disaster or emergency that OFA funding authority shall be used instead of FEMA funding.

(c) *Restoration of leased facilities.* (1) Applicant-owned facilities are eligible, except when leased and the lease places such responsibility on the lessee.

(2) Facilities owned by others but under lease to an applicant are eligible to the extent of the applicant's responsibility under the lease.

(d) *Assurances.* As a condition for any grant or loan under the Act, the State and the applicant shall provide the assurances required by the Regional Director and accompanying the project application or loan application. These assurances are legally binding when offered by the applicant and the State, and approved by the Regional Director.

(e) *Facilities serving a rural community or unincorporated town or village.* To be eligible, a facility or system not owned by a State or local government must meet the following requirements:

(1) The facility is located in and/or serves an unincorporated community, town, or village; *and*

(2) Ownership is vested in a not-for-profit organization; *and*

(3) Proposed work on the facility satisfies eligibility requirements otherwise applicable to public facilities under Section 306 of the Act and must be necessary to restore essential public services on an emergency basis.

(f) *Grants-in-lieu.* A grant-in-lieu is a categorical grant, based on work eligible under section 306 or 402(e) of the Act, which the grantee may use to provide a larger, more elaborate or equivalent facility that as a minimum replaces the design or capacity of the public facility damaged or destroyed by the major disaster. The facility to which the grant-in-lieu is applied must be restored to its predisaster capacity and serve the same purpose or function as the damaged facility.

(g) *Time limitations.* Timely performance of eligible work is necessary to minimize costs of work and to avoid delays in restoration of public services. The Regional Director may approve reimbursement to an applicant for eligible work performed prior to the Federal damage survey, but within the time limitations and the disaster-affected area. When, due to circumstances not beyond its control, an applicant fails to comply with the approved time limitations, the Associate Director, or his/her designee may decline to approve an extension of time for starting or completing the approved work.

(h) *Maintenance.* Routine or regular maintenance is not eligible. To be eligible, repairs or replacements of damaged facilities which are of the types usually performed as maintenance, must:

(1) Be of disaster scope and magnitude, and

(2) Be essential to restore the disaster condition and design of the damaged or destroyed facilities, and

(3) Be performed on an expedited basis.

§ 205.74 Emergency work.

(a) *General.* (1) Emergency work is eligible under section 305 or 306 of the Act to provide emergency protective measures to save lives, to protect public health and safety, and to protect property as the result of a declared major disaster or emergency; under section 306 or 403 for debris removal; under section 415 for Emergency Communications; and under Section 416 for Emergency Public Transportation.

(2) When immediately necessary and no lesser emergency work is feasible, permanent restorative work on facilities damaged or destroyed by a major disaster or emergency may be expedited as emergency work under sections 305 or 306 of the Act. Eligibility of such emergency work shall be determined separately from any other permanent restorative work eligible under section 402 of the Act.

(3) In determining public interest for emergency work for which these regulations require such determination, the Regional Director shall determine whether the work is necessary to:

(i) Eliminate immediate threats to life, public health, and safety; or

(ii) Eliminate an immediate hazard which threatens substantial destruction of undamaged improved public or private property; or

(iii) Assure economic recovery of the affected community to the benefit of the community-at-large; or

(iv) Provide emergency facilities when necessary to resume essential public services.

(4) In determining whether such emergency work is in the public interest, the Regional Director may require certification by local, State, or Federal health officials, including identification and evaluation of the threat and recommendations of the emergency work necessary to cope with the threat. Refer also to 44 CFR 205.70.

(b) *Debris removal.* No such work shall be performed unless the affected State or local government first provides to the Regional Director written assurances of rights of entry and indemnification required by FEMA. When approved in the public interest by the Regional Director the following types of emergency work are eligible:

(1) Clearance of debris and wreckage from publicly and privately owned land and waters.

(2) Demolition and removal of public and private buildings damaged beyond repair.

(3) Cleanout of reserviors, debris catch basins, streams, and opening of drainage channels or facilities only under section 306 or 403 of the Act. Such clearance shall be limited to the removal of materials which are foreign to that facility and which were deposited by the disaster. It is not in the public interest to clean out debris catch basins at Federal expense that have a remaining capacity of storing debris that could be expected from a five-year storm. In determining public interest, past history of clean out of such facility shall be considered. Some removal of debris, deposited prior to the Presidential declaration, may be required as a condition for Federal funding under this section.

(c) *Emergency protective measures.* (1) The Regional Director may approve emergency protective measures under section 306(a)(4) of the Act which he/she determines are in the public interest. Such emergency work to protect property must be justified further by favorable benefits when compared to Federal costs involved and by providing widespread benefits to the community-at-large.

(2) Emergency protective work to prevent additional damage to improved property is eligible only when the effects of a declared major disaster or emergency have severely damaged or destroyed facilities and further destruction to improved property is threatened soon by subsequent similar disasters or emergencies. When approved, such emergency work is limited to the essential measures required to protect the community-at-large against similar disasters or emergencies that would be expected to occur not less frequently than every five years, or to restore protection as existed prior to the disaster, whichever is lesser.

(3) Removal of health and safety hazards. The following are examples of measures that may be eligible when approved in the public interest by the Regional Director: disposal of dead animals; drainage of water trapped as a result of a major disaster or emergency; pumping of basements only where there is flooding of numerous basements in the disaster-affected area; decontamination of private wells or pumping septic tanks only where pollution problem is widespread; vector control of insects involving a serious health hazard to humans.

(4) Landslides. To be eligible for FEMA reimbursement, emergency work shall be performed during the incidence period for the major disaster or emergency, except under unusual circumstances where the Regional Director determines that the proposed work is primarily disaster-related and in the public interest. Examples are debris removal, simple drainage measures, and emergency repairs to damaged public facilities. Permanent stabilization of a landslide is not attainable usually by such emergency measures.

(5) Emergency access. An access facility that is not publicly owned or is not the direct responsibility of an eligible applicant or grantee for operation and maintenance may be eligible for emergency repairs or replacement provided:

(i) The Regional Director determines that emergency repair or replacement of the facility is in the public interest, or economically eliminates needs for temporary housing, with no alternative access facilities immediately available within a reasonable distance, and

(ii) The necessary emergency work can be provided on a one-time basis can and will in no way obligate the Federal Government to fund further emergency work or maintenance.

(6) [Reserved]

(7) Work that is immediately necessary as the result of a major disaster and directly related to permanent work eligible to be preformed later under section 402 of the Act will normally be approved by the Regional Director in the public interest as emergency protective measures under section 306 of the Act.

(8) Water control facilities. Emergency work on water control facilities shall be limited to that required to insure the structural integrity of the damaged facilities or to restore disrupted public services when necessary to meet emergency needs of the community-at-large.

(9) Ice jams. FEMA assistance to remove ice jams is not eligible.

(10) Emergency protective facilities installed will be eligible for removal under the Act only when such facilities are directly affecting the operations of, or access to, public facilities required by the applicant in its normal day to day operation.

(d) *Emergency communications.* The Regional Director is authorized as the result of an emergency or major disaster to establish emergency communications and make them available to State and local government officials and other persons as he/she deems appropriate. Such emergency communications are ordinarily intended for use as necessary to carry out the disaster relief functions. Communications provided under this section are intended to supplement but not replace normal communications that remain operable after a major disaster. These emergency communications will be discontinued immediately when the essential emergency communications needs of FEMA and the community have been met.

(e) *Emergency public transportation.* The Regional Director may provide emergency public transportation in a disaster-affected area to meet emergency needs and to provide transportation to public places and such other places as necessary for the community to resume its normal pattern of life as soon as possible. Any transportation provided under this section is intended to supplement but not replace predisaster transportation facilities that remain operable after a

major disaster. FEMA funding of such emergency transportation will be discontinued by the Regional Director as soon as the emergency needs have been met.

§ 205.75 Permanent work.

(a) *General.* (1) Applicability. Permanent work is eligible under section 402 of the Act and these regulations and includes help to eligible applicants to repair, restore, reconstruct, or replace eligible facilities on the basis of the design of the facilities as they existed immediately prior to the disaster and in conformity with applicable standards. Criteria for determining eligibility of permanent work are the same for categorical, flexible funding, and small project grants.

(2) Standards. (i) To be applicable for Federal grant assistance under section 402 of the Act, standards for repairs, or for new construction, must be in writing, formally adopted, enforced, and in general use when the major disaster occurred, except:

(A) Those standards prescribed by the Associate Director

(B) Those standards authorized as deviations by the Associate Director.

(ii) In those cases where no standards are applicable, Federal grant assistance for permanent work under the Act shall be limited to restoring the facility to its predisaster condition and predisaster design to the extent practicable.

(iii) In restoring damaged or destroyed facilities by use of grant assistance for permanent work under the Act, the Regional Director may authorize minor disaster proofing not required by applicable codes, specifications or standards, when in the public interest. Refer also to 44 CFR 205.70.

(iv) Under section 406 of the Act, as implemented by 44 CFR 205.402(d), the Associate Director may prescribe standards which then are applicable only to Federally-assisted projects for permanent work.

(v) Under section 402 of the Act, when the Associate Director determines that conformity to existing applicable standards will jeopardize public health and safety, he/she may authorize appropriate standards as deviations after consultations with the Regional Director, the Governor's Authorized Representative, and the applicants. Prior to the authorization of such deviations, the State or local government having jurisdiction in the affected areas shall also adopt and enforce these new standards for all like projects. Refer also to 44 CFR 205.70.

(3) Materials. For all eligible repairs, replacements, rebuilding or other restorative work, the most economical materials shall be used, taking into consideration the following: predisaster design and condition of the facility; current applicable standards, if any; and predisaster public services or usage of the facility. Consideration shall also be given to protection of the environment (44 CFR Part 10) and to floodplain management, if applicable, (44 CFR Part 9).

(4) Public Interest. Refer also to 44 CFR 205.70. In determining whether permanent work is in the public interest, the Regional Director shall determine that:

(i) The applicant and the work involved are eligible under the Act and these regulations.

(ii) The work is necessary for the benefit of the community-at-large.

(iii) The outlook for continued future public use of the restored facility and the ratio of benefits to costs of restoration are favorable.

(5) Repairs. (i) A facility is considered repairable when in terms of current applicable standards for repairs in effect at the time of the disaster:

(A) It is feasible to repair the facility so that it can perform the function for which it was designed as well as it did immediately prior to the disaster; and

(B) Such repairs can be made at a cost less than the estimated cost of replacing the damaged structure on the basis of its design immediately prior to the disaster; and

(C) Such permanent repairs are a practicable alternative under 44 CFR 205, Subpart M, 44 CFR Part 9 and 44 CFR Part 10 when applicable and are determined by the Regional Director to be in the public interest. If not, the Regional Director may authorize emergency repairs under Section 306, PL 93–288, to restore essential public service and shall then decline to approve any permanent restorative work in accordance with 44 CFR Part 9.

(ii) If the facility was in a damaged or unsafe condition prior to the major disaster, the applicant shall agree to pay the cost of correcting any such conditions as a prerequisite to Federal assistance.

(iii) Only those repairs will be approved which restore the portions of the structure damaged by the major disaster.

(6) Replacement. If a damaged facility is not repairable to predisaster condition as determined by the Regional Director, approved restorative work shall include replacement of the facility on the basis of its predisaster design, in conformity with applicable standards for new construction. Refer also to 44 CFR Parts 9 and 10 and to 44 CFR 205, Subpart M, for additional guidance where applicable.

(7) Relocation. When the Regional Director determines that there is a practicable alternative to restoring a facility in a high hazard area he/she may approve relocation to the less hazardous site. In each such case an environmental assessment is required and the applicant shall provide the new site. Refer also to 44 CFR 205.76(e)(6).

(8) Feasibility studies. In those cases where the decision to repair or to replace the damaged facility depends upon the relationship between repair costs and replacement costs, and the project is of sufficient magnitude, a feasibility study may be undertaken.

(9) Limited use facilities. Facilities which were in limited use prior to the disaster, or were being used for other purposes than originally designed, may be eligible for assistance only to the extent necessary to restore immediate predisaster capacity for such use.

(10) Inactive facilities. Facilities that were not in active use at the time of occurrence of the major disaster are not eligible except in those instances, as determined by the Regional Director, where the facilities were only temporarily inoperative for repairs or remodeling, or where active use by the applicant was firmly established in an approved budget and was scheduled prior to the major disaster to begin within a reasonable time.

(11) No action. (i) The Regional Director may decline to approve Federal funding to restore facilities at the original site when such facilities were subject to frequent repetitive heavy damages or destruction.

(ii) The Regional Director shall decline to approve Federal funding when he/she determines in accordance with 44 CFR Part 9, 44 CFR Part 10, or 44 CFR Subpart M that FEMA funding is barred. For each such determination, there is no flexible funding option under Section 402(f) or in lieu contributions under Section 419 Pub. L. 93–288, as amended.

(12) Nonessential features. Although constructed and maintained by the applicant, non-functional features of a facility only of aesthetic value are not eligible.

(13) Furnishings and equipment. Comparable used or surplus furnishings and equipment will be approved as replacement items when available. Only those functional furnishings and equipment essential to the maintenance and operation of the facility are eligible.

(14) Consumable supplies. Consumable supplies damaged or lost in a disaster are eligible for replacement but limited to a 30-day requirement of each item replaced. However, the

Regional Director may approve additional requirements for certain items for which he determines that minimum economical stockage levels exceed 30 days.

(15) Seeding. Seeding shall normally be limited to broadcast seeding without mulching or fertilizer during the regular seasons when such work is performed locally. The Regional Director may approve broadcast seeding to retard erosion in disaster-affected areas and in areas disturbed by eligible work. The Regional Director may approve mulching, fertilizer, and watering only on highway slopes or where required to maintain the structural integrity of a facility, and in areas where sodding is eligible but seeding is substituted.

(16) Sodding. Sodding is not eligible except when the local practices of the applicant would require sodding as in golf greens and in certain grassy areas in parks or public places. Seeding shall be substituted whenever feasible.

(17) Landslides. Section 402 of the Act provides for restoration of damaged or destroyed facilities which are man-made features or improvements. The site is the owner's responsibility. Permanent stabilization of a landslide area can be quite costly and may not produce the desired results. When the Regional Director determines that no practicable alternative exists, he may decline to provide such grant assistance for restoration of facilities within the slide area. Permanent work to stabilize a landslide is not eligible.

(b) *[Reserved]*

(c) *Road and street facilities or systems.* (1) Width standards. The Associate Director has prescribed minimum bridge width standards which are applicable to bridge replacement (but not to repairs) involving FEMA funding. These standards appear in applicable handbooks and may be superseded by changes when approved by the Associate Director.

(2) Approach roads. If the approach roads were undamaged and a bridge can be replaced at the existing site without unacceptable traffic safety hazards, the Regional Director may approve eligible restoration costs to replace the bridge at that site in accordance with current applicable standards. If relocation of the bridge is approved to achieve a safer road alignment, any replacement of existing, undamaged approach roads and all other work on approach roads not resulting directly from major disaster damages are the responsibility of the applicant. Such relocated approach roads of any replacement bridge shall conform at least to the minimum American Association of State Highway and Transportation Officials (AASHTO) standards outlined in Tables 1 thru 7, AASHTO Geometric Design Guide for Local Roads and Streets. Skewing of any replacement bridge to conform to a FEMA-approved safer alignment is eligible for Federal reimbursement. If an applicant decides not to provide at its own cost the approach roads, relocated and upgraded to minimum AASHTO standards, Federal assistance under the Act shall be limited to a replacement bridge at the original location with the same capacity as existed at the time of the disaster and with width not exceeding the minimum safe standards stated above.

(3) Sidewalks. Sidewalks on bridges are not eligible unless they existed on the damaged bridge prior to the disaster, or are required by current, applicable standards.

(4) Waterway openings. In the design of bridge and culvert waterway openings, consideration will be given to the drainage area involved above and below the bridge site. Federal regulations pertaining to the National Flood Insurance Program provide for prevention of "new enroachments" into 100-year floodway. However, the replacement of bridges under the Act which were damaged or destroyed is not "new encroachment" within the meaning of those regulations. Waterway openings for bridges and culverts shall be based on predisaster design and capacity in accordance with current applicable standards and additional guidance in 44 CFR 205, Subpart M, 44 CFR Part 9 or 44 CFR Part 10.

(5) Floodway. Work in floodway related to bridge restoration, including lining and straightening or bank protection such as rip-rap that did not exist prior to the major disaster, is not eligible unless such work will reduce overall project costs of new construction eligible for Federal funding.

(6) Traffic standards. Determination of predisaster capacity for handling traffic of bridges damaged or destroyed as a result of a major disaster shall be based on the average daily traffic which the bridge carried immediately prior to the disaster.

(7) New drainage structures. Construction of new drainage structures in those cases where lack of drainage structures caused flooding damage is not eligible, except for disaster proofing. In accordance with 44 CFR Part 9 or Part 10 of these Regulations, the Regional Director may require that an applicant provide without reimbursement adequate drainage structures or erosion-resistant structures, as a condition for approval of Federal grant assistance for the placement of a fill, embankment, or other facility.

(8) Culverts. Culverts that are washed out and destroyed may be replaced by culverts of similar construction or by larger culverts if required by applicable standards. However, if a culvert is merely plugged, and no other damage has been sustained, cleaning of the culvert is routine maintenance and therefore is not eligible.

(d) *Water control facilities.* (1) Repairs or other restorative work will not exceed restoration in accordance with current applicable standards including appropriate hazard mitigation measures as practiced by the applicant throughout its system of other like facilities:

(i) Predisaster condition and design capacity,

(ii) Previously existing elevations, and

(iii) Cross sections

(2) In those cases where inadequate maintenance by the applicant prior to a major disaster significantly diminished the predisaster design or hydraulic capacity of a facility or system, the Regional Director shall require the applicant to correct the maintenance deficiencies of the entire facility or system as a condition for Federal grant approval. The approval will be limited to restoration of the design and condition of the facility or system as it existed immediately prior to the major disaster. The applicant shall submit a plan and schedule for the required maintenance work acceptable to the Regional Director before his/her approval of otherwise eligible costs. If these conditions are not satisfied, the Regional Director may decline to approve Federal assistance. Final payment of approved Federal assistance may not be made until the design capacity of the facility or system has been restored and all maintenance deficiencies have been corrected.

(e) *Public buildings and equipment.* (1) Repairs to buildings. Where an eligible building receives extensive damage but remains structurally sound, the Federal contribution is limited to repairing the damage in accordance with applicable standards for repairs.

(2) Replacement of buildings. When a publicly-owned building is destroyed or damaged to the extent that the Regional Director determines that it would not be feasible to perform repairs, a replacement structure may be authorized, with its eligible capacity not to exceed the capacity of the original structure.

(3) Office equipment. When damage to office equipment is repairable, only repair is authorized. Comparable office equipment such as typewriters, desks and chairs, when available from Federal

and State surplus or commercially, shall be procured for repalcement items.

(4) Service equipment. Police cars and motorcycles, fire trucks, public works construction and maintenance equipment, and other such equipment damaged as a direct result of the disaster, but not as the result of the disaster operations, are eligible for repair or replacement in accordance with the following criteria:

(i) Repairs. (A) Only those repairs necessary to return service equipment to its predisaster repair standards are eligible. The allowable repairs normally will not exceed the "Blue Book" retail value of the piece of equipment, less any salvage value and insurance recoveries.

(B) As a condition for Federal grant assistance for repairs, the applicant shall correct any predisaster deficiencies needed to restore the service equipment to safe operating condition without Federal assistance except for disaster-related eligible repairs.

(ii) Replacement. Non-repairable service equipment will normally be replaced with used equipment of approximately the same age and value to the extent such equipment is readily available within a reasonable time and distance. Any equipment eligible for replacement must have been in active use or temporarily out of service.

(5) Library books and publications. Replacement of library books and publications is based on an inventory of the quantities of various categories of books or publications damaged or destroyed. When damage to books is repairable, only repair is authorized. Federal grant assistance shall be based on used replacements, when resonably comparable and available. Discounts normally are available and must be considered. The Regional Director may authorize equivalent replacement, such as substituting microfilm copies of newspapers and periodicals, if they can be provided at no greater Federal cost than replacement of the damaged items in kind.

(f) *Public utilities.* (1) Repair of public utility distribution systems normally requires the same general type of materials as previously existed. If more economical and satisfactory alternate materials are available, they shall be used.

(2) Cleaning of storm and sanitary sewer lines damaged by the disaster is eligible only to the extent it is disaster-related and necessary to restore adequate functioning of the system under conditions expected each year.

(3) Repair or replacement of measuring devices such as meters is eligible only if the responsibility is that of the applicant.

(4) The Federal contribution shall not provide a higher level of sewage treatment. If a higher level of treatment is required to meet State or Federal standards, the additional cost of such facilities is the responsibility of the applicant.

(g) *Facilities under construction.* (1) "Under construction" means that period of time from the initiation of construction by applicant forces to final completion of all eligible work or from the award of the prime contract to the applicant's final acceptance of the facility from the contractor. Although the applicant may have accepted certain features of the project for use, the project is considered to be under construction until it is finally accepted.

(2) Only those repairs or replacements are eligible that are necessary to restore facilities damaged or destroyed by a major disaster substantially to predisaster condition. Restoration of the site or natural setting for such facilities is the owner's responsibility and is therefore not eligible. Disaster proofing is not eligible.

(h) *Private nonprofit facilities.* (1) Eligibility criteria for restorative work on facilities owned by eligible private nonprofit organizations are the same as for like work on similar facilities owned by any eligible applicant.

(2) As a condition for Federal grant assistance, such facilities must have been operated at the time of the major disaster in a manner to carry out fully the purposes of the facilities and of the owning organization or entity, except those facilities under construction.

(3) As a condition for Federal grant assistance, the eligible owning organization shall provide all assurances normally required from any applicant in submitting a project application plus any additional assurances required by the Regional Director, including but not limited to the following: the grant recipient shall operate and maintain the restored facilities continuously after completion throughout their useful life.

(4) The eligible owning organization must provide the necessary permits and licenses to repair, restore, reconstruct or replace the facility in accordance with the project application and subsequently to maintain and operate the facility. Refer aso to 44 CFR 205.76(a)(15) and (a)(16).

(5) Repair or replacement of any educational facility is not eligible for which disaster relief assistance would not be authorized if it were a public facility under the Act, under Pub. L. 81-815, or Title VII of the Higher Education Act of 1965.

(6) Repair or replacement of any hospital or other medical care facility in any disaster-affected area is not eligible:

(i) For which disaster relief assistance would not be eligible under the Act if it were a publicly-owned facility, or

(ii) Where the Regional Director after consulting with the State hospital planning agency, determines that a significant surplus of such facilities exists, or

(iii) Where after consulting with the State hospital planning agency, he/she determines that a significant surplus of such facilities would be created by the proposed work, or

(iv) Unless the facility was in active use prior to the major disaster and providing significant medical services to the general public.

(i) *Publicly-owned parks and recreational facilities.* (1) Publicly-owned facilities which constitute physical installations in the area such as playgrounds, swimming pools, boat docks, bath houses, tennis courts, picnic tables, etc., are eligible for repair or replacement when damaged or destroyed as the result of a major disaster.

(2) Natural features of a publicly-owned park or recreational facility such as trees and shrubs may be restored to predisaster condition to the extent necessary to restore significant public services or use that the Regional Director determines to be reasonable and practicable and in the public interest.

(3) Repair or replacement of other damaged or destroyed natural areas is not eligible except to eliminate an immediate threat to public health and safety.

(j) *Removal of timber.* (1) When in the public interest, the Regional Director may approve grants to a State or local government for the purpose of removing from privately owned lands timber damaged as a result of a major disaster. Refer also to 44 CFR 205.76(e)(9).

(2) Approved Work Practices. Bent, twisted, downed timber of commercial value will be salvaged or cleared when approved under 44 CFR 205.75. This includes the construction of approved temporary access roads required for removal of the damaged timber.

(i) Slash created by approved timber removal may be disposed of by not more than one of the following practices when approved by the Regional Director:

(A) Prescribed burning.

(B) Drum chopping.

(C) Raking, windrowing, and burning.

(ii) Where such slash is to be burned, appropriate permits will be obtained from the Forestry Commission and/or other appropriate agency(ies), and other precautions and notifications made as required by law.

(iii) No such slash should be placed where it will interfere with existing drainage facilities.

§ 205.76 Eligibility of costs.

(a) *General.* (1) This section provides policies and guidelines for determining eligibility of costs of work eligible under the Act that may be paid to any eligible applicant or other recipient of this grant assistance. The subparagraphs which follow are generally applicable to eligibility of costs. Only reasonable costs of eligible work are reimbursable.

(2) Factors affecting eligibility of costs. To be eligible under a FEMA grant, costs must meet the following general criteria:

(i) Be necessary and reasonable for proper and efficient administration of the approved work, be allocable thereto under these regulations, and, except as specifically provided herein, not to be a general expense required to carry out the overall responsibilities of State or local governments.

(ii) Be authorized or not prohibited under State or local laws or regulations.

(iii) Conform to any limitations or exclusions set forth in these regulations, Federal laws, or other governing limitations as to types or amounts of cost items.

(iv) Be consistent with policies, regulations, and procedures that apply uniformly to both Federally assisted and other activities of the unit of government of which the grantee is a part.

(v) Be accorded consistent treatment through application of generally accepted accounting principles appropriate to the circumstances.

(vi) Not be allocable to or included as a cost of any other Federally financed program.

(vii) Be net of all applicable credits.

(3) Funding to any applicant for costs that are reimbursable by another Federal agency under its own statutory authorities is not eligible under the Act.

(4) The amount of Federal reimbursement made to an applicant under categorical funding or under a small project grant is limited to the eligible cost of performing work approved by FEMA. This limitation is not intended to restrict the type and cost of work which the applicant may choose to undertake. If the applicant performs work in excess of the approved amount, Federal financial assistance is limited to the costs of eligible work approved by the Regional Director. Flexible funding under section 402(f) of the Act, is limited to 90 percent of the estimated costs of eligible permanent restorative work.

(5) The applicant may use assistance under the Act to supplement funds available from the grant programs of other Federal agencies, or from other sources provided that:

(i) There is no duplication of benefits prohibited by section 315 of the Act, or

(ii) Such funding is not in violation of applicable laws and Federal regulations.

(6) Approval of Federal funding may be withdrawn for any project not started within approved time limitations, including extensions. Federal funding is not eligible for work performed after the approved termination date, including extensions. Refer also to 44 CFR 205, Subpart H.

(7) Administrative expenses. Administrative expenses attributable to requesting, obtaining, and administering FEMA grant or loan assistance are not eligible, including but not limited to the following:

(i) Preparation or processing of project applications, reports, appeals, inspection reports, audits, and claims for payment.

(ii) Performance of owners responsibilities.

(iii) Operation of Emergency Operations Center.

(iv) Salaries, wages, and expenses of State and local officials who are responsible for directing regular governmental activities.

(v) Salaries, wages, fees, and expenses of individuals or firms while engaged in the preparation and processing of damage assessments, of project applications, claims for payment and supporting documentation, including costs of damage estimates.

(vi) Office supplies and equipment.

(vii) Rent.

(viii) Telephone and telegraph expenses.

(8) Grant-in-lieu, (i) The amount for which a grant-in-lieu is approved is limited to the estimated costs of the eligible work.

(ii) Proportionate sharing of costs is not an acceptable method of determining eligible costs for a grant-in-lieu.

(iii) The only permissible basis for increasing or reducing the Federal funding under a grant-in-lieu is a substantial error or omission in defining the approved scope of eligible work or in the approved estimated reasonable costs of such work. In cases where the actual audited costs for completing the project are less than the approved grant-in-lieu, the final payment will not exceed the actual audited costs. In such cases the Regional Director or the Associate Director will make appropriate reductions in the Federal payment based on his/her determination of costs of completed betterments.

(9) Equipment rental. Rental of privately-owned equipment to perform eligible disaster work is eligible. However, the rental rates must be comparable to going rates in the locality for similar types of equipment. If not, reasonable rates as determined by the Regional Director shall be substituted in approval of project applications, or of claims. When auditable records are available, the actual audited costs of equipment may be considered in processing appeals.

(10) Hand tools, materials, and supplies. (i) Eligible: (A) Reasonable costs for materials and supplies consumed in eligible disaster work, including those procured by direct purchase or taken from applicant's stock.

(B) Costs of hand tools (shovels, handsaws, hammers, etc.), personal equipment, and protective clothing reasonably lost, worn out or destroyed through disaster use in performing eligible work.

(ii) Not eligible: Costs for losses, damage or destruction while in disaster or emergency use of radios, weapons, and other items used regularly in field operations by police and other employees whose duties do not change because of the disaster.

(11) Salvage. Salvage value of any damaged or destroyed property must be deducted in all determinations of eligibility of work and from final reimbursement to any claimant.

(12) Stockpiled items. Costs of all stockpiled items purchased under the Contributions Program (Pub. L. 920, 81st Congress, as amended) for civil defense purposes which are lost, damaged, or destroyed by a major disaster while in storage are not eligible.

(13) Insurance. (i) Cost of insurance required for performance of grant or loan assistance is eligible.

(ii) Insurance purchased by the State, the applicant, or grantee for its protection from any liability arising from assurances made to the grantor, or arising directly or indirectly from use of the grant shall be at the insured's expense and is not eligible.

(iii) The Regional Director shall reduce the grant by the actual applicable amount of insurance proceeds received by the grantee or by any prior insurance commitment for Federal assistance that is delinquent. In the event insurance recovery is contingent upon the amount of reimbursement under the Act, reimbursement is limited to eligible

costs as determined by the Regional Director after deducting the maximum amount otherwise recoverable under and up to the limit of the policy.

(14) Acquisition of lands, easements, and rights-of-way. Such acquisitions are the responsibility of the applicant, or grant recipient upon whose behalf project application was made. These costs are usually covered by the assurances accompanying the project application and are not eligible for Federal reimbursement except when approved in the public interest by the Associate Director under unusual circumstances, requiring immediate action beyond State, applicant, or grantee's capabilities, or involving significant cost savings to the Federal Government.

(15) Licenses. The costs of Federal, State, or local licenses which are required for the grantee to operate and maintain completed facilities are not eligible. Meeting the requirements for licenses is the responsibility of the grantee.

(16) Permits. The costs of Federal, State, or local permits which are required to perform eligible work are eligible.

(17) Loss of revenue. Replacement of revenues lost as the result of a major disaster or emergency is not eligible for grant assistance.

(18) Excess utility costs. Any loss of revenue or added costs or charges for providing utility services is not eligible.

(19) National Guard. (i) Eligible: Actual projects paid by the State not otherwise federally funded for work undertaken by the National Guard on a project basis, including salaries of National Guardsmen directly engaged in project work or supervision, when such projects are approved in advance by the Regional Director.

(ii) Not eligible: Use of National Guard for public safety, or other security measures.

(20) Cooperative agreements. (i) Eligible: Costs for work performed under cooperative arrangements between State or local governments, but limited to those direct costs of the performing entity, which would be eligible if the applicant had performed the work.

(ii) Not eligible: Costs for work performed under arrangement between a State or political subdivision of a State and a Federal agency, except when approved in advance by the Regional Director.

(21) Work performed by service, fraternal, and other similar organizations which do not normally contract their service for disaster relief. (i) Eligible: Only out-of-pocket costs for equipment, materials, and supplies used or consumed in the performance of eligible work.

(ii) Not eligible: Wages or salaries of member personnel engaged in disaster relief activities.

(22) Prison labor. (i) Eligible: Out-of-pocket costs to an eligible applicant of prison labor performing eligible disaster work, limited to the amount paid the prisoners in accordance with rates established prior to the disaster, and the cost of transportation.

(ii) Not eligible: Costs of food, lodging, and guards. Also, any costs for prison labor utilized by a contractor.

(23) Private nonprofit organizations. (i) Only catergorical grants may be approved by the Regional Director for such eligible grantees. No payment will be made for any work which was not within the scope of responsibility of the eligible private nonprofit organization prior to the major disaster.

(ii) Such grants shall not: (A) Be used to pay any part of the cost of facilities, supplies, or equipment which are to be used primarily for sectarian purposes; or

(B) Be used to pay costs to repair or replace: any facility, equipment, or supplies used primarily:

(*1*) For religious worship,

(*2*) For religious instruction, or

(*3*) In connection with any part of the program of a school or department of divinity.

(24) Negligence. No Federal reimbursement shall be made to any applicant for damages caused by its own negligence, by the negligence of any interested public or private organization or entity that is a direct grant recipient, or by any contractor.

(25) Interest and other financial costs. Interest on borrowings (however represented), bond discounts, cost of financing and refinancing operations, and legal and professional fees paid in connection therewith are not eligible.

(26) Governor's expenses. The salaries and expenses of the Office of the Governor of a State or the chief executive of a political subdivision are considered a cost of general State of local government and are not eligible.

(27) Legislative expenses. Salaries and other expenses of the State legislature or similar local governmental bodies such are county supervisors, city councils, school boards, etc., whether incurred for purposes of legislation or executive direction, are not eligible.

(28) Legal fees required in the administration of the grant are eligible. Legal services furnished by the Chief legal office of a State or local government of this staff solely for the purpose of discharging his general responsibilities as a legal officer are not eligible. Legal expenses for the prosecution of claims against the Federal Government are not eligible.

(29) Other. Any costs not allowable under OMB Circular 74–4 are ineligible for FEMA reimbursement.

(30) Interest on Advances. Interest earned on advances of Federal funds shall be remitted to FEMA except for interest earned on advances to States or instrumentalities of a State as provided by the Intergovernmental Cooperation Act of 1968 (Pub. L. 90–577) and advances made to tribal organizations pursuant to section 102, 103, or 104 of the Indian Self Determination Act (Pub. L. 93–638).

(b) *Work by applicant's own forces.* (1) In addition to the provisions of 44 CFR 205.76(a), this section provides criteria for eligibility of costs specifically applicable to work by the applicant's own forces, hereinafter referred to as force account.

(2) Personnel. (i) Gross salaries or wages (including overtime) of extra employees of the applicant or grantee are eligible when the employees are engaged in the performance of eligible work, but not to exceed the going wages paid locally for such work.

(ii) Gross salaries or wages (including overtime) of regular employees of the applicant or grantee are eligible for reimbursement, but not to exceed the going wages paid locally for such work except the following types of ineligible costs:

(A) Regular salaries or wages of regularly employed policemen and firemen and of other regular employees whose duties do not change because of the disaster. Examples are levee patrollers, pumping plant operators, and building inspectors.

(B) Regular salaries of supervisory personnel other than working foremen engage primarily-and-continuously in field supervision of eligible work.

(C) All payroll costs above each employee's gross pay.

(3) Equipment. (i) The FEMA Schedule of Equipment Rates, or an alternative Schedule of Equipment Rates approved by the Associate Director, is applicable to all reimbursements for equipment that is publicly-owned or owned by other grantees.

(ii) For vehicles or equipment utilized by police, firemen, and other employees whose duties do not change because of the major disaster or emergency, only disaster-related actual costs in excess of average costs for the same period of time for the pervious three years, based on auditable records are eligible.

(iii) For permanently installed fixed equipment, such as pumping stations, only disaster-related actual costs in excess of the average costs for this same period of time for the previous three years, based on auditable records are eligible.

(c) *Contract work.* (1) Eligible: Reasonable costs for work performed by private contractors on eligible projects contracted for in accordance with State or local statutes.

(2) Not eligible: Costs incurred under the following types of contracts unless the Regional Director determines, on a case-by-case basis, that reimbursement of reasonable actual costs of eligible work is in the best insterests of the government:

(i) Cost-plus-percentage-of-cost contracts.

(ii) Contracts containing a provision which makes payment for eligible work contingent upon reimbursement under the Act.

(iii) Contracts with any contractor included on any FEMA listing of debarred contractors.

(d) *Emergency work.* (1) General. In addition to provisions of 44 CFR 205.76, (a), (b) and (c), these specific criteria apply to emergency work under the Act.

(2) Engineering and design. For emergency work such services are usually not necessary and Federal reimbursement may not be justified. The provisions of 44 CFR 205.76(e)(2) are also applicable to any engineering or design services related to emergency work.

(3) Debris removal. No Federal reimbursement will be made to an applicant for its reimbursement of an individual or private organization for the cost of removing debris from his/her own property except those public entities and private nonprofit organizations eligible under section 402(b) of the Act.

(4) (Reserved.)

(5) Emergency pumping. Reimbursement for emergency pumping shall terminate promptly after the river or stream has crested, except for removal of trapped water posing an immediate threat to public health and safety.

(6) Access to water control facilities. Emergency repairs to roadways along the top of a water control facility shall not exceed that required to provide access for emergency work or that which existed prior to this major disaster or emergency.

(7) Vector control. Only disaster-related actual costs in excess of the average cost for the same period of time during the previous three years are eligible when vector control is approved in the public interest.

(e) *Permanent work.* (1) General. In addition to provisions of 44 CFR 205.76 (a), (b), and (c), these specific criteria apply to permanent work under Section 402 of the Act.

(2) Engineering and design. Reimbursement for eligible engineering, planning, design, supervision, or inspection services is based upon actual direct costs but shall not exceed the amount approved on the project application, or on a supplemental project application. The Regional Director may approve special services, such as engineering, surveys, soil investigations, resident engineers, and additional construction inspection when justified.

(3) Feasibility studies. Feasibility studies may be reimbursable under the Act when approved in advance by the Regional Director. Costs for feasibility studies primarily concerning alternate facilities, betterments, or post-disaster programs or any project approved for flexible funding are not eligible for reimbursement under the provisions of the Act.

(4) Environmental review. Costs incurred by an applicant to perform an environmental review and assessment are not eligible without prior approval by the Regional Director. Refer also to 44 CFR Part 10.

(5) Disaster proofing. The eligible costs of disaster proofing are limited to minor measures to make the affected features of a facility or structure disaster-resistant. Eligible costs of disaster proofing shall not exceed a small percentage of otherwise eligible costs of restorative work being disaster proofed, unless approved by the Associate Director under unusual circumstances on a case-by-case basis.

(6) Relocations. When the Regional Director has approved replacement of a facility at a new location under section 402 of the Act, the costs of acquiring the site plus providing to the site road access, utilities, and communication lines are the owner's responsibility and are not eligible. The costs of replacing the facility at the new approved location, otherwise eligible under the Act, are reimbursable.

(7) Warranties. Additional costs to provide warranty or guarantee of any repaired or replacement items or facilities are not eligible for Federal reimbursement. However, after applying for relief from the contractor, manufacturer, or supplier, the applicant or grantee may appeal to the Regional Director for any grant assistance that he can justify as disaster related.

(8) Projects under construction. (i) Only categorical grants may be approved for those facilities under construction when damaged or destroyed by a major disaster. Federal reimbursement shall not exceed the net eligible costs to the applicant, to a private nonprofit organization or entity, or to the contractors in restoring a facility to substantially the same condition as existed prior to the major disaster.

(ii) In addition to other provisions of 44 CFR 205.76, the following are not eligible:

(A) Repair or replacement of the site.

(B) Repair or replacement of mobile construction equipment.

(C) Project operation and maintenance.

(D) Idle construction equipment ownership expense or loss of revenue because of damages to construction equipment or for other reasons.

(E) Contractors' administrative or overhead costs not directly related to eligible work including computer costs.

(F) Costs covered by insurance settlements or salvage, including reimbursement which might be received from any other private, State or local government, or Federal agency.

(G) Contractor's profit in those instances where the contractor is the beneficiary of the Federal assistance.

(H) Losses resulting from delays in completion of the work such as contract penalties or loss of revenue.

(I) Costs of disaster proofing.

(9) Timber removal. (i) Eligible costs: (A) Reimbursement for eligible expenses actually incurred in the removal of damaged timber subject to verification by inspection and audit.

(B) Costs of repair or construction of temporary roads approved by the Regional Director as necessary for access to damaged timber for removal.

(ii) Ineligible costs: (A) Estimated salvage value of timber destroyed by burning or otherwise by the claimant in lieu of practicable salvage operations.

(B) Costs of timber removal for which the Regional Director determines salvage or insurance recoveries by the claimant are applicable.

(C) Debris removal other than

provided in approved work practices for primary purpose of timber removal.

(iii) Maximum Payment: Maximum payment for completed approved work practices will be based on the following:

(A) Construction of approved temporary access roads for salvage of damaged timber. 100% of eligible costs not to exceed $60.00 per thousand linear feet.

(B) Drum chopping: 100% of eligible cost not to exceed $100.00 per acre.

(C) Prescribed burning: 100% of eligible cost not to exceed $5.00 per acre.

(D) Raking, windrowing and burning: 100% of eligible cost not to exceed $140.00 per acre.

Any payment will be minus any residual salvage value, insurance recoveries or other cost-share payments related to timber removal.

Issued at Washington, D.C.

William H. Wilcox,

Associate Director, Disaster Response and Recovery, Federal Emergency Management Agency.

Part III

Department of the Interior

Fish and Wildlife Service

Emergency Determination of Endangered Status and Designation of Critical Habitat for Astragalus yoder-williamsii

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Emergency Determination of Endangered Status and Designation of Critical Habitat for Astragalus yoder-williamsii

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Emergency rule.

SUMMARY: The Service determines the Osgood Mountains milk-vetch (*Astragalus yoder-williamsii*) to be an Endangered species and an area on Bureau of Land Management land in Humboldt County, Nevada, to be its Critical Habitat. The species also is found in Owyhee County, Idaho. Mining development threatens the integrity of the species' habitat and hence poses a significant risk to the survival of the plant. This emergency rule will provide the Endangered Species Act's protection to this species for 240 days.

DATES: This emergency determination for the species and designation of its Critical Habitat will be effective on August 13, 1980, and remain in effect until April 15, 1981.

ADDRESSES: Interested persons or organizations can obtain information from the Area Director, U.S. Fish and Wildlife Service, Room E2730, Federal Building, 2800 Cottage Way, Sacramento, California 95825; telephone 916/484–4664.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240; telephone 703/235–2771.

SUPPLEMENTARY INFORMATION:

Background

Astragalus yoder-williamsii is known only from eastern Humboldt County in northern Nevada and from southeast of Black Butte in Owyhee County, southwestern Idaho. It was first collected in 1977 and was recognized as a new species from a second collection in 1979. It was formally named and described as a new species earlier this year (Barneby 1980). It is found on exposed ridge crests and flat plateaus of decomposed granite gravel or sandy soil derived from granodiorite parent material, at elevations of 1890–2230 meters. The Nevada population, in the northern Osgood Mountains, is estimated to number about 500 individual plants. The Idaho population was composed of less than ten plants in 1977. Searches undertaken in 1979 and 1980 for other populations of the species in both states have been unsuccessful.

At both locales where this species occurs there are recent mining claims, and assessment work on the claims in Nevada appears imminent. The Nevada population is on land managed by the Bureau of Land Management (BLM), while the Idaho population is mostly on BLM land and also on some private land. The BLM has requested that this emergency rule be enacted, in a letter to the Director dated July 1, 1980. The Department has determined that this is not a significant rule and does not require the preparation of a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Summary of factors affecting the species: Subsection 4(a)(1) of the Endangered Species Act (16 U.S.C. 1531 *et seq.*) states that the Secretary of the Interior shall determine whether any species is an Endangered species due to one or more of the five factors described in that subsection. This authority has been delegated to the Director. These factors and their application to *Astragalus yoder-williamsii* Barneby are as follows:

1. *Present or threatened destruction, modification, or curtailment of its habitat or range.* This species appears to be restricted to a few granodiorite outcrops in north-central Nevada and southwestern Idaho. The larger population on about 20 acres of BLM land in eastern Humboldt County, Nevada, is located east of Soldier Cap and southwest of the Getchell Mine, in the northern Osgood Mountains. The population lies within mining claims of a private corporation, which were filed in 1974. This June, the majority of these claims were leased to a private company which indicates they will carry out assessment work this summer. The claims lie on deposits of a tungsten and gold ore. The ore deposits are immediately to the west and north of this population of the species. Considerable mining excavations occur within one mile of the population in all directions, a road passes through the population, and past mining assessment cuts have been made in the species' habitat (Yoder-Williams 1980). Considerable care will be necessary to avoid further damage to the species in assessment work and development of these mining claims.

The smaller population in southwestern Idaho is in Owyhee County, 4.5 km SSE of Black Butte and 14.5 km E of Triangle. It was discovered in June 1977, but plants could not be found in the area this June. The population is on some private land but mostly on land managed by BLM; mining claims for the area were filed this April. Barneby (1980) indicates that there are morphological differences between plants at the two sites, but he places them in one species.

2. *Overutilization for commercial, sporting, scientific, or educational purposes.* Not applicable to this species.

3. *Disease or predation* (including grazing). Grazing has occurred on the species' habitat. This grazing does not appear to threaten the species.

4. *The inadequacy of existing regulatory mechanisms.* There currently exist no State or Federal laws protecting this species. The BLM has advised us that it intends to set aside the Nevada habitat for this species as an Area of Critical Environmental Concern, under the Federal Land Policy and Management Act of 1976 (Pub. L. 94–579), section 102(a). The Endangered Species Act of 1973, as amended, offers additional possibilities for protection of *Astragalus yoder-williamsii.*

5. *Other natural or man-made factors affecting its continued existence.* Any human pressure on this species may exaggerate the possibility of small populations going extinct through natural population fluctuations.

Critical Habitat

The Act defines Critical Habitat to include (a) areas within the geographical area occupied by the species at the time that species is listed which are essential to the conservation of the species and which may require special management considerations or protection, and (b) specific areas outside the geographic area occupied by the species at the time, upon a determination by the Secretary that such areas are essential for the conservation of the species.

Critical Habitat for *Astragalus yoder-williamsii* is as follows: Nevada, Humboldt County, the immediate ridge area on both sides of Burma Road at the summit, in the northern Osgood Mountains, excluding the existing roadways of Burma Road and the road to the Alpine Mine. The exact boundaries are the N½ of the SW¼ of the NE¼, and the SW¼, SE¼, and NE¼ of the NW¼ of the NE¼ of section 6, T38N R42E, and the SE¼ of the SW¼ of the SE¼ of section 31, T39N R42E.

It is anticipated that these areas will provide the species with the necessary requirements for survival and conservation. The Idaho site of the species is not included in Critical Habitat because plants could not be relocated there in field work recently undertaken. Nevertheless, it is protected through the jeopardy provision of Subsection 7(a)(2) of the Act should plants be found there.

Subsection 4(f)(4) of the Act requires, to the maximum extent practicable, that Critical Habitat designations be accompanied by a brief description and evaluation of those activities which, in the opinion of the Secretary, may adversely modify such habitat if undertaken, or those Federal actions which may be impacted by such designation. Such activities are discussed below for this species. It should be emphasized that Critical Habitat designation may not affect each of the activities listed below, as Critical Habitat designation only affects Federal agency actions through section 7 of the Act.

Two activities are planned in the area of the designated Critical Habitat. The BLM intends to designate an Area of Critical Environmental Concern for the species, as discussed above under threat factor four, and it may fense this area. This action appears fully compatible with the Subsection 7(a)(1) responsiblities BLM will now have for this Endangered plant.

Second, Pinson Mining Company, working with Cordex Exploration Company, plans further assessment work on mining claims at the Nevada site this summer. In June of this year, the majority of these claims were leased to Cordex Exploration Company by Utah International, Inc., a division of the General Electric Corporation. Access to the ores on BLM land is regulated by the Mining Law of 1872. The effect of this species' listing and Critical Habitat designation on the mining activity is currently under review (cf. BLM, m.d.; Sheridan 1978). It is clear that future mining assessment work and development of the claims could cause severe decreases in available habitat for the species, as well as direct loss of individual plants. Cooperative efforts so as to avoid damage to the species and its habitat are certainly indicated.

Effects of This Rule

In addition to the effects discussed above, the effects of this emergency rule include, but are not necessarily limited, to those mentioned below.

Subsection 7(a)(2) of the Act, as amended, requires Federal agencies to evaluate their actions with respect to any species which is listed as Endangered. Provisions for Interagency Cooperation implementing this subsection are codified at 50 CFR Part 402. New regulations to accommodate amendments to Section 7 are in preparation. This emergency rule requires Federal agencies to insure that actions they authorize, fund or carry out are not likely to jeopardize the continued existence of this species, or to result in destruction or adverse modification of its Critical Habitat. Since the BLM has requested this emergency rule, it appears it intends to readily comply with the effects of this subsection to the extent that it has discretionary powers to exercise.

The Act and implementing regulations published in the June 24, 1977, **Federal Register** (42 FR 32373–32381) set forth a series of general trade prohibitions and exceptions which apply to all Endangered plant species. The prohibitions are found at Section 17.61 of 50 CFR and are summarized below. With respect to *Astragalus yoder-williamsii,* all prohibitions of Subsection 9(a)(2) of the Act, as implemented by Section 17.61, apply. These prohibitions, in part, make it illegal for any person subject to the jurisdiction of the United States to import or export, transport in interstate or foreign commerce in the course of a commercial activity, or sell or offer for sale this species in interstate or foreign commerce. Certain exceptions apply to agents of the Service and State conservation agencies. The Act and 50 CFR Sections 17.62 and 17.63 also provide for the issuance of permits to carry out otherwise prohibited activities involving Endangered species, under certain circumstances. No such trade in this *Astragalus* is known. It is anticipated that no permits involving the species will be requested.

Subsection 4(f)(2)(C) of the Act provides the authority for this emergency rule, which is effective for 240 days. During that time period, the Service intends to carry out the regular proposed and any final rulemaking procedure for this species, as required by the Act, in order to replace this emergency rule with appropriate long-term legal protection for the species. The Governors of Nevada and Idaho have been notified of this emergency rule, in accord with Subsection 4(b)(1)(A) of the Act and our regulations in the February 27, 1980, **Federal Register** (45 FR 13025), to be codified at 50 CFR Part 424, Section 424.19.

National Environmental Policy Act

An Environmental Assessment has been prepared in conjunction with this emergency rule. It is on file in the Service's Area Office, Room E2740, Federal Building, 2800 Cottage Way, Sacramento, California, and may be examined by appointment during regular business hours. A determination has been made that this emergency rule is not a major Federal action which significantly affects the quality of the human environment within the meaing of Section 102(2)(C) of the National Environmental Policy Act of 1969.

This rule is published under the authority contained in the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.;* 87 Stat. 884, 92 Stat. 3751, 93 Stat. 1225). The primary author of the rule is Dr. Bruce MacBryde, Office of Endangered Species, Washington, D.C. 20240, (703–235–1975).

Regulation Promulgation

Accordingly, for 240 days amend Part 17, Subchapter B of Chapter I, Title 50 of the Code of Federal Regulations, as set forth below:

1. Amend § 17.12 by adding in alphabetical order the following to the list of plants:

§ 17.12 Endangered and threatened plants.

Species		Historic range	Status	When listed	Critical habitat	Special rule
Scientific name	Common name					
Fabaceae—Pea family:						
Astragalus yoder-williamsii	Osgood Mountains milk-vetch.	U.S.A. (ID, NV)	E	101	17.96(a)	NA

§ 17.96(a) [Amended]

2. Also, the Service amends § 17.96(a) by adding the Critical Habitat of *Astragalus yoder-williamsii* after that of *Astragalus perianus*, as follows:

Fabaceae (Astragalus yoder-williamsii)

Osgood Mountains milk-vetch. Nevada, Humboldt County: The immediate ridge area on both sides of Burma Road at the summit, in the northern Osgood Mountains, excluding the existing roadways of Burma Road and the road to the Alpine Mine. The exact boundaries are the N½ of the SW¼ of the NE¼, and the SW¼, SE¼, and NE¼ of the NW¼ of the NE¼ of Section 6, T38N R42E, and the SE¼ of the SW¼ of the SE¼ of Section 31, T39N R42E.

Dated: August 7, 1980.

Part IV

Department of Energy

Provisions Governing Acceptance of Gifts and Travel From Foreign Governments

V 4 5 A G 1 3 8 0 UMI

DEPARTMENT OF ENERGY

10 CFR Part 1050

Foreign Gifts and Decorations

AGENCY: Department of Energy.

ACTION: Final regulations.

SUMMARY: The Department of Energy is amending 10 CFR to establish a new Part 1050, to contain regulations implementing the Foreign Gifts and Decorations Act (5 U.S.C. 7342). The regulations are intended to implement for the Department of Energy that Act's provisions governing acceptance of gifts and travel from foreign governments.

EFFECTIVE DATE: August 13, 1980.

FOR FURTHER INFORMATION CONTACT:
Tony C. Upchurch, AD–41, Deputy Director of Administrative Services, Office of Administration, U.S. Department of Energy, Washington, D.C. 20585 (202–252–5712).
Katherine B. Soffer, Attorney, Office of the Assistant General Counsel for Standards of Conduct, GC–45, U.S. Department of Energy, Washington, D.C. 20545 (301–353–4016).

SUPPLEMENTARY INFORMATION: In the Foreign Gifts and Decorations Act, 5 U.S.C. 7342 (hereafter the Act), the Congress consented to an exception to the general Constitutional rule prohibiting Federal employees from accepting gifts or decorations from foreign governments. The statute allows employees to accept gifts of minimal value tendered as souvenirs or as marks of courtesy; it permits acceptance of gifts such as medical or educational services; it allows acceptance, on behalf of the United States, of gifts of more than minimal value where refusal would adversely affect the foreign relations of the United States; it consents to acceptance by employees of gifts of travel and related expenses for travel taking place entirely outside of the United States; and it permits the acceptance of decorations in recognition of active field service in combat or other outstanding performance. The Act establishes reporting and enforcement provisions and identifies the Department of State as the lead Executive Branch agency in this area.

The regulations are consistent with State Department Guidelines issued on the subject and implement the substantive provisions of the Act in a straightforward manner. They identify the Directorate of Administration as the lead organization within the Department of Energy for purposes of administering the Act, and include draft forms for use in meeting reporting requirements. Where appropriate, the General Counsel, the Inspector General, and the Assistant Secretary for International Affairs are given major responsibility for consultation. The Federal Energy Regulatory Commission has been included in coverage of the regulations.

Comments

On March 18, 1980, the Department of Energy (DOE) published proposed regulations (45 FR 17560) with a 30 (thirty) day comment period to establish policies and procedures for DOE employees to follow concerning the acceptance of gifts and decorations from foreign Governments. No comments were received. Several non-substantive or editorial changes in the regulations have been made: the principal revisions are discussed below.

The first change in the regulations consists of deleting Appendix III, General Services Administration (GSA) Standard Form 120, Report of Excess Personal Property. The regulations at § 1050.302(d)(1) already provide that the Directorate of Administration is responsible for reporting and transmitting to GSA for disposal, pursuant to the Federal Property and Administrative Services Act of 1949 and the Federal Property Management Regulations at 41 CFR 101–49, gifts or decorations which are not retained for official use by DOE. The reports on Standard Form 120 are to be made by the Directorate of Administration and not by the employee who received the gift or decoration. Because the reporting responsibility is designated in the regulations, there is no need to attach Standard Form 120 as Appendix III and the reference to it has therefore been deleted from the final regulations.

The second change consists of clarifying the regulations at § 1050.101 to reflect the policy of the Department of Energy that compliance with the regulations will satisfy the requirements of DOE Conduct of Employees regulations. (10 CFR Part 1010).

Section 1050.202(d) of the regulations regarding gifts in the form of travel or travel expenses has been clarified to specify that advance written approval for acceptance by DOE employees of such gifts must be obtained. This revision makes the treatment of these gifts consistent with the approval requirements in the regulations for acceptance of travel by spouses or dependents of employees under § 1050.202(d) and for acceptance of travel from international energy-related organizations under § 1050.202(e).

The treatment in the regulations of gifts in the form of an educational scholarship or medical treatment has been clarified. The regulations have been revised at § 1050.204(a) to specify that advance approval is required, where feasible, for the acceptance of a gift of more than minimal value in the form of an educational scholarship or in the form of medical treatment. In addition § 1050.202(c) and § 1050.301 have been changed to reflect that acceptance of these gifts must be reported on the DOE Form contained in Appendix I. This clarification was necessary to make the regulations reflect DOE policy that the treatment of these gifts should be consistent with the required treatment of gifts of more than minimal value accepted as a souvenir or mark of courtesy under § 1050.202(b).

The regulations have been changed at § 1050.303 to clarify the functions of the General Counsel. Section 1050.303(b) has been revised to specify that the General Counsel of DOE or of FERC, as appropriate, as well as the Inspector General, shall be notified of all suspected violations of the regulations. Section 1050.204(a) of the regulations (which has not been changed) also provides that the Director of Administration should consult with the Assistant Secretary for International Affairs and the appropriate General Counsel in connection with determining whether to grant advance approval for acceptance of gifts or decorations by DOE employees.

Appendix I, DOE Form 3735.2, Statement Concerning Gifts Received from a Foreign Government, refers to a reporting requirement for receipt of gifts having an aggregate value of $250 or more. This requirement has been clarified, and the regulations at § 1010.301(a) have been revised to specify the requirement.

Issued in Washington, D.C., July 9, 1980.

John C. Sawhill,
Deputy Secretary of Energy.

In consideration of the foregoing, title 10, Code of Federal Regulations, is amended to add a new Part 1050 to read as set forth below.

PART 1050—FOREIGN GIFTS AND DECORATIONS

Subpart A—General

Sec.
1050.101 Purpose and scope.
1050.102 Applicability.
1050.103 Definitions.
1050.104 Responsibilities and authorities.

Subpart B—Guidelines for Acceptance of Foreign Gifts or Decorations

1050.201 Policy against accepting foreign gifts or decorations.
1050.202 Allowable aceptance of gifts.
1050.203 Acceptance of decorations.
1050.204 Advance approval for acceptance of gifts or decorations.

Subpart C—Procedures and Enforcement

1050.301 Reports.
1050.302 Use or disposal of gifts and decorations accepted on behalf of the United States.
1050.303 Enforcement.

Subpart D—Gifts to Foreign Individuals

1050.401 Prohibition against use of appropriated funds.
Appendix I—DOE Form 3735.2.
Appendix II—DOE Form 3735.3.

Authority: The Constitution of the United States, Article I, Section 9; 5 U.S.C. 7342; Pub. L. 95–91, sections 644 and 652, 91 Stat. 599 (42 U.S.C. 7254 and 7262).

Subpart A—General

§ 1050.101 Purpose and scope.

These regulations implement the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342), which establishes policies and procedures pertaining to the acceptance, use, and disposition of gifts or decorations from foreign governments. If an employee of Department of Energy (DOE) meets the requirements of these regulations, he or she is deemed to be in compliance with the DOE Conduct of Employees regulations, 10 CFR Part 1010.

§ 1050.102 Applicability.

These regulations apply to all DOE employees, including special Government employees, and civilian and military personnel of other Government agencies regularly detailed to DOE, and to spouses and dependents of such personnel. These regulations apply to all employees of the Federal Energy Regulatory Commission (FERC) to the extent the Commission by rule makes these regulations applicable to FERC employees. These regulations do not apply to gifts and bequests accepted by the Department as authorized by section 652 of the Department of Energy Organization Act (42 U.S.C. 7262), except as set forth in section 1050.202(d) of this Part. These regulations do not apply to assistance from a foreign government for participation by DOE employees in foreign cultural exchange programs pursuant to the Mutual Educational and Cultural Exchange Act (22 U.S.C. 2458a).

§ 1050.103 Definitions.

(a) "Employee" means—

(1) An employee of DOE or FERC as defined by 5 U.S.C. 2105 (employees of DOE contractors are specifically excluded);

(2) A special Government employee as defined in 18 U.S.C. 202(a), and an expert or consultant who is under contract to the DOE pursuant to 5 U.S.C. 3109, including, in the case of an organization performing services under such section, any individual involved in the performance of such services;

(3) A member of a Uniformed Service or an employee of another Government agency assigned or detailed to the DOE or FERC;

(4) The spouse of an individual described in paragraphs (a)(1) through (a)(3) of this section (unless such individual and his or her spouse are legally separated) or a dependent (within the meaning ot section 152 of the Internal Revenue Code of 1954) of such an individual, other than a spouse or dependent who is an employee under paragraphs (a)(1) through (a)(3).

(b) "Foreign government" means—

(1) Any unit of foreign governmental authority, including any foreign national, State, local, or municipal government;

(2) Any international or multinational organization whose membership is composed of any unit of foreign government described in subparagraph (b)(1); and

(3) Any agent or representative of any such unit or such organization, while acting as such.

(c) "Gift" means a tangible or intangible present (other than a decoration) tendered by, or received from, a foreign government.

(d) "Decoration" means an order, device, medal, badge, insignia, emblem, or award tendered by, or received from, a foreign government.

(e) "Minimal value" means a retail value in the United States at the time of acceptance of $100 or less.

(f) "The Act" means the Foreign Gifts and Decorations Act, 5 U.S.C. 7342.

(g) "Appropriate General Counsel" means either the DOE General Counsel when the employee involved is an employee of that portion of the DOE which excludes FERC, or the FERC General Counsel when the employee involved is an employee of FERC.

§ 1050.104 Responsibilities and authorities.

(a) The Director of Administration shall—

(1) Assure that all employees are given access to or a copy of the Act and these regulations;

(2) Maintain liaison with the Department of State and prepare Departmental reports to the Department of State consistent with the Act and these regulations;

(3) Provide advice and assistance on implementation of the act and these regulations, in coordination with the Assistant Secretary for International Affairs (IA) and the appropriate General Counsel;

(4) Collect and maintain for public inspection all employee statements submitted pursuant to these regulations;

(5) Arrange for independent appraisal of the value of gifts or decorations, upon the request of the General Services Administration or the Inspector General (or other appropriate DOE official); and

(6) Accept and maintain custody and make all determinations regarding the use and disposition of all gifts and decorations accepted by employees on behalf of the United States, in coordination with IA, the appropriate General Counsel, and, for gifts to the Secretary, Deputy Secretary or Under Secretary, the appropriate official in the Office of the Secretary.

(b) The Assistant Secretary for International Affairs (IA) shall assist the Directorate of Administration, where appropriate, in making determinations concerning the effects of the proposed acceptance, use, or disposition of a foreign gift or decoration on the foreign relations of the United States.

(c) The appropriate General Counsel shall assist the Directorate of Administration in matters relating to the interpretation and application of the Act, and these and any related regulations, and shall provide counseling and interpretation regarding the Act, and these and any related regulations, to employees.

(d) The Inspector General shall investigate suspected violations of these regulations pursuant to section 1050.303 below.

Subpart B—Guidelines for Acceptance of Foreign Gifts or Decorations

§ 1050.201 Policy against accepting foreign gifts or decorations.

(a) The Constitution of the United States, Article I, section 9, clause 8, provides that "* * * no Person holding any Office of Profit or Trust under * * * [the United States], shall, without the consent of the Congress, accept of any present, Emolument, Office, or Title, of any kind whatever, from any * * * foreign State." In the Foreign Gifts and Decorations Act the Congress consented to the acceptance by Federal employees of gifts and decorations with certain constraints and under certain procedures. Acceptance of any gift or decoration not consistent with this Act, the Department of Energy Organization Act, or the regulations in this Part is prohibited.

(b) No employee shall request or otherwise encourage the tender of a gift or decoration from a foreign government. No employee shall accept a

gift or decoration from a foreign government except as provided in sections 1050.202 or 1050.203 of this Part and in accordance with the additional procedures set forth in sections 1050.204 and 1050.301 of this Part.

§ 1050.202 Allowable acceptance of gifts.

(a) An employee may accept and retain gifts from foreign governments where the gift is tendered or received as a souvenir or mark of courtesy, and is of minimal value. Initial responsibility for determining the value of a gift lies with the employee.

(b) Subject to the prior approval requirements described in § 1050.204(a) of this Part, an employee may accept gifts of more than minimal value, tendered as a souvenir or mark of courtesy, where it appears that refusal of the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States. Otherwise, an employee, when offered a gift of more than minimal value from a foreign government, other than a gift designated in paragraph (c) of this section, should advise the donor that acceptance of such gifts by the employee is contrary to the policy of the United States. If a gift described in this paragraph is accepted by an employee and not immediately returned thereby, it shall be deemed to have been accepted on behalf of the United States. Upon acceptance it becomes the property of the United States. Within 60 days after acceptance by the employee, the gift shall be deposited with the Directorate of Administration for disposal or official Departmental use as determined by the Directorate of Administration, in accordance with § 1050.302 of this Part, and an appropriate statement shall be filed by the employee in accordance with § 1050.301(a) of this Part.

(c) Subject to the prior approval requirements described in § 1050.204(a) of this Part, an employee may accept and retain gifts of more than minimal value:

(1) Where the gift is in the nature of an educational scholarship.

(2) Where the gift is in the form of medical treatment.

An employee accepting a gift pursuant to this paragraph shall file an appropriate statement in accordance with § 1050.301(a) of this Part.

(d) An employee may accept gifts (whether or not of minimal value) of travel or expenses for travel (such as transportation, food, lodging, or entertainment) taking place entirely outside of the United States where the provision of such travel or expenses is in accordance with diplomatic custom or treaty and where the Head of the employee's Office grants prior written approval. A spouse or dependent may accept gifts of travel or travel expenses when accompanying the employee, provided this is done with the prior written approval of the Head of the employee's Office. The Head of the employee's Office shall consult with the appropriate General Counsel in connection with granting approval under this paragraph. Travel or expenses for travel may not be accepted merely for the personal benefit, pleasure, enjoyment, or financial enrichment of the individual involved. An appropriate statement shall be filed in accordance with § 1050.301(b) of this Part. When *any portion* of the travel (such as the origination or termination of a flight) is within the United States, it may not be paid for by a foreign government, except as set forth in paragraph (e) of this section.

(e) Pursuant to section 652 of the DOE Organization Act, an employee may accept gifts from the International Atomic Energy Agency or other energy-related international organizations (e.g., the Nuclear Energy Agency and the International Energy Agency) covering transportation expenses to or from a foreign country in connection with scientific or technical assistance projects of such agencies for which the Department of Energy has lead U.S. Government agency responsibility. Such gifts may be accepted only with the prior written approval of the Head of the employee's Office, who is hereby delegated authority to accept such gifts in accordance with section 652.

§ 1050.203 Acceptance of decorations.

(a) An employee may accept, retain and wear a decoration tendered by a foreign government in recognition of active field service in time of combat operations or awarded for other outstanding or unusually meritorious performance.

(b) Acceptance of a decoration in accordance with paragraph (a) of this section shall be reviewed and approved by the Directorate of Administration in accordance with § 1050.204 of this Part. Otherwise, it will be deemed to have been accepted on behalf of the United States, shall become the property of the United States, and shall be deposited, within 60 days of acceptance, with the Directorate of Administration for disposal or official Departmental use as determined by the Directorate of Administration in accordance with § 1050.302 of this Part.

§ 1050.204 Advance approval for acceptance of gifts or decorations.

(a) If an employee is advised that a gift of more than minimal value as described in § 1050.202 (b) or (c) is to be tendered to him or her, the employee shall, if time permits, request the written advice of the Directorate of Administration regarding the appropriateness of accepting or refusing the gift. A request for approval shall be submitted to the Directorate of Administration in writing, stating the nature of the gift and the reasons for which it is being tendered. The Directorate of Administration shall consult with Assistant Secretary for International Affairs and the appropriate General Counsel in connection with advising the employee. If such advice cannot be obtained and refusal of the gift would likely cause offense or embarrassment or otherwise adversely effect the foreign relations of the United States, the gift may be accepted, but the Directorate of Administration shall be informed as soon as possible. In either event, the employee shall proceed as provided in §§ 1050.202 and 1050.301 of this Part.

(b) Where an employee is notified of the intent of a foreign government to award him a decoration for outstanding or unusually meritorious service, approval required under § 1050.203 should be obtained prior to acceptance of the award. A request for approval shall be submitted to the Directorate of Administration in writing, stating the nature of the decoration and the reasons for which it is being awarded. The Directorate of Administration shall consult with the Assistant Secretary for International Affairs and the appropriate General Counsel. If time does not permit the employee to obtain approval for the award of the decoration before its receipt, the employee may accept it, but shall seek such approval immediately thereafter.

Subpart C—Procedures and Enforcement

§ 1050.301 Reports.

(a) Within 60 days of accepting a gift of more than minimal value, other than gifts of travel or travel expenses, which are covered in paragraph (b) below, an employee shall, in addition to depositing a tangible gift (e.g. wearing apparel, liquor, etc.) with the Directorate of Administration in accordance with § 1050.202 of this Part, file with the Directorate of Administration a statement concerning the gift containing the information identified on the sample form set forth in Appendix I. The form set forth in Appendix I must also be filed if the aggregate value of gifts accepted by the recipient from all sources over any period of one year exceeds $250.

(b) Within 30 days after accepting travel or travel expenses in accordance with § 1050.202 of this Part, an employee shall file with the Directorate of Administration a statement concerning the travel containing the information identified on the sample form set forth in Appendix II. Such a statement need not be filed, however, if the travel is in accordance with specific travel arrangements made by the Department in cooperation with the foreign government.

(c) The Directorate of Administration shall:

(1) Maintain the statements filed pursuant to these regulations and make them available for public inspection and copying during regular business hours; and

(2) Not later than January 31 of each year compile and transmit to the Department of State for publication by the Department of State in the **Federal Register** a list of all statements filed pursuant to these regulations during the preceding calendar year.

§ 1050.302 Use or disposal of gifts and decorations accepted on behalf of the United States.

(a) The Directorate of Administration shall accept and maintain custody of all tangible gifts and decorations accepted by employees on behalf of the United States pending their final disposition.

(b) Whenever possible, the gift or decoration shall be returned to the original donor. The Directorate of Administration shall examine the circumstances surrounding its donation, and, in consultation with the Assistant Secretary for International Affairs, assess whether any adverse effect upon the United States foreign relations might result from return of the gift or decoration to the donor. The appropriate officials of the Department of State shall be consulted if the question of an adverse effect arises.

(c) The Directorate of Administration may determine that the gift or decoration may be retained for the official use of the Department, if it can be properly displayed in an area at Headquarters or at a field facility accessible to employees or members of the public or if it is otherwise usable in carrying out the mission of the Department. The Assistant Secretary for International Affairs shall be consulted to determine whether failure to accept the gift or decoration for the official use of the Department will have an adverse effect on the foreign relations of the United States. In no case shall a gift or decoration be accepted for the official use of the Department when the enjoyment and beneficial use of the gift will accrue primarily to the benefit of the donee or any other individual employee. Gifts or decorations that are retained for the official use of the Department shall be handled in accordance with the provisions of paragraph (d) of this section when their official use is ended.

(d) If a gift or decoration is not retained for official use of the Department, or if its official use has ended, the Directorate of Administration shall, within 30 days after its deposit or after its official use has ended—

(1) Report the gift or decoration to the General Services Administration (GSA) for transfer, donation, or other disposal in accordance with the provisions of the Federal Property and Administrative Services Act of 1949 and the Federal Property Management Regulations at 41 CFR 101–49, or

(2) If the gift or decoration is in cash, currency, or monies (except those with possible historic or numismatic value), or is a noncash monetary gift such as a check, money order, bonds, shares of stock, or other negotiable instrument, forward it to the Finance and Accounting Office for deposit with the Department of the Treasury.

(e) The Directorate of Administration shall retain custody of gifts and decorations not returned to the donor or retained for the official use of the Department until GSA directs it concerning their disposition. At the request of GSA, the Directorate of Administration shall arrange for appraisal of specific gifts and decorations.

§ 1050.303 Enforcement.

(a) An employee who violates the provisions of the Act or these regulations may be subject to disciplinary action or civil penalty action as set forth in paragraphs (c) and (d) of this section.

(b) Suspected violations of the Act or these regulations shall be reported promptly to the appropriate General Counsel and the Inspector General.

(c) The Inspector General will be responsible for taking the following actions:

(1) If the results of an investigation by the Inspector General do not provide any support for a determination that a violation of the Act or these regulations has occurred, then no further action shall be taken.

(2) If it is determined that the employee knowingly and through actions within his own control has done any of the following, the matter shall be referred to the Attorney General for appropriate action: (i) solicited or accepted a gift from a foreign government in a manner inconsistent with the provisions of the Act and these regulations; (ii) as the approved recipient of travel expenses failed to follow the procedures set forth in the Act and these regulations; or (iii) failed to deposit or report a gift as required by the Act and these regulations.

(3) If it is determined that the employee failed to deposit a tangible gift with the Directorate of Administration within 60 days, or to account properly for acceptance of travel expenses, or to comply with the requirements of these regulations relating to the disposal of gifts and decorations retained for official use, but that the criteria of knowledge and control specified in paragraph (c)(2) of this section for referral to the Attorney General have not been met, then the matter shall be referred by the Inspector General to appropriate Departmental officials for administrative action.

(d) As set forth in section 7342(h) of title 5, United States Code, the Attorney General may bring a civil action in any district court of the United States against any employee who knowingly solicits or accepts a gift from a foreign government not consented to by the Act, or who fails to deposit or report such gift as required by the Act. The court in which such action is brought may assess a civil penalty against such employee in any amount not to exceed the retail value of the gift improperly solicited or received plus $5,000.

Subpart D—Gifts to Foreign Individuals

§ 1050.401 Prohibition against use of appropriated funds.

No appropriated funds other than funds from the "Emergencies in the Diplomatic and Consular Service" account of the Department of State may be used to purchase any tangible gift of more than $100 value for any foreign individual unless such gift has been approved by the Congress.

FOREIGN GIFTS STATEMENT

(Statement Concerning Gifts
Received from a Foreign Government)

1. Name of Employee		2. Date
3. Division	4. Position	
5. Name of Recipient	6. Relationship to Employee	
7. Description of Gift		
8. Date of Acceptance	9. Value of Gift	
10. Circumstances Justifying Acceptance of the Gift		
11. Foreign Government Donor		
12a. Name of Individual Presenting Gift	12b. Position of Individual Presenting Gift	
13. Do you wish to participate in the sale of this item if it is sold by GSA? ☐ Yes ☐ No		
Signature of Recipient		Date

Statement Concerning Gifts
Received From a Foreign Government

Item 1. This statement is to be filed pursuant to the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342, as amended by Pub. L. 95-105, August 17, 1977) and DOE implementing Regulations at 10 CFR Part 1050. These provisions apply to foreign gifts tendered to or accepted by Federal employees and their spouses and dependents. The name of the employee should always be indicated in item 1; if the employee is the recipient of the gift then items 5 and 6 should be marked N/A-not applicable; if the recipient is a spouse or dependent, then the appropriate information should be included in items 5 and 6.

Item 2. Self explanatory.

Items 3 and 4. The Office or Division and the position of the employee should be indicated here regardless of whether the recipient is the employee or a spouse or dependent.

Items 5 and 6. See above, Item 1.

Item 7. Self explanatory.

Item 8. Self explanatory.

Item 9. Indicate the retail value in the United States at the time of acceptance. If there is any uncertainty as to the value of the gift, it is the recipient's responsibility to make a reasonable effort to determine value. If the value is $100 or under, and if the aggregate value of the gifts accepted by the recipient from all sources over any period of one year does not exceed $250, then the gift may be retained by the recipient and this Statement need not be submitted.

Item 10. Identify in this item whether or not approval to accept the gift was sought or given in advance in accordance with Section 1050.204 of the DOE regulations. Also identify those circumstances supporting a determination that refusal of the gift would likely cause offense or embarrassment or otherwise adversely affect the foreign relations of the United States.

Items 11 and 12. Self explanatory.

Item 13. Though there is no assurance that the item will be sold or if it is sold that it will be feasible for the recipient to participate in the sale, GSA regulations provide for participation by the recipient where feasible.

FOREIGN TRAVEL STATEMENT

(Statement Concerning Acceptance of Travel or Travel Expenses from a Foreign Government)

1. Name of Employee	2. Date
3. Division	4. Position
5. Name of Recipient	6. Relationship to Employee
7a. Description of Transportation Provided: Approximate Value $	7b. Description of Other Travel Expenses Provided: Approximate Value $
8. Date of Acceptance	9. Total Value of Transportation and Expenses Provided $
10. Nature of Employee's Official Business Related to Travel:	
11. Circumstances Justifying Acceptance:	
12. Foreign Government Donor	
13a. Name of Individual Responsible for Payment of Travel or Travel Expenses	13b. Position of Individual Responsible
Signature of Recipient	Date

Statement Concerning Acceptance of Travel or Travel Expenses from a Foreign Government

Item 1. This statement is to be filed pursuant to the provisions of the Foreign Gifts and Decorations Act (5 U.S.C. 7342, as amended by Pub. L. 95-105, August 17, 1977) and DOE implementing regulations at 10 CFR Part 1050. These provisions apply to travel or travel expenses for travel entirely outside of the United States* tendered to or accepted by Federal employees and their spouses and dependents. The name of the employee should always be indicated in item 1; if the employee is the recipient of the travel or travel expenses, then items 5 and 6 should be marked N/A-not applicable; if the recipient is a spouse or dependent, then the appropriate information shall be included in items 5 and 6.

Item 2. Self explanatory.

Items 3 and 4. The Office or Division of the employee should be indicated here regardless of whether the recipient is the employee or a spouse or dependent.

Items 5 and 6. See above item 1.

Item 7a. Indicate the location and mode of transportation and approximate value in U.S. dollars, if possible. Attach itinerary if available.

Item 7b. Indicate nature and location of travel expenses provided and approximate value in U.S. dollars, if possible. Attach itinerary if available.

Item 8. Indicate dates of travel.

Item 9. Self explanatory.

Item 10. Travel and travel expenses may be accepted in accordance with DOE regulations where the travel is official agency business. Spouses and dependents may accept such travel and expenses only when accompanying the employee. Item 10 therefore should be completed to identify the employee's official business whether the recipient is an employee or a spouse or dependent.

Item 11. Identify in this item any treaty or diplomatic custom that related to acceptance of the travel or expenses, and any circumstances indicating that acceptance would be consistent with the interests of the U.S. Also provide information regarding any prior approval of the acceptance.

Items 12, 13a, and 13b. Self explanatory.

---

*The Congress has consented in Pub. L. 95-105 only to acceptance of travel or travel expenses that is entirely outside of the United States. Travel, any portion of which (such as the origination or termination of a flight) is within the United States, may not be paid for by a foreign government. All such travel must be handled within applicable DOE Travel Regulations and Standards of Conduct Regulations.

Department of the Interior

Fish and Wildlife Service

Proposed Framework for Late Season Migratory Bird Hunting Regulations

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 20

Migratory Bird Hunting; Proposed Frameworks for Late Season Migratory Bird Hunting Regulations

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Supplemental proposed rule.

SUMMARY: This document supplements proposed rulemakings published in the Federal Register on February 29 and July 1, 1980, and proposes to establish frameworks, (i.e., the outer limits for dates and times when shooting may occur, hunting areas, and the number of birds which may be taken and possessed) for late season migratory bird hunting regulations for the 1980–81 season. These seasons commence on or after October 1, 1980, and include most of those for waterfowl. The Service annually prescribes hunting regulations frameworks to the States. The effects of this proposed rule are to facilitate the selection of hunting seasons by the States and to further the establishment of the late season migratory bird hunting regulations for the 1980–81 season.

In general, the frameworks for ducks are similar to those in effect last year. The Service proposes to stabilize these regulations as part of a cooperative program with Canada aimed at improving its understanding of factors other than annual hunting regulation changes on duck harvests and population dynamics. Other changes proposed include removal of hunting area closures for redheads, separating limits for canvasbacks and redheads under conventional regulations, zoning changes or additions in several Atlantic and Mississippi Flyway States, including mergansers in the regular duck limit in the Pacific Flyway, and local or regional changes for some goose hunting areas, limits, and seasons.

DATES: The comment period for these proposed late season frameworks will end on August 23, 1980.

ADDRESS: Comments to: Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received on the supplemental proposed late season frameworks will be available for public inspection during normal business hours in Room 525–B, Matomic Building, 1717 H Street, NW., Washington, D.C. Copies of the draft environmental assessment on proposed stabilization of hunting regulations are available from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. The Service's biological opinions resulting from its consultation under Section 7, Endangered Species Act, are available for public inspection in or available from the Office of Endangered Species and the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240.

FOR FURTHER INFORMATION CONTACT: John P. Rogers, Chief, Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240 (202–254–3207).

SUPPLEMENTARY INFORMATION: In the annual process of developing migratory game bird hunting regulations, a distinction is made between "early" and "late" season frameworks. Earl seasons include those which may open before October 1, while late seasons may open no earlier than October 1. Regulations are developed independently for early and late seasons. The early season regulations include mourning doves, white-winged doves, band-tailed pigeons, rails, gallinules, an early duck season in Iowa, woodcock, common snipe, sea ducks in the Atlantic Flyway, teal in September in the Central and Mississippi Flyways, sandhill cranes in North Dakota and South Dakota, doves in the Virgin Islands and Hawaii, all migratory game birds in Puerto Rico and Alaska, and some special falconry seasons. Late seasons include the general waterfowl seasons; special seasons for scaup and goldeneyes; extra scaup and blue-winged teal in regular seasons; most sandhill crane seasons in the Central Flyway; coots, gallinules, and snipe in the Pacific Flyway; and special falconry seasons.

Certain general procedures are followed in developing regulations for both the early and the late seasons. Initial regulatory proposals are first announced in a **Federal Register** document published in late February and opened to public comment. Following termination of the comment period and a public hearing, the Service develops and publishes the proposed frameworks for times of seasons, season lengths, shooting hours, daily bag and possession limits, and other regulatory measures or options. Following another public comment period, and after consideration of additional comments, the Service publishes the final frameworks in the **Federal Register**. Using these frameworks, State conservation agencies then select hunting season dates and options. States may select more restrictive seasons and options than those offered in the Service's frameworks. The final regulations, reflected in amendments to Subpart K of 50 CFR Part 20, then appear in the **Federal Register**, taking effect upon publication.

The regulations schedule for this year is as follows. On February 29, 1980, the Service published for public comment in the **Federal Register** (45 FR 13630) proposals to amend 50 CFR Part 20, with a comment period ending May 16, 1980. All comments received to date were considered. The proposal dealt with establishment of seasons, limits and shooting hours for migratory birds under §§ 20.101 through 20.107 of Subpart K. On June 20, 1980, a public hearing was held in Washington, D.C., to review the status of mourning doves, woodcock, band-tailed pigeons, white-winged doves, and sandhill cranes. The meeting was announced in the **Federal Register** on February 29, 1980 (45 FR 13630). Proposed hunting season frameworks for these species were discussed plus those for common snipe; rails; gallinules; migratory game birds in Alaska, Puerto Rico, and the Virgin Islands; mourning doves in Hawaii; September teal seasons in the Mississippi and Central Flyways; an early duck season in Iowa; special sea duck seasons in the Atlantic Flyway; and falconry seasons. Statements or comments were invited.

On June 27, 1980, the Service published in the **Federal Register** (45 FR 43419) a second document in the series of proposed and final rulemaking documents dealing specifically with final frameworks for the 1980–81 season from which wildlife conservation agency officials in Alaska, Puerto Rico, and the Virgin Islands could select season dates for hunting certain migratory birds in their respective jurisdictions during the 1980–81 season.

On July 1, 1980, the Service published for public comment in the **Federal Register** (45 FR 44540) a third document in the series consisting of proposed frameworks for early season migratory bird hunting regulations and supplemental proposals for late season regulations arising from comments received or from new information. The comment period for proposed early season frameworks ended on July 12, 1980, and for late season proposals will end on August 23, 1980.

On July 22, 1980, the Service published for public comment in the **Federal Register** (45 FR 49061) a fourth document in the series dealing specifically with final frameworks for early season migratory game bird hunting regulations from which State wildlife agency officials selected season dates and daily bag and possesion limits for the 1980–81 season.

On August 4, 1980, the Service delivered to the **Federal Register** a fifth document in the series dealing specifically with amending Subpart K of 50 CFR 20 to set hunting seasons and areas, shooting and hawking hours, and bag and possession limits for species subject to early hunting regulations. These regulations will be published on or about August 15, 1980, and will take effect immediately.

On August 5, 1980, a public hearing was held in Washington, D.C., as announced in the **Federal Register** on February 29, 1980 (45 FR 13630) and July 1, 1980 (45 FR 44540) to review the status of waterfowl. Proposed population and harvest objectives and regulations frameworks were discussed, and statements and comments were solicited and received from the public.

This supplemental proposed rulemaking is the sixth document in the series and contains changes to the original framework proposals published on February 29, 1980, in the **Federal Register**, as supplemented on July 1, 1980. The present supplemental proposals are briefly described and discussed later.

Review of Public Comments and the Service's Response

Comments Received at Public Hearing

Six individuals presented statements at the Public Hearing on the proposed late season regulations. These comments are summarized below, and when appropriate, responded to by the Service. Some comments related to matters other than the proposed annual hunting frameworks, and thus were irrelevant.

Dr. James Timmerman, representing the Atlantic Flyway Council, emphasized the importance of cooperative efforts to manager North American waterfowl on a continental basis; endorsed the Service's proposed stablilzation of duck hunting regulations frameworks; expressed concern about the growing populations of Canada geese, greater snow geese, and whistlng swans in the Atlantic Flyway, and the need for hunting relaxations to stabilize or reduce certain populations; and reiterated the Council's interest in a special 11-day and 4 canvasback daily bag limit season oriented to harvest of drake canvasbacks in portions of the flyway.

Mr. John Newsom, representing The Wildlife Society, strongly supported the Service's proposal to stablilze duck hunting regulations for a five-year period, and recommended that the study of stabilized regulations commence this year despite the anticipated reduced fall flight of ducks.

Mr. Toby Cooper, Defenders of Wildlife (Defenders) urged changes in the regulations process; expressed concern about the use of "average" population levels for defining population objectives; indicated that Defenders would comment later on the proposal to stabilize duck hunting regulations; opposed separate treatment of canvasback and redheads in the regulations because of problems in distinguishing the two species during early morning and late afternoon hunting periods; opposed the hunting of whistling swans in the Atlantic Flyway; and expressed support of the Service's proposal not to establish hunting seasons on brant in the Atlantic Flyway this year.

Mr. John Anderson, National Audubon Society, advocated the simplification of regulations and expressed support for the proposed stabilization of duck hunting regulations. He urged that necessary research be undertaken during the stabilization period so that the results of the study can be properly evaluated.

Dr. Laurence Jahn, Wildlife Management Institute, recommended completion of national waterfowl management plans now being developed in Canada and the United States; supported the idea of an international waterfowl management plan to be developed jointly by the U.S. Fish and Wildlife Service, Canadian Wildlife Service, and Mexican Direccion General de la Fauna Silvestre; urged that the issue of subsistence taking of waterfowl in northern areas be resolved and that such taking be recognized in the management plan; favored stabilization of duck hunting regulations at the 1979–80 level in principle but urged that population objectives be clarified; urged completion of a black duck management plan, and the development of plans leading to the rebuilding of mid-continent mallard populations; and expressed concern about the effects of drought on duck numbers, the unbalanced sex ratios of some waterfowl, and the establishment of conservative regulations for certain Arctic-nesting geese.

Mr. Dale Whitesell, speaking on behalf of Ducks Unlimited, Inc., endorsed the stablilzation of duck hunting regulations, urged the Service to complete its national waterfowl management plan, offered views on the regulations setting process, and described his organization's program in Canada.

Response: In replying to comments on the proposed stabilization of duck hunting regulations, the Service notes that a draft environmental assessment on this subject is available for public review from the Office of Migratory Bird Management, U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Despite the anticipated reduction in the fall flight of ducks, the Service believes it highly desirable to implement the program this year so that U.S. and Canadian cooperative studies would be underway simultaneously. The Service emphasizes that the stabilization of regulations is not expected to result in substantial changes in duck harvests nor adversely affect efforts to meet various population and harvest objectives. Rather, information gathered during the study is expected to provide valuable information on the role of hunting and other forms of mortality on the population dynamics of ducks, and thus contribute to the management of these migratory game birds.

The Service recognizes that populations of Canada geese and whistling swans have increased in the mid-Atlantic States in recent years. However, the most recent evaluation of greater snow goose numbers suggests that the population is stable. Cooperative management plans are being developed for these Canada geese and greater snow geese. The Service believes that regulatory relaxations should be deferred until these plans are completed. The Service has previously explained its position on the hunting of whistling swans in the Atlantic Flyway (see the **Federal Register** dated February 29, 1980, at 45 FR 13638; and July 1, 1980, at 45 FR 44546).

The Service supports, in principle, a special, limited canvasback hunting season directed primarily at the harvest of drakes to be conducted on a trial basis in designated areas of the Atlantic Flyway (see the **Federal Register** dated July 1, 1980, at 45 FR 44543). However, the hunt should be initiated in a year when population levels and production are favorable. Recently completed surveys show that although the number of breeding canvasbacks increased modestly this spring, habitat conditions were such that little production occurred. Consequently, the Service believes that implementation of the proposal should be temporarily delayed, pending a year of good production.

In regard to the difficulty of distinguishing between canvasbacks and redheads in early morning and late afternoon, the Service notes that an environmental assessment on shooting

hours was issued in 1977, and that the subject has been discussed several times in the **Federal Register** (see the **Federal Register** dated March 10, 1977, at 42 FR 13314; and February 29, 1980, at 45 FR 13634). The Service believes that the proposed change will have little effect on the welfare of either species.

Written Comments Received

In the **Federal Register** dated July 1, 1980, (at 45 FR 44542), the Service reported and responded to all public comments which had been received up to that time. These included communications on both the proposed early and late season frameworks. Eighty-nine written comments were received subsequent to that time, and through August 6, 1980. These are summarized and responded to below.

The comments originated from 79 individuals, 7 State conservation agencies, 3 conservation organizations, and 1 waterfowl flyway council. In some instances, the communications do not specifically mention the open comment period or regulatory proposals. However, because they were received or sent during the comment period and generally relate to migratory bird hunting regulations, they are treated as comments.

Sixty-nine of the comments requested that the Service approve a request by the Central Flyway Council that the length of the hunting season be increased by 16 days in the flyway. These letters originated from 68 individuals and 1 organization.

Response. In the **Federal Register** dated July 1, 1980, (at 45 FR 44545), it was stated that the proposal was aimed primarily at increased harvest of mallards. The Service noted that it did not favor any regulatory change which would increase or tend to increase hunting pressure on mallards in the mid-continent area of the United States at this time. This is judged to be inconsistent with present mallard population and harvest goals. The Service stated the view that a balanced program of reasonable harvest opportunity among the four flyways, as developed over the past few years, now exists and that further changes in hunting opportunity should be based on changes in the status of the populations involved. With a decline in the mallard breeding population, severely curtailed production, and prospects for a reduced fall flight in 1980, the Service reaffirms its previously expressed views.

Eighteen comments concerned stabilized duck regulations (season lengths and bag limits). Two States, 2 organizations, and 2 individuals expressed support and twelve individuals, chiefly from the Low Plains area of the Central Flyway, expressed opposition to the proposal. Most of the latter were concerned that regulations stabilization would occur at the 1979 rather than the more liberal level proposed for the Low Plains by the Central Flyway Council.

As noted in the **Federal Register** dated July 1, 1980 (at 45 FR 44546), the Service proposes to implement stabilized duck hunting regulations at the 1979–80 level this season. The Service views stabilized hunting regulations as a means of providing an improved basis for evaluating and better understanding the relationships between hunting regulations, duck harvests, and duck populations. It is believed appropriate to take this action now in order to take advantage of those elements of stability that have already been introduced into the regulations in both Canada and the United States and because the program will be substantially improved if implemented jointly by the United States and Canada.

The Service does not anticipate that implementing the program in a year of below average waterfowl breeding conditions will affect overall duck populations or the ability to attain the population objectives to a significantly greater degree than would be the case with other, more restrictive alternatives.

The Service believes that the level at which it proposes to stabilize the regulations is reasonable in terms of current waterfowl conditions, the amount of hunting opportunity provided across the flyways, and a relatively modest impact on duck populations. The proposal is described in more detail in a draft environmental assessment that is available on request.

The remaining requests concerned a wide array of regulations, including local or regional changes in goose regulations, a variety of hunting proposals for Michigan, Sunday hunting in certain Atlantic Flyway States, and boundary changes in special management areas.

Response. Disposition of rejected proposals has been previously discussed. Accepted proposals are included in the accompanying frameworks.

Public Comment Invited

Based on the results of migratory game bird studies now underway and having due consideration for any data or views submitted by interested parties, the amendments resulting from these supplemental proposals will specify open seasons, hours, areas, and bag and possession limits for waterfowl, coots, and gallinules; sandhill cranes in portions of the Central Flyway; and snipe in the Pacific Flyway.

The Director intends that finally adopted rules be as responsive as possible to all concerned interests. He therefore desires to obtain the comments and suggestions of the public, other concerned governmental agencies, and private interests on these proposals and will take into consideration the comments received. Such comments, and any additional information received, may lead the Director to adopt final regulations differing from these proposals.

Special circumstances are involved in the establishment of these regulations which limit the amount of time which the Service can allow for public comment. Specifically, two considerations compress the time in which the rulemaking process must operate: the need to establish final rules at a point early enough in the summer to allow affected State agencies to appropriately adjust their licensing and regulatory mechanisms, and the unavailability before late July of specific, reliable data on year's status of waterfowl. Therefore, the Service believes that to allow a comment period past August 23, 1980, is contrary to the public interests.

Comment Procedure

It is the policy of the Department of the Interior, whenever practicable, to afford the public an opportunity to participate in the rulemaking process. Accordingly, interested persons may participate in this rulemaking process by submitting written comments to the Director (FWS/MBMO), U.S. Fish and Wildlife Service, Department of the Interior, Washington, D.C. 20240. Comments received will be available for public inspection during normal business hours at the Service's office in Room 525–B in the Matomic Building, 1717 H Street, NW., Washington, D.C. 20240.

All relevant comments received on the late season proposals no later than August 23, 1980, will be considered. The Service will attempt to acknowledge received comments, but substantive response to individual comments may not be provided.

NEPA Consideration

The "Final Environmental Statement for the Issuance of Annual Regulations Permitting the Sport Hunting of Migratory Birds (FES 75–54)" was filed with the Council on Environmental Quality on June 6, 1975, and notice of availability was published in the **Federal Register** on June 13, 1975 (40 FR 25241). In addition, several environmental assessments have been prepared on specific matters which serve to supplement the material in the Final Environmental Statement. Copies of these documents are available from the Service.

Endangered Species Act Consideration

Section 7 of the Endangered Species Act provides that, "The Secretary shall review other programs administered by him and utilize such programs in furtherance of the purposes of this Act," and "by taking such action necessary to insure that any action authorized, funded, or carried out * * * is not likely to jeopardize the continued existence of such endangered or threatened species or result in the destruction or modification of habitat of such species * * * which is determined to be critical."

Consequently, the Service reviewed all regulations frameworks being contemplated this year for outside dates, season lengths, hours, areas, and limits within which States may select regulations subject to early seasons. As a result of intra-Service Section 7 consultation, Acting Associate Director Harold J. O'Connor stated in a biological opinion dated July 14, 1980, "that your action, as proposed, is not likely to jeopardize the continued existence of the above listed species [Aleutian Canada goose, Everglade kite, bald eagle, American peregrine falcon, Arctic peregrine falcon, and whooping crane] and is not likely to result in the destruction or adverse modification of any designated Critical Habitat."

The proposed late season regulatory frameworks were likewise subjected to careful study to insure that they complied with Section 7 of the Endangered Species Act. Special attention was again given the Aleutian Canada goose (*Branta canadensis leucopareia*), Everglade kite (*Rostrhamus socialbilis plumbeus*), bald eagle (*Haliaeetus leucocephalus*), American peregrine falcon (*Falco peregrinus anatum*), Arctic peregrine falcon (*Falco peregrinus tundrius*), and whooping crane (*Grus americanus*) and designated Critical Habitat for the Everglade kite, American peregrine falcon, and whooping crane. As a result of intra-Service Section 7 consultation, Acting Associate Director Harold J. O'Connor stated in a biological opinion dated July 14, 1980, "that your action, as proposed, is not likely to jeopardize the continued existence of the above listed species and is not likely to result in the destruction or adverse modification of any Critical Habitat."

As in the past, hunting regulations this year are designed, among other things, to remove or alleviate chances of conflict between seasons for migratory game birds and the protection and conservation of endangered and threatened species and their habitats. Examples of such consideration include areas closed to dove and pigeon hunting for protection of the Puerto Rican plain pigeon and the Puerto Rican parrot, both of which are classified as endangered. Also, areas in Alaska and California are closed to Canada goose hunting for protection of the endangered Aleutian Canada goose.

The Service's biological opinions resulting from its consultation under Section 7 are considered public documents and are available for public inspection in the Office of Endangered Species and the Office of Migratory Bird Management, Department of the Interior.

Nontoxic Shot Regulations

On February 11, 1980, the Service published in the **Federal Register** (45 FR 9028) proposed rules describing nontoxic shot zones for waterfowl hunting seasons commencing in 1980. When eaten by waterfowl, spent lead pellets have a toxic effect. The nontoxic shot zones will reduce the number of deaths to waterfowl by reducing the availability of lead pellets in waterfowl feeding areas. The final regulations were published in the **Federal Register** on June 5, 1980 (45 FR 37847) under § 20.108 of 50 CFR and will also be summarized in waterfowl regulations leaflets to be published late this summer.

In 1980, shotshells loaded with toxic shot will not be permitted for waterfowl hunting in designated nontoxic shot zones (44 FR 2597). This regulation related only to 12-gauge shotshells in previous years but applies to all gauges of shotshells after August 31, 1980.

Authorship

The primary author of this proposed rule is Henry M. Reeves, Office of Migratory Bird Management, working under the direction of John P. Rogers, Chief.

Exemption from Executive Order 12044 and 43 CFR Part 14

As discussed in the **Federal Register** dated February 29, 1980 (45 FR 13630) the Assistant Secretary for Fish and Wildlife and Parks has concluded that the ever decreasing time frames in the regulatory process are mandated by the statutory requirements under Section 704 of the Migratory Bird Treaty Act and the Administrative Procedure Act. The regulatory process simply has no remaining flexibility in its timetable between the accumulation of critical summer survey data and the publication of the revised sets of proposed ruelmakings. Compliance with the procedures for the development of significant rules and the preparation of a regulatory analysis established under Executive Order 12044 would simply not be possible if the fall hunting season deadlines were to be achieved. Consequently, although the rules establishing the annual migratory bird hunting regulations are significant, the Assistant Secretary for Fish and Wildlife and Parks has approved the exemption of these regulations from the procedures of Executive Order 12044 and 43 CFR Part 14 which is provided for in § 14.3(f).

Proposed Regulations Frameworks for 1980–81 Late Hunting Seasons on Certain Migratory Game Birds

Pursuant to the Migratory Bird Treaty Act, the Secretary of the Interior has approved proposed frameworks for season lengths, shooting hours, bag and possession limits, and outside dates within which States may select seasons for hunting waterfowl, coots, and gallinules; cranes in parts of New Mexico, Texas, Colorado, Oklahoma, Montana, and Wyoming; and common snipe in the Pacific Flyway. Frameworks are summarized below. States may be more restrictive in selecting season regulations, but may not exceed the framework provisions.

General

States in the Pacific, Central and Mississippi Flyways may split their season for ducks or geese into two segments of equal or unequal lengths. States in the Atlantic Flyway may, in lieu of zoning, split their season for ducks or geese into two or three segments of equal or unequal lengths. Exceptions are noted in appropriate sections.

Shooting hours in all States, on all species, and for all seasons are ½ hour before sunrise until sunset.

States in Mississippi and Central Flyways selecting neither a September teal season nor the point system may slect an extra daily bag and possession limit of 2 and 4 blue-winged teal, respectively, for 9 consecutive days designated during the regular duck season. These extra limits are in addition to the regular duck bag and possession limits.

States in the Atlantic Flyway not selecting the point system may select an extra teal limit for 9 consecutive days during the regular duck season of no more than 2 blue-winged teal or 2 green-winged teal or 1 of each daily and no more than 4 singly or in the aggregate in possession.

V 45 A G 13 80 UMI

States in the Altantic, Mississippi and Central Flyways may select a special scaup-only hunting season not to exceed 16 consecutive days, and daily bag and possession limits of 5 and 10 scaup, respectively, subject to the following conditions:

1. The season must fall between October 1, 1980, and January 31, 1981, all dates inclusive.

2. The season must fall outside the open season for any other ducks expect sea ducks.

3. The season must be limited to areas mutually agreed upon between the State and the Service prior to September 1, 1980.

4. These areas must be described and delineated in State hunting regulations.

or

As an alternative, states in the Atlantic, Mississippi, and central Flyways, except those selecting a point system, may select an extra daily bag and possession limit of 2 and 4 scaup, respectively, during the regular duck hunting season, subject to conditions 3 and 4 listed above. These extra limits are in addition to the regular duck limits and apply during the entire regular duck season.

Selection of the point system for any State entirely within a flyway must be on a statewide basis, *except* if New York selects that point system, conventional regulations may be retained for the Long Island Area. New York may not select the point system within the Upstate zoning option, and Maine, Massachusetts, Connecticut, Pennsylvania, West Virginia and North Carolina may not select the point system pending completion of zoning studies.

States that did not select their rail, woodcock, snipe, gallinule, and sea duck seasons in July should do so at the time they make their waterfowl selections.

Frameworks for open seasons and season lengths, bag and possession limit options, and other special provisions are listed below by Flyway.

Atlantic Flyway

Between October 1, 1980, and January 20, 1981, States in this Flyway may select open seasons on ducks, coots, and mergansers of: (a) 50 days, with basic daily bag and possession limits of 4 and 8 ducks, respectively, of which no more than 2 in the daily bag and 4 in possession may be black ducks; or (b) 50 days, with basic daily bag and possession limits of 5 and 10 ducks, respectively, of which no more than 1 in the daily bag and 2 in possession may be black ducks.

Except in closed areas, the limit on canvasbacks is 1 canvasback daily and 1 in possession. The limit on redheads throughout the flyway is 2 daily, except that in areas open to canvasback harvest the daily bag limit is 2 redheads, or 1 redhead and 1 canvasback. The possession limit on redheads is twice the daily bag limit under conventional regulations. The canvasback possession limit is equal to the daily bag limit. Under the point system, canvasback (except in closed areas) count 100 points each and redheads flywaywide count 70 points each. Areas closed to canvasback hunting are:

New York—Upper Niagara River between the Peace Bridge at Buffalo, New York, and the Niagara Falls. All waters of Lake Cayuga.

New Jersey—Those portions of Monmouth County and Ocean County lying east of the Garden State Parkway.

Maryland, Virginia and North Carolina—Those portions of each State lying east of U.S. Highway 1.

Under conventional and point system options, the daily bag and possession limits may not include more than 2 and 4 wood ducks, respectively, except that Virginia, North Carolina, South Carolina, Georgia and Florida may split their regular hunting season so that a hunting season not to exceed 9 consecutive days occurs between October 1 and October 15. During this period under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the flyway in 1980 shall apply to wood ducks. Under the point system, wood ducks shall be 25 points. For other ducks, daily bag and possession limits shall be the same as established for the flyway under conventional or point system regulations. For those States using conventional regulations, the 9 consecutive days extra teal option may be selected concurrent with the early wood duck season option. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits of coots are 15 and 30, respectively.

The Lake Champlain Area of New York must follow the waterfowl seasons, daily bag and possession limits, and shooting hours selected by Vermont. This area includes that part of New York lying east and north of a boundary running south from the Canadian border along U.S. Highway 9 to New York Route 22 south of Keeseville, along New York Route 22 to South Bay, along and around the shoreline of South Bay to New York Route 22, along New York Route 22 to U.S. Highway 4 at Whitehall, and along U.S. Highway 4 to the Vermont border.

In lieu of a special scaup season, Vermont may, for the Lake Champlain Area, select a special scaup and goldeneye season not to exceed 16 consecutive days, with a daily bag limit of 3 scaup or 3 goldeneyes or 3 in the aggregate and a possession limit of 6 scaup or 6 goldeneyes or 6 in the aggregate, subject to the same provisions that apply to the special scaup season elsewhere.

New York may, for Long Island, select season dates and daily bag and possession limits which differ from those in the remainder of the State.

Upstate New York (excluding the Lake Champlain area) may be divided into three zones (West, North, South) on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Option (a) or (b) for seasons and bag limits is applicable to the zones in the Upstate area within the Flyway framework; only conventional regulations may be selected. Each zone will be permitted the full number of days offered under option (a) or (b). In addition, a 2-segment split season without penalty may be selected in each zone. The basic daily bag limit on ducks in each zone and the restrictions applicable to option (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus bird options shall be applicable to the Upstate zones, but the 16-day special scaup season will not be allowed.

The zones are defined as follows:

The West Zone is that portion of Upstate New York lying west of a line commencing at the north shore of the Salmon River and its junction with Lake Ontario and extending easterly along the north shore of the Salmon River to its intersection with Interstate Highway 81, then southerly along Interstate Highway 81 to the Pennsylvania border.

The North and South Zones are bordered on the west by the boundary described above and are separated from each other as follows:

Starting at the intersection of Interstate Highway 81 and New York Route 49 and extending easterly along Route 49 to its junction with Route 8 in Utica, then southerly along Route 8 to its intersection with U.S. Highway 20 in Bridgewater, then easterly along U.S. Highway 20 to the Massachusetts border.

Maine may implement its current zoned season program on an operational basis. Massachusetts, Connecticut, West Virginia, and North Carolina each may be divided into two zones on an experimental basis for the purpose of setting separate duck, coot and merganser seasons. Pennsylvania and New Jersey each may be divided into three zones for the same purpose. Option (a) or (b) for seasons and bag limits is applicable to the zones within the Flyway framework; only conventional regulations may be selected in Maine, Massachusetts, Connecticut, West Virginia and North Carolina. New Jersey must select the point system. Each zone will be permitted the full number of days offered under option (a) or (b). In addition, a two-segment split season without penalty may be selected. The basic daily bag limit on ducks in each zone and the restrictions applicable to options (a) and (b) of the regular season for the Flyway also apply. Teal and scaup bonus bird options, and the 16-day special scaup season shall be allowed.

The zones are defined as follows:

Maine

North Zone—Game Management Zones 1, 2 and 3.

South Zone—Game Management Zones 4 through 8.

Massachusetts

Coastal Zone—Beginning at the New Hampshire-Massachusetts border, that portion of the State east and south of a boundary formed by Interstate 95, south to U.S. Route 1, south to Interstate 93, south to Route 3, south to U.S. Route 6, southwest to Route 28, northwest to Interstate 195, and west to the Rhode Island line.

Inland Zone—That portion of the State west and north of the above boundary.

Connecticut

North Zone—That portion of the State north of Interstate 95.

South Zone—That portion of the State south of Interstate 95.

Pennsylvania

Lake Erie Zone—The Lake Erie waters of Pennsylvania and a shoreline margin along Lake Erie from New York on the east to Ohio on the west extending 150 yards inland, but including all of Presque Isle peninsula.

North Zone—That portion of the State north of I–80 from the New Jersey State line west to the junction of State Route 147, then north on State Route 147 to the junction of Route 220, then west and/or south on Route 220 to the junction of I–80, then west on I–80 to its junction with the Allegheny River, and then north along the Allegheny River to the New York border. The Allegheny River is included in the North Zone.

South Zone—The remaining portion of the State.

New Jersey

North Zone—That portion of New Jersey west of the Garden State Parkway and north of a line starting at the Garden State Parkway and running west along Route 70 to the junction of Route 38, then west along Route 38 and Route 30.

South Zone—That portion of New Jersey west of the Garden State Parkway and south of a line starting at the Garden State Parkway and running west along Route 70 to the junction of Route 38, then west along Route 38 and Route 30.

Coastal Zone—That portion of New Jersey lying east of the Garden State Parkway from the New York State line to the Cape May Canal.

West Virginia

Allegheny Mountain Upland Zone (contained with the circumscribed boundaries below).

The north boundary is the State line adjacent to Pennsylvania and Maryland. The eastern boundary extends south along U.S. Route 220 through Keyser, West Virginia, to the intersection of U.S. Route 50, and follows U.S. Route 50 to the intersection with State Route 93. The boundary follows State Route 93 south to the intersection with State Route 42 and continues south on State Route 42 to Petersburg. At Petersburg, the boundary follows State Route 28 south to Huntersville, and then follows State Route 92 west to U.S. Route 219 and follows 219 south to the intersection of Interstate 64. The southern boundary follows I–64 west to the intersection with U.S. Route 60, and follows Route 60 west to the intersection of U.S. Route 19. The western boundary follows Route 19 north to the intersection of I–79, and follows I–79 north to the Pennsylvania State line.

Remainder of the State—That portion outside the above boundaries.

North Carolina

East Zone—That portion of the State east of U.S. Highway 1.

West Zone—That portion of the State west of U.S. Highway 1.

As an alternative to conventional bag limits for ducks, a 50-day season with a point-system bag limit may be selected by States in the Atlantic Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: in Florida only, the fulvous tree duck counts 100 points each; in all States the canvasback counts 100 points each (except in closed areas); the female mallard, black duck, mottled duck, wood duck (except in Virginia, North Carolina, South Carolina, Georgia and Florida during the early wood duck season option), redhead and hooded merganser count 70 points each; the blue-winged teal, green-winged teal, pintail, gadwall, wigeon, shoveler, scaup, sea ducks, and mergansers (except hooded) count 10 points each; the male mallard, the wood duck during the early wood duck season option in Virginia, North Carolina, South Carolina, Georgia and Florida, and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

In any State in the Atlantic Flyway selecting both point-system regulations and a special sea duck season, sea ducks count 10 points each during the point-system season, but during any part of the regular sea duck season falling outside the point-system season, regular sea duck daily bag and possession limits of 7 and 14, respectivley, apply.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Between October 1, 1980, and January 20, 1981, Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, Pennsylvania, West Virginia, Maryland, and Virginia (excluding those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate 64 and U.S. Highway 17) may select 70-day seasons on Canada geese; the daily bag and possession limits are 3 and 6 geese, respectively. However, in the area comprised of New Jersey, Delaware, the Delmarva Peninsula portions of Maryland and Virginia, and that portion of Pennsylvania lying east and south of a boundary beginning at Interstate Highway 83 at the Maryland border and extending north to Harrisburg, then east on U.S. Highway 22 to the New Jersey border, the Canada goose season length will be 90 days with the closing framework date extended to January 31, 1981. The dialy bag limit within this area will be 4 birds with a possession limit of 8 birds. North Carolina and those portions of the cities of Virginia Beach and Chesapeake lying east of Interstate

64 and U.S. Highway 17 in Virginia may select 50-day seasons on Canada geese within the October 1, 1980, to January 20, 1981, framework; the daily bag and possession limits are 2 and 4 Canada geese, respectively. South Carolina may select a 50-day season on Canada geese within the October 1, 1980, to January 20, 1981, framework; the daily bag and possession limits are 1 and 2 Canada geese, respectively.

The season is closed on Canada geese in Florida and Georgia.

Between October 1, 1980, and January 31, 1981, States in the Atlantic Flyway may select 70-day seasons on snow geese (including blue geese); the daily bag and possession limits are 4 and 8 geese, respectively.

The season is closed on Atlantic brant.

Mississipppi Flyway

Between October 4, 1980, and January 20, 1981, States in this Flyway may select concurrent 50-day seasons on ducks, coots, and mergansers, except that in Iowa the framework opening date is September 20 and in Mississippi the framework closing date is January 31. The daily bag limit for ducks is 5, and may include no more than 3 mallards, no more than 2 of which may be female mallards, 1 black duck, and 2 wood ducks (except as noted below). The possession limit is 10, including no more than 6 mallards, no more than 4 of which may be female mallards, 2 black ducks, and 4 wood ducks (except as noted below).

Except in closed areas, the conventional limit on canvasbacks and redheads is 1 daily and 2 in possession for each species. Under the point system, canvasbacks count 100 points each (except in closed areas) and redheads count 70 points each. Areas closed to canvasback hunting are:

Mississippi River—Entire river, both sides, from Alton Dam upstream to Prescott, Wisconsin, at confluence of St. Croix River.

Alabama—Baldwin and Mobile Counties.

Louisiana—Caddo, St. Charles, and St. Mary Parishes; that portion of Ward 1 formerly designated as Ward 6 of St. Martin Parish; and Catahoula Lake in LaSalle and Rapides Parishes.

Michigan—Arenac, Bay, Huron, Macomb, Monroe, St. Clair, Tuscola, and Wayne Counties, and those adjacent waters of Saginaw Bay south of a line extending from Point au Gres in Sec. 6, T18N, R7E (Arenac County) to Sand Point in Sec. 11, T17N, R9E (Huron County), the St. Clair River, Lake St. Clair, the Detroit River and Lake Erie, under jurisdiction of the State of Michigan.

Minnesota—Douglas, Mahnomen, Polk, Pope and Sibley Counties. Where the county line of any of the above counties crosses any portion of a lake, that entire lake is closed. In addition, all land in Sec. 13, T130N, R31W (i.e., land between Lake Christina and Pelican Lake) is closed.

Ohio—Land and water areas comprising Erie, Ottawa and Sandusky Counties.

Tennessee—Kentucky Lake lying north of Interstate Highway 40.

Wisconsin—In the Mississippi River Zone, all that part of Wisconsin west of the Burlington-Northern Railroad in Grant, Crawford, Vernon, LaCrosse, Trempealeau, Buffalo, Pepin and Pierce Counties. Also, the following lakes and waters, including a strip of land 100 yards wide adjacent to the shorelines thereof: Lake Poygan in Winnebago and Waushara Counties and Lakes Winneconne and Butte des Morts, including the connecting waters thereof, in Winnebago County.

The daily bag limit on mergansers is 5, only 1 of which may be a hooded merganser. The possession limit is 10, only 2 of which may be hooded mergansers.

The daily bag and possession limits on coots are 15 and 30, respectively.

As an alternative to conventional bag limits for ducks, a 50-day season with point-system bag and possession limits may be selected by States in the Mississippi Flyway during the framework dates prescribed. Point values for species and sexes taken are as follows: except in closed areas, the canvasback counts 100 points; the redhead, female mallard, wood duck (except as noted below), black duck and hooded merganser count 70 points each; the pintail, blue-winged teal, cinnamon teal, wigeon, gadwall, shoveler, scaup, green-winged teal and mergansers (except hooded merganser) count 10 points each; the male mallard and all other species of ducks count 25 points each. The daily bag limit is reached when the point value of the last bird taken, added to the sum of the point values of the other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Kentucky, Arkansas, Tennessee, Louisiana, Mississippi and Alabama may split their regular duck hunting seasons in such a way that a hunting season not to exceed 9 consecutive days may occur between October 4 and October 15. During this period, under conventional regulations, no special restrictions within the regular daily bag and possession limits established for the Flyway shall apply to wood ducks, and under the point system, the point value for wood ducks shall be 25 points. For other species of ducks, daily bag and possession limits shall be the same as established for the Flyway under conventional or point system regulations. In addition, the extra blue-winged teal option available to States in this Flyway that select conventional regulations and do not have a September teal season may be selected during this period. This exception to the daily bag and possession limits for wood ducks shall not apply to that portion of the duck hunting season that occurs after October 15.

In that portion of Louisiana west of a boundary beginning at the Arkansas-Louisiana border on Louisiana Highway 3; then south along Louisiana Highway 3 to Shreveport; then east along Interstate 20 to Minden; then south along Louisiana Highway 7 to Ringgold; then east along Louisiana Highway 4 to Jonesboro; then south along U.S. Highway 167 to Lafayette; then southeast along U.S. Highway 90 to Houma; then south along the Houma Navigation Channel to the Gulf of Mexico through Cat Island Pass—the season on ducks, coots and mergansers may extend 5 additional days, provided that the season opens on November 1, 1980. If the 5-day extension is selected, and if point-system regulations are selected for the State, point values will be the same as for the rest of the State.

The waterfowl seasons, limits, and shooting hours in the Pymatuning Reservoir area of Ohio will be the same as those selected by Pennsylvania. The area includes Pymatuning Reservoir and that part of Ohio bounded on the north by County Road 306 known as Woodward Road, on the west by Pymatuning Lake Road, and on the south by U.S. Highway 322.

Michigan, Illinois, Indiana, Ohio, Missouri, Alabama and Tennessee may select hunting seasons on ducks, coots and mergansers by zones described as follows:

Michigan

North Zone—State Management Zones I and II.

South Zone—State Management Zone III.

Michigan may split its season in the South Zone into two segments.

Illinois

North Zone—That portion of the State north of a line running east from the Iowa border along U.S. Highway 34 to I–74, north along I–74 to I–80, then east along I–80 to the Indiana border.

Central Zone—That portion of the State between the North and South Zone boundaries.

South Zone—That portion of the State south of a line running east from the Missouri border along Illinois Highway 150 to Illinois Highway 4, north along Illinois Highway 4 to Illinois Highway 15, east along Illinois Highway 15 to I–57, north along I–57 to I–70, then east along I–70 to the Indiana border.

Indiana

North Zone—That portion of Indiana north of a line running east from the Illinois border along U.S. Highway 24 to U.S. Highway 41, north along U.S. Highway 41 to State Highway 16, east along State Highway 16 to State Highway 5, southeast along State Highway 5 to Huntington, then east along U.S. Highway 224 to the Ohio border.

South Zone—The remainder of Indiana.

Ohio

North Zone—The counties of Darke, Miami, Clark, Champaign, Union, Delaware, Licking, Muskingum, Guernsey, Harrison and Jefferson and all counties north thereof. In addition, the North Zone also includes that portion of the Buckeye Lake area in Fairfield and Perry Counties bounded on the west by State Highway 37, on the south by State Highway 204, and on the east by State Highway 13.

South Zone—The remainder of Ohio.

Ohio may split its season in each zone into two segments.

Missouri

North Zone—That portion of Missouri north of a line running east from the Kansas border along U.S. Highway 54 to U.S. Highway 65, south along U.S. Highway 65 to State Highway 32, east along State Highway 32 to State Highway 72, east along State Highway 72 to State Highway 34, then east along State Highway 34 to the Illinois border.

South Zone—The remainder of Missouri.

Missouri may split its season in each zone into two segments.

Alabama

South Zone—Mobile and Baldwin Counties.

North Zone—The remainder of Alabama.

Tennessee

Reelfoot Zone—Lake and Obion Counties, or a designated portion of that area.

State Zone—The remainder of Tennessee.

Within each State: (1) The same bag limit option must be selected for both zones; and (2) if a special scaup season is selected for a zone, it shall not begin until after the regular season closing date in that zone.

The waterfowl seasons, limits, and shooting hours in the lower St. Francis River area of Arkansas and Missouri shall be the same as those selected by Missouri. The area is defined as that part of the St. Francis River south of U.S. Highway 62 that is the boundary between Arkansas and Missouri and all sloughs and chutes (but not tributaries) connected to it.

Between October 4, 1980, and January 20, 1981, States in this Flyway, except Louisiana, may select 70-day seasons on geese (except as noted below for Michigan), with a daily bag limit of 5 geese, to include no more than 2 white-fronted geese. The possession limit is 10 geese, to include no more than 4 white-fronted geese. Regulations for Canada geese are shown below by State.

Between October 4, 1980, and February 14, 1981, Louisiana may select 70-day seasons on snow (including blue) and white-fronted geese by zones established for duck hunting seasons, with daily bag and possession limits as described in the above paragraph.

The season on Canada geese is closed in Arkansas and Louisiana.

In Minnesota, in the:

(a) Lac Qui Parle Zone (described in State regulations)—the season on Canada geese closes after 50 days or when 5,500 birds have been harvested, whichever occurs first. The daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

(b) Southeastern Zone (described in State regulations)—the season for Canada geese may extend for 70 consecutive days. The daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

(c) Remainder of the State—the season on Canada geese will be concurrent with the duck season. The daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

In Iowa, the season for Canada geese may extend for 70 consecutive days. The daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

In Missouri, in the:

(a) Swan Lake Zone (described in State regulations)—The season on Canada geese closes after 70 days or when 20,000 birds have been harvested, whichever occurs first. Through November 23, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese. After November 23, the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

(b) Southeastern Area (east of U.S. Highway 67 and south of Crystal City)—State may select a 50-day season on Canada geese between December 1, 1980, and January 20, 1981, with a daily bag limit of 2 Canada geese and a possession limit of 4 Canada geese.

(c) Remainder of the State—The season on Canada geese will be concurrent with the duck season in the respective duck hunting zones. The daily bag limit is 2 Canada geese, and the possession limit is 4 Canada geese.

In Wisconsin, the harvest of Canada geese is limited to 30,000. In the Horicon Zone, during the first hunting period, the daily bag and possession limits are 1 Canada goose; thereafter, the daily bag and possession limits are 2 Canada geese. In the Central Zone, the daily bag and possession limits are 2 Canada geese. Elsewhere in Wisconsin, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese. In the Horicon Zone and the Central Zone, Canada goose hunting is restricted to those persons holding valid Canada goose hunting permits issued by the State. The Horicon Zone is defined as those portions of the counties of Fond du Lac, Green Lake, Washington and Dodge enclosed by a line beginning at the intersection of State Highway 175 and State Highway 23 in Fond du Lac County, then southerly on State Highway 175 to its intersection with State Highway 33, then westerly on State Highway 33 to the city of Beaver Dam, then northerly on State Highway 33 to its intersection with County Highway A, then northerly on County Highway A to its intersection with County Highway S, then easterly on County Highway S and continuing easterly on County Highway AS to it intersection with County Highway E, then northerly on County Highway E to its intersection with State Highway 23, then easterly on State Highway 23 to the point of beginning.

The Central Zone is defined as those portions of Fond du Lac, Winnebago, Green Lake, Marquette, Columbia and Dodge Counties enclosed by a line beginning in Winnebago County at the intersection of State Highway 21 and U.S. Highway 45, then southerly on U.S. Highway 45 to its intersection with State Highway 175, then southerly on State Highway 175 to its intersection with State Highway 23, then westerly on

V 45 A G 13 80 UMI

State Highway 23 to its intersection with County Highway E, then southerly on County Highway E to its intersection with County Highway AS, then westerly on County Highway AS and continuing westerly on County Highway S to its intersection with County Highway A, then southerly on County Highway A to its intersection with State Highway 33, then southeasterly on State Highway 33 to its intersection with U.S. Highway151, then southwesterly on U.S. Highway 151 to its intersection with State Highway 73, then northerly on State Highway 73 to its intersection with State Highway 33, then westerly on State Highway 33 to its intersection with State Highway 22, then northerly on State Highway 22 to its intersection with State Highway 23, then northeasterly on State Highway 23 to its intersection with State Highway 49, then northerly on State Highway 49 to its intersection with State Highway 116, then easterly on State Highway 116 to State Highway 21, then easterly on State Highway 21 to the point of beginning.

In Illinois, 70-day seasons on geese may be selected by zones established for duck hunting seasons, except that in the South Zone the season will close December 31. The harvest of Canada geese is limited to 33,000, with 27,000 birds allocated to the Southern Illinois Zone (described in State regulations). The daily bag limit is 2 Canada geese and the possession is 4 Canada geese. The season on Canada geese in the Southern Illinois Zone will open November 3 and extend through December 31, 1980, or until the Zone's quota of 27,000 birds is reached, whichever occurs first.

In Michigan, in the:

(a) Counties of Baraga, Dickinson, Delta, Gogebic, Houghton, Iron, Keweenaw, Marquette, Menominee and Ontonagon—The daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

(b) Southeastern Canada Goose Management Area (described in State regulations)—The Canada goose season may extend for 107 days within the flyway framework dates. Through November 14, the daily bag limit will be 1 Canada goose and the possession limit will be 2 Canada geese. From November 15 through November 30, the daily bag limit will be 2 Canada geese and the possession limit will be 4 Canada geese. For the remainder of the season, the daily bag limit will be 3 Canada geese and the possesion limit will be 6 Canada geese.

(c) Remainder of the State—The daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese.

In Ohio, the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese, except that in the counties of Ashtabula, Trumbull, Marion, Wyandot, Lucas, Ottawa, Erie, Sandusky, Mercer and Auglaize, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese.

In Indiana, the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

In Kentucky, the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

In Tennessee, the daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese, except in that portion of the State west of State Highway 13, where the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese. The season on Canada geese is closed in that portion of Tennessee bounded on the north by State Highways 20 and 104, and on the east by U.S. Highways 45W and 45.

In Mississippi, in the Sardis Reservoir Area (that area encompassed by Interstate Highway 55 on the west, State Highway 7 on the east, State Highway 310 on the north and State Highway 6 on the south), the season on Canada geese will be November 15 through December 14, 1980. The daily bag limit is 1 Canada goose and the possession limit is 2 Canada geese. In the remainder of the State, the season on Canada geese is closed.

In Alabama, the season is closed on all geese in the counties of Henry, Russell and Barbour. Elsewhere in Alabama, the daily bag limit is 2 Canada geese and the possession limit is 4 Canada geese.

When it has been determined that the quota of Canada geese allotted to the Southern Illinois Zone and the Swan Lake Zone of Missouri will have been filled, the season for taking Canada geese in the respective area will be closed by the Director upon giving public notice through local information media at least 48 hours in advance of the time and date of closing.

Geese taken in Illinois and Missouri and in the Kentucky counties of Ballard, Hickman, Fulton, and Carlisle may not be transported, shipped or delivered for transportation or shipment by common carrier, the Postal Service, or by any person except as the personal baggage of the hunter taking the birds.

Central Flyway

Seasons on ducks (including mergansers) and coots may be selected between October 4, 1980, and January 18, 1981, inclusive, in Central Flyway States and portions of States.

The basic season may include no more than 60 days. Conventional limits on ducks (including mergansers), singly or in the aggregate, are 5 daily and 10 in possession. The aggregate daily bag limit on ducks (including mergansers) may include no more than 1 canvasback (note areas closed to canvasback hunting), 1 redhead, 1 female mallard, 1 hooded merganser, and 2 wood ducks. The possession limit may include no more than 1 canvasback (note areas closed to canvasback hunting), 2 redheads, 2 female mallards, 2 hooded mergansers, and 4 wood ducks. The daily bag and possession limits on coots are 15 and 30, respectively.

The areas closed to canvasback hunting are:

North Dakota—That portion lying east of State Highway 3, including all or portions of 27 counties.

South Dakota—All of Marshall County; that portion of Day County east of State Highway 25; that portion of Codington County south of State Highway 20 and west of U.S. Highway 81; that portion of Hamlin County west of U.S. Highway 81; and that portion of Kingsbury County east of State Highway 25 and north of U.S. Highway 14.

As an alternative to conventional bag and possession limits for ducks, point-system regulations may be selected for States and portions of States in this Flyway. The point system season length in the High Plains Mallard Management Unit is 83 days provided that the last 23 days of such season must begin on or after December 13, 1980. The High Plains Unit, roughly defined as that portion of the Central Flyway which lies west of the 100th meridian, shall be described in State regulations. The season length for the Low Plains unit (those portions of North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas not included in the High Plains Mallard Management Unit) may not exceed 60 days.

The point values for species and sexes taken in the Central Flyway are: canvasbacks count 100 points each (note areas closed to canvasback hunting); female mallards, Mexican-like ducks, wood ducks, redheads and hooded mergansers count 70 points each; blue-winged teal, green-winged teal, cinnamon teal, scaup, pintails, gadwalls, wigeon, shovelers, and mergansers (except the hooded merganser) count 10 points each; all other species and sexes of ducks count 20 points each. The daily bag limit is reached when the point value of the last bird taken, when added to the sum of the point values of other birds already taken during that day, reaches or exceeds 100 points. The possession limit is the maximum number of birds which legally could have been taken in 2 days.

Coots have a point value of zero, but the daily bag and possession limits are 15 and 30, respectively, as under the conventional limits.

Those portions of Colorado and Wyoming lying west of the Continental Divide, that portion of New Mexico lying west of the Continental Divide plus the entire Jicarilla Appache Indian Reservation, and that portion of Montana which includes the counties of Hill, Chouteau, Cascade, Meagher, and Park and all counties west thereof, must select open seasons on waterfowl and coots in accordance with the framework for the Pacific Flyway.

States in the Central Flyway may select goose seasons between October 4, 1980, and January 18, 1981, inclusive.

Montana, Wyoming and Colorado may select, for the Central Flyway portions, seasons of 93 days, with daily bag and possession limits of 2 and 4 geese, respectively.

New Mexico (for the Central Flyway portion) and Texas (for that portion west of U.S. Highway 81) may select seasons of 93 days with a daily bag limit of 5 geese which may include no more than 2 dark (Canada and white-fronted) geese and a possession limit of 10 geese which may include no more than 4 dark geese.

North Dakota, South Dakota, Nebraska, Kansas, Oklahoma, and Texas (for that portion east of U.S. Highway 81) may select seasons (which need not be concurrent) for light (Ross' and snow, including blue) geese of 86 days with limits of 5 daily, and dark (Canada and white-fronted) geese of 72 days with daily bag limits as follows (possession limits are described later):

In North Dakota, 1 Canada goose and 1 white-fronted goose or 2 white-fronted geese.

In South Dakota, 1 Canada goose and 1 white-fronted goose.

In Nebraska, 1 Canada goose and 1 white-fronted goose, except in that portion of the State west of U.S. Highway 183, prior to November 24, the daily bag limit may include 2 Canada geese or 1 Canada goose and 1 white-fronted goose.

In Kansas, 1 Canada and 1 white-fronted goose.

In the Oklahoma counties of Alfalfa, Bryan, Johnston, and Marshall, the State may select either:

(a) A season of 72 days with daily limits of 1 Canada goose and 1 white-fronted goose.

or

(b) A season of 53 days (within the 72-day period selected for the remainder of the State) with limits of 2 Canada geese or 1 Canada goose and 1 white-fronted goose daily.

In the remainder of Oklahoma, the limits are 2 Canada geese or 1 Canada goose and 1 white-fronted goose daily.

In that portion of Texas east of U.S. Highway 81, the bag limit is 1 Canada goose or 1 white-fronted goose daily.

In all East Tier Central Flyway States, goose possession limits are twice the daily bag limits.

Colorado, Montana, New Mexico, Oklahoma, Texas, and Wyoming may select a sandhill crane season with daily bag and possession limits of 3 and 6, respectively, within an October 4, 1980-January 31, 1981, framework as follows:

(a) 37 consecutive days from October 4 through November 23, 1980, in the Central Flyway portion of Colorado except the San Luis Valley area, and in the Wyoming counties of Crook, Goshen, Laramie, Niobrara, Platte and Weston.

(b) 93 consecutive days between October 20, 1980, and January 31, 1981, in the New Mexico counties of Chaves, Curry, De Baca, Eddy, Lea, Quay, and Roosevelt, and in that portion of Texas west of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, along U.S. Highway 87 (and including all of Howard and Lynn Counties) to U.S. Highway 277 at San Angelo, and along U.S. Highway 277 to the International Toll Bridge in Del Rio.

(c) 58 consecutive days on or after November 22, 1980, in that portion of Oklahoma west of U.S. Highway 81, and in that portion of Texas east of a boundary from the Oklahoma border along U.S. Highway 287 to U.S. Highway 87 at Dumas, then along U.S. Highway 87 to San Angelo, and west of a line running north from San Angelo along U.S. Highway 277 to Abilene, along State Highway 351 to Albany, along U.S. Highway 283 to Vernon, and then along U.S. Highway 183 east to the Oklahoma border.

(d) 37 consecutive days, to open with the goose season, in all of the Central Flyway portion of Montana except Sheridan County and that area south and west of Interstate Highway 90 and the Big Horn River.

All persons hunting sandhill cranes in the above designated areas of the Central Flyway must obtain and possess valid Federal permits issued by the appropriate State conservation agency on an equitable basis without charge.

Emergency closures of hunting seasons will be considered whenever portions of either the Rocky Mountain or Wood Buffalo-Aransas flocks of whooping cranes are found in areas where there is risk to their taking by hunters.

Pacific Flyway

Between October 4, 1980, and January 18, 1981, concurrent 93-day seasons on ducks (including mergansers), coots, and gallinules may be selected in Pacific Flyway States and portions of States, *except* as subsequently noted. Basic daily bag and possession limits on ducks (including mergansers) are 7 and 14, respectively.

No more than 2 redheads or 2 canvasbacks or 1 of each may be taken daily and no more than 4 singly or in the aggregate may be possessed.

The daily bag and possession limits on coots and gallinules are 25 singly or in the aggregate.

Waterfowl season dates for the Colorado River Zone of California must coincide with season dates selected by Arizona for waterfowl. Waterfowl season dates for the Northeastern Zone of California must coincide with season dates selected by Oregon for waterfowl, except that the season on geese may differ according to prescribed options described later. For the Southern Zone of California (as described in Title 14 California Fish and Game Code, Section 502), the State may designate season dates differing from those in the remainder of the State.

For Nevada, county of Clark, the State may designate season dates for waterfowl differing from those in the remainder of the State.

In the Idaho counties of Ada, Bannock, Benewah, Blaine, Bonner, Boundary, Camas, Canyon, Cassia, Elmore, Gem, Gooding, Jerome, Kootenai, Latah, Lewis, Lincoln, Minidoka, Nez Perce, Owyhee, Payette, Power, Shoshone, Twin Falls, Washington, and that portion of Bingham County lying outside the Blackfoot Reservoir drainage; the Oregon counties of Baker, Gilliam, Malheur, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco; and in Washington all areas lying east of the summit of the Cascade Mountains and east of the Big White Salmon River in Klickitat County (all formerly identified as the Columbia Basin Area for ducks), between October 4, 1980, and January 18, 1981, the season lengths for ducks (including mergansers), coots and gallinuiles may be 100 days with all seasons to run concurrently.

Between October 4, 1980, and January 18, 1981, 93-day seasons on geese may be selected in States or portions of States in this Flyway, except as subsequently noted. The basic daily bag and possession limits are 0, provided that the daily bag limit includes no more

V 45 A G 1 3 1980 UMI

than 3 white geese (snow, including blue, and Ross's geese) and 3 dark geese (Canada and white-fronted geese); the daily bag and possession limits are proportionately reduced in those areas where special restrictions apply to Canada geese. In Washington and Idaho, the daily bag and possession limits are 3 and 6 geese, respectively.

The season is closed on the Aleutian Canada goose.

Three areas in California, described as follows, are restricted to the hunting of dark geese (all subspecies of Canada and white-fronted geese) in order to protect the Aleutian Canada goose for which no hunting is allowed and to temporarily reduce harvests on white-fronted geese and cackling Canada geese:

(1) In the counties of Del Norte and Humboldt there will be no open season on dark geese during the 1980–81 waterfowl hunting season.

(2) In the Sacramento Valley in the area described as follows: beginning at Willos in Glenn County proceeding south on Interstate Highway 5 to the junction with Hahn Road north of Arbuckle in Colusa County; then easterly on Hahn Road and the Grimes-Arbuckle Road to Grimes on the Sacramento River; then southerly on the Sacramento River to the Tisdale By-pass; then easterly on the Tisdale By-pass to where is meets O'Banion Road; then easterly on O'Banion Road to State Highway 99; then northerly on State Highway 99 to its junction with the Gridley-Colusa Highway in Gridley in Butte County; then westerly on the Gridley-Colusa Highway to its junction with the River Road; then northerly on the River Road to the Princeton Ferry; then westerly across the Sacramento River to State Highway 45; then northerly on State Highway 45 to its junction with State Highway 162; then continuing northerly on State Highway 45–162 to Glenn; then westerly on State Highway 162 to the point of beginning in Willows, the hunting season for taking dark geese will not open until December 15, 1980, and will then continue to the end of the 1980–81 waterfowl hunting season.

(3) In the San Joaquin Valley in the area described as follows: beginning at Modesto in Stanislaus County proceeding west on State Highway 132 to the junction of Interstate 5; then southerly on Interstate 5 to the junction of State Highway 152 in Merced County; then easterly on State Highway 152 to the junction of State Highway 59; then northerly on State Highway 59 to the junction of State Highway 99 at Merced; then northerly and westerly to the point of beginning; the hunting season for taking dark geese will close on November 23, 1980.

Emergency closures may be invoked for all Canada geese should Aleutian Canada goose distribution patterns or other circumstances justify such actions.

In the Washington counties of Adams, Benton, Douglas, Franklin, Grant, Kittitas, Klickitat, Lincoln, Walla Walla, and Yakima, and in the Oregon counties of Gilliam, Morrow, Sherman, Umatilla, Union, Wallowa, and Wasco, the goose season may be of 100 days duration and must run concurrently with the duck season; and the bag limits for geese are to be the same as in the general goose season in their respective States.

Oregon, for Lake and Klamath Counties, must select frameworks for season and limits from among the following listed Options 1, 2, 3 and 7; California, for the Northeastern Zone must select frameworks from among Options 1, 2, 3, 8 and 9; and California, for the Balance-of-the-State Zone, must select frameworks from among Options 4, 5, 6 and 8. The selected season for geese must occur within that selected for ducks.

Option 1. A season of not more than 79 days between November 1, 1980, and January 18, 1981, with a basic goose limit of 6 per day and 6 in possession of which not more than 3 dark and 3 white geese may be in the daily bag.

Option 2. A season of not more than 86 days between October 25, 1980, and January 18, 1981, with a basic goose limit of 4 per day and 4 in possession, of which not more than 2 dark and 2 white geese may be in the daily bag.

Option 3. A season of 93 days between October 4, 1980, and January 18, 1981, with a basic goose limit of 2 per day and 2 in possession of which not more than 1 dark and 1 white goose may be in the daily bag.

Option 4. A season of not more than 83 days between October 4 and December 25, 1980, with a basic goose limit of 6 per day and 6 in possession of which not more than 3 dark and 3 white geese may be in the daily bag.

Option 5. A season of not more than 90 days between October 4, 1980, and January 1, 1981, with a basic goose limit of 4 per day and 4 in possession of which not more than 2 dark and 2 white geese may be in the daily bag.

Option 6. A season of not more than 93 days between October 4, 1980 and January 18, 1981, with a basic goose limit of 2 per day and 2 in possession of which not more than 1 dark and 1 white goose may be in the daily bag.

Option 7. A season of not more than 93 days having daily bag limits of 1 dark and 1 white geese with possession limits twice the daily limit through October 31, 1980. Thereafter, limits may be increased to 3 dark and 3 white geese in the daily bag with any 6 geese in possession.

Option 8. A season of not more than 79 days opening not less than 2 weeks after the opening of the duck season, with limits of 2 dark geese and 2 white geese daily and 4 of any geese in possession.

Option 9. A season of not more than 93 days with a limit of 1 goose (either dark or white) in daily bag and possession for the first 14 days of the season. Thereafter, limits may be increased to 3 geese in daily bag and possession of which not more than 2 may be dark geese and not more than 2 may be white geese.

In that portion of Idaho lying west of the line formed by U.S. Highway 93 north from the Nevada border to shoshone, thence northerly on Idaho State Highway 75 (formerly U.S. Highway 93) to Challis, thence northerly on U.S. Highway 93 to the Montana border (except Boundary, Bonner, Kootenai, Benewah, Shoshone, Latah, Nez Perce, Lewis, Clearwater and Idaho Counties); in the Oregon counties of Baker and Malheur; and in that portion of Montana and Wyoming in the Pacific Flyway, the daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond December 28, 1980.

In that portion of Idaho lying east of the line formed by U.S. Highway 93 north from the Nevada border to Shoshone, thence northerly on Idaho State Highway 75 (formerly U.S. Highway 93) to Challis, thence northerly on U.S. Highway 93 to the Montana border; in that portion of Colorado in the Pacific Flyway; in Utah except Washington County, the daily bag and possession limits are 2 Canada geese, and the season on Canada geese may be no more than 72 days and may not extend beyond December 21, 1980.

For Nevada, the State may experimentally designate season dates on geese in Clark County and on geese in Elko County and that portion of White Pine County within Ruby Lake National Wildlife Refuge differing from those in the remainder of the State. The daily bag and possession limits are 2 Canada geese throughout the State.

In Arizona, except in the counties of Mohave and Yuma; in that portion of New Mexico in the Pacific Flyway; in Clark County, Nevada; in Washington County, Utah; and in the Southern Zone, except that portion in California Department of Fish and Game District 22, of California, the season on Canada geese may be no more than 72 days. The daily bag and possession limit is 2 Canada geese and the season on Canada geese may not extend beyond January 18, 1981.

In California, the balance of California Fish and Game District 22 in the Southern Zone (that portion of District 22 lying outside the Colorado River Zone), the daily bag limit is 1 Canada goose with 2 in possession and the season on Canada geese may be no more than 72 days and may not extend beyond January 4, 1981.

In the Arizona counties of Mohave and Yuma and in the Colorado River Zone of California, the seasons on Canada geese may be no more than 72 days and may not extend beyond January 4, 1981. The daily bag and possession limits on Canada geese are 2 and 2, respectively, in these areas. the season on geese in the Colorado River Zone of California must be the same as that selected by Arizona.

In the Washington counties of Island, Skagit, Snohomish, and Whatcom, the seasons on snow geese may not extend beyond January 1, 1981; and the daily bag and possession limits on snow geese are 3 and 6, respectively.

Between October 25, 1980, and February 22, 1981, States in this Flyway may select an open season on black brant of 93 days with daily bag and possession limits of 4 and 8 brant, respectively.

In Utah, Nevada and Montana, an open season for taking a limited number of whistling swans may be selected subject to the following conditions: (a) The season must run concurrently with the duck season; (b) in Utah, no more than 2,500 permits may be issued, authorizing each permittee to take 1 whistling swan; (c) in Nevada, no more than 500 permits may be issued, authorizing each permittee to take 1 whistling swan in Churchill County; (d) in Montana, no more than 500 permits may be issued authorizing each permittee to take 1 whistling swan in Teton County; (e) permits and correspondingly numbered metal locking seals must be issued by the appropriate State conservation agency on an equitable basis without charge.

For all States entirely in the Pacific Flyway, open seasons on common snipe must coincide with the duck season. For other States partially within the Pacific Flyway seasons between September 1, 1980, and February 28, 1981, and not to exceed 93 days, may be selected. The daily bag and possession limits are 8 and 16, respectively. Any State may split its snipe season without penalty.

Special Falconary Frameworks

Falconry is a permitted means of taking migratory game birds in any State.

Any State listed in 50 CFR 21.29(k) as meeting Federal Falconry Standards may select an extended season for taking migratory game birds in accordance with the following:

1. Seasons must fall within the regular season framework dates and, if offered, other special season framework dates for hunting.

2. Season lengths for all permitted methods of hunting within a given area may not exceed 107 days for any species.

3. Hunting hours shall not exceed ½ hour before sunrise to sunset.

4. Falconry daily bag and possession limits for all permitted migratory game birds shall not exceed 3 and 6 birds, respectively, singly or in the aggregate, during both regular hunting seasons and extended falconry seasons.

5. Each State selecting extended seasons shall report to the Service the results of the special falconry season by March 15, 1981.

6. Each State selecting the special season must inform the Service of the season dates and publish said regulations.

General hunting regulations, including seasons, hours, and limits, apply to falconry in each State listed in 50 CFR 21.29(k) which does not select an extended falconry season.

Notice: In no instance shall the total number of days in any combination of duck seasons (regular duck season, sea duck season, September teal season, special scaup season, special scaup and goldeneye season, or falconry season) exceed 107 days for a species in any geographical area.

Dated: August 8, 1980.

F. Eugene Hester,

Acting Director, United States Fish and Wildlife Service.

Part VI

Department of Education

Territorial Teacher Training Assistance Program; Final Regulations

DEPARTMENT OF EDUCATION

45 CFR Part 151

Territorial Teacher Training Assistance Program

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary issues regulations for the Territorial Teacher Training Assistance Program. This program was established by the Education Amendments of 1978 to provide assistance to Guam, American Samoa, the Virgin Islands, the Commonwealth of the Northern Mariana Islands, and the Trust Territory of the Pacific Islands for the training of teachers.

EFFECTIVE DATE: These regulations are expected to take effect 45 days after they are transmitted to Congress. Regulations are usually transmitted to Congress several days before they are published in the **Federal Register**. The effective date is changed by statute if Congress disapproves these regulations or takes certain adjournments. If you want to know the effective date of these regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Nancy E. Martin, Department of Education, Office of School Improvement, (Room 3700, Donohoe Building), 400 Maryland Avenue, S.W., Washington, D.C. 20202. Telephone: (202) 426–7220.

SUPPLEMENTARY INFORMATION: On April 8, 1980, the Commissioner of Education published a Notice of Proposed Rulemaking (NPRM) for this program in the **Federal Register** (45 FR 24070). Interested persons were given 60 days to comment on the notice. Three persons submitted comments. The comments generally supported the provisions established in the NPRM. However, certain changes have been made in response to comments and for clarification purposes. The provisions of these final regulations are substantially the same as the provisions of the NPRM. The paragraphs below summarize the comments and the Secretary's response to them.

§ 151.2(b)(2) Eligible Parties.

Comment. All commenters expressed concern regarding the capability of the institutions of higher education (IHEs) located in the territories to provide the needed training, although the commenters believed it desirable to promote the use of territorial IHEs.

Response. A change has been made. The Secretary agrees that these concerns are valid. Section 151.10(d) provides that the training is to be done in the territory, except in unusual circumstances. However, where necessary the IHE may be from outside the territory. The Secretary does encourage the use of territorial IHEs to the maximum extent possible.

§ 151.4(b) Definitions.

Comment. One commenter asked whether the definition of teacher included teachers of adults.

Response. A change has been made. The definition of "teacher" in § 151.4(b) now includes persons who provide instruction to adults in courses traditionally provided to students in elementary and secondary schools.

Comment. One commenter wanted further clarification of the term "nonindigenous contract teacher". The commenter expressed concern that the present definition excludes teachers from general training who have been in the school system for many years and who reside in the territory on a permanent basis.

Response. A change has been made. The definition of "nonindigenous contract teacher" has been clarified to include those teachers who have been in the school system less than three (3) years and who were not, at the time of entering into the contract, a resident of the territorial jurisdiction in which the service will be performed.

§ 151.10 Project Activities (formerly § 151.5)

Comment. One commenter suggested that training for principals and administrators should be allowed with these funds.

Response. No change has been made. Such training is not allowed by law. The statute specifically states that grants shall be made "for the purpose of providing training to teachers in schools" in the territories.

Comment. One commenter asked whether activities designed to help teachers obtain bachelor's degrees in education are allowable under § 151.10(b).

Response. No change has been made. The regulations do not prohibit the use of funds for programs which lead to a bachelor's degree. However, all inservice training must be related directly to the teacher training needs of the jurisdiction. See § 151.10(b).

Comment. Two commenters expressed concern over the requirement in § 151.10 (formerly § 151.5) that limits training within the geographic boundaries of the territories.

Response. No change has been made. The Secretary believes that the purpose of the statute is most effectively met by providing training to teachers in the schools of the territories. To do this, territorial IHEs should be used whenever feasible. If territorial IHEs cannot provide the needed training, IHEs outside the territory may conduct training programs in the territories. However, if circumstances are such that training within territorial limits is not feasible, the Secretary may approve training to be provided outside the territory(ies).

Citation of Legal Authority

A citation of statutory or other legal authority has been placed in parentheses on the line following the text of each provision.

Dated: August 8, 1980.

(Catalog of Federal Domestic Assistance No. 84.124, Territorial Teacher Training Assistance Program. Part I of OMB Circular A–95 does not apply)

Shirley M. Hufstedler,

Secretary of Education.

Title 45 of the Code of Federal Regulations is amended by adding Part 151 as follows:

PART 151—TERRITORIAL TEACHER TRAINING ASSISTANCE

Subpart A—General

Sec.

151.1 Description of the Territorial Teacher Training Assistance Program.
151.2 Eligible parties.
151.3 Regulations that apply to the Territorial Teacher Training Assistance Program.
151.4 Definitions.

Subpart B—What Kinds of Projects does the Department of Education Assist under This Program?

151.10 Project activities.

Subpart C—How Does One Apply for a Grant?

151.20 How to apply for funds.

Subpart D—How Is a Grant Made?

151.30 How applications are reviewed.
151.31 How funds are allocated.

Subpart E—What Conditions Must be met by a Grantee?

151.40 Allowable costs.
151.41 Limitations on costs.
151.42 Participation of private school personnel.

Authority—Title XV, Part C, sec. 1525, Education Amendments of 1978 (Pub. L. 95–561), 92 Stat. 2379.

Subpart A—General

§ 151.1 Description of the Territorial Teacher Training Assistance Program.

The Territorial Teacher Training Assistance Program provides Federal assistance for the training of teachers in schools in Guam, American Samoa, the Commonwealth of the Northern Mariana Islands, the Trust Territory of the Pacific Islands, and the Virgin Islands.

(Sec. 1525, Pub. L. 95–561)

§ 151.2 Eligible parties.

Each territory is eligible to receive a grant. If a jurisdiction desires a grant, its SEA—either alone or in conjunction with an IHE—shall submit an application. If an SEA submits an application in conjunction with an IHE, the SEA remains fully responsbile for the administration of the project.

(Sec. 1525, Pub. L. 95–561)

§ 151.3 Regulations that apply to the Territorial Teacher Training Assistance Program.

(a) The following regulations apply to grants under the Territorial Teacher Training Assistance Program:

(1)(i) The Education Division General Administrative Regulations (EDGAR) in 45 CFR Part 100a (Direct Grant Program), except for 45 CFR 100a.202–100a.206; and

(ii) 45 CFR Part 100c (Definitions).

(2) The regulations in this Part 151.

(b) The "Introduction to Education Division Programs" at the beginning of EDGAR includes general information to assist in using regulations that apply to Education Division programs.

(Sec. 1525, Pub. L. 95-561)

§ 151.4 Definitions.

(a) *Definitions in EDGAR.* The following terms in this part are defined in 45 CFR Part 100c: Applicant, Application, Award, Budget, EDGAR, Grant, Grantee, Nonprofit, Private, Project, Public, State educational agency (SEA).

(b) *Specific program definitions.* As used in these regulations—

"Teacher" means a person who has the primary responsibility for teaching elementary and secondary students in an educational institution, whether public or private. The term includes persons who provide instruction to adults in courses traditionally provided to students in elementary and secondary schools.

"Nonindigenous contract teacher" means a teacher who serves on a contract basis, who has been employed in the school system for less than three years, and who was not at the time of entering the contract, a resident of the territorial jurisdiction in which the service will be performed.

(c) *Other definitions.* "Institution of higher education" is defined in the Higher Education Act of 1965 (Pub. L. 89–329), as amended.

(Sec. 1525, Pub. L. 95–561; 20 U.S.C. 1141)

Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

§ 151.10 Project activities.

(a) Projects funded under this part provide for the training of teachers in the five territorial jurisdictions who teach—

(1) Students in grades kindergarten through 12 in public and nonprofit private schools; or

(2) Adults in courses traditionally provided by elementary or secondary schools.

(b) All activities must be directly related to teaching. Activities that may be funded include, but are not limited to, the following:

(1) In-Service teacher training in—
(i) Basic Skills development; or
(ii) Specific subject areas.
(2) Curriculum development.
(3) Use of instructional materials or equipment.
(4) Classroom management.
(5) Training for teachers to achieve full certification under the appropriate territorial requirements.

(c) Nonindigenous contract teachers may receive only that training directly necessary for teaching within the territorial schools, rather than training concerned with general teacher competency.

(d) Except in unusual circumstances, as determined by the Secretary, the Secretary does not approve training to be provided outside the geographical limits of the territory(ies) involved.

(Sec. 1525, Pub. L. 95–561)

Subpart C—How Does One Apply for a Grant?

§ 151.20 How to apply for funds.

(a) The "Introduction to Education Division Programs" at the beginning of EDGAR includes general information to assist in applying for assistance under an Education Division program.

(b) The Secretary makes a grant only if the applicant submits an application meeting the applicable requirements under Subpart C of 45 CFR Part 100a of EDGAR and the following requirements:

(1) For the first year of the program an application must contain:

(i) A needs assessment defining teacher training needs of both public and private schools in the jurisdiction covered by the application;

(ii) A four-year plan explaining the methods to be employed and activities to be conducted to meet the teacher training needs identified in paragraph (b)(1)(i) of this section;

(iii) A detailed explanation of the goals, objectives, and activities to be carried out in the first year of the program;

(iv) A detailed proposed budget for the accomplishment of the activities described in paragraph (b)(1)(iii) of this section for the fiscal year for which the application is submitted; and

(v) The estimated funding needs for each subsequent year of the four-year plan.

(2) For each subsequent year of the program, an application must contain:

(i) Any revisions to the needs assessment statement or amendments to the four year plan statement submitted in (b) paragraphs (1)(i) and (1)(ii) of this section;

(ii) A statement regarding the extent to which the previous year's project met the goals and objectives set forth in that year's application;

(iii) A detailed explanation of the activities to be carried out for the current project year;

(iv) A detailed proposed budget for the current project year; and

(v) An updated estimate of funding needs for the subsequent years of the project.

(20 U.S.C. 1221e–3(a)(1))

Subpart D—How Is a Grant Made?

§ 151.30 How applications are reviewed.

The Secretary reviews an application to ensure that—

(a) The proposed objectives and activities respond to the needs assessment stated in the application: and

(b) The proposed budget is applicable to these needs.

§ 151.31 How funds are alloted.

(a) The Secretary allots funds to each territory on the basis of the identified needs and a review of the proposed activities and budget in its application.

(b)(1) If the total determined allotments to the territories exceed the total amount of funds appropriated, the Secretary reduces each allotment.

(2) However, the Secretary allots to each territory whose application for funds is approved at least five percent of each fiscal year's appropriation.

(Sec. 1525, Pub. L. 95–561)

Subpart E—What Conditions Must Be Met by a Grantee?

§ 151.40 Allowable costs.

(a) Funds may cover all or part of the cost of establishing and implementing a teacher training assistance project, subject to applicable cost principles in 45 CFR Part 100a and 45 CFR Part 74.

(b) These costs may include, but are not limited to—

(1) Research material and resources;

(2) Consultants; and

(3) Training of project staff.

§ 151.41 Limitations on costs.

(a) Funds received under this program may not be used for the training of teachers outside the geographic limits of the territory(ies) involved, except—

(1) In unusual circumstances as determined by the Secretary; and

(2) With prior written approval of the Secretary.

(b) The application must describe the circumstances that require training outside the geographic limits of the territories if funds are requested for that purpose.

(Sec. 1525, Pub. L. 95–561)

§ 151.42 Participation of private school teachers.

(a) A grantee shall provide teachers in private nonprofit schools in the area served by the project an opportunity to participate in the training on a basis comparable to that provided for public school teachers.

(b) Training for teachers in private nonprofit schools shall be provided in accordance with §§ 100b.658 through 100b.662 of EDGAR.

(Sec. 1525, Pub. L. 95–561)

Part VII

Department of Education

Pre-College Teacher Development in Science Program; Proposed Rulemaking

DEPARTMENT OF EDUCATION

34 CFR Part 797

Precollege Teacher Development in Science Program

AGENCY: Department of Education.

ACTION: Notice of proposed rulemaking.

SUMMARY: The Secretary proposes regulations for the Pre-College Teacher Development in Science Program for the first time. This program provides support to colleges and universities and certain nonprofit institutions for the continuing education of elementary school teachers in mathematics and the natural and social sciences.

DATES: Comments must be received on or before September 12, 1980.

ADDRESSES: Comments should be addressed to Mary G. Lewis, Room W-458, Pre-College Teacher Development in Science Program for Elementary School Teachers, U.S. Department of Education, c/o National Science Foundation, 1800 G Street, NW., Washington, D.C. 20550.

FOR FURTHER INFORMATION CONTACT: Mary G. Lewis. Telephone No. (202) 282-7083.

SUPPLEMENTARY INFORMATION: The Pre-College Teacher development in Science Program was transferred to the Department of Education from the National Science Foundation by the Department of Education Organization Act of 1979. Pub. L. 96-88, section 304.

The National Science Foundation's Pre-College Teacher development in Science Program, of which this Program was a part, and which also includes training opportunities for middle and secondary school teachers, was reestablished in fiscal year 1977 by Congress through Pub. L. 94-378.

The program for fiscal year 1980 for kindergarten through grade twelve teachers was announced by the National Science Foundation (NFS) in a *Guide for Preparation of Proposals and Project and Award Management*, NSF Publication No. SE 80-27, in July 1979. With the transfer of the elementary school portion of this program to the Education Department on May 4, 1980, the program for these grades is now subject to the general Education Provisions Act which requires publication of regulations in the Federal Register.

Provisions of the regulations

These proposed regulations follow closely the characteristics of the FY 1980 Pre-College Teacher development in Science Program as administered by the NSF and announced in the *Guide* referred to under Supplementary Information. The exceptions are noted below:

Since the inception of this program in FY 1977, the NSF has invited proposals from colleges and universities nationwide that offer at least a baccalaureate degree in science. In FY 1981, however, the eligibility at NSF and at ED, has been broadened to include nonprofit institutions having both the scientific research staff and the facilities necessary to provide a quality science education program for pre-college teachers. Institutions might include, but are not limited to, science museums, nonprofit scientific research laboratories, and planetariums.

The target group for which the program is designed is elementary school teachers who have been identified by their peers as key teachers in their schools. A work group of two or three teachers teamed with a school principal, assistant superintendent, resource teacher, or other school leader to represent a school or system is encoouraged. The intent of the program is that these school personnel who attend the projects will, upon their return, carry out further inservice training of teachers in their schools, thereby creating a multiplier effect.

(b) Most projects are expected to be local or regional rather than national. This emphasis is intended to promote economy of operation as well as to encourage continuing communication among teachers in a locality or region.

The Secretary intends to use groups of experts to evaluate the merit of each proposal using the nine selection criteria in § 797.31 of the regulations. Panels of scientists, and science educators selected from all areas of the United States, and from relevant disciplines, pre-college educator roles, and a variety of colleges and universities will be assembled for proposal review.

Additional Requirements for Projects

These proposed regulations do not contain certain types of administrative requirements. Those requirements are covered in the Education Division's General Administrative Regulations (EDGAR) which were published as final regulations on April 3, 1980 (45 FR 22494)

Invitation To Comment

Interested persons are invited to submit comments and recommendations regarding the proposed regulations. Written comments and recommendations may be sent to the adreess given at the beginning of this preamble. All comments received on or before September 12, 1980, will be considered in the development of the final regulations.

All comments submitted in response to these proposed regulations will be available for public inspection, during and after the comment period, in Room W458, NSF Wisconsin Avenue Annex, 5225 Wisconsin Avenue, NW., Washington, D.C., between the hours of 8:30 a.m. and 5:00 p.m., Monday through Friday of each week except Federal holidays.

Citation of Legal Authority

A citation of statutory or other legal authority is placed in parentheses on the line following each substantive provision of these regulations.

(Catalog of Federal Domestic Assistance No. 13.119, Pre-College Teacher development in Science Program. Part I of the OMB Circular does not apply to this program)

Dated: August 7, 1980.

Shirley M. Hufstedler,

Secretary of Education.

The Secretary proposes to add a new Part 797 to Title 34 of the Code of Federal Regulations as follows:

PART 797—PRE-COLLEGE TEACHER DEVELOPMENT IN SCIENCE PROGRAM

Subpart A—General

Sec.

797.1 Description of the Pre-College Teacher Development in Science Program.
797.2 Eligible parties.
797.3 Regulations that apply to the Pre-College Teacher Development in Science Program.
797.4 Definitions that apply to the Pre-College Teacher Development in Science Program.

Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

797.10 What is the purpose of the program?
797.11 What are the general characteristics of the projects?
797.12 What types of projects are supported?

Subpart C—How Does One Apply for a Grant? [Reserved]

Subpart D—How Is a Grant Made?

797.30 How does the Secretary evaluate a proposal?
797.31 What selection criteria does the Secretary use?

Subpart E—What Conditions Must Be Met by a Grantee?

797.40 Who may participate in the projects?

Authority: Pub. L. 81-507; Pub. L. 94-378; Pub. L. 96-88; 42 U.S.C. 1862; 20 U.S.C. 3444.

Subpart A—General

§ 797.1 Description of pre-college teacher development in science program.

The Pre-College Teacher Development in Science Program offers continuing education in science, to provide in-service training for elementary school teachers.

(42 U.S.C. 1862)

§ 797.2 Eligible institutions.

The following institutions are eligible to receive grants:

(a) Institutions of Higher Education that offer at least a baccalaureate degree in science.

(b) Nonprofit private, non-academic institutions having both the scientific research staff and the facilities necessary to provide a quality science education program for pre-college teachers. This may include institutions such as, but not limited to, scientific research laboratories, field stations, museums, or planetariums.

(42 U.S.C. 1862)

§ 797.3 Regulations that apply to the pre-college teacher development in science program.

The following regulations apply to the Pre-College Teacher Development in Science Program:

(a) The Education Division General Administrative Regulations (EDGAR) in 45 CFR Part 100a (Direct Grant Programs) and 45 CFR Part 100c (General).

(b) The regulations in this Part 797.

(42 U.S.C. 1862; 20 U.S.C. 3444)

§ 797.4 Definitions that apply to the pre-college teacher development in science program.

(a) *Definitions in EDGAR.* The following terms used in this part are defined in 45 CFR Part 100c: Applicant, Application, Award, Department, Elementary school, Fiscal year, Nonprofit, Project, Secretary.

(20 U.S.C. 1221e-3(a)(1))

(b) *Definitions that apply to this Part.* The following definitions apply to this part:

"Science" means the mathematical, biological, physical, engineering, and social sciences.

"Proposal" means the application.

(42 U.S.C. 1862)

Subpart B—What Kinds of Projects Does the Department of Education Assist Under This Program?

§ 797.10 What is the purpose of the program?

The major objective of the Pre-College Teacher Development in Science Program is to promote the offering of quality science, mathematics, and social studies instruction to the Nation's elementary school students. This is accomplished by—

(a) Improving elementary teachers' knowledge of the subject matter of science and mathematics, and their awareness of accompanying appropriate instructional strategies;

(b) Developing and maintaining cooperation and communication between scientists and mathematicians at colleges, universities, and certain other scientific institutions, and teachers in elementary schools; and

(c) Aiding teachers in the identification and use of resources appropriate to their level of instruction, which will aid in their teaching of scientific concepts.

(42 U.S.C. 1862)

§ 797.11 What are the general characteristics of the projects?

(a) Projects supported in this program will be characterized in general by a group of elementary school teachers engaged in a learning experience sponsored by the grantee institution and staffed by its faculty members or others selected for their appropriate expertise.

(b) Staff site visits for individual consultation, and group meetings devoted to classroom teaching strategies may be used to augment the instructional phase.

(c) Projects are to provide instruction on general concepts of science and mathematics, basic elements and concepts of a particular discipline, or more advanced training in specific disciplines, consistent with the needs of an identified group of teachers. The instruction would also illustrate appropriate materials and instructional teaching strategies for classroom use, as well as local resources that are applicable to classroom instruction.

(42 U.S.C. 1862)

§ 797.12 What types of projects are supported?

The types of projects supported under this program include but are not limited to:

(a) Academic Year Seminars—Part-time study offered at a central location for teachers within commuting distance, with sessions during the academic year.

(b) Summer Seminars—Part-time study offered during the summer at a central location for teachers within commuting distance with follow-up sessions during the academic year.

(c) Summer Workshops—Full-time projects offered during the summer, generally for 1 to 4 weeks. These projects normally will be regional and intended for more advanced training in specific disciplines. A limited follow-up activity may take place during the academic year.

(42 U.S.C. 1862)

Subpart C—How Does One Apply for a Grant? [Reserved]

Subpart D—How Is a Grant Made?

§ 797.30 How does the Secretary evaluate a proposal?

(a) The Secretary evaluates each proposal on the basis of the criteria in § 797.31.

(b) The Secretary assigns a maximum of 70 points that a proposal may receive under all the criteria.

(c) Each criterion is evaluated using a scale of 1-7.

(d) The weight assigned to each complete criterion is indicated in parenthesis following each criterion.

(e) For proposals of substantially equal quality, the Secretary gives priority to projects that, nationwide, contribute to achieving overall balance among projects funded under this program in the following categories:

(1) Grade level.

(2) Academic discipline.

(3) Institutional type.

(4) Geographic location.

§ 797.31 What selection criteria does the Secretary use?

(a) *Plan of operation.* (10 percent)

(1) The Secretary reviews each proposal for information that shows the quality of the plan of operation for the project.

(2) The Secretary looks for information that shows—

(i) High quality in the design of the project;

(ii) An effective plan of management that insures proper and efficient administration of the project;

(iii) A clear description of how the objectives of the project relate to the purpose of the program;

(iv) The way the applicant plans to use its resources and personnel to achieve each objective;

(v) A clear description of how the applicant will provide equal access and treatment for eligible project participants who are members of groups that have been traditionally underrepresented, such as—

(A) Members of racial or ethnic minority groups;

(B) Women; and

(C) Handicapped persons.

(b) *Quality of key personnel.* (10 points)

(1) The Secretary reviews each application for information that shows

the quality of the key personnel the applicant plans to use on the project.

(2) The Secretary looks for information that shows—

(i) The qualifications of the project director (if one is to be used);

(ii) The qualifications of each of the other key personnel to be used in the project;

(iii) The time that each person referred to in paragraphs (b)(2)(i) and (ii) of this section plans to commit to the project; and

(iv) The extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of groups that have been traditionally under-represented, such as members of racial or ethnic minority groups, women, and handicapped persons.

(3) To determine the qualifications of a person, the Secretary considers evidence of past experience and training, in fields related to the objectives of the project, as well as other information that the applicant provides.

(c) *Budget and cost effectiveness.* (5 percent)

(1) The Secretary reviews each application for information that shows that the project has an adequate budget and is cost effective.

(2) The Secretary looks for information that shows—

(i) The budget for the project is adequate to support the project activities; and

(ii) Costs are reasonable in relation to the objectives of the project.

(d) *Evaluation plan.* (5 percent)

(1) The Secretary reviews each application for information that shows the quality of the evaluation plan for the project. (See 45 CFR 100a.590—Evaluation by the grantee.)

(2) The Secretary looks for information that shows methods of evaluation that are appropriate for the project and, to the extent possible, are objective and produce data that are quantifiable.

(e) *Adequacy of resources.* (10 percent)

(1) The Secretary reviews each application for information that shows that the applicant plans to devote adequate resources to the project.

(2) The Secretary looks for information that shows—

(i) The facilities that the applicant plans to use are adequate; and

(ii) The equipment and supplies that the applicant plans to use are adequate.

(iii) Evidence is presented of long term support and institutional commitment to pre-college science education from the host institution.

(20 U.S.C. 1221(e)–3(a)(1))

(f) *Need for the project.* (20 percent)

(1) The Secretary reviews each proposal for information that shows a well-established need for the project.

(2) The Secretary looks for information that shows—

(i) An adequate needs assessment has been carried out;

(ii) Appropriate individuals, especially representative teachers, have been consulted in the needs assessment; and

(iii) Instructional needs have been clearly indentified and stated.

(g) *Cooperative relationships.* (10 percent)

(1) The Secretary reviews each proposal for information that shows the extent to which cooperative teaching relationships will be established between elementary teachers and college and university faculty or other scientists.

(2) The Secretary looks for information that shows the extent to which the project will advance the long term program objective of promoting useful relationships between elementary science teachers and college and university or other scientists beyond the term of the grant.

(h) *Subject matter emphasis.* (20 percent)

(1) The Secretary reviews each application for information that shows the extent to which subject matter in science is emphasized.

(2) The Secretary looks for information that shows—

(i) The extent to which there is a central focus on science curriculum is integrated with appropriate teaching strategies; and

(ii) The appropriateness of the content for the designated teacher group.

(i) *Participant selection.* (10 percent)

(1) The Secretary reviews each proposal for information that shows the appropriateness of the participant selection process.

(2) The Secretary looks for information that shows—

(i) Adequacy of publicity plan to recruit participants; and

(ii) Suitability of participant evaluation and selection procedures.

(42 U.S.C. 1862)

Subpart E—What Conditions Must be Met by a Grantee?

§ 797.40 Who may participate in the projects?

(a) The program is designed for the continuing education of elementary school teachers.

(b) Other school leaders such as principals, assistant superintendents, or resource teachers, may team with one or two teachers to represent a school or system.

(42 U.S.C. 1862)

Part VIII

Department of Education

Final Regulations for Nonprofit Organization Grants Under the Emergency School Aid Act

V 45 AG 13 80 UMI

DEPARTMENT OF EDUCATION

45 CFR Part 185

Emergency School Aid Act

AGENCY: Department of Education.

ACTION: Final regulations.

SUMMARY: The Secretary of Education issues final regulations for nonprofit organization grants under the Emergency School Aid Act. These Awards to public or private nonprofit organizations support a local educational agency in the development or implementation of a qualifying desegregation plan. These regulations implement changes in the program made by the Education Amendments of 1978 and respond to the extensive public comment received on two notices of proposed rulemaking.

EFFECTIVE DATE: These regulations are expected to take effect 45 days after they are transmitted to the Congress. Regulations are usually transmitted to the Congress several days before they are published in the **Federal Register**. The effective date is changed if Congress takes certain adjournments. If you want to know the effective date of these final regulations, call or write the Department of Education contact person.

FOR FURTHER INFORMATION CONTACT: Ms. L. Ann Benjamin, Room 2011–A, Federal Office Building #6, 400 Maryland Avenue, SW., Washington, D.C. 20202. Telephone: (202) 245–8230.

SUPPLEMENTARY INFORMATION: The authority for these regulations is the Emergency School Aid Act ("ESAA" or "the Act"), Title VI of the Elementary and Secondary Education Act of 1965, as amended (20 U.S.C. 3191 *et seq.*), as well as section 408 of the General Education Provisions Act (20 U.S.C. 1221e–3).

Background

These regulations are based on the amended ESAA enacted as part of the Education Amendments of 1978 (Pub. L. 95–561), the legislative history of the amendments to the Act, the Office of Education's experience in administering the nonprofit organization (NPO) program, and an evaluation of the NPO program by the Rand Corporation ("An Evaluation of the Emergency School Aid Act Nonprofit Organization Program", Vols. I–IV, 1978).

The notice of proposed rulemaking (NPRM) for the ESAA program was published in the **Federal Register** on June 29, 1979 (44 FR 38364). Numerous comments were received requesting major changes to the nonprofit organization section of the ESAA NPRM. In response to the comments, a revised NPRM for the NPO program was published on April 11, 1980 (45 FR 25028).

Summary of Changes

The provisions of the final regulations are substantially the same as the provisions of the April 11 NPRM. The only changes are in the selection criteria. the points assigned to recency of the qualifying plan have been changed to reduce the disadvantage to nonprofit organizations that are addressing continuing racial discrimination problems or that are involved in long-term monitoring of plans previously implemented. The selection criterion on project design has been revised to increase the maximum possible score and to include teachers among the groups to be involved in the development and implementation of the project. The Secretary believes that the effective involvement of teachers will help to ensure the success of the desegregation program. In addition, the selection criterion on budget has been revised to increase the maximum possible score. Finally, the selection criterion on personnel has been revised to take into consideration racial and cultural diversity of the applicant's staff. The Secretary believes that the applicant should make an effort to have staffing patterns reflect the racial and cultural diversity of the community.

These changes in the selection criteria will not take effect until October 1, 1980. The selection criteria and point allocations contained in the proposed regulations are adopted as final regulations for fiscal year 1980. This delayed effective date is intended to ensure that applicants are not disadvantaged by a change in the selection criteria on which they based their applications.

Many of the comments received on the second NPRM are similar to the comments received in response to the initial ESAA NPRM, e.g. the statutory abolition of the State apportionment, the prohibition against compensatory education activities and the reduced funding level. A major criticism of both NPRMs is the emphasis on recency of the local educational agency's qualifying plan in evaluating NPO applications.

A summary of the comments on the revised notice of proposed rulemaking follows and is organized according to the section numbers and titles of the final regulations. This summary does not repeat the comments and responses received in response to the June 29, 1979 ESAA NPRM.

Summary of Comments and Responses

General

Comment. One commenter recommended a regulatory provision that would allow a grantee to receive a negotiated indirect cost rate.

Response. No change is necessary. Provisions relating to indirect costs are contained in the Education Division General Administrative Regulations (45 CFR Part 100a) and in 34 CFR Part 74, Appendix F.

Comment. Two commenters recommended the restoration of NPO funding to the FY 1979 level of $17.5 million.

Response. The statute authorizes $15 million for fiscal year 1980 and for each of the three succeeding fiscal years for grants to public or private nonprofit agencies. Congress appropriated $5 million for the fiscal year 1980 NPO program. The decision on the amount of each year's appropriation rests with Congress and is not subject to ESAA regulatory provisions.

Comment. One commenter recommended the continuation of NPO advisory committee requirements contained in previous regulations.

Response. No change is made. The advisory committee requirements for NPOs were eliminated in an effort to reduce the administrative burden on NPO applicants and because the selection criteria address community participation. Since many of the boards of NPOs are made up of a diverse group of community and civic representatives, the ESAA advisory committee may be a duplication.

Comment. One commenter recommended that the Department add to the selection criteria consideration of the degree of support and/or participation of classroom teachers and teacher associations, as well as provision for effective input by teachers, in the development and implementation of inservice programs.

Response. A change is made. Based upon the findings of the Rand study, an effort was made to increase the independence of the NPOs. It would be inappropriate to add a provision requiring the involvement of teacher associations, since such involvement may hamper the full autonomy of the nonprofit organization. However, the selection criterion on project design (§ 185.128(c)) is revised to address the involvement of teachers in the development and implementation of the project. This change will be effective in FY 1981. Applications for awards this year are evaluated on the basis of the criterion in the proposed regulations.

Comment. One commenter objected to the change from State to national competition for NPO applications.

Response. No change is made. The statute provides for the State apportionment of funds through the basic grant program only. Congress eliminated State competition under the NPO program.

Comment. One commenter was unclear whether a procedure is available for reconsideration of applications that are initially rejected for funding.

Response. No change is made. Under the technical amendments to ESAA, local educational agencies and State educational agencies are allowed to resubmit their applications. There are no resubmit provisions for NPOs.

§ 185.122 Authorized activities.

Comment. One commenter objected to the elimination of all instructional services as authorized activities.

Response. No change is made in this provision. The NPO regulations attempt to increase the focus on school districts in the initial stages of desegregation and on making the program more accurately reflect the original Congressional intent to assist in emergency situations resulting from desegregation. The Rand study indicated that educational service activities conducted by most NPOs made little impact on the desegregation process.

Comment. One commenter suggested that the prohibition on NPOs monitoring desegregation plans where a court-appointed group is conducting a similar activity be limited to those cases in which the court-appointed group is required to report back to the court.

Response. No change is made. The problem that this restriction is intended to address—duplication of activities and potential interference with the mandate of a court-appointed group—is present whether or not that group is required to report back to the court.

§ 185.124 Approval of new projects.

Comment. One commenter expressed concern about the separate selection criteria for applications for implementation and development. It was suggested that the regulations permit the awarding of a single multiple year grant to an applicant to support both the development and implementation of a plan.

Response. No change is made. Separate criteria are needed because of differences in the types of projects. For example, a criterion addressing recency of plan implementation is inapplicable to a project for the development of a plan. However, an NPO is permitted to submit separate applications to support the development and implementation of a plan.

§ 185.126 Selection criterion: Recency of qualifying plan.

Comment. Several commenters objected to the emphasis on the implementation date of the qualifying plan in evaluating NPO applications. Some apparently believed that recency would be the sole basis for ranking applications while others felt that too much emphasis is placed on that criterion. These commenters noted that nonprofit organizations proposing to assist districts meeting problems of continued racial discrimination will be disadvantaged by the criterion.

Response. A change is made. Nonprofit organizations are ranked on a combination of factors related to recency of the plan and the quality of the proposal. The inclusion of a criterion on recency of implementation of a qualifying plan reflects the statute's focus on early support of desegregation plans. However, the number of points awarded for recency of plan implementation has been reduced so that organizations will not be as disadvantaged in supporting school districts with continuing racial discrimination problems. This change will be effective beginning in fiscal year 1981. Applications for fiscal year 1980 grant awards will be reviewed according to the total point value for recency of a qualifying plan in the revised NPRM published April 11, 1980.

§ 185.130 Selection criterion: Personnel.

Comment. One commenter interpreted the selection criterion on personnel as putting "* * * the affirmative action employment process at the same impasse faced by minority persons prior to 1965". This commenter suggested that all staff persons hired by NPOs for the purpose of implementing an ESAA program should be screened by a panel composed of representatives from the LEA, community agencies, parents and NPOs. Another commenter recommended that the criterion be revised to consider racial and cultural diversity in staffing patterns.

Response. A change is made. The purpose of this selection criterion was to encourage inclusion of minority group members on an applicant's staff in order to enhance its ability to carry out desegregation-related activities. The criterion has been revised to address the extent to which the staff includes the racial and cultural diversity needed to facilitate the project's success. It would be unnecessarily burdensome and intrusive to require screening of job applicants before they can be hired by an NPO.

Citation of Legal Authority

A citation of statutory of other legal authority is placed in parentheses on the line following each substantive provision of the final regulations. The first citation is to the appropriate section of the Act (Title VI of the Elementary and Secondary Education Act of 1965, as amended). This is followed by a citation to the same provision in the United States Code.

(Catalog of Federal Domestic Assistance Number 13.529, Nonprofit Organization Grants. Part I of OMB Circular A–95 does not apply to this program)

Dated: August 8, 1980.

Shirley M. Hufstedler,

Secretary of Education.

The Secretary amends 45 CFR Part 185 as follows:

1. The table of contents is amended by adding a new entry for Subpart G to read as follows:

PART 185—EMERGENCY SCHOOL AID

Subpart G—Nonprofit Organization Grants

Sec.
185.120 Purpose.
185.121 Eligible applicants.
185.122 Authorized activities.
185.123 Application procedures.
185.124 Approval of new projects.
185.125 Selection criteria.
185.126 Selection criterion: Recency of qualifying plan (3 points).
185.127 Selection criterion: Need (20 points).
185.128 Selection criterion: Project design (40 points).
185.129 Selection criterion: Organizational experience (10 points).
185.130 Selection criterion: Personnel (15 points).
185.131 Selection criterion: Evaluation plan (5 points).
185.132 Selection criterion: Budget (7 points).
185.133 Selection criterion: Commitment to plan adoption (10 points).

2. A new Subpart G is added to read as set out below.

Subpart G—Nonprofit Organization Grants

§ 185.120 Purpose.

The purpose of a nonprofit organization grant is to support an LEA's development or implementation of a qualifying plan described in § 185.42.

(Sec. 604(b)(3), 608(b); 20 U.S.C. 3194(b)(3), 3198(b))

§ 185.121 Eligible applicants.

(a) Any public or private nonprofit agency, institution or organization (NPO), other than an LEA, is eligible to apply for a grant under this subpart.

(b) An NPO may receive a grant under this subpart regardless of whether the LEA whose plan the NPO proposes to support applies for assistance under the Act.

(c) An NPO that proposes to support the development of a qualifying plan must receive a written request for that assistance from the LEA, except in the case of a plan described in § 185.42(a) that has been required but not yet adopted.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.122 Authorized activities.

(a) Except as provided in paragraph (b) of this section, an NPO may apply for any activity that is designed to support the development or implementation of a qualifying plan. These activities include, but are not limited to—

(1) Encouraging parental and community involvement in matters relating to the development or implementation of the plan;

(2) Providing information to parents and community members on the contents of the plan;

(3) Monitoring the implementation of the plan;

(4) Carrying out activities designed to promote interracial and intercultural understanding among students who are affected by, or are reasonably likely to be affected by, the implementation of the plan;

(5) Carrying out activities designed to stimulate a desire to learn in those students;

(6) Addressing non-academic problems faced by those students—at home, in school, or in the community—that affect their adjustment to schools to which the plan relates;

(7) Promoting student understanding of and support for the plan;

(8) Providing training to LEA staff related to the development or implementation of the plan; and

(9) Providing specialized technical assistance to LEA staff in areas related to the development or implementation of the plan, such as the development of affirmative action programs or the review of curricular materials.

(b)(1) An NPO may not use funds under this subpart in connection with the provision of compensatory education or the development of basic skills.

(2) An NPO may not use funds under this subpart for monitoring the implementation of the plan where a court-appointed group is conducting a similar activity.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.123 Application procedures.

(a) An NPO may include in an application activities in support of only one qualifying plan. However, an NPO may submit more than one application.

(b) An NPO shall include in its application a needs assessment that shows the severity of the needs addressed by the proposed activities and the relationship of those needs to the development or implementation of a qualifying plan.

(c) An NPO shall address each selection criterion in §§ 185.126–185.133 that applies to its application.

(d) An NPO that proposes to support the implementation of a qualifying plan shall include in its application—

(1) A copy of the LEA's qualifying plan or a detailed description of that plan; and

(2) The date when the LEA adopted the plan.

(e) An NPO that proposes to support the development of a plan shall include a copy of the LEA's request for that assistance, if a request is required under § 185.121(c).

(f) An NPO shall include in its application an assurance that it has met and will meet the applicable requirements of the Act and this part.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.124 Approval of new projects.

(a) Applications for projects to support the development of qualifying plans and those to support the implementation of qualifying plans are considered separately. The Secretary states in the application notice published in the **Federal Register** the amount of funds available for each type of project.

(b) The Secretary evaluates applications for projects that support the development of qualifying plans on the basis of the selection criteria in §§ 185.127–185.133. The Secretary evaluates applications for projects that support the implementation of qualifying plans on the basis of the selection criteria in §§ 185.126–185.132.

(c) If more than one otherwise approvable project relates to the same qualifying plan, the Secretary—

(1) Reviews the approvable activities to identify any duplication in the needs addressed by those activities; and

(2) In the case of duplication, approves only the activity contained in the highest ranking application.

(d) The Secretary may approve a project period of up to 36 months.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.125 Selection criteria.

The number of points awarded for each criterion depends on how well the application addresses all the factors under the criterion. The total possible score for an implementation grant is 100 points and for a development grant 107 points. The selection criteria in §§ 185.127–185.133 apply to an application for a project that supports the development of a qualifying plan. The selection criteria in §§ 185.126–185.132 apply to an application for a project that supports the implementation of a qualifying plan.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.126 Selection criterion: Recency of qualifying plan (3 points).

(a) In the case of an application for a project that supports the implementation of a qualifying plan, the Secrtary considers the recency of the implementation date of the qualifying plan on which the applicant bases its application.

(b) In assessing the recency of a qualifying plan, the Secretary uses the table set out below. The Secretary assigns each application the number of points in column B that corresponds to the period of time in column A between—

(1) The implementation date of the LEA's plan on which the applicant bases its eligibility, as described in § 185.45(c)(2); and

(2) The July 1 that follows the deadline date for applications under this subpart.

Table

Col. A—Implementation date	Col. B—Points
3 years or less	3
More than 3 years but not more than 6 years	2
More than 6 years	1

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.127 Selection criterion: Need (20 points).

The Secretary considers:

(a) The severity of the needs to be addressed (10 points).

(b) The extent to which the identified needs are directly related to the development or implementation of the qualifying plan (10 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.128 Selection criterion: Project design (40 points).

The Secretary considers the extent to which:

(a) The project objectives are likely to meet the identified needs (10 points).

(b) The proposed activities are designed to meet the objectives within the project period (10 points).

(c) The parents, students, teachers, and community members are involved in the development and implementation of the project (5 points).

(d) The applicant demonstrates sensitivity to the community and the population to be served (5 points).

(e) The applicant's management plan is effective in terms of resource allocation, realistic schedules, and a sufficient amount of time to be spent on the project by the proposed staff members (10 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.129 Selection criterion: Organizational experience (10 points).

The Secretary considers the extent to which the applicant has experience in working effectively with the LEA and with community organizations, especially on matters related to school desegregation and race relations.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.130 Selection criterion: Personnel (15 points).

The Secretary considers the extent to which—

(a) The project director and other key project staff members are qualified on the basis of training and experience, to carry out the project (10 points).

(b) The applicant's staff includes such racial and cultural diversity as may be necessary to facilitate the success of the project (5 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.131 Selection criterion: Evaluation plan (5 points).

The Secretary considers the quality of the proposed plan for evaluating the success of the project in achieving the stated objectives.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.132 Selection criterion: Budget (7 points).

The Secretary considers the extent to which proposed costs are reasonable in relation to the expected benefits of the project.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.133 Selection criterion: Commitment to plan adoption (10 points).

In the case of an application for a project that supports the development of a qualifying plan, the Secretary considers the extent to which the cooperating LEA has demonstrated its commitment to the adoption of a qualifying plan.

(Sec. 608(b); 20 U.S.C. 3198(b))

Note.—The following Appendix will not be published in Title 45 Code of Federal Regulations.

Appendix B—Selection Criteria for Fiscal Year 1980.

The selection criteria in these regulations (§§ 185.125–185.133) do not apply to grants under Subpart G for fiscal year 1980. Instead, the selection criteria contained in the notice of proposed rulemaking published in the **Federal Register** on April 11, 1980, and republished below, apply to those grants.

§ 185.127 Selection criterion: Recency of qualifying plan (10 points).

(a) In the case of an application for a project that supports the implementation of a qualifying plan, the Commissioner considers the recency of the implementation date of the qualifying plan on which the applicant bases its application.

(b) In assessing the recency of a qualifying plan, the Commissioner uses the table set out below. The Commissioner assigns each application the number of points in column B that corresponds to the period of time in column A between—

(1) The implementation date of the LEA's plan on which the applicant bases its eligibility, as described in § 185.35(c)(2); and

(2) The July 1 that follows the deadline date for applications under this subpart.

Table

Col. A—Implementation date	Col. B—Points
3 years or less	10
More than 3 years but not more than 6 years	5
More than 6 years	1

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.128 Selection criterion: Need (20 points).

The Commissioner considers:

(a) The severity of the needs to be addressed (10 points).

(b) The extent to which the identified needs are directly related to the development or implementation of the qualifying plan (10 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.129 Selection criterion: Project design (25 points).

The Commissioner considers the extent to which:

(a) The project objectives are likely to meet the identified needs (5 points).

(b) The proposed activities are designed to meet the objectives within the project period (5 points).

(c) Parents, students, and community members are involved in the development and implementation of the project (5 points).

(d) The applicant demonstrates sensitivity to the community and the population to be served (5 points).

(e) The applicant's management plan is effective in terms of resource allocation, realistic schedules, and a sufficient amount of time to be spent on the project by the proposed staff members (5 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.130 Selection criterion: Organizational experience (10 points).

The Commissioner considers the extent to which the applicant has experience in working effectively with the LEA and with community organizations, especially on matters related to school desegregation and race relations.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.131 Selection criterion: Personnel (15 points).

The Commissioner considers the extent to which the project director and other key project staff members are qualified, on the basis of training and experience, to carry out the project (10 points).

(b) If the applicant's staff does not include members of minority groups, the extent to which the applicant, as part of its nondiscriminatory employment practices, encourages applications for employment from persons who are members of those groups (5 points).

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.132 Selection criterion: Evaluation plan (5 points).

The Commissioner considers the quality of the proposed plan for evaluating the success of the project in achieving the stated objectives.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.133 Selection criterion: Budget (5 points).

The Commissioner considers the extent to which proposed costs are reasonable in relation to the expected benefits of the project.

(Sec. 608(b); 20 U.S.C. 3198(b))

§ 185.134 Selection criterion: Commitment to plan adoption (10 points).

In the case of an application for a project that supports the development of a qualifying plan, the Commissioner considers the extent to which the cooperating LEA is committed to the adoption of a qualifying plan.

(Sec. 608(b); 20 U.S.C. 3198(b))

The authentic text behind the news . . .

The Weekly Compilation of PRESIDENTIAL DOCUMENTS

Administration of Jimmy Carter

This unique service provides up-to-date information on Presidential policies and announcements. It contains the full text of the President's public speeches, statements, messages to Congress, news conferences, personnel appointments and nominations, and other Presidential materials released by the White House.

The Weekly Compilation carries a Monday dateline and covers materials released during the preceding week. Each issue contains an Index of Contents and a Cumulative Index to Prior Issues.

Separate indexes are published quarterly, semiannually, and annually. Other features include lists of acts approved by the President and of nominations submitted to the Senate, a checklist of White House press releases, and a digest of other Presidential activities and White House announcements.

Published by Office of the Federal Register, National Archives and Records Service, General Services Administration

Highlights

FEDERAL REGISTER Published daily, Monday through Friday, (not published on Saturdays, Sundays, or on official holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C. Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The **Federal Register** provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive Orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The **Federal Register** will be furnished by mail to subscribers, free of postage, for $75.00 per year, or $45.00 for six months, payable in advance. The charge for individual copies is $1.00 for each issue, or $1.00 for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the **Federal Register**.

Questions and requests for specific information may be directed to the telephone numbers listed under INFORMATION AND ASSISTANCE in the READER AIDS section of this issue.

54210 **Housing** HUD/FHC publishes general prototype housing costs for one- to four-family dwelling units, effective 8–14–80 (Part V of this issue)

54204 **Housing** HUD/FHC establishes policy on transfer of HUD-insured and owned multifamily housing projects from nonprofit to profit-motivated ownership; effective 9–15–80 (Part IV of this issue)

54087 **Low Income Public Housing and Indian Housing** HUD transmits proposed rule to Congress on maximum limit on total development costs

54115 **Loan Programs—Business and Industry** USDA/FmHA announces 11½ percent insured loan interest rate

54028 **Business and Industry** Commerce establishes Cooperative Generic Technology Program procedures; effective 8–14–80

54173 **Revenue Sharing** Treasury/RSO announces 9–30–80 final date for adjustment demands for Entitlement Period Ten (10–1–78 through 9–30–79)

54036 **Nondiscrimination** Justice/OJARS amends provisions prohibiting discrimination by recipients of its financial assistance programs

54135 **Water Pollution Control** EPA announces availability of Wastewater Treatment Manual (Treatability Manual); comments by 4–1–81

54037 **Maritime Carriers** DOT/CG requires certain oil and hazardous materials carrying vessels to install electronic relative motion analyzers; effective 7–1–82; comments by 9–29–80

54174 **Sunshine Act Meetings**

Federal Register
Vol. 45, No. 159
Thursday, August 14, 1980

Agency for International Development
NOTICES
54149 Organization and functions

Agricultural Marketing Service
RULES
54063 Oranges (Valencia) grown in Ariz and Calif.
54064 Prunes (dried) produced in Calif.
PROPOSED RULES
Milk marketing orders:
54066 New England; hearing

Agriculture Department
See Agricultural Marketing Service; Farmers Home Administration; Federal Grain Inspection Service; Forest Service; Soil Conservation Service.

Alcohol, Drug Abuse, and Mental Health Administration
NOTICES
Meetings; advisory committees:
54142 September

Alcohol, Tobacco and Firearms Bureau
PROPOSED RULES
Alcoholic beverages:
54087 Distilled Spirits Tax Revision Act of 1979; temporary rules; extension of time

Army Department
See also Engineers Corps.
NOTICES
54122 Senior Executive Service Performance Review Boards; membership

Coast Guard
RULES
Boating safety:
54042 Equipment requirements; hand red flares as visual distress signals; correction
Navigation safety regulations:
54037 Electronic relative motion analyzer requirement for self-propelled vessels of 10,000 gross tons or more
PROPOSED RULES
Cargo vessels:
54095 Great Lakes bulk dry vessels; damage stability standards; advance notice
NOTICES
Meetings:
54166 Chemical Transportation Advisory Committee

Commerce Department
See also International Trade Administration; Minority Business Development Agency; National Oceanic and Atmospheric Administration.
RULES
54028 Cooperative generic techology program
NOTICES
Procurement:
54121 Commercial or industrial activities; cost comparison study of government versus contract operations; correction

Commodity Futures Trading Commission
RULES
Commodity Exchange Act regulations:
54032 Associated person registration requirement; "Supervision" scope; interpretation

Conservation and Solar Energy Office
PROPOSED RULES
54264 Alcohol fuels, biomass energy and municipal waste energy projects; loan guarantees

Customs Service
PROPOSED RULES
Administrative rulings:
54085 Ornamented wearing apparel, etc.; classification
NOTICES
Trade name recordation application:
54173 Donkenny, Inc.
54173 R.B.K. Importers, Inc.

Defense Department
See also Army Department; Engineers Corps.
NOTICES
Meetings:
54124 Defense Systems Management College Board of Visitors
54124 Women in Services Advisory Committee

Drug Enforcement Administration
NOTICES
Registration applications, etc.; controlled substances:
54155 Cordova Chemical Co.
54155 Diosynth Inc.; correction
54156 Merck, & Co., Inc.
54156 Penick Corp.
54156 Sterling Drug Inc.

Economic Regulatory Administration
PROPOSED RULES
Petroleum allocation and price regulations:
54069 Equal application rule; sales of gasoline; hearing cancellation
NOTICES
Procurement:
54124 Contract award; proposed

Energy Department
See Conservation and Solar Energy Office; Economic Regulatory Administration; Federal Energy Regulatory Commission.

Engineers Corps
NOTICES
Environmental statements; availability, etc.:
54122 Brazos Island Harbor Channel, Tex.
54123 Palo Blanco and Cibolo Creeks, Tex.; flood control study
54123 Rippowam River Basin Study, Conn. and N.Y.

Environmental Protection Agency
RULES
54072, VOR Federal airways (4 documents)
54074

NOTICES

Environmental Protection Agency
RULES
Air quality implementation plans; approval and promulgation; various States, etc.:
54042 West Virginia
Air quality planning purposes; designation of areas:
54052 West Virginia
Pesticide chemicals in or on raw agricultural commodities; tolerances and exemptions, etc.:
54053 Cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate
Pesticides; tolerances in food:
54035 Cyano(3-phenoxyhenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate
PROPOSED RULES
Air programs; fuel and fuel additives:
54090 Gasoline refiners; lead phase-down regulations; repeal petition denied
Air quality implementation plans; approval and promulgation; various States, etc.:
54088, 54089 West Virginia (2 documents)
Pesticide programs:
54094 Biorational pesticides; data requirements; registration guidelines for U.S. and chemistry guidelines; meeting
NOTICES
Air pollution control, new motor vehicles and engines:
54126, 54130, 54132 California (3 documents)
Air quality implementation plans; approval and promulgation:
54139 Prevention of significant air quality deterioration (PSD); final determination
Water pollution control:
54135 National pollutant discharge elimination system; wastewater treatment manual (treatability manual); availability

Farmers Home Administration
NOTICES
54115 Business and industrial loans, insured; interest rates

Federal Aviation Administration
RULES
Airworthiness directives:
54013 Aerosonic Corp.
54012, 54014 Bell (2 documents)
54014 Dowty Rotol
54013 Sikorsky
54028 Restricted areas
54015 Terminal control areas
54027 Transition areas (2 documents)
54028 Transition areas; correction
PROPOSED RULES
Airworthiness directives:
54071 Bell
54072 Boeing
54073 Control zones
54081 Jet routes
54081 Jet routes; correction
54076–54080 Transition areas; (7 documents)

Rules and Regulations

Federal Register
Vol. 45, No. 159
Thursday, August 14, 1980

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect, most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.
The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

FEDERAL RESERVE SYSTEM

12 CFR Part 201

[Docket No. R-0307]

Extensions of Credit by Federal Reserve Banks

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Final rule.

SUMMARY: The Monetary Control Act of 1980 (Title I of Pub. L. 96–221) provides that a depository institution that maintains transaction accounts or nonpersonal time deposits is entitled to the same discount and borrowing privileges as banks that are members of the Federal Reserve System. In order to implement this provision, the Board has revised its rules relating to the provision of Federal Reserve credit presently contained in Regulation A—Extensions of Credit by Federal Reserve Banks (12 CFR Part 201).

EFFECTIVE DATE: September 1, 1980.

FOR FURTHER INFORMATION CONTACT: Gilbert T. Schwartz, Assistant General Counsel (202/452–3625), Paul S. Pilecki, Attorney (202/452–3281), or John Spitzer, Senior Economist (202/452–2587), Board of Governors of the Federal Reserve System, Washington, D.C.

SUPPLEMENTARY INFORMATION: The Monetary Control Act of 1980 (Title I of Pub. L. 96–221) provides that any depository institution that holds transaction accounts or nonpersonal time deposits subject to Federal Reserve requirements shall be entitled to the same discount and borrowing privileges as member banks. On June 10, 1980, the board solicited public comments on a proposed revision of its rules regarding access to Federal Reserve credit currently provided for in Regulation A—Extensions of Credit by Federal Reserve Banks (12 CFR Part 201) (45 FR 40130). After consideration of the comments received, the Board has determined to adopt the regulation substantially in the form proposed on June 10, 1980. Certain technical amendments have been made to clarify the regulation further.

The regulation provides that Federal Reserve credit may be offered under two basic programs—adjustment and extended. Nonmember depository institutions that are now eligible to borrow from the Federal Reserve, like member banks, generally, are expected to rely on other reasonable available sources of funds before turning to the discount window for assistance. Consequently, institutions that have access to credit programs provided by Federal Home Loan Banks, credit union centrals, the Central Liquidity Facility of the National Credit Union Administration or other specialized industry lenders are expected to seek assistance from these sources prior to requesting credit from the Federal Reserve. A number of comments were received concerning this requirement. While some supported the concept, others indicated that they did not believe it appropriate to require a depository institution to seek funds from other available sources prior to turning to the Federal Reserve for assistance. The Board believes that continuation of this requirement, which applies to member banks, is appropriate. The credit facilities of the Federal Reserve are not intended to supplant other reasonable available sources of funds, and use of Federal Reserve credit facilities is regarded as appropriate only when these other alternatives have been fully used. In instances where depository institutions require funds on short notice to cover immediate cash or reserve needs and are unable to gain timely access to their special industry lenders, the Federal Reserve is prepared to advance funds through its discount window. On these occasions the Federal Reserve will consult and coordinate with the special industry lender as soon as possible. Any such advances made will be viewed as strictly temporary and will be expected to be repaid when access to usual sources of funds is secured, usually the next business day.

The primary form of Federal Reserve lending will continue to be short-term *adjustment* credit. Such credit is available on a short-term basis to assist borrowers in meeting temporary requirements for funds, or to cushion more persistent fund outflows pending an orderly adjustment of the borrower's assets and liabilities. Borrowing is not permitted to take advantage of a favorable spread between the discount rate and other market rates, to add to investment portfolios, or to finance a program of loan expansion.

Interest on Federal Reserve adjustment credit will generally be at the basic discount rate. However, the Federal Reserve retains the option to impose a surcharge in addition to the baic rate. While the discount rate surcharge introduced for a brief period earlier this year applied only to large institutions, any surcharge that may be imposed may apply to all institutions that are eligible to borrow depending upon the length and frequency of the borrowing.

In addition to the short-term adjustment credit program, under the regulation adopted by the Board *extended* credit will be available under certain limited conditions. Regular arrangements for providing seasonal credit to smaller institutions that lack ready access to national money markets or to special industry lenders such as the Federal Home Loan Banks, credit union centrals, or the Central Liquidity Facility will remain in effect. In determining a depository institution's eligibility for seasonal credit, Federal Reserve Bank discount officers will give weight not only to its historical record of seasonally adjusted loan and deposit performance, but will also take into account evidence with regard to changing patterns of recent and prospective needs for funds and liquidity conditions at the institution. The special program for seasonal credit adopted as a temporary measure on April 17, 1980, will be terminated on September 1, 1980, when the new regulation becomes effective.

Extended credit will also be available to meet the needs of a depository institution experiencing difficulties arising from exceptional circumstances or practices involving only that institution, where the provision of such temporary assistance is in the public interest and the needed funds are not available from other sources. In addition, when conditions warrant, extended credit will be available to accommodate the needs of institutions, including those with longer term asset

portfolios, that may be experiencing

PART 201—EXTENSIONS OF CREDIT

important bearing on overall monetary

be imposed above the basic rate of interest normally charged by Reserve

the Board of Governors, may be applied to other extended credit.

and (2) shall consider such information in determining whether to extend credit.

portfolios, that may be experiencing difficulties adjusting to changing money market conditions. These advances may be extended over a longer period than contemplated in the use of adjustment credit, particularly at times of deposit disintermediation. In cases where there may be serious liquidity strains affecting a broad range of depository institutions, Federal Reserve Banks will be prepared to address the problems of particular institutions being affected by the general situation. Before extending credit, however, the Reserve Bank will be expected to consult with other official agencies responsible for supervising the institution affected to determine, among other things, why funds are not available from other sources. Loan agreements will be drawn to establish the conditions under which credit is being advanced and to assure that the borrower adopts an appropriate plan to restore adequate liquidity and to repay the loan in a reasonable period of time.

Advances made under the seasonal credit program will be at the basic discount rate, but, as with adjustment credit, the Federal Reserve reserves the option to impose a surcharge in addition to the basic rate. Depending on market conditions, a special rate above the basic discount rate may be applied to other extended credit.

Section 201.5(d) of Regulation A currently provides that obligations of customers tendered for discount or as collateral for an advance generally may not exceed the limitations of section 5200 of the Revised Statutes (12 U.S.C. 84) applicable to the lending limitations for one obligor. While this restriction is required by law (12 U.S.C. 345) to apply to discounted paper, there is no statutory requirement that it apply to collateral for advances, which is the principal way in which Federal Reserve credit is extended. Accordingly, the Board will no longer require that collateral tendered as security for advances comply with the lending limitations of 12 U.S.C. 84. However, Reserve Banks may, for prudential purposes, impose limitations on the maximum amount of obligations of one customer that may be tendered as collateral for advances.

Pursuant to authority under sections 10(a), 10(b), 13, 13a, and 19 of the Federal Reserve Act (12 U.S.C. §§ 347a, 347b, 343–347, 347c, 347d, 348–352, 374, 374a, and 461), as amended by the Monetary Control Act of 1980 (Title I, Pub. L. 96–221; 94 Stat. 132), effective September 1, 1980, the Board amends Regulation A (12 CFR Part 201) to read as follows:

PART 201—EXTENSIONS OF CREDIT BY FEDERAL RESERVE BANKS

Sec.
201.1 Authority, scope and purpose.
201.2 Definitions.
201.3 Availability and terms.
201.4 Advances and discounts.
201.5 General requirements.
201.6 Federal Intermediate Credit Banks.

Authority: Sections 10(a), 10(b), 13, 13a, and 19 of the Federal Reserve Act, 12 U.S.C. 347a, 347b, 343 *et seq.*, 347c, 348 *et seq.*, 374, 374a, and 461, Section 7(b) of the International Banking Act of 1978, 12 U.S.C. 347d.

§ 201.1 Authority, scope and purpose.

(a) *Authority and Scope.* This Part is issued under the authority of sections 10(a), 10(b), 13, 13a, and 19 of the Federal Reserve Act (12 U.S.C. §§ 347a, 347b, 343 *et seq.*, 347c, 348 *et seq.*, 374, 374a and 461), other provisions of the Federal Reserve Act, and section 7(b) of the International Banking Act of 1978 (12 U.S.C. § 347d) and relates to extensions of credit by Reserve Banks to depository institutions and others. Except as may be otherwise provided, this Part shall be applicable to United States branches and agencies of foreign banks subject to reserve requirements under Regulations D (12 CFR Part 204) in the same manner and to the same extent as member banks.

(b) *Purpose.* This Part establishes rules under which Federal Reserve Banks may extend credit to depository institutions and others. Extending credit to depository institutions to accommodate commerce, industry, and agriculture is a principal function of Reserve Banks. While open market operations are the primary means of affecting the overall supply of reserves, the lending function of the Reserve Banks is an effective method of supplying reserves to meet the particular credit needs of individual depository institutions. The lending functions of the Federal Reserve System are conducted with due regard to the basic objectives of monetary policy and the maintenance of a sound and orderly financial system. These basic objectives are promoted by influencing the overall volume and cost of credit through actions that affect the volume and cost of reserves to depository institutions. Borrowing by individual depository institutions, at a rate of interest that is adjusted from time to time in accordance with prevailing economic and money market conditions, has a direct impact on the reserve positions of the borrowing institutions and thus on their ability to meet the credit needs of their customers. However, the effects of such borrowing do not remain localized but have an important bearing on overall monetary and credit conditions.

§ 201.2 Definitions.

For purpose of this Part, the following definitions shall apply:

(a)(1) *"Depository institution"* means an institution that maintains reservable transaction accounts or nonpersonal time deposits and is:

(A) An insured bank as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813(h)) or a bank that is eligible to apply to become an insured bank under section 5 of such Act (12 U.S.C. 1815);

(B) A savings bank or mutual savings bank as defined in section 3 of the Federal Deposit Insurance Act (12 U.S.C. 1813(f), (g));

(C) An insured credit union as defined in section 101 of the Federal Credit Union Act (12 U.S.C. 1752(7)) or a credit union that is eligible to apply to become an insured credit union under section 201 of such Act (12 U.S.C. 1781);

(D) A member as defined in section 2 of the Federal Home Loan Bank Act (12 U.S.C. 1422(4)); or

(E) An insured institution as defined in section 401 of the National Housing Act (12 U.S.C. 1724(a)) or an institution that is eligible to apply to become an insured institution under section 403 of such Act (12 U.S.C. 1728).

(2) A financial institution that is not required to maintain reserves under Part 204 of this Title (Regulation D) because it is organized solely to do business with other financial institutions, is owned primarily by the financial institutions with which it does business, and does not do business with the general public is not a depository institution.

(b) *"Transaction account and nonpersonal time deposits"* have the meanings specified in Part 204 of this Title (Regulation D).

§ 201.3 Availability and terms.

(a) *Short-term adjustment credit.* Federal Reserve credit is available on a short-term basis to a depository institution under such rules as may be prescribed to assist the institution, to the extent appropriate, in meeting temporary requirements for funds, or to cushion more persistent outflows of funds pending an orderly adjustment of the institution's assets and liabilities. Such credit generally is available only after reasonable alternative sources of funds, including credit from special industry lenders, such as Federal Home Loan Banks, the National Credit Union Administration's Central Liquidity Facility, and corporate central credit unions have been fully used. Under certain circumstances, a surcharge may be imposed above the basic rate of interest normally charged by Reserve Banks.

(b) *Extended credit*—(1) *Seasonal credit.* Federal Reserve credit is available for periods longer than those permitted under adjustment credit to assist smaller depository institutions in meeting regular needs for funds arising from a combination of expected patterns of movement in their deposits and loans. Seasonal credit is available only if similar assistance is not available from other special industry lenders. Seasonal credit will ordinarily be limited to the amount by which the depository institution's seasonal needs exceed certain percentages, established by the Board of Governors, of the institution's average total deposits in the preceding calendar year. Such credit will be available if the Reserve Bank is satisfied that the institution's qualifying need for funds is seasonal and will persist for at least four weeks. Need for credit at depository institutions will also be given consideration when institutions are experiencing unusual seasonal demands for credit in a period of liquidity strain. To the extent practicable, a depository institution should arrange in advance for seasonal credit for the full period during which such credit is expected to be required. Under certain circumstances, a surcharge may be imposed above the basic rate of interest normally charged by Reserve Banks.

(2) *Other extended credit.* Federal Reserve credit is available to depository institutions under extended credit arrangements where similar assistance is not reasonably available from other sources, including special industry lenders. Such credit may be provided where there are exceptional circumstances or practices involving only a particular depository institution. Exceptional circumstances would include situations where an individual depository institution is experiencing financial strains arising from particular circumstances or practices affecting that institution—including sustained deposit drains, impaired access to money market funds, or sudden deterioration in loan repayment performance. Extended credit may also be provided to accommodate the needs of depository institutions, including those with longer term asset portfolios, that may be experiencing difficulties adjusting to changing money market conditions over a longer period, particularly at times of deposit disintermediation. A special rate or rates above the basic discount rate established by the Reserve Banks, subject to review and determination by the Board of Governors, may be applied to other extended credit.

(c) *Emergency credit for others.* In unusual and exigent circumstances, a Reserve Bank may, after consultation with the Board, advance credit to individuals, partnerships, and corporations that are not depository institutions if, in the judgment of the Reserve Bank, credit is not available from other sources and failure to obtain such credit would adversely affect the economy. The rate applicable to such credit will be above the highest rate for advances in effect for depository institutions. Where the collateral used to secure such credit consists of assets other than obligations of, or fully guaranteed as to principal and interest by, the United States or an agency thereof, an affirmative vote of five or more Board members is required before credit may be extended.

§ 201.4 Advances and discounts.

(a) Reserve Banks may lend to depository institutions either through advances secured by acceptable collateral or through the discount of certain types of paper. Credit extended by the Federal Reserve generally takes the form of an advance.

(b) Reserve Banks may make advances to any depository institution if secured to the satisfaction of the Reserve Bank. Satisfactory collateral generally includes United States government and Federal agency securities, and, if of acceptable quality, mortgage notes covering 1–4 family residences, State and local government securities, and business, consumer and other customer notes.

(c) If a Reserve Bank concludes that a depository institution will be better accommodated by the discount of paper than by an advance, it may discount any paper endorsed by the depository institution that meets the requirements specified in the Federal Reserve Act.

§ 201.5 General requirements.

(a) *Credit for capital purposes.* Federal Reserve credit is not a substitute for capital.

(b) *Compliance with law and regulation.* All credit extended under this Part shall comply with applicable requirements of law and of this Part. Each Reserve Bank (1) shall keep itself informed of the general character and amount of the loans and investments of depository institutions with a view of ascertaining whether undue use is being made of credit for the speculative carrying of or trading in securities, real estate, or commodities, or for any other purpose inconsistent with the maintenance of sound credit conditions, and (2) shall consider such information in determining whether to extend credit.

(c) *Information.* A Reserve Bank shall require such information as it believes appropriate or desirable to insure that paper tendered as collateral for advances or for discount is acceptable and that the credit provided is used in a manner consistent with this Part.

(d) *Indirect credit for others.* Except with the permission of the Board of Governors, no depository institution shall act as the medium or agent of another depository institution in receiving Federal Reserve credit.

§ 201.6 Federal Intermediate Credit Banks.

A Reserve Bank may discount for any Federal Intermediate Credit bank (1) agricultural paper, or (2) notes payable to and bearing the endorsement of the Federal Intermediate Credit Bank that cover loans or advances made under subsections (a) and (b) of section 2.3 of the Farm Credit Act of 1971 (12 U.S.C. 2074) and that are secured by paper eligible for discount by Reserve Banks. Any paper so discounted shall have a period remaining to maturity at the time of discount of not more than nine months.

By order of the Board of Governors, August 11, 1980.

Theodore E. Allison,
Secretary of the Board.

BILLING CODE 6210-01-M

---

12 CFR Part 265

[Docket No. R-0321]

Delegation of Authority to Determine Preemption and to Grant Exemptions

AGENCY: Board of Governors of the Federal Reserve System.
ACTION: Final rule.

SUMMARY: As permitted by section 11(k) of the Federal Reserve Act, this rule delegates to the Director of the Division of Consumer and Community Affairs the authority to determine whether provisions of the Electronic Fund Transfer Act and Regulation E preempt provisions of state laws that are inconsistent with federal law and are not more protective of the consumer. In addition, the rule delegates to the Director the authority to grant, but not to deny or revoke, exemptions to states if their statutes contain provisions substantially similar to the federal statute and there is adequate provision for enforcement. Because of the complex and time-consuming nature of these decisions, the Board finds that this delegation of authority is appropriate.

EFFECTIVE DATE: August 8, 1980.

FOR FURTHER INFORMATION CONTACT:
Susan Werthan, Staff Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3867).

SUPPLEMENTARY INFORMATION: (1) The Board has delegated authority to the Director of the Division of Consumer and Community Affairs to determine whether provisions of the Electronic Fund Transfer Act preempt state laws relating to electronic fund transfers. The Director has authority to decide, under section 919 of the Electronic Fund Transfer Act and Regulation E (12 CFR 205.12), whether state law provisions are inconsistent with and preempted by federal law. If inconsistent state law provisions are more protective of the consumer, they shall not be preempted.

The Board has also delegated the authority to grant, but not to deny or revoke, exemptions to states. If the Director determines, under section 920 of the Electronic Fund Transfer Act and § 205.12 of Regulation E, that provisions of a state law are substantially similar to the federal statute and there is adequate provision for enforcement, any class of electronic fund transfers in that state may be exempted from the federal requirements.

The Board finds that delegation of its authority to make preemption and exemption decisions is necessary because of the highly technical and time-consuming nature of these decisions. The complexity of each statute is compounded by the difficulty of comparing provisions of different statutes. In addition, the existence of more than 20 state electronic fund transfer statutes indicates that there will be many requests for preemption and exemption determinations.

(2) The Board finds that the notice, public procedure, and deferral of effective date provisions of 5 U.S.C. 553(b) are unnecessary in connection with this proceeding because it relates to agency procedures. For the same reasons, the expanded rule-making procedures set forth in the Board's policy statement of January 15, 1979 (44 FR 3957), will not be followed in connection with this proceeding.

(3) Pursuant to the provisions of section 11(k) of the Federal Reserve Act (12 U.S.C. 248(k)), the Board hereby amends 12 CFR 265.2 by revising paragraph (h) and by adding two paragraphs, effective immediately, to read as follows:

§ 265.2 Specific functions delegated to Board employees and to Federal Reserve Banks.

* * * * *

(h) The Director of the Division of Consumer and Community Affairs (or, in the Director's absence, the Acting Director) is authorized:

* * * * *

(4)(i) Pursuant to Section 919 of the Electronic Fund Transfer Act (15 U.S.C. 1693, et seq.) and the Board's Regulation E, 12 CFR 205.12, to determine whether the act and regulation preempt state laws that are inconsistent with the act and regulation,

(ii) Pursuant to Section 920 of the Electronic Fund Transfer Act and Regulation E, to grant, but not deny or revoke, exemptions to states from the requirements of the act or regulation, where state law imposes substantially similar requirements and there is adequate provision for enforcement.

Dated: August 8, 1980.

By order of the Board of Governors,

Theodore E. Allison,

Secretary of the Board.

[FR Doc. 80-24552 Filed 8-13-80; 8:45 am]

BILLING CODE 6210-01-M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Airworthiness Docket No. 80-ASW-18; Amdt. 39-3875]

Airworthiness Directives: Bell Models 206A, 206B, 206A-1, 206B-1, and 206L Helicopters

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) which requires repetitive inspections on all models, replacement as necessary, and a reduction in service life on the Model 206L, for tail rotor blades, P/N 206-010-750-005 and -007, installed on Bell Models 206A, 206B, 206A-1, 206B-1, and 206L helicopters. The AD is needed to prevent inflight failure of the tail rotor blades, P/N 206-010-750-005 and -007, with resulting loss of helicopter control.

DATES: Effective September 10, 1980. Compliance required as prescribed in the AD.

ADDRESSES: Copies of the applicable service information may be obtained from the Regional Counsel, Attention: Docket No. 80-ASW-18, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. Bell Service Information may be obtained from Product Support Department, Bell Helicopter Textron, P.O. Box 482, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:
Tom Dragset, Airframe Section, Engineering and Manufacturing Branch, ASW-212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas, telephone number (817) 624-4911, extension 517.

SUPPLEMENTARY INFORMATION: A proposal to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive (AD) requiring repetitive inspections on all models, replacement as necessary, and a reduction in service life on the Model 206L, for tail rotor blades, P/N 206-010-750-005 and -007, installed on Bell Models 206A, 206B, 206A-1, 206B-1, and 206L helicopters was published in 45 FR 38402 June 9, 1980.

The proposal was prompted by six reported cases of blade skin chordwise cracks at tail rotor blade Station 9.1 on the Bell Model 206B and 206L helicopters. Four of these occurred on the 206B and two on the 206L. All cracks were discovered during the daily inspection. Reported blades had 530 to 1,105 hours' time in service. Operations Safety Notice 206-79-5/206L-79-2 dated December 4, 1979, was issued on this subject and alerted operators on the importance of the daily inspection.

There has been one inflight failure of the subject blade on a military helicopter. The blade had 880 hours' time in service, and the failure was the result of an undetected crack.

Interested persons have been afforded the opportunity to participate in the making of the amendment. One response was received from the National Transportation Safety Board in support of the proposal. Accordingly, the proposal is adopted without change.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Bell: Applies to Models 206A, 206B, 206A-1, 206B-1, and 206L helicopters equipped with tail rotor blades, P/N 206-010-750-005 and -007, certificated in all categories (Airworthiness Docket No. 80-ASW-18).

Compliance required as indicated.

To prevent possible failure of tail rotor blades, P/N 206-010-750-005 and -007, due to fatigue cracks, accomplish the following:

a. Before the first flight of each day after the effective date of this AD, visually check for chordwise cracks in the tail rotor blade skin surfaces in the area between Blade Station 7.1 and 11.1 using a three-power or higher magnifying glass. (Blade Station 0 is the center of the tail rotor yoke.)

b. Replace tail rotor blades having cracks before further flight.

c. Blades with 450 or more hours' time in service (as calculated in paragraph (e) below) on the effective date of this AD must be removed from service within the next 50 hours' time in service.

d. Blades with less than 450 hours' time in service (as calculated in paragraph (e) below) on the effective date of this AD must be removed from service prior to or on attaining 500 hours' time in service.

e. For purposes of this AD, hours' time in service is calculated by the following formula:

Time on 206A/B÷2.4 Series+Time on 206L=Calculated Time in Service

f. The check required by paragraph (a) of this AD may be performed by the pilot, providing the pilot's logbook has been endorsed by a properly rated mechanic stating that the pilot has been trained to conduct the daily check in accordance with this AD.

Note.—For the requirements regarding the listing of compliance with this AD in the aircraft maintenance record, see FAR 91.173.

(Bell Helicopter Textron Operations Safety Notice No. 206-79-5/206L-79-2, dated December 4, 1979; Alert Service Bulletin Nos. 206-80-6 dated February 22, 1980, and 206L-80-8, Rev. A, dated June 3, 1980; and Technical Bulletin Nos. 206-78-3 dated July 18, 1978, and 206L-79-38 dated September 28, 1979, pertain to this subject.)

This amendment becomes effective September 10, 1980.

(Secs. 313(a), 601 and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Issued in Fort Worth, Texas, on July 31, 1980.

C. R. Melugin, Jr.,

Director, Southwest Region.

[FR Doc. 80-24429 Filed 8-13-80; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 80-NE-34; Amdt. 39-3877]

Airworthiness Directives; Sikorsky S-61 Series Helicopters Certified in All Categories

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD), which establishes new replacement times for the main rotor horizontal hinge pins of Sikorsky S-61 series helicopters. These times are required to prevent fatigue failures of these horizontal hinge pins.

EFFECTIVE DATE: This amendment becomes effective on August 15, 1980.

FOR FURTHER INFORMATION CONTACT:
William E. Garlock, Airframe Section, ANE-212, Engineering and Manufacturing Branch, Flight Standards Division, New England Region, Federal Aviation Administration, 12 New England Executive Park, Burlington, Massachusetts 01803; telephone: (617) 273-7336.

SUPPLEMENTARY INFORMATION: As a result of a review of engineering analysis and the utilization of recent methodology, new replacement times have been developed, for Sikorsky S-61 main rotor hub horizontal hinge pins. The FAA has, therefore, determined that S-61 series horizontal hinge pins must be replaced prior to these new times.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable, and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator (14 CFR 11.89), § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new AD:

Sikorsky Aircraft: Applies to S-61 series helicopters certificated in all categories, including military counterparts. Compliance required as indicated. To prevent fatigue failures of the horizontal hinge pins: Replace the Rotary Wing Hub Horizontal Hinge Pin P/N S6110-23020 and S6110-23320 prior to 4000 and 5300 hours time in service, respectively, or within 25 hours time in service after the effective date of this AD, whichever occurs later. This AD is effective August 15, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a final regulation which is not considered to be significant under Executive Order 12044 as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). In addition, the expected impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Burlington, Massachusetts, on July 31, 1980.

Robert E. Whittington,

Director, New England Region.

[FR Doc. 80-24430 Filed 8-13-80; 8:45 am]

BILLING CODE 4910-13-M

14 CFR Part 39

[Docket No. 80-SO-39; Amdt. No. 39-3873]

Airworthiness Directives; Aerosonic Corp. Fuel Flow Transducers, Part Numbers 33184-1 and 32622-6

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new Airworthiness Directive (AD) which requires that Aerosonic Corporation Fuel Flow Transducers, Part Numbers 33184-1 and 32622-6, to be inspected and as applicable, removed and replaced on all affected airplanes. The AD is prompted by a report in which an Aerosonic Fuel Flow Transducer failed and resulted in an in-flight engine fire.

DATES: Effective August 14, 1980. Compliance as prescribed in body of AD.

ADDRESSES: The applicable service bulletins may be obtained from Aerosonic Corporation, P.O. Box 4627, Clearwater, Florida 33518, telephone (813) 461-3000.

A copy of the applicable service bulletins are also contained in the Rules Docket, Room 275, Engineering and Manufacturing Branch, FAA, Southern Region, 3400 Norman Berry Drive, East Point, Georgia.

FOR FURTHER INFORMATION CONTACT:
John J. Lyness, Manufacturing Inspection Section, Engineering and Manufacturing Branch, FAA, Southern Region, P.O. Box 20636, Atlanta, Georgia 30320, telephone (404) 763-7280.

SUPPLEMENTARY INFORMATION: There has been a report in which an Aerosonic Fuel Flow Transducer epoxy plug was found displaced causing fuel leakage which resulted in an in-flight fire. Since this condition is likely to exist or develop on other products of the same type design, an Airworthiness Directive is being issued which requires an inspection and as applicable, the removal and replacement of Aerosonic Fuel Flow Transducers, Part Numbers 33184-1 and 32622-6, except those identified with "FLO-SCAN" on the bottom.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and

public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new Airworthiness Directive (AD):

Aerosonic Corp. Applies to all Aerosonic Fuel Flow Transducers, Part Numbers 33184–1 and 32622–6, installed on, but not limited to, Cessna Models 335, 340A, 402B, 404, 414A, and 421C; Mooney Aircraft Corporation Models M20J and M20K; and Piper Aircraft Aerostar Models 600, 601, and 601P airplanes certificated in all categories.

Compliance is required as indicated unless already accomplished.

To prevent possible fuel leakage, accomplish the following within the next 25 hours time in service after the effective date of this AD:

(a) Inspect for installation of Aerosonic Fuel Flow Transducers Part Numbers 33184–1 or 32622–6 (name plate has part number identification). If the Transducer(s) is identified with the word "FLO–SCAN" on the bottom, or is identified with an Aerosonic part number other than 33184–1 or 32622–6, or any other manufacturer's part number the unit(s) is acceptable.

(b) Remove Aerosonic Fuel Flow Transducers, Part Numbers 33184–1 and 32622–6 (except "FLO–SCAN") identified in paragraph (a) and reinstall Aerosonic replacement units identified with "FLO–SCAN," Serial Numbers 5000 and up.

(c) Accomplish the following in accordance with Aerosonic Service Bulletin No. 1 dated June 30, 1980, or Service Bulletin No. 2 dated June 26, 1980, as applicable:

(1) Torque fittings to 25–30 ft. lbs.

(2) Perform a system leak check.

(d) Make an appropriate entry in the aircraft maintenance record.

An equivalent method of compliance may be approved by the Chief, Engineering and Manufacturing Branch, Federal Aviation Administration, Southern Region.

This amendment becomes effective August 14, 1980.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). A copy of the final evaluation prepared for this action is contained in the regulatory docket. A copy of it may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT."

Issued in East Point, Georgia, on July 30, 1980.

George R. LaCaille,

[Docket No. 80–GL–13–AD; Amdt. 39–3879]

Airworthiness Directives; Dowty Rotol (c)R.289/3 Propellers

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action publishes in the **Federal Register** and makes effective as to all persons an amendment adopting a new airworthiness directive (AD) which was previously made effective by airmail letter dated July 18, 1980 on Dowty Rotol (c)R.289/3–110–F/1 and (c)R.289/3–110–F/11 propellers installed on the WSK-Pezetel Model PZL–3S engine used on Gulfstream American (formerly Grumman) Model G–164A, B, C airplanes modified by Supplemental Type Certificate (STC) SA2731SW, and Ayres (formerly Rockwell) Model S2R–R3S, and model S2R airplanes modified by STC SA3897WE. The AD is needed to prevent possible propeller blade tip failures and requires installation of a placard in the cockpit to alert the pilot of a restricted operating range.

DATES: Effective August 20, 1980. Compliance required within 10 operating hours after the effective date of the AD, unless already accomplished.

ADDRESSES: None. No service document is required for compliance with this AD.

FOR FURTHER INFORMATION CONTACT: Bob Alpiser, Flight Standards Division, Engineering and Manufacturing Branch, AGL–214, FAA, 2300 East Devon Avenue, Des Plaines, Illinois 60018, telephone 312–694–4500, extension 308.

SUPPLEMENTARY INFORMATION: There have been two reports of propeller blade tip failures which were attributed to engine induced vibration at high power and low r.p.m. Since this condition is likely to exist on other engine/propeller combinations of the same design, an Airworthiness Directive is being issued which requires installation of a placard in the cockpit to alert the pilot of a restricted operating range.

Since a situation exists that requires the immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective immediately.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) is amended, by adding the following new Airworthiness Directive:

Dowty Rotol: Applies to Dowty Rotol (c)R.289/3–110–F/1 and (c)R.289/3–110–F/11 propellers installed on the WSK-Pezetel Model PZL–3S engine used on Gulfstream American (formerly Grumman) Model G–164A, B, C airplanes modified by STC SA2731SW, and Ayres (formerly Rockwell) Model S2R–R3S, and model S2R airplanes modified by STC SA3897WE.

Compliance is required as indicated unless previously accomplished. To preclude the possibility of blade tip failures, accomplish the following:

Within the next 10 hours time in service after the effective date of this AD, install in the cockpit as near the engine tachometer as possible and in clear view of the pilot a placard which reads, "AVOID MP ABOVE 26 IN. HG. BELOW 1950 RPM." The placard may be fabricated locally, using 5/32 inch high red lettering on a white background.

Upon request of the operator, an equivalent means of compliance with the requirement of this AD may be approved by the Chief, Engineering and manufacturing Branch, FAA, Great Lakes Region.

This amendment becomes effective August 20, 1980 as to all persons except those to whom it was made immedately effectively by the airmail letter dated July 18, 1980, which contained this amendment.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Note.—Due to the emergency nature of this AD, it is impracticable to follow the regulatory procedures prescribed by Executive Order 12044 as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Des Plaines, Illinois, on July 29, 1980.

Kenneth C. Patterson,

Acting Director, Great Lakes Region.

BILLING CODE 4910-13-M

14 CFR Part 39

[Airworthiness Docket No. 80–ASW–25; Amdt. 39–3876]

Bell Models 204B, 205A–1, 212, 214B, and 214B–1 Helicopters; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment adopts a new airworthiness directive (AD) that provides for a reduction in retirement time from 2,400 hours to 1,200 hours or 2 years total time in service for the main rotor blade tension-torsion straps used on Bell Models 204B, 205A–1, 212, and 214B series helicopters. The AD is needed to preclude possible failure of a tension-torsion strap and loss of a main rotor blade.

DATES: Effective September 15, 1980. Compliance required as indicated in the AD.

ADDRESSES: A copy of the service bulletins may be obtained from the Regional Counsel, Attention: Docket No. 80–ASW–25, Southwest Region, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas 76101. Bell service information may be obtained from Product Support Department, P.O. Box 482, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT: James H. Major, Airframe Section, Engineering and Manufacturing Branch, ASW–212, Federal Aviation Administration, P.O. Box 1689, Fort Worth, Texas, telephone number (817) 624–4911, extension 516.

SUPPLEMENTARY INFORMATION: A proposal was issued to amend Part 39 of the Federal Aviation Regulations to include an airworthiness directive requiring replacement of certain main rotor blade tension-torsion straps on or before attaining 1,200 hours' total time in service, or require replacement on or before attaining 24 months' elapsed time from initial release to service, whichever comes first, for the Bell Models 204B, 205A–1, 212, 214B, and 214B–1 helicopters and the UH–1 series military helicopters. The proposal to establish a retirement time based on calendar time or time in service, whichever would occur first, was published in 45 FR 38403 on June 9, 1980.

The proposal was prompted by an offshore accident of a Bell Model 212 helicopter in which a main rotor blade tension-torsion strap, P/N 204–012–122–1, reportedly failed in flight after 2,140 hours' time in service with resulting loss of the main rotor blade. The investigation into the cause of the strap failure is still continuing. However, preliminary information indicates fatigue failures of individual wires have occurred.

Interested persons have been afforded an opportunity to participate in the making of the amendment. No objections were received. Only the National Transportation Safety Board (NTSB) responded to the notice. The NTSB believes this action is needed to provide reasonable safety for similarly equipped aircraft until the cause of the strap failure has been established and permanent corrective action has been implemented.

Accordingly, the proposal is adopted with only a minor editorial change.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) is amended by adding the following new airworthiness directive:

Bell. Applies to Models 204B, 205A–1, 212, 214B, and 214B–1 helicopters and military UH–1 series helicopters certificated in all categories.

Compliance required as indicated for helicopters equipped with main rotor straps, P/N 204–012–122–1, –5, or 214–010–178–1.

To preclude possible separation of a main rotor blade tension-torsion strap and loss of a main rotor blade, accomplish the following:

a. Within the next 100 hours' time in service after the effective date of this airworthiness directive (AD), remove and replace main rotor straps having:

(1) 1,100 or more hours of total time in service on the effective date of this AD, or

(2) 24 or more months elapsed calendar time in service as of the effective date of this AD, whichever comes first.

b. Remove and replace main rotor straps having less than 1,100 hours' total time in service or having less than 24 months elapsed time in service on the effective date of this AD:

(1) Prior to attaining 1,200 hours' total time in service, or

(2) Prior to exceeding 24 months elapsed time in service, whichever comes first.

c. The helicopter may be flown in accordance with FAR's 21.197 and 21.199 to a base where this AD may be accomplished.

(Bell Helicopter Textron Alert Service Bulletin No. 212–80–17 pertains to this subject.)

This amendment becomes effective September 15, 1980.

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of Transportation guidelines (43 FR 9582; March 8, 1978).

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.89)

Issued in Fort Worth, Texas, on July 31, 1980.

C. R. Melugin, Jr.,

Director, Southwest Region.

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 19605/79–APC–1]

Establishment of Group II Terminal Control Area Honolulu, Hawaii

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This amendment establishes a Group II Terminal Control Area (TCA) at Honolulu, Hawaii. The adoption of a TCA at Honolulu was initially proposed as part of a comprehensive FAA program announced by the Administrator on December 27, 1978, for enhanced safety of flight operations in the National Airspace System. This action will increase the capability of the Air Traffic Control (ATC) system to separate all aircraft in the terminal airspace around Honolulu International Airport while providing sufficient flexibility to permit aircraft operating under visual flight rules (VFR) to operate within or outside the TCA. The TCA adopted by this amendment is the product of discussion with a broad representation of the aviation community. In conjunction with this action, the FAA will work cooperatively with local user groups to ensure that the TCA is effective for all users by identifying any adjustments or modifications that appear necessary. Through joint FAA and user cooperation, any problems that arise can then be identified and corrective action taken when necessary.

EFFECTIVE DATE: November 27, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. B. Keith Potts, Airspace and Air Traffic Rules Division (AAT–200), Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue SW., Washington, D.C. 20591; telephone: (202) 426–3731.

SUPPLEMENTARY INFORMATION:

Background

On December 27, 1978, the Administrator of the Federal Aviation Administration announced his Plan for Enhanced Safety of Flight Operations in the National Airspace System. As part of that comprehensive program, the FAA proposed to establish a Group II TCA at Honolulu, Hawaii, with operations in the proposed TCA subject to the operating and equipment rules for Group II TCAs specified in § 91.90(b) of Part 91 of the Federal Aviation Regulations. These include, among other rules, the requirements to have ATC authorization to operate in the TCA, and to have an operable VOR/TACAN receiver, two-way radio, and a transponder to operate

in the TCA. An altitude encoder would

The Need for Increased Positive Control

terminal gives sufficient need to ensure

fact, to date the FAA's analysis has led

would be provided to small, VFR

in the TCA. An altitude encoder would not be required.

User Group Participation

The TCA configuration adopted here has been developed through substantial public participation. Initially, meetings were held with local groups and individuals representing both the VFR and IFR aviation communities to receive and discuss their needs and and views concerning a preliminary TCA configuration. After those initial meetings, a tentative TCA configuration was prepared for further public discussion at a subsequent local informal airspace meeting. To announce that meeting, the FAA made a bulk mailing to groups and persons believed to have an interest in the proposal. As a result of those efforts, further adjustments to the TCA configuration were made and were reflected in the FAA's modified configuration proposed formally for adoption. An additional opportunity for public participation was provided by a notice of proposed rulemaking (Airspace Docket No. 18605/79–APC–1) published in the **Federal Register** on December 17, 1979 (44 FR 73114). Twenty-six comments and a petition signed by more than 300 pilots were received during the comment period in response to the notice. Due consideration has been given to these comments as well as the comments received at the various meetings.

Changes to Accommodate VFR Traffic

Since the original development of a preliminary TCA configuration for discussion with airspace users, numerous changes in the configuration have been made to accommodate VFR activity. Those changes have primarily been in the vicinity of NAS Barbers Point, the area north of the Honolulu International Airport, the description of the northern outer boundaries of the TCA east of the Honolulu International Airport and the TCA floor altitudes over and south of Waikiki. Some adjustments to IFR approach procedures have also been made since the proposed TCA action was started over one year ago. Those changes allow the maximum use possible for VFR operations beneath the TCA floor by aircraft not equipped to operate in the TCA. No VFR corridor is provided because the maximum exclusion of airspace has been provided along the southern shores of the island. The vast majority of airspace designated as TCA is offshore over the ocean, airspace which is not generally used by VFR aircraft.

The Need for Increased Positive Control in Terminal Airspace

The departure and arrival phases of flight result in a high concentration of aircraft in a relatively limited volume of airspace surrounding an airport. Aircraft density is a function of the number of aircraft using that airport and its proximity to one or more adjacent airports that share or abut that airspace. As air traffic activity at an airport increases, the need for increasingly precise control of aircraft and protection of airspace from unknown aircraft becomes essential for continued safe operations. The FAA has developed a spectrum of air traffic procedures which, when coupled with precision navigational aids, airport surveillance radar facilities, automated radar data processing capability, and a highly skilled work force, forms a comprehensive system to provide safe and efficient flight operations at all controlled airports. The scope of services range from simple, recommended airport traffic flows at lowest density airports, to TCAs at the busiest airports.

This action extends and enhances the application of these proven control techniques and subsystems to airports in the Honolulu area and assures greater protection of VFR and IFR air traffic in the airspace surrounding this area.

An analysis of the overall need for extending the ability of ATC to separate VFR aircraft and IFR aircraft in terminal airspace is contained in the Administrator's plan for enhanced safety. A copy of the plan and other documents referred to in this amendment have been filed in the Rules Docket.

The "Highest Degree" of Air Transportation Safety

Near midair collision statistics indicate that, for all classes of users of terminal airspace, the use of ATC separation services, in addition to the duty of pilots to see and avoid each other, results in a higher level of air traffic safety. For the millions of air carrier passengers who enter and leave the major air terminals each year, Congress has directed that the highest feasible degree of safety be achieved. A continued "mix" of ATC controlled aircraft and uncontrolled VFR aircraft can interfere unnecessarily with that safety objective. That position applies generally, however, it is particularly pertinent to the Honolulu terminal area. While a continuous record of potential midair collisions does not exist at Honolulu, the number of large, passenger carrying aircraft using that terminal gives sufficient need to ensure that those large, passenger carrying aircraft are operating in airspace restricted from any mix with uncontrolled, VFR aircraft.

The congressional mandate is clear with respect to the high level of safety intended for passengers in air transportation. Section 601 of the Federal Aviation Act of 1958 requires that the FAA give full consideration to the duty resting on air carriers to perform their services with the "highest possible degree of safety in the public interest . . ." The congressional concern for air transportation, as a distinct class to be protected, was restated in the Airline Deregulation Act of 1978 (Pub. L. 95–504, October 24, 1978) which amended Section 102 of the Federal Aviation Act of 1958 to emphasize the "dedication of Congress to the furtherance of the highest degree of safety in air transportation and air commerce, and the maintenance of the safety vigilance that has evolved within air transportation and air commerce and has come to be expected by the traveling and shipping public" (49 U.S.C. 1302(a)). The Airline Deregulation Act of 1978 also directed the Secretary of Transportation to complete a thorough review of the safety regulations applicable to air carriers in order to ensure that "all classes of air carriers are providing the highest level of safe, reliable air transportation to all the communities served by those air carriers." The Administrator of the FAA is directed to respond to the Secretary's review by promulgating regulations that may be needed to "maintain the highest standard of safe, reliable air transportation in the United States." The orderly and extensive expansion of positive controlled airspace, including the amendments adopted by this action, ensures that the local and systemwide capability of the FAA to ensure separation and protection for air carrier passengers remains commensurate with the growth of a vigorous, safe, and efficient air transportation system under the new act. By this action, the FAA is also increasing the degree of safety available to the general aviation community, many of whom are fully qualified to operate within the parameters of a TCA.

Building on Existing Programs

The FAA's experience since the establishment of mandatory participation in TCAs and voluntary participation in Terminal Radar Service Areas (TRSAs) indicates that, in terminal airspace, ATC control of VFR aircraft reduces the potential for hazardous traffic conflicts. For the year 1968 (which preceded the establishment of TCAs), the "Near Midair Collision Report of 1968," July 1969, concluded that, for the airports now served by TCAs, there were 271 incidents reported as "hazardous" to flight. For the fiscal years 1975, 1976, and 1977, there were a total of 64 reported near midair collisions (NMACs) in the 21 then existing TCAs. For comparison purposes, that translates into an average of approximately 21 reported incidents per year, under TCA requirements, in contrast with 271 incidents for the year 1968. Those figures are not conclusive indicators of the absolute numbers of incidents, but are viewed as meaningful evidence of the critical relationship between the absence of control of all aircraft and the likelihood of hazardous traffic conflicts in congested terminal airspace.

As a result of public comments, in response to Notice No. 78–19 (44 FR 1322, January 4, 1979), questioning the adequacy of FAA's near midair collision information, a comprehensive review of that information has been undertaken. The results of that review are discussed under the "Discussion of Comments—Safety."

The Honolulu TCA adopted by this amendment is a logical extension of programs that first gained momentum in 1962. In addition to the earlier nonregulatory programs, the 1970 National Terminal Radar Program initiated the regulatory development of TCAs, also in response to the 1968 Near Midair Collision Report. The TCA concept was added to the Federal Aviation Regulations in Amendments 71–6 and 91–78, which were published in the **Federal Register** (35 FR 7782) on May 21, 1970, to be effective on June 25 of that year. Those amendments followed extensive public comment in response to Notice No. 69–41, issued on September 30, 1969, (34 FR 15252); 22 public meetings; and a supplemental notice of proposed rulemaking (Notice No. 69–41B), issued on March 11, 1970 (35 FR 4519). That regulatory history led to the issuance of § 71.12 of Part 71 of the Federal Aviation Regulations (FARs), under which TCAs are issued, and § 91.90 of Part 91 of the FARs, which describes the equipment and operating rules for participating in a TCA. While the safety enhancement plan identified 44 new potential locations for Group II TCAs, the regulatory basis for, and description of, the TCA concept was established under those 1970 amendments to Parts 71 and 91. It should be noted that the 44 additional locations were only proposals. Each site is being evaluated on its own merits. In fact, to date the FAA's analysis has led to dropping eleven proposed TCAs from the original list. The evaluation is continuing with the very real possibility that other sites may be dropped even before issuance of a notice of proposed rulemaking.

The establishment of a Group II TCA at Honolulu is an important and timely step forward and represents a meaningful contribution to the local and systemwide increase in safety because it responds specifically to the conditions that exist in the Honolulu terminal area. The design will safely accommodate the present traffic flow of all user groups in the TCA and the overall traffic flows of adjacent areas that interface with Honolulu while minimizing the impact on operation of aircraft not operating in the TCA. The TCA design is based on existing traffic flows, airport locations, and navigation aid locations. It is part of an evolutionary growth process and is workable immediately. Other plans offered in response to the notice of proposed rulemaking, while having some attractive features or advantages for some airspace users, would have unattractive aspects and disadvantages for other airspace users. Some adjustments to the design proposed in the notice, however, have been made as a result of comments received. Those are discussed in detail under "Discussion of Comments—Alternative Proposals."

Discussion of Comments

In response to the TCA proposal, the FAA received 26 written comments from individuals, pilots and owners of aircraft, aircraft operators, State and Federal government agencies, and aviation trade and industry associations. A petition signed by more than 300 pilots was also received. In addition, prior to the notice, the FAA had the benefit of meetings with various user groups. The FAA appreciates the thoughtful and meaningful contributions and the interest expressed by all of those who took time to participate in the several steps of this rulemaking proceeding. Most of the comments received came from pilots and owners of general aviation airplanes who stated their objections to the TCA concept and to its application in Honolulu.

In responding to the issues involved in the FAA's proposal, some commenters expressed complete support of the proposal and some made suggestions for achieving flight safety in the Honolulu terminal area that were either alternative or supplementary to those proposed in the notice. Other commenters were critical of the air traffic control services that are and would be provided to small, VFR aircraft using the Honolulu International Airport. Specifically, some commenters were critical of runway separation standards; radar separation standards; unsupervised holding awaiting approval to enter the area; and the vectoring of aircraft at low altitudes over the ocean (especially at night and in poor weather conditions). Some felt vectoring is unnecessary, unsafe, causes delays with a resulting waste of fuel, and contributes to the mix of low and high performance aircraft rather than relief from that mix. Some commenters stated that a TCA was not needed or justified and that there is no evidence that a TCA would enhance or increase safety or provide local benefit; that the existing voluntary acceptance of Stage III services in the Honolulu TRSA was adequate, especially in light of the high participation rate and lack of satellite reliever airports in the area; that it would be better to urge increased voluntary acceptance of Stage III in the TRSA; and that more rules are not necessary but that what is necessary is a better understanding and application of the existing ones. A few commenters recommended that altitude encoders should be required for all aircraft using the Honolulu International Airport, or at least by those that use the radar procedures presently offered. Other commenters felt that transponders would add little benefit and no added safety. Many commenters stated that what Honolulu really needs to reduce the mix of large and small aircraft is a general aviation reliever airport, not a TCA; and that FAA should assist the State of Hawaii to provide such a site that would not increase the airspace congestion around the Honolulu terminal area. Some stated that no TCA was needed now but acknowleged there could be such a need in the future, when reliever airports have been provided, if a safety problem developed. The Navy expressed their objection based upon its effect on their use of the airspace at and around Naval Air Station (NAS) Barbers Point.

As in most proceedings of this kind, the public beneficiary of a safety regulation does not have an organizational basis to participate and they do not traditionally present their views in significant numbers to counterbalance the advocacy of the more institutionalized commenters. This does not, however, reduce the viability of the public benefits that may be achieved if an otherwise beneficial proposal is adopted.

V 45 A G 1 4 8 0 UMI

A. Safety

The primary concern in any proposed TCA action is providing the highest degree of safety while preserving the most efficient use of the available terminal airspace. The TCA designates areas where large, turbine-powered aircraft are required to operate. That airspace is also available for use by properly equipped general aviation and military aircraft operating under an ATC clearance. Providing air traffic control services to all aircraft reduces the probability of near midair collisions in that airspace.

While the mix of controlled and uncontrolled aircraft in the Honolulu area is less than that surrounding many major mainland U.S. locations, the air carrier aircraft density is greater than all the other Group II TCA locations except Denver, and the collision potential between air carrier and uncontrolled, VFR aircraft still exists. A factor decreasing the mix of aircraft in the Honolulu area is the fact that much of the terminal airspace used by the large, turbine-powered aircraft is over the open ocean south of the Island of Oahu where uncontrolled VFR flight is less likely to occur. Thus, the airspace designated by this amendment, in the south shoreline areas and areas east and southeast of the island that would actually affect most commenters objecting to the action, is the minimum necessary to meet the TCA objectives. The area of NAS Barbers Point is an example. Most uncontrolled, VFR activity presently is along the shoreline area east of the Honolulu International Airport and to and from the island's central valley area. The VFR traffic pattern activity at NAS Barbers Point operates also in relative proximity to Honolulu's instrument approach flight paths to Runways 4 and 8, and has for some years required close coordination between the control towers of the two airports.

Since the TRSA was established in September 1975, there have been two near midair collisions reported by air carrier flights (using the ILS procedure to Runway 8L at Honolulu) with uncontrolled VFR flights originating from NAS Barbers Point. For some time there has been concern expressed by Barbers Point officials about the proximity of ILS Runway 8L arrivals to aircraft operating in the NAS Barbers Point traffic pattern. The FAA also is concerned with the potential conflicts between operations at the two airports. The proposal contained in the notice attempted to minimize the impact on NAS Barbers Point activity, and yet also attain the objectives of the TCA by containing the flight paths of the large, turbine-powered, passenger carrying aircraft. An analysis of the Navy's comments are discussed in greater detail under "NAS Barbers Point area."

Several commenters recommended that the FAA withdraw the proposal for a TCA at Honolulu, and, based on factors of safety and efficiency, should change the present procedures to allow VFR aircraft to operate completely in the see-and-be-seen environment as they did prior to radar services being provided. The FAA declines to adopt either of those recommendations. First, the mix of various types of aircraft using the airspace in and around Honolulu International Airport makes it highly desirable to add the assurance that the flight paths of IFR, air carrier aircraft using this airport are contained within airspace free of uncontrolled, VFR aircraft to provide the highest level of safety to persons traveling on those air carrier aircraft. Second, to further ensure that an adequate level of safety be provided for all aircraft using the Honolulu International Airport, the radar service, when available, is considered essential for the safe, orderly, and expeditious movement of air traffic. A detailed explanation of the necessary traffic flow is contained under "VFR Arrival/Departure Procedures."

Comments were received stating the opinion that the 1968 Near Midair Collision (NMAC) study was not valid because (1) it did not consider areas outside the Continental United States (CONUS), (2) contained no statistics for Hawaii, and (3) that it was out of date especially because fewer aircraft were transponder equipped in that period. The 1968 NMAC study solicited reports without any reference to geographical areas. In fact, 28 of the 2230 reports received were from the Pacific Region. Because of radar target enhancement, if more of the aircraft involved had been transponder equipped, fewer NMACs might have occurred in radar environments.

One commenter felt that the cause or contributing causes of several major accidents can be attributed to reliance upon air traffic controller use of radar. No details or indentification of those accidents were provided nor was it apparent to which accidents the commenter referred in order to provide a basis for analysis or response. The commenter did refer to an accident between Koko Head and Honolulu of a night, sight-seeing flight in which ATC allegedly contributed as a cause because it vectored the pilot over the ocean where he flew into cloudy weather, became disoriented, and crashed. While no specific identification of that flight was provided, the description seems to correspond to an accident of a Cessna 310 that occurred on the night of April 13, 1977. However, that accident and the subsequent National Transportation Safety Board (NTSB) report on the probable causes of the accident do not correspond to the causes suggested by the commenter.

Commenters also referred to the near midair collision draft report originated by the National Aeronautics and Space Administration (NASA) as support for the proposition that TCAs do not enhance safety. Those commenters generally stated that the NASA report was based on more recent information than the 1968 Near Midair Collision Report and indicated that more near midair collisions occur within the confines of a TCA than in other terminal airspace areas.

The FAA has reviewed that draft report and the underlying data on which it is based. The data used to originate the NASA Draft Report was produced under the Aviation Safety Reporting System (ASRS). The ASRS is a voluntary reporting system and the commentaries received are not investigated to verify information they contain. Consequently, incomplete, inaccurate, and multiple reports have been filed on some of the same incidents and counted as separate incidents. In its findings, NASA reminds the reader of the limitations of the program. The FAA obtained copies from NASA of all data base incidents (July 1, 1976 to November 30, 1978). These 2,965 nationwide reports were analyzed using the near midair collision criteria as defined by both the FAA and NASA. Of those, 1,303 clearly did not meet the criteria and 301 were duplicate reports.

The remaining 1,361 near midair collision reports were analyzed in light of the conclusions offered in the NASA Draft Report. The NASA Draft Report presented a comparison of terminal airspace at all locations covered by reports (low density to high density) and concluded that most hazardous incidents occur in high density areas. The relative number of hazardous incidents in high density areas is, of course, a primary reason why the FAA embarked upon the program to establish TCAs and TRSAs in those high density areas. Contrary to the impression of many commenters, the NASA Draft Report did not address the effectiveness of TCAs after they were established compared to the number of incidents reported before they were created. As noted previously, the FAA's data shows

that after establishing a TCA there have been fewer hazardous incidents in that airspace than there were before it was established.

B. Complexity

Commenters contended that the TCA as proposed was too complicated for even the most experienced pilot to comprehend and apply in flight. The FAA also wants a simple and uncomplicated an airspace designation as possible, while designating no more airspace than is necessary to meet the objectives of the TCA program. The complexity of the TCA's configuration has been reduced as much as possible while accomplishing the objectives of the TCA. For example, in the notice some of the northern boundaries had been revised to use geographical references rather than abstract lines to describe TCA boundaries so that a pilot may more easily recognize the aircraft's position relative to the TCA. However, an additional area has been established over NAS Barbers Point, at the Navy's request, to reduce the adverse impact on their VFR airport operations. The description of Area J has been revised slightly so that its boundary, as intended in the notice, abuts that of Area A. During a charting review, it was discovered that there was a minor discrepancy between the boundaries of Areas J and A. The change to the description corrects that discrepancy. If, from subsequent evaluation, it is found that the TCA configuration is too complex or does not attain the safety objectives sought, the FAA will revise the configuration to solve those problems.

C. Stage III Concept and Services

Many general aviation commenters expressed concern about FAA's procedures for radar control of VFR aircraft. Specific criticism was made of runway separation standards, radar separation standards, and radar procedures used for vectoring and spacing arrivals.

1. Runway separation standards—The suggestion was made that VFR aircraft using Honolulu should be allowed to operate as though it were an uncontrolled airport, like the nearby Ford Island and Dillingham Airports, where it is not unusual for two to four aircraft to be using the runway simultaneously.

At uncontrolled airports, such as those cited, the responsibility for separation between aircraft and collision avoidance rests with the pilots. When an air traffic control tower is in operation at an airport, the controllers ensure separation on the runways by using procedures established and applied nationally by the FAA. Application of those procedures is appropriate, as is airport traffic control service at a tower controlled airport like the Honolulu International Airport.

2. Radar separation standards—The VFR radar separation standards applied in Stage III service between two small aircraft is at least 1½ miles. Between a small and large aircraft, or behind a heavy jet, that standard increases to as much as 6 miles between the aircraft, depending on the particular aircraft involved and their relative positions. Once visual sighting by a pilot of the other aircraft is verified, pilots may be allowed to assume responsibility for their own visual separation. Those standards are not excessive and have been in use for many years throughout the country. However, the safety aspects of the see-and-be-seen concept have occasionally been criticized, but a recent review with user organizations shows this concept is still viable.

3. Stage III terminal radar services at Honolulu—In September 1975, the FAA implemented Stage III radar service for IFR and participating VFR aircraft operating in the Honolulu TRSA. That was part of a national program to reduce the potential for collisions involving passenger carrying aircraft by ensuring the separation of those aircraft from other participating aircraft while operating in the terminal area. Establishing a TCA is an extension of that protection by requiring ATC control of all aircraft within the airspace containing the flight paths of large, turbine-powered aircraft. The uncontrolled operation of see-and-be-seen flight by aircraft in the terminal area is no longer adequate at Honolulu to ensure an acceptable level of safety in air transportation.

4. Pilot complacency—Pilots' failure to see and avoid other aircraft can be a problem in any terminal environment, particularly if the pilot places undue reliance on radar separation services. However, in a TCA environment, regardless of weather, aircraft are controlled and provided separation. In VFR weather conditions, ATC will provide separation unless the other aircraft is sighted by the pilot. In that situation the pilot may be allowed to maintain visual separation. Although ATC separation enhances safety, pilots continue to have the responsibility to see and avoid other aircraft.

5. Overcontrol—Some commenters felt that establishing a TCA would give controllers the power to coerce pilots into unsafe situations, and that the controllers would abuse their authority with arbitrary vectors and overcontrol, and that ATC control of aircraft is not necessary.

Pilots are required to request an amended clearance or instruction if a controller issues one that would put them into an unsafe situation. Nothing in this program removes the final authority of the pilots for the safe conduct of their aircraft. Controllers should not step beyond their authority or coerce any pilot into an unnecessary or unsafe situation. If a pilot thinks a controller has acted improperly, the incident should be reported in detail to the ATC supervisor as soon as a pilot is able to do so.

D. VFR Arrival/Departure Procedures.

1. Routes—The routes established for VFR aircraft using the Honolulu International Airport are separated from the IFR routes. In addition, the individual arrival and departure paths of each aircraft are also separated from other paths. For example, during trade wind conditions when Runways 4 and 8 are in use, small, single-engine aircraft making VFR departures proceed eastbound via the H–1 freeway; small, twin-engine aircraft making VFR departures proceed eastbound just off the island shoreline; and IFR departures proceed eastbound south of those routes. VFR arrival routes from the east are south of the twin-engine departure route and beneath the IFR departures. The IFR arrival route is south of both of those. An optional routing for single-engine arrivals, when weather permits, is at an altitude above and in the opposite direction to the single-engine departures. To the north of the airport, VFR departures follow the Moanalua Freeway out of the area; arrivals proceed inbound south of the freeway. Similar routings are used during Kona wind conditions (Runways 22 and 26). To allow traffic flows without those procedures would cause unsafe head-on and cross-traffic situations.

2. Overwater vectors—VFR arrivals from the east to Runway 4R are normally routed along or south of the Molokai VOR 265° radial until turning onto final approach and are instructed to be at 1,000 feet no later than abeam Diamond Head. That route and altitude is necessary to ensure separation from jet departures off Runway 8 and from VFR departures along the shoreline. When weather conditions permit, single-engine arrivals do have an optional overland routing available in the opposite direction to and above the single-engine departures. If weather does not permit that routing, the only alternative that exists is offshore routing unless eastbound VFR departures are not being used. Flight in single-engine

V 45 A G 14 80 UMI

aircraft over water at relatively low altitudes is not unique to those arrivals. Flight to any other island from Oahu puts aircraft beyond engine-out gliding distance to land. It is common for pilots to operate at low altitudes between islands over water, beneath rather than above, a cloud layer.

3. VFR Holding—Many commenters complained that holding VFR aircraft without an ATC clearance at entry points occurs because of ATC application of excessive radar separation procedures. Any holding of arriving aircraft is to establish an organized and safe flow of air traffic at it approaches the airport for landing. It is not safe or efficient to allow uncontrolled VFR aircraft to approach the airport for landing on various runways without ensuring adequate spacing. It is safer for arrivals to circle in an uncongested area away from the airport traffic pattern than to have to many aircraft simultaneously in the traffic pattern thereby extending the traffic pattern and impeding the safe and orderly flow of air traffic. Congestion is caused by excessive demand for use of the airport or airspace at any given time and not by the use of radar procedures. When the demand exceeds the capacity, aircraft may be held short of a runway before takeoff, held over a geographical point when in flight, or they may be issued alternate routing or other instructions to accommodate other traffic.

E. Efficiency.

There were many comments that the TCA would encompass an excessive amount of airspace in light of the limited airspace available in the Oahu area and the lack of alternate areas. They also objected because the TCA would limit the freedom of movement in the airspace and infringe on flight practice and training areas. Many commenters expressed concern that a TCA would waste fuel because of added vectors and holding. Commenters also stated that the proposal did not fairly apportion costs, inconveniences, and benefits among the various airspace users, and would further restrict a massive amount of airspace to the detriment of general aviation and for the convenience of the airlines. Other commenters felt a TCA would require more controllers and would result in an increased controller grade level.

1. Airspace—It is true that airspace around Oahu is at a premium. To design a safe and efficient controlled environment in a terminal area, it is necessary to tailor the airspace configuration to the specific needs of that area. The various types of aircraft that operate within the area and the basic requirements of all airports and user groups within the terminal area must be considered, along with the constraints imposed by terrain, weather conditions, and optimum traffic flows. The Honolulu TCA was designed with those considerations in mind. For example, the airspace in the Ford Island area and much of the airspace north of Honolulu's Runway 8L ILS approach course are not designated within the TCA because large, turbine-powered aircraft do not operate in those areas but other aircraft do. The tailoring of the TCA along the Runway 8L ILS approach course in the vicinity of NAS Barbers Point minimizes as much as possible any adverse impact on the Navy operations. The minimum amount of airspace necessary is designated north of Honolulu Airport to meet the TCA program objectives. The restriction of the free, uncontrolled movement of aircraft in the TCA is a result of ensuring that uncontrolled VFR aircraft do not operate in the same terminal airspace as that used by the controlled aircraft. No general aviation VFR practice and training areas are known to exist in the areas designated as TCA airspace, although IFR general aviation practice and training are conducted in the area and are not precluded in a TCA. Since those IFR areas are used by large turbojets, it is necessary to mandate control of all aircraft in those areas. Any uncontrolled VFR training being conducted in those areas would be inconsistent with the objectives of the TCA program. The TCA airspace is not designated for any one user group's convenience, but to ensure that use of that airspace is safe and efficient. Use of TCA airspace must be with ATC authorization, therefore ensuring that ATC services are provided to all aircraft operating within that airspace. The result is intended to be a higher level of safety provided to air transportation.

2. Fuel—While there may be some increase in fuel use because of the TCA, it is not considered significant in light of the anticipated benefits to the traveling public. Any added delays resulting from the TCA are anticipated only at peak traffic periods when extended vectors or holding for arrival spacing becomes necessary. Some delays could be expected during those periods even if a TCA were not established. Currently, the most prevalent time a general aviation aircraft experiences that type of delay is when the local, air tour flights are returning to Honolulu in the early evening.

3. Costs—When considering the distribution of costs to the user, much has been said about it being the general aviation operators who are the most likely to incur the greatest cost impact. To operate within the confines of the TCA, aircraft must be equipped with a transponder. From available data, it is estimated that 51 percent of the aircraft based in the area are already equipped with a transponder. The operators of the remaining aircraft will have to elect to incur the cost of a transponder in order to achieve the enhanced level of safety and receive ATC services or to operate outside the TCA airspace. Nevertheless, the FAA has made a concerted effort to design the TCA to accommodate those who wish to avoid the TCA airspace and to minimize the potential risks of operating on the periphery of the TCA. However, the options are clearly posed for the election of each operator to pursue whichever is appropriate to that operator's situation.

The additional operating costs incurred by the transponder equipped operators who operate within the TCA airspace, as explained in the Airspace User Cost Impact Study, will be minimal. The FAA estimates that those costs are anticipated to be approximately a one-minute average ATC procedural delay during peak traffic periods. That delay is attributable, in part, to ATC procedures, and includes the time required to radar identify any VFR traffic and integrate that traffic into established IFR traffic flows.

The cost of avoiding the TCA for nonparticipating aircraft is expected to be minimal, because the TCA has been configured to lie mostly over water, away from frequently used VFR routes.

4. Weight of Transponder and Required Avionics—Commenters stated that the additional weight of the avionics required to operate in the TCA is prohibitive to small civil aircraft. A typical transponder weighs approximately 3 pounds. A typical VOR and two-way communications radio weighs approximately 6 pounds. Many aircraft will not incur additional weight because they already have some or all of the required avionics. When the avionics weight is considered in relation to the overall weight of an aircraft, it is minimal. The FAA has determined that the small additional weight to meet the equipment requirements to operate in the Honolulu TCA is insignificant compared to the benefits to be achieved by the designation of the TCA.

5. Controller Staffing and Pay Grades—Little or no increase in ATC staffing is anticipated, nor is any pay grade level change expected as a result of this TCA. Honolulu Tower has been providing Stage III terminal radar services in a TRSA since September 1975. Those services are nearly identical to TCA services; the main difference being that pilot participation in the TRSA is voluntary. Any workload change as a result of the TCA is expected to be insignificant and is not anticipated to cause any immediate need to adjust controller staffing levels. Staffing is constantly under review considering all activities of the facility. Controller grade levels are adjusted according to pre-established aircraft activity levels. If no significant change of activity results from the TCA, no pay grade level changes are expected.

F. TRSA vs. TCA.

1. Some commenters felt the existing TRSA and its voluntary participation by pilots provides an adequate level of service. They cited the high level of participation and contend that because of that a TCA would not provide any additional benefits. Since voluntary participation is so high in the TRSA, the impact of a TCA on VFR operations should not be significant. Additional airspace is designated within the TCA that is not in the TRSA which may require VFR pilots to request arrival instructions earlier in some areas, but pilots presently participating in the TRSA should expect little, if any, difference in the ATC handling they now receive. The additional airspace, and required ATC clearance to enter the airpsace, provides more assurance that the passenger carrying aircraft operating in the terminal area are operating in airspace free of uncontrolled aircraft. Considering the higher level of activity, the mix of aircraft types that operate in the terminal area, and the high numbers of passengers carried by the large, turbojet-powered aircraft, that assurance is essential to ensure the highest degree of safety in air transportation.

2. Some commenters felt that it is necessary only to require transponders rather than establish a TCA. Others felt that transponders were too expensive and would add little benefit or added safety. Requiring transponders provides the benefit of radar target enhancement, but without a TCA, would still allow the mix of uncontrolled and controlled flights. It is the elimination of that controlled/uncontrolled aircraft "mix" that the FAA seeks to accomplish. The cost of purchasing transponders by those not so presently equipped is not a significant cost when balanced against the benefits achieved. Further discussion is contained in the user cost assessment made for this rulemaking and contained in the docket. The FAA disagrees that transponders add little benefit and no added safety. Benefit and safety are the reasons that transponder requirements were originally included in the rules to operate in TCAs. A transponder provides for immediate radar identification of an aircraft, radar target enhancement, and a more efficient method to maintain radar identification of the aircraft.

G. Public Consultation.

A commenter stated that the FAA should have surveyed individual pilots in Hawaii for their opinions on the proposed TCA. Individual pilots and other interested parties have been accorded several opportunities to express their views. The Honolulu TCA proposal was the result of FAA staff analysis and input received from various meetings with user respresentatives that resulted in a tentative TCA configuration. An informal airspace meeting was held on March 7, 1979. The results of that meeting and comments received were factors contributing to the proposal to establish a TCA and its configuration. Those were submitted and published as a notice of proposed rulemaking (NPRM). This rulemaking action is a result of those proceedings. The notice of the informal airspace meeting was made to over 100 users and user organizations. The NPRM was mailed to those same addresses, persons who attended the informal airspace meeting, and others who contacted the FAA and requested copies. The NPRM was published in the Federal Register on December 17, 1979, soliciting comments to be received not later than March 17, 1980. Twenty-six letters and a petition signed by more than 300 persons were received. The public has had adequate opportunity to participate in this proceeding.

H. Aircraft Mix and Reliever Airports.

Many comments addressed the mix of types of aircraft operations that occur at the Honolulu International Airport and the lack of an adequate system of general aviation reliever airports in the area. A TCA action would likely still have been proposed even if most general aviation aircraft were relocated at one or more reliever airports. TCA airspace free of uncontrolled VFR aircraft is designed to contain the flight paths of the large, turbine-powered aircraft in terminal airspace. The FAA supports establishing reliever airports and is actively encouraging the State of Hawaii to provide such facilities. However, providing reliever airports does not eliminate the uncontrolled aircraft problem. A TCA at Honolulu will. Some commenters recognized that increased use of Runway 8L, for IFR aircraft rather than 4R, during the higher traffic periods of the day would be a positive step in reducing hazardous incidents and the aircraft mix problem. While segregating the large aircraft on Runway 8L/R and small aircraft on Runway 4L/R would help reduce the mix of types of aircraft using the airport, a prime objective of establishing the TCA is to ensure that the passenger carrying aircraft operating IFR in the terminal airspace receive the added radar separation services from VFR aircraft that is provided. Runway segregation of VFR/IFR aircraft does not present an adequate alternative.

I. ATC Component and Aircraft Equipment Failures.

Some commenters asked what the effects would be if the Honolulu Tower experiences a radar, or computer failure, or aircraft experiences a transponder failure.

1. Computer failure—It is assumed that concern refers to the ARTS III computer. No significant effect would be felt by pilots or controllers. Controllers would not have alphanumerics information available. They would still retain nondiscrete use of the beacon interrogator but would be required to revert to nonautomated coordination, a function normally provided by the ARTS III. Computer outages do occur at various times, both scheduled and unscheduled. Pilots are seldom aware of them, except possibly during a transition to nondiscrete beacon use.

2. Radar failure—The Stage III separation and sequencing for VFR aircraft is dependent upon the terminal radar while a TCA is not. When a radar outage occurs, the rules for entry into and operation within the TCA still apply. ATC will apply available alternate procedures to segregate VFR traffic as much as possible from the IFR traffic flow. Some delays could be expected, but there would be no decrease in the level of safety provided. The same effects would result under the existing TRSA procedures when radar outages occur.

3. Transponder failures—Pilots should familiarize themselves with § 91.24(c)(1) transponder requirements in the case of equipment failure. ATC may authorize an immediate deviation from the requirement for a transponder to allow an aircraft with an inoperative transponder to continue to the airport of ultimate destination, including intermediate stops, or to proceed to a place where suitable repairs can be made, or both. Provisions for other deviations are also prescribed in § 91.24(c)(2) and (c)(3). One commenter

stated the FAA should not issue "waivers" to the transponder

communications with ATC when operating within 5 miles of, and below

K. Alternative Proposals.

1. Proposed Area F—The commenters

the airport traffic area. Separation services will be provided only at and

informal airspace meeting held on March 7, 1979, to which there was no

they were implemented in the TRSA in 1975. That altitude was selected to

stated the FAA should not issue "waivers" to the transponder requirements. Exceptions to those requirements are not issued by waiver, but by obtaining a deviation authorization from the appropriate ATC facility, in this case the Honolulu Tower. Regardless of what it is called, ATC must remain responsive to legitimate deviation requests for specific flights or aircraft which can be handled without undue risk to operations in the TCA.

J. NAS Barbers Point Area.

The U.S. Navy objected to the proposed TCA primarily because of its adverse impact on their mission capability and aviation safety concerns at and around Naval Air Station Barbers Point. They contend it is extremely complicated and would create a more complex operational situation, and would add little, if any, significant improvement to the existing Stage III terminal radar service in the TRSA. While the FAA understands the Navy's position, each airport is considered separately and collectively through a system approach to aviation safety. Airports that are located in such proximity to one another as Honolulu and NAS Barbers Point cannot have large or high performance aircraft operations without some interaction. The FAA has worked with the Navy to design a TCA configuration with as little adverse effect on NAS Barbers Point activity as possible. The airspace configuration of the TCA contains the minimum airspace necessary to contain within the TCA the IFR flight paths and altitudes over and adjacent to NAS Barbers Point. The Navy stated that the proposed Area G would result in Honolulu arrivals crossing NAS Barbers Point as much as 600 feet lower than at present. That conclusion is erroneous. Nothing in the ILS procedure has been changed over NAS Barbers Point and operations should continue as in the past. Changes were made to the west and south, however, but those were to increase the glide slope interception altitude and the intermediate approach segments to 3,000 feet. Those changes were made to enable the floor of Area D to be at 3,000 feet to minimize the impact on NAS Barbers Point operations.

The Navy objected to any TCA airspace encroaching on the NAS Barbers Point airport traffic area, and recommended changes for the narrow areas established to contain the ILS Runway 8L flight path and altitudes. (Those recommendations are reviewed in greater detail under "Alternative Proposals.") Airport traffic areas are established in part to require communications with ATC when operating within 5 miles of, and below 3,000 feet above, an airport with an operating control tower. It is not airspace delegated to a tower to conduct whatever activities they see fit and prohibit other aircraft access to that airspace. Since there is no ATC separation responsibility created by the existence of an airport traffic area, there is no encroachment of airport traffic area airspace by the establishment of a TCA. However, where the TCA airspace is within the NAS Barbers Point airport traffic area, Barbers Point Tower no longer has overall communications responsibility for that airspace. That does not preclude the responsibility for the two ATC facilities involved to execute a Letter of Agreement to ensure the safe, orderly, and expeditious coordination and movement of aircraft activity under their respective jurisdictions. An agreement to achieve that purpose is currently in effect, but it may need to be updated to reflect the establishment of the TCA.

The Navy stated that the TCA action will increase noise because of increased activity to Runway 8L through the Barbers Point airport traffic area. The added activity of jet arrivals to Runway 8L at Honolulu during busy traffic periods is not connected to the TCA action. The TCA will require jet arrivals conducting a visual turn to Runway 8L in the vicinity of Barbers Point to remain at or above 3,000 feet until within the TCA areas confining the Runway 8L approach course. Previously, with coordination with Barbers Point Tower, those aircraft could descend to a minimum of 2,200 feet at or west of the Honolulu VOR in accordance with noise abatement procedures. As previously stated, an altitude below 3,000 feet, south of Barbers Point, was not designated in order to minimize the impact on Barbers Point VFR activity.

The Navy also stated they believed a reduction in safety would occur due to increased numbers of aircraft attempting to avoid the TCA beneath its floor west of Area A. The FAA has found no basis to expect areas over the ocean, south of the ILS Runway 8L localizer, to be used as a detour route around Area A. North of the localizer, over the land, some increased activity may be expected, however, it is not expected to cause any reduction in safety. Aircraft properly equipped and with the appropriate authorization can operate in the TCA. ATC authorization will be based on traffic conditions, pilot intentions, and other factors related to ensuring a safe, orderly, and efficient movement of air traffic in the terminal area.

K. Alternative Proposals.

1. Proposed Area F—The commenters stated that Area F is too low and will unduly restrict en route and other VFR flight. That area contains the departure profiles of the Kules, Blush, and Molokai standard instrument departures (SIDs) as well as the initial approach segments from BAMBO Intersection to the LDA/DME Runway 26L final approach course. A higher floor altitude would require climb rates exceeding those used (300 feet per mile) for the departures and would restrict the Runway 26 arrivals such that a higher rate of descent or an extended vector pattern would be required from BAMBO. Past experience with VFR overflights, especially the afternoon air tours en route to Kauai, indicates that 4,500 feet, or lower, is an optimum altitude. Properly equipped aircraft should encounter little difficulty receiving authorization to transit through that area, especially when Runways 4 and 8 are in use. VFR altitudes of 4,500 feet and lower along V–15 between Molokai and Koko Head are outside the TCA except at the Koko Head VORTAC.

2. Proposed Area K—Commenters stated that this area would unduly restrict VFR pilots, is an arbitrary impediment to VFR traffic, is unnecessary control by ATC, and is not necessary to contain the flight paths of large, turbine-powered aircraft in light of the regulatory requirements associated with operating within airport traffic areas. There were also several comments suggesting that geographical references rather than the proposed northern boundaries of the TCA would be more appropriate for VFR navigation. The FAA agrees with some of those points and Area K has been revised by adjusting its northern boundary from the control zone to along the State Highway H–1 and by reducing the ceiling altitude from 3,000 feet to 2,000 feet. That will exclude unnecessary airspace and establish only that airspace as TCA that is necessary to contain large, turbine-powered aircraft approaching to land on Runways 22L/R and 26R. Further, it ensures aircraft transiting northeast of the airport, that is, those operating to and from Ford Island or helicopter landing areas within the Honolulu airport traffic area, are provided ATC separation services. It will also allow aircraft bypassing Honolulu to remain outside the TCA en route between Koko Head and the central valley area. Pilots are reminded, however, this exclusion does not remove the requirements of § 91.85(b) and § 91.87(b) concerning authorization from, and communication with, the control tower to transit through the airport traffic area. Separation services will be provided only at and below 2,000 feet MSL.

3. Improved TCA entry and exit procedures—Commenters suggested developing improved entry and exit procedures in the State Highway H–1 and H–2 Interchange area, providing landmark reporting points and additional arrival frequencies, especially to the east. Those recommendations are being reviewed by the Honolulu Tower staff. Those actions are beyond the scope of designating TCA airspace, and should be considered even if a TCA were not established since they involve the Stage III radar procedures. The need for another radar position has already been identified, is in the planning stage, and will be installed when funding and equipment availability permit.

4. Revision of proposed northern boundaries—Recommendations were made that all the northern boundaries should be established geographically rather than as proposed. The north boundaries of proposed Area K and a portion of proposed Area J have been revised as suggested. The portion of Area J using VOR radials and the other northern boundaries of the TCA have not been changed because no suitable alternative geographical references exist without establishing more TCA airspace than is necessary. This rationale also applies to not using roads or visual landmarks for defining Areas A, D, G, and H.

5. Corridors—Several commenters recommended that all jet aircraft operate within corridors over the ocean using Runaway 8 thereby leaving light, single-engine aircraft over land and twin-engine aircraft along the shoreline to use Runway 4. Between 7 a.m.–7 p.m. during trade wind conditions, the normal flow is as recommended, except when delays exist for jet arrivals to Runway 8L or when other traffic using Runway 4 is light. Although the TCA does not have an overall appearance of corridors, it does contain the various arrival and departure routes of the large, turbine-powered aircraft. There are six departure and five arrival paths contained along and within V–12 to the northeast of Koko Head VORTAC clockwise to V–15 northwest of Honolulu VORTAC. Those paths connect to the landing and takeoff area of each runway at Honolulu since they are all used by large aircraft. Some additional airspace within Area J was included in the proposed TCA, even though it is not necessary to contain large, turbine-powered aircraft. That was the result of a suggestion at the informal airspace meeting held on March 7, 1979, to which there was no objection. (Area J contains within the TCA aircraft descending to 1,000 feet abeam Diamond Head for separation from jet departures off Runway 8.) No VFR corridor through the TCA exists because flight beneath Area F, above Area K, and north of Areas A, C, D, and J provides the equivalent bypass that would be provided by a VFR corridor.

6. Concerning the applicability of operating rules over the high seas—A question was asked why the 250 knot below 10,000 feet rule (§ 91.70(a)) can't be enforced when the TCA operating and equipment rules (§ 91.90) apply in these same areas. The applicability of those rules is specified in § 91.1(b)(1), which specifies that the rules concerning operations within and underlying a TCA are applicable over the high seas. No such applicability is specified for § 91.70(a) nor does such a requirement exist in Annex 2 to the Convention on International Civil Aviation concerning flight over the high seas.

7. Containing IFR procedures—

a. It was pointed out that on the "PEBLE ONE" (IFR) arrival, an aircraft could be at 2,000 feet between PEBLE and MAKAI intersections and that 15 miles of that route would be below the floor of Area E. The altitude on that route is the minimum en route altitude. Large, turbine-powered aircraft will be assigned altitudes by ATC in that area to ensure they remain at or above the floor of TCA.

b. Another comment stated that an "ELRON" departure, using the 300 feet per mile rate of climb, would exit the TCA between 8,000 and 9,000 feet. That would be true for Runway 4 and 8 departures; however, the 3,000 feet restriction crossing the Honolulu VORTAC 190° radial is usually removed prior to that point allow a climb to exit the TCA above 9,000 feet. Even if that were not possible, the limited VFR activity at those altitudes in that area is not sufficient reason to amend the IFR departure procedure or extend the TCA. However, that situation will be monitored by ATC to determine whether VFR activity dictates adjustment in the procedures or whether a later change in the TCA should be considered.

c. A commenter said that there is no justification for the TCA ceiling of 9,000 feet since practically no uncontrolled, VFR aircraft would be operating above 7,000 feet in the vicinity of the Honolulu International Airport. A recommendation was therefore submitted that the ceiling altitude be amended to 7,000 feet. The altitude of 9,000 feet is the same as has been used for State III separation services since they were implemented in the TRSA in 1975. That altitude was selected to contain the overflights that were known to transit Oahu daily, usually at and below 8,500 feet. Therefore, the ceiling altitude of 9,000 feet was selected to ensure that those aircraft would not operate without ATC authorization while within the same airspace used by the large, turbine-powered aircraft operating from Honolulu International Airport.

d. A commenter stated that Areas B and C and a large portion of Areas E and F are not required because large, turbine-powered aircraft should not be in those areas below 7,000 feet. The commenter further stated that IFR approach and departure procedures could be easily accommodated in slightly enlarged Areas D and J, a reduced Area A, and the Areas G and H as proposed. That commenter then recommended an alternative configuration comprised of six areas, each having a ceiling of 7,000 feet, except over the Honolulu International Airport where the recommended ceiling was at 4,000 feet. The base altitudes would range from the surface up to 4,000 feet.

It was also recommended that if a TCA was adopted it should not be applicable between midnight and 6 a.m. because very few large, turbine-powered scheduled air carriers operate between those hours.

The statement concerning areas where large, turbine-powered aircraft operate below 7,000 feet is incorrect. Areas B and C each contain IFR nonradar approach segments of the primary instrument approaches to Honolulu International Airport and the "ELRON" and "CORAL" standard instrument departures (SIDs). Areas E and F contain other SID procedures to "KULES," "BLUSH," "MOLOKAI," "LANAI," and "ELRON." Areas C and F also contain the vector paths of aircraft transiting from "BAMBO" to the LDA/DME Runway 26L final approach course. The base altitudes established are all predicated on the altitudes established in those procedures or anticipated by use of a 300 feet per mile climb/descent gradient.

The alternate configuration and hours proposed are not adopted for the following reasons:

(1) Aircraft conducting an ILS Runway 4R approach would be operating beneath the floor of a 3,000 feet area while on the final approach course until reaching the airport traffic area.

(2) Aircraft conducting instrument approaches to Runway 8L would be operating beneath the floor of a 1,600

feet area between the Honolulu VORTAC and the airport traffic area.

(3) Aircraft conducting an LDA/DME Runway 28L approach would be operating beneath the floor of a 1,500 feet area between "DELMO" and the airport traffic area.

(4) Runway 8 departures flying the "CATTY" SID or military VORTAC departure could be expected to exit the area over the airport at 4,000 feet.

(5) All other large, turbine-powered aircraft departing Runways 8, 22, and 26 would not be continuously contained within the TCA in the terminal area. For example, the departure ends of all runways used by turbine-powered aircraft for departure are less than 4 miles from the boundary proposed for the core surface area. Using a 300 feet per mile climb rate, departures would either exit the TCA beneath the 1,500 feet floor proposed to the southeast, into an area not designated to the south, or beneath a 3,000 feet floor proposed to the southwest.

(6) Section 91.90(b)(1)(ii) requires that unless otherwise authorized by ATC, each person operating a large, turbine-powered aircraft to or from a primary airport shall operate at or above the designated floors while within the lateral limits of the TCA. Therefore, the situations cited in (1), (2), (3), and (5) would be conflict with that rule in that through improper design of the TCA pilots could not be in compliance with § 91.90(b)(1)(ii) unless ATC gave authorization to operate beneath the floor of the TCA. Such authorization would not be in keeping with the purposes of establishing a TCA and, therefore, is not an acceptable alternative.

(7) No purpose can be found for excluding airspace beyond the airport traffic area due south of the Honolulu International Airport as recommended in the alternative proposal. Three known VFR activities could occur in that area, each of which give reason to designate sufficient airspace to contain the IFR procedures to and from Honolulu International Airport. Those are VFR flights operation to and from the Warning Areas of Oahu, airway navigation training flights, and low altitude air work with surface vessels. Sufficient airspace beneath the TCA will be available for the latter activity, and the operations of the two former activities should be contained within the TCA since those operations may be operating in airspace containing the flight paths of the Honolulu large, turbine-powered aircraft.

(8) Concerning the hours of designation of the TCA, it is true that activity in the early morning hours is reduced. The same is true for all categories of operations. The designation of a TCA between midnight and 6 a.m. is not considered adverse to any operation. During a randomly selected week of activity at Honolulu, an average of 42 air carrier, 7 air taxi, 1 general aviation, and 4 military operations per day took place during those hours. Aircraft activity through the terminal area from other airports is considered extremely light, and aircraft should have no difficulty obtaining any authorizations required. Since the availability of service exists with no anticipated adverse impact on any operation, the FAA sees no advantage in designating the TCA for less than the full day period.

8. Barbers Point area—The U.S. Navy recommended that if the TCA were established, an additional area should be established along the Honolulu ILS Runway 8L approach course, and amendments should be made to Areas G and H to reduce the operational impact on the missions of NAS Barbers Point. Those recommended changes are reflected in the TCA as adopted. Pilots of aircraft operating beneath those areas (G, H and I) are reminded that aircraft flying the glide slope of the ILS Runway 8L procedure will be very near the base of those areas and that no-separation buffer is provided between aircraft operating within and outside of the TCA.

Economic Impacts

The FAA has thoroughly assessed the costs of establishing the Honolulu TCA. A comprehensive economic assessment, covering the entire program as described in the Plan for Enhanced Safety was made available to attendees at informal airspace meetings held in Honolulu on March 7, 1979, and was placed in the Regional and Washington dockets for public comment. The assessment includes systemwide assumptions concerning the impact of all 44 originally proposed TCAs, including the Honolulu, Hawaii, TCA proposal. Since eleven of the original sites are no longer under current consideration, the cost impact systemwide is even less but the underlying assumptions are still applicable to the remaining candidate sites. In addition, to determine whether these general assumptions are valid for the particular TCA airspace description proposed for Honolulu, Hawaii, a Regional detailed draft addition to the broad national study was prepared by the FAA's Pacific-Asia Regional Office. The Regional economic assessment was appended to the national assessment and was also in the Regional and Washington dockets.

Environmental Impacts

In a manner similar to that described above for the national and local economic assessments, an environmental assessment was prepared, which addresses the overall national environmental effect of the 44 original candidate sites for TCAs. The assessment addresses the aircraft noise, aircraft emissions, and fuel consumption impacts of the program as a whole, and concludes that those impacts would not significantly affect the quality of the human environment. That national assessment is in the Regional and Washington dockets. In addition, as with the economic study, the program-wide assessment has been supplemented with an environmental assessment prepared by the Pacific-Asia Regional Office, responding to the site-specific impacts of the Honolulu, Hawaii, TCA proposal. The local assessment was likewise in both dockets for public comment and has been updated to reflect the proposed action of adopting this amendment.

Airspace Outside the United States

As part of this proposal relates to the navigable airspace outside the United States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States, is governed by Article 12 of, and Annex 11 to, the Convention on International Civil Aviation, which pertain to the establishment of air navigational facilities and services necessary to promote the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to ensure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided, and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices to civil aircraft in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standard and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provision of Executive Order 10854.

Adoption of the Amendment

Accordingly, § 71.401(b) of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 669) on January 2, 1980, is hereby amended, effective November 27, 1980, by adding a new Group II Terminal Control Area to read as follows:

Subpart K—Terminal Control Areas

§ 71.401 Designation.

* * * * *

(b) Group II, Terminal Control Areas:

* * * * *

Honolulu, Hawaii, Terminal Control Area
Primary Airport
Honolulu International Airport (Lat. 21°19'20"N., Long. 157°55'27"W.)

Boundaries

Area A. That airspace extending upward from the surface to and including 9,000 feet MSL within an area bounded by a line beginning at the Honolulu ILS Runway 4R DME (Lat. 21°20'01"N., Long. 157°54'23"W.), to Lat. 21°18'39"N., Long 157°51'15"W.; thence direct to a point on bearing 145°, and 4.5 miles from the ILS Runway 4R DME; thence along the 145° bearing to, and then clockwise along, the 7.5-mile radius arc of the ILS Runway 4R DME to, and along, the Honolulu VORTAC (Lat. 21°19'41"N., Long. 158°01'56"W.) 179°/359° radial to, and then east along, a line 0.5 miles north of, and parallel to, the ILS Runway 8L localizer course to a point 1.5 miles west of the ILS Runway 4R DME, thence direct to the point of beginning.

Area B. That airspace extending upward from 1,500 feet MSL to and including 9,000 feet MSL between 7.5 miles and 15 miles of the ILS Runway 4R DME and bounded on the east by the Honolulu VORTAC 134° radial and on the west by a line 1.5 miles northwest of, and parallel to, the ILS Runway 4R localizer course, excluding that airspace within Area A.

Area C. That airspace extending upward from 2,000 feet MSL to and including 9,000 feet MSL between 15 miles and 22 miles of the ILS Runway 4R DME and bounded on the northeast by the Koko Head VORTAC (Lat. 21°16'06"N., Long. 157°42'21"W.) 111° radial and on the west by a line 1.5 miles northwest of, and parallel to, the ILS Runway 4R localizer course.

Area D. That airspace extending upward from 3,000 feet MSL to and including 9,000 feet MSL within 22 miles of the ILS Runway 4R DME, south of a line 0.5 miles north of, and parallel to, the Honolulu VORTAC 293° radial, north of a line 1.5 miles northwest of, and parallel to, the ILS Runway 4R localizer course, and west of the Honolulu VORTAC 179°/359° radial, excluding that airspace within Areas G, H, and I.

Area E. That airspace extending upward from 4,000 feet MSL to and including 9,000 feet MSL within 32 miles of the ILS Runway 4R DME extending from the Honolulu VORTAC 119° radial clockwise to Lat. 20°49'00"N., Long. 157°46'35"W., to Lat. 20°52'00"N., Long. 157°50'00"W., to Lat. 20°48'20"N., Long. 157°50'00"W., thence clockwise along the 32-mile radius arc of the ILS Runway 4R DME to Lat. 20°51'30"N., Long. 158°10'00"W., to Lat. 21°00'00"N., Long. 158°10'00"W., to Lat. 21°00'00"N., Long. 158°16'00"W., to Lat. 20°59'02"N., Long. 158°19'58"W., thence clockwise along the 32-mile radius arc of the ILS Runway 4R DME to a line 0.5 miles north of, and parallel to, the Honolulu VORTAC 293° radial, excluding that airspace within Areas A, B, C, D, G, H, I, and J.

Area F. That airspace extending upward from 5,000 feet MSL to and including 9,000 feet MSL bounded by a line 0.5 miles northeast of, and parallel to, the Koko Head VORTAC 050° radial beginning at the Koko Head 291° radial and extending to Lat. 21°25'15"N., thence southeast along a 152° heading to, and then along, the 32-mile radius arc of the ILS Runway 4R DME to, and then along, the Honolulu VORTAC 119° radial to a point 22 miles from the ILS Runway 4R DME, thence direct to the point of beginning, excluding that airspace within Areas C and J.

Area G. That airspace extending upward from 1,600 feet MSL to and including 9,000 feet MSL within an area bounded on the north and south by lines 0.5 miles parallel to, and on each side of, the ILS Runway 8L localizer course, on the east by the Honolulu VORTAC 179°/359° radial and, on the west by the 1.1-mile radius arc of the Honolulu VORTAC.

Area H. That airspace extending upward from 1,900 feet MSL to and including 9,000 feet MSL within an area bounded on the north and south by lines 0.5 miles parallel to, and on each side of, the ILS Runway 8L localizer course, on the east by the 1.1-mile radius arc of the Honolulu VORTAC, and on the west by the 1.9-mile radius arc of the Honolulu VORTAC.

Area I. That airspace extending upward from 2,200 feet MSL to and including 9,000 feet MSL within an area bounded on the north and south by lines 0.5 miles parallel to, and on each side of the ILS Runway 8L localizer course, on the east by the 1.9-mile radius arc of the Honolulu VORTAC, and on the west by the 9-mile radius arc of the Honolulu VORTAC.

Area J. That airspace extending upward from 1,000 feet MSL to and including 9,000 feet MSL within 15 miles of the ILS Runway 4R DME, bounded on the north by a line extending west along the Koko Head VORTAC 111°/281° radial until intersecting, and then proceeding along, the H–1 Freeway to Lat. 21°18'39"N., Long. 157°51'15"W.; bounded on the west by Area A, and on the south by the Honolulu VORTAC 134° radial.

Area K. That airspace extending upward from the surface to and including 2,000 feet MSL within an area south of the H–1 Freeway, between Lat. 21°22'32"N., Long. 157°55'40"W., Lat. 21°21'29"N., Long. 157°54'00"W., and Lat. 21°18'39"N., Long 157°51'15"W., east of Long. 157°55'40"W., and north of Area A.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 [49 U.S.C. 1348(a), 1354(a), and 1510]; Executive Order 10854 [24 FR 9565]; Sec. 6(c), Department of Transportation Act [49 U.S.C. 1655(c)])

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). However, establishment of this terminal control area in concert with the proposed establishment or alteration of many other terminal control areas has been determined to be significant. Therefore, this action is included in the final evaluation prepared in conjunction with that comprehensive action. Copies of the evaluation are in the Washington and Regional dockets, and may be obtained by contacting the person identified above under the caption "FOR FURTHER INFORMATION CONTACT: . . ."

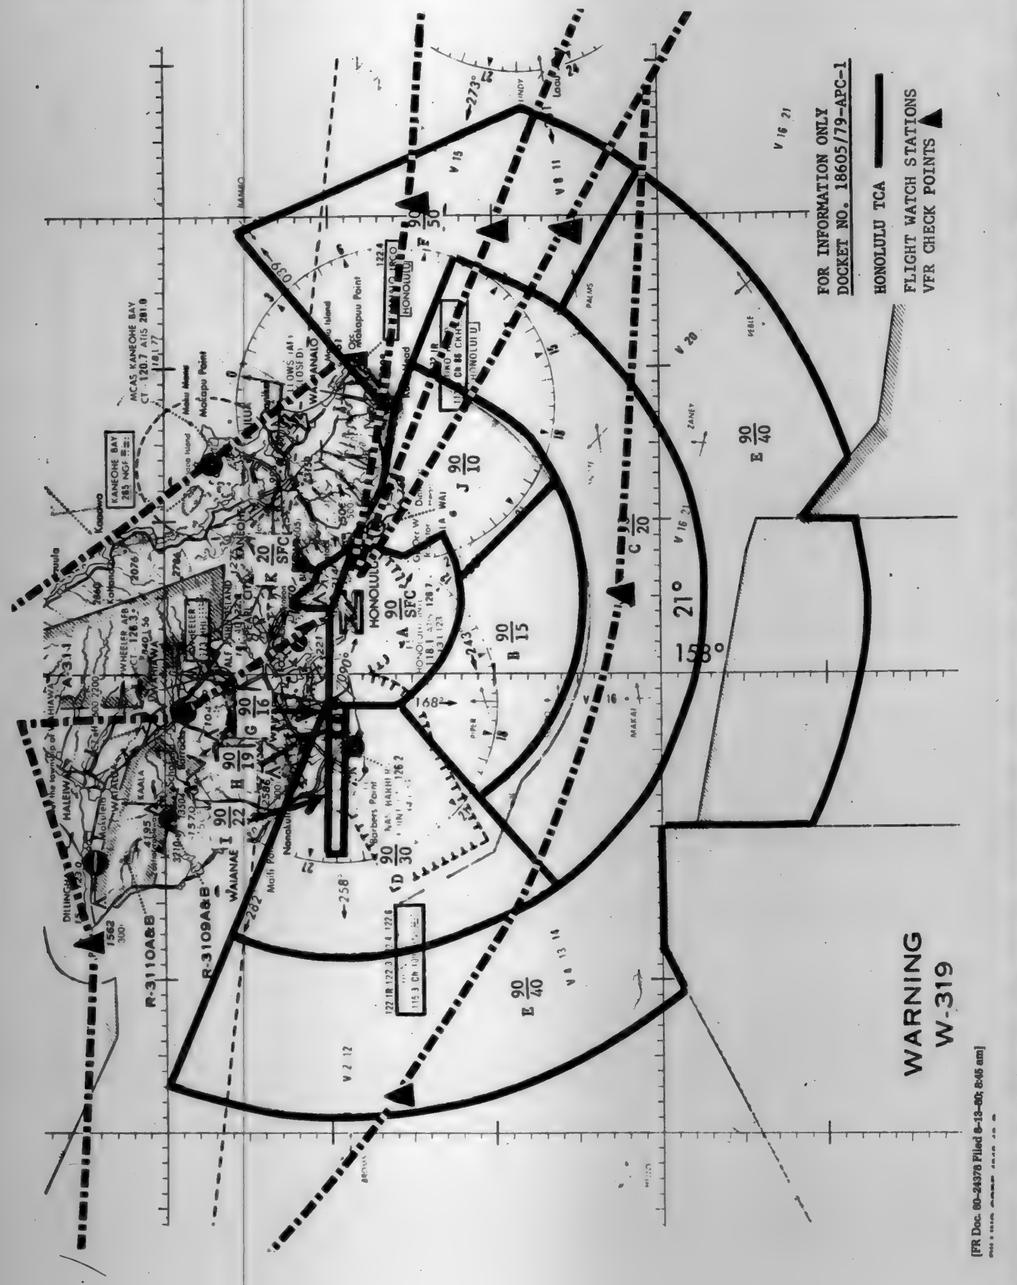
Issued in Washington, D.C. on August 5, 1980.

Langhorne Bond,
Administrator.

BILLING CODE 4910-13-M

Since this regulatory action involves an established body of technical requirements

to alter the Wrightstown, N.J., Transition Area. The rule is an amendment to



14 CFR Part 71

[Airspace Docket No. 79-EA-65]

Alteration of Transition Area; Martinsville, Va.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Martinsville, Va., Transition Area over Blue Ridge Airport, Martinsville, Va. This alteration will provide protection to aircraft executing an amended VOR-B and a new VOR/DME Runway 30 instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: 0901 GMT September 4, 1980.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: On page 3920 of the **Federal Register** for January 21, 1980, the FAA published an NPRM to alter the Martinsville, Va., Transition Area. The rule will amend Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Martinsville, Va., Transition Area. The airport is at present overlaid by a 700-foot area to which is now added a portion of airspace approximately three miles long and nine miles wide to the southeast side of the area and a portion approximately one mile wide by six miles long to the westerly side of the southern extension. Interested parties were given time in which to submit comments. No objections were received.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT September 4, 1980, as published.

(Section 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York, on July 17, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

§ 71.181 [Amended]

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Martinsville, Va., 700-foot floor transition area as follows:

In the text delete all after, "extended from the 6.5-mile radius area to 14 miles northeast of the end of the runway"; and substitute therefor, "within 4.5 miles each side of the Martinsville, Va. VOR 178° radial extending from the 6.5-mile radius area to 12 miles south of the airport; within 4.5 miles each side of the Martinsville, Va. VOR 115° radial extending from the 6.5-mile radius area to 11 miles southeast of the airport."

BILLING CODE 4910-13-M

14 CFR Part 71

[Airspace Docket No. 79-EA-57]

Alteration of Transition Area; Wrightstown, N.J.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This rule alters the Wrightstown, N.J., Transition Area over Monmouth County Airport, Belmar-Farmingdale, N.J. This alteration provides protection to aircraft executing the proposed Runway 14 simplified directional facility (SDF) instrument approach which is being developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

EFFECTIVE DATE: 0901 GMT September 4, 1980.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace and Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

SUPPLEMENTARY INFORMATION: On page 3922 of the **Federal Register** for January 21, 1980, the F.A.A. published an NPRM to alter the Wrightstown, N.J., Transition Area. The rule is an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Wrightstown, N.J., Transition Area. The airport is at present overlaid by a 700-foot area to which will be added a portion of airspace approximately six miles deep and eight miles wide to the northwest. Interested parties were given time in which to submit comments. No objections were received.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) is amended, effective 0901 GMT September 4, 1980, as published.

(Section 307(a), and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(c)); Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.69)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York, on July 17, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

§ 71.181 [Amended]

Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Wrightstown, N.J., 700-foot floor transition area by amending the description to read:

Wrightstown, N.J.

Following, "within a 5-mile radius of Monmouth County Airport (40°11'05" N., 74°07'20" W.); within 2 miles each side of the Colts Neck VORTAC 167° radial extending from the Monmouth County Airport 5-mile radius area to the VOR;" add the following: "within 4 miles each side of the Belmar (BLM), N.J., localizer (40°10'57" N., 74°07'14" W.) 315° bearing extending from the Monmouth County Airport 5-mile radius area to 7-miles northwest of the approach end of Runway 14."

[FR Doc. 80-24377 Filed 8-13-80; 8:45 am]

BILLING CODE 4910-13-M

V 45 A G 1480 UMI

14 CFR Part 71

[Airspace Docket No. 80-NW-4]

Alteration of Transition Area; Redmond, Oreg.; Correction

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Correction to final rule.

SUMMARY: The final rule altering the Redmond, Oregon, transition area to be effective September 4, 1980, omitted an airspace exclusion to the transition area being altered. This correction will reflect the additional airspace exclusion.

EFFECTIVE DATE: September 4, 1980.

FOR FURTHER INFORMATION CONTACT: Robert L. Brown, Airspace Specialist, (ANW-534), Operations, Procedures and Airspace Branch, Air Traffic Division, Federal Aviation Administration, Northwest Region, FAA Building, Boeing Field, Seattle, Washington 98108; telephone (206) 767-2610.

SUPPLEMENTARY INFORMATION: Correction to the final rule excludes that airspace within the Lakeview, Oregon, control area from the transition area being altered at Redmond, Oregon.

Since this action is editorial in nature, notice and public procedure hereon are not necessary.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 445) is amended, effective 0901 G.m.t., September 4, 1980, as follows:

Redmond, Oreg.

After "* * * of and parallel to the 189° radial," on line eleven add: "* * *; that airspace extending upward from 1700 feet above the surface within a line beginning at Redmond, Oregon, VORTAC, extending north on V25 to The Dalles VORTAC, east on V112 to Pendleton VORTAC, southeast on V4 to Baker VORTAC, southwest on V357 to Lakeview VORTAC, west on V122 to Klamath Falls, VORTAC, northwest on V452 to Eugene VORTAC, east on V121N to Redmond VORTAC, excluding that airspace within Federal Airways, the Juniper MOA, the Lakeview Control Area, and the Baker, Eugene, Klamath Falls, Pendleton, The Dalles, and Burns (Wildhorse), Oregon transition areas."

(Sec. 307(a), Federal Aviation Act of 1958, as amended (49 U.S.C. 1348(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and (14 CFR 11.65))

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the procedure and criteria prescribed by Executive Order 12044 and as implemented by Department of Tranportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Seattle, Wash., August 1, 1980.

E. O'Connor,

Acting Director, Northwest Region.

BILLING CODE 4910-13-M

14 CFR Part 73

[Airspace Docket No. 80-ARM-14]

Amendment to Restricted Areas

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Final rule.

SUMMARY: This action changes the title of the using agency of R-6404A and R-6404B Hill AFB, Utah; R-6405 Windover, Utah; and R-6406 Windover, Utah, to reflect internal military reorganization. There are no changes to the area's utilization or dimensions.

EFFECTIVE DATE: October 30, 1980.

FOR FURTHER INFORMATION CONTACT: George O. Hussey, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-3715.

The Rule

This amendment to Part 73 of the Federal Aviation Regulations (14 CFR Part 73) changes the using agency of R-6404A and R-6404B Hill AFB, Utah; R-6405 Windover, Utah: and R-6406 Windover, Utah, from "Commander, Hill AFB, Utah" to "Commander, 6501st Range Squadron, Hill AFB, Utah." Because this action is administrative in nature and not affected by public comment, I find that notice of proposed rulemaking and public procedure is unnecessary.

Adoption of the Amendment

Accordingly, pursuant to the authority delegated to me by the Administrator, § 73.64 of Part 73 of the Federal Aviation Regulations (14 CFR Part 73) as republished (45 FR 722) is amended, effective 0901 GMT, October 30, 1980, as follows:

In § 73.64:

Under R-6404A Hill AFB, Utah, using agency; "Commander, Hill AFB, Utah" is deleted and "Commander, 6501st Range Squadron, Hill AFB, Utah" is substituted therefor.

Under R-6404B Hill AFB, Utah, using agency; "Commander, Hill AFB, Utah" is deleted and "Commander, 6501st Range Squadron, Hill AFB, Utah" is substituted therefor.

Under R-6405 Windover, Utah, using agency; "Commander, Hill AFB, Utah" is deleted and "Commander, 6501st Range Squadron, Hill AFB, Utah" is substituted therefor.

Under R-6406 Windover, Utah, using agency; "Commander, Hill AFB, Utah" is deleted and "Commander, 6501st Range Squadron, Hill AFB, Utah" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) 1354(a)); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.69.)

Note.—The FAA has determined that this document involves a regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Washington, D.C., on August 7, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[FR Doc. 80-24561 Filed 8-13-80; 8:45 am]

BILLING CODE 4910-13-M

DEPARTMENT OF COMMERCE

Office of the Secretary

15 CFR Part 17a

Cooperative Generic Technology Program Procedures

AGENCY: Office of the Secretary, Department of Commerce.

ACTION: Final rule.

SUMMARY: This notice announces the intention of the Department of Commerce to develop and carry out a Cooperative Generic Technology Program in cooperation with U.S. industry and commerce. This new program will provide an opportunity for government, industry, technical institutes, and universities to cooperate in the development of needed generic technologies—those that underlie a broad range of industries—in instances where it is inappropriate for the private sector, acting alone, to do so. The cooperation will include the activities of problem analysis, discovering new knowledge, and providing institutional mechanisms that will promote the development, improvement, and/or transfer of generic technology in selected areas of major importance.

DATE: The regulations become effective August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Frederick Haynes, Department of Commerce, Room 3520, 14th and Constitution Avenue, N.W. Washington, D.C. 20230. (202) 377-5905.

SUPPLEMENTARY INFORMATION: These regulations finalize the Proposed Procedures of the Cooperative Generic Technology Program, which were published for comment, in the **Federal Register** on June 18, 1980.

Maintaining vitality in the Nation's economy and improving our quality of life requires an increased commitment to the development of new technology and improved application of existing technology by domestic industry. In recent years, analysts and decision makers in Government and industry have noted opportunities for stimulating the development of generic technologies—those that underlie a broad range of industries. These generic technologies, broadly used in industry, are often beyond the capability of any one firm to develop for a variety of reasons (cost, lack of management expertise, limited return on investment within a single industry, among others). To encourage a commitment to technological growth and innovation in these generic fields, the Department of Commerce seeks to promote cooperative centers for generic technology research, development and transfer to the private sector. Sharing costs, risks and ideas and building cumulative expertise through a cooperative program such as the one described here will encourage technical progress in these generic technologies.

To this end, the President's Industrial Innovation Initiatives announced on October 31, 1979 called for establishment of non-profit centers—at universities or other private sector sites—to develop and transfer generic technologies. Each center will be targeted on a technology that is involved in the processes of several industrial sectors, and has the potential for significant technological upgrading. The Centers would not supplant efforts in the private sector that are designed for specific product development. Each center will be jointly financed by industry and government, with the government's share dropping to 20 percent or less of the center's cost in the fifth year. In future years, the size of the program will depend on the proposals received, and the experience gained from this initial effort.

Program Goals

The goals of this program are to stimulate technological and industrial innovation in the United States. By stimulating innovation, this program will help to satisfy important national goals such as:

Generating advances in productivity necessary for a growing and noninflationary economy;

Developing new jobs by fostering the creation of new high technology companies;

Protecting environmental quality and human health and safety while enhancing productivity and competitiveness; and

Meeting foreign competitive challenges.

The institutional mechanism chosen to satisfy these program goals is the Cooperative Generic Technology (COGENT) Center. Center will be established for each technology area selected by the program. These centers will be independent non-profit institutions or separate operating units of such institutions that are managed and controlled by private industry sponsors, and funded through government and private sector cost sharing.

Procedural Description

The establishment of centers for generic technologies will follow a three step process. First, the Secretary shall create and maintain an inventory of candidate generic technologies, based upon outside suggestions and internal analysis.

Second, the Secretary will select technologies and invite proposals and requests for funding.

Third, the proposals received will be reviewed, and funds will be released to implement those proposals that best fit the program goals and budgetary limitations.

Description of a Generic Technology Center

A COGENT center will be responsible for the conduct of major R&D projects in the specified generic technology and for promoting technology transfer and utilization. To carry out this responsibility, each Center must perform the following major functions:

A. In-House Generic R&D

Each center will conduct R&D to develop the knowledge needed for new technologies which are unlikely to be created without a cooperative effort. The R&D agenda established by members or their governing boards must be relevant to the specified generic technology, and the potential results should significantly outweigh costs. This R&D must be performed in-house in order to take advantage of cummulative research and problem solving expertise. Therefore the center should plan to develop its facilities, equipment and personnel to the point where it has the capacity to perform in-house as much of the required R&D as possible. The center will not develop a technology beyond the point at which a member firm, acting on its own, may assume the development and resulting commercialization.

B. Technical Services

A major facet of this program is that each center is cooperatively funded by government and industry. However, it is recognized that industry support is likely only if members obtain concrete benefits which are available only to them, and which provide an adequate and near-term return on contributions of the members. Such returns are unlikely from long-term generic R&D. Therefore, each center is expected to design and operate a program of technical services that will provide knowledge of, and ability to utilize available technologies. The specific nature and mix of these services will undoubtedly vary from field to field. However, candidate services include:

1. *Consulting and Technology Service:* A center may have the capability to provide consulting and technical services to interested members, and to non-member firms on an appropriate fee basis. Center staff should include specialists that can provide services such as technical audits, quality control calibrations, technology evaluation, etc. However, the services chosen should complement the capabilities of private consultants rather than compete with them. Therefore, the center must create and distribute a directory of outside experts who can serve as consultants in the specified generic technology.

2. *Information System Service:* The center may establish and maintain a specialized library and data bank that gathers worldwide information on all new developments relevant to the generic technology and disseminates it to its membership. The center could produce periodic status reports on the technology and respond to queries for

technical information from both center members, and from nonmembers on an

(ii) Dues will be assessed by a formula which considers such factors as:

should identify the funding sources and indicate how these funds will be spent.

coordinate the request with the other agency or agencies.

technical information from both center members, and from nonmembers on an appropriate fee basis.

3. *Training:* The center should ensure the availability of programs and facilities for the training of both management and labor in the evaluation and use of the technology in industry. Such services, if provided in-house, must complement programs available from universities and other private sources.

4. *Technology Evaluation:* On a continuing basis, a center will assess new developments in technology on a generic, rather than producer by producer, basis. In this way the center will keep members informed as to progress being made in the development of the technology and the appropriate utilization of new developments.

C. Strategic Planning

The center must have the capability of doing strategic planning in the area of technology development and technology transfer. Strategic planning will involve the periodic assessment of the technology, technology forecasting, identification of critical R&D projects that are required for the advancement of the technology, and of future technology transfer requirements.

Jordan J. Baruch,

Assistant Secretary.

Issued: August 8, 1980.

Title 15 of the Code of Federal Regulations is hereby amended by adding Part 17a, as follows:

PART 17a—COOPERATIVE GENERIC TECHNOLOGY PROGRAM PROCEDURES

Sec.

17a.1 Purpose.
17a.2 Definitions.
17a.3 Program overview.
17a.4 Inventory of candidate technologies.
17a.5 Workshops on generic technologies.
17a.6 Selection of technologies for inclusion in the program.
17a.7 Annual notice of availability of funds.
17a.8 Content of proposals.
17a.9 Waiver procedure.
17a.10 Criteria for selection of center proposals.
17a.11 Proprietary data.
17a.12 Coordination/cooperation with other Federal agencies.
17a.13 Amendments of procedures and criteria.

Authority: 15 U.S.C. 1512; sec. 2, 31 stat. 1449, as amended; sec. 1, 64 stat. 371 (15 U.S.C. 272); Reorg. Plan No. 3 of 1946, Part VI; Reorg. Plan No. 5 of 1950.

§ 17a.1 Purpose.

The purpose of this part is to establish procedures under which the Department of Commerce will administer the Cooperative Generic Technology Program.

§ 17a.2 Definitions.

(a) The term "Secretary" means the Secretary of Commerce or his designee.

(b) The term "Program" means the Cooperative Generic Technology Program.

(c) The term "Generic Technology" means technology that is not product-specific, or that has not been refined to a point where a single firm could reasonably be expected to complete its development.

(d) The term "center" means the Cooperative Generic Technology Centers.

(e) The term "person" means individuals, associations, companies, corporations, firms, government agencies at the Federal, State, and local level, organizations, professional societies, and institutions.

(f) The term "sponsor group" means a group of persons (including users, producers, and/or suppliers of the technology) organized to support centers in a specific technology area.

§ 17a.3 Program overview.

The establishment of generic technology centers will follow a three part process. First, the Secretary will create and maintain an inventory of candidate generic technologies. Second, the Secretary will select technologies from the inventory for inclusion in the Program, and will seek proposals for funding. Third, the proposals received will be reviewed, and funds will be released to implement those proposals which best fit program goals and budget limitations.

§ 17a.4 Inventory of candidate technologies.

The Secretary shall create and maintain an inventory of generic technologies which may be suitable candidates for inclusion in the Program. The inventory will be based upon internal analysis and outside suggestions.

§ 17a.5 Workshops on generic technologies.

The Secretary may hold workshops with representatives from the private sector in order to better understand the nature, need, and value of work in a field of generic technology inventoried in § 17a.4 of this section. Notice of such workshops shall be published in the **Federal Register** and *Commerce Business Daily*, a reasonable time before such a meeting is to be held. Such notice shall state that the workshop is open to the public, and shall give time and location of the workshop.

§ 17a.6 Selection of technologies for inclusion in the program.

(a) The Secretary may select generic technologies for inclusion in the Program from the inventory of technologies prescribed in § 17a.4, or such other sources as he deems appropriate.

(b) Upon making a determination that a specific technology shall be included in the Program, the Secretary may issue in the **Federal Register** an invitation for proposals to fund Centers in the specific technology. The notice shall contain a deadline for submission of the proposal.

(c) The notice shall require that the contents of each proposal shall be as prescribed in § 17a.8 of these regulations.

(d) The Secretary may hold workshops and otherwise encourage the preparation and submission of proposals requested under § 17a.6(b).

(e) The Secretary may select one or more proposals for funding which best meets the requirements set out in § 17a.10.

§ 17a.7 Annual notice of availability of funds

The Secretary shall publish annually, in the **Federal Register** and the *Commerce Business Daily*, a notice containing information about:

(a) Those technologies which the Secretary has designated for inclusion in the Program.

(b) The amount of funds available to the Program; funds for the various technology centers will be available from this total amount.

(c) Contact person, address and phone number.

(d) A listing of other publications in which the funding announcement will appear.

§ 17a.8 Content of proposals.

Each proposal for the establishment of a Center shall contain the following:

(a) A completed *cover sheet* applying for Federal Assistance, SF–424, as described in OMB Circular A–110, Attachment M.

(b) *Corporate Charter and By-laws,* showing that the organization has been established, or will be established, as a nonprofit corporation, and listing the sponsoring individuals.

(1) Each Center's by-laws shall state that the governing board of the Center will be elected in a manner which will ensure fair representation of the interests of all members. No Federal employees will be eligible to serve on a governing board in any capacity.

(2) The Center's by-laws shall also provide that:

(i) Membership in a Center shall be open to all interested domestic persons.

(ii) Dues will be assessed by a formula which considers such factors as:

(A) Overall size of each member;

(B) Volume of activity relevant to the Center's technology;

(C) The member's directness of interest.

(D) A prorated share of the cost of research previously conducted by the Center.

(iii) Membership in a Center may not be conditioned upon adherence to agreements which unreasonably restrain trade. Prohibited agreements shall include:

(A) Restrictions upon members' operational use of technical information or patents developed by the Center;

(B) Restrictions upon independent research conducted by individual members; and

(C) Restrictions upon the use, by individual members, of technology developed outside the Center.

(iv) A Center will not serve as a means for sharing confidential business data among members. Should research or development require the use of such data, it shall be collected either by employees of the Center, or by some independent entity. In no event will such information be shared with the sources' competitors in a form which would allow identification of individual firms.

(v) The Center shall make technical information, resulting from the Center's research activities available to all members at a reasonable cost without discrimination. Terms and conditions of dissemination to nonmembers of the Center shall be at the discretion of the Board; however, the Board shall be governed by the consideration that no significant anticompetitive result ensue from such decisions.

(c) *The Site and Organizational Affiliation* of the proposed Center.

(d) *A Center Organization Plan,* which will describe the Center's activities in these major areas:

(1) In-house R&D;

(2) Technical Services, including:

(i) Consulting and technical services;

(ii) Information system services;

(iii) Training;

(iv) Technology evaluation;

(3) Strategic planning.

(4) The Organizational Plan will include the following for each Center function listed above:

(i) Budget;

(ii) Equipment requirements;

(iii) Personnel requirements;

(iv) Facility requirements;

(v) Major milestones;

(vi) Expected outputs.

(e) *Overall Center Budget and Funding Plan,* covering the first five years of Center operation. This plan should identify the funding sources and indicate how these funds will be spent. Institutional support for the Center operations will be funded by membership dues, sales of technical services, and government supplements that will decline over a number of years.

§ 17a.9 Waiver procedure.

(a) The Secretary may waive the requirement of § 17a.8(b) that a center be established as an independent nonprofit organization under the following circumstances:

(1) If the organization is an independent entity within an existing nonprofit organization, and

(2) If the management and direction of the Center is controlled by the sponsoring firms.

(b) Organizations qualified under this section must meet all the requirements of § 17a.8(b) paragraphs (1) and (2).

§ 17a.10 Criteria for selection of center proposals.

(a) The Secretary may select one or more proposals for funding, which best meet the following criteria:

(1) The breadth and extent of the base of sponsors committed to collaborate in the work of a center, including the likelihood of operation of the center independent of government support after a reasonable period of time.

(2) The degree of center operation's enhancement of industry structure and competition.

(3) The comprehensiveness of coverage of the requirements in § 17a.8.

(4) Availability of funds, and program priorities.

§ 17a.11 Proprietary data.

All persons who request the Secretary to select a technology for inclusion in the Program, and all persons submitting proposals to establish a specific Center, are cautioned that data submitted to the Department may be vulnerable to dissemination under the Freedom of Information Act. The Department would, however, withhold any information it deemed proprietary, on the basis of the provision of 5 U.S.C. 552(b)(4). The Department will consult with the submitter of any data requested under the Freedom of Information Act, prior to the release of such information.

§ 17a.12 Coordination/cooperation with other Federal agencies.

While the Secretary is considering a request prior to making either a preliminary or final determination to establish a specific Center, it may become apparent that the request covers such subjects that are of primary interest of another Federal agency(ies). In such a case, the Secretary will coordinate the request with the other agency or agencies.

§ 17a.13 Amendment of procedures and criteria.

(a) The Secretary may amend these Procedures and Criteria by publishing in the **Federal Register** a notice of proposed amendment. A thirty (30) day period will be allowed from the date of publication for written comment by the public on the proposed amendment. Any amendment adopted shall be published in the **Federal Register.**

(b) If the Secretary finds for good cause that an amendment must be made in a shorter time period than required by this section, he may publish an interim amendment in the **Federal Register,** and at the same time, request comments as provided in paragraph (a) of § 17a.13.

BILLING CODE 3510-18-M

International Trade Administration

15 CFR Part 373

Revision of Computer-Consignee Destinations

AGENCY: Office of Export Administration, International Trade Administration, Commerce.

ACTION: Final rule.

SUMMARY: This revision amends Supplements 2 and 3 to Part 373, which define destinations to which various levels of computers may be exported under the Distribution License Procedure. In the original submission of these lists (43 FR 29448), Luxembourg erroneously appeared in both lists. Italy appeared in Supplement No. 2, while San Marino and Vatican City appeared in Supplement No. 3. This revision amends these supplements by:

(a) Deleting Luxembourg from Supplement No. 3;

(b) Deleting San Marino and Vatican City from Supplement No. 3; and

(c) Inserting a footnote to Italy to indicate that San Marino and Vatican City are considered as parts of Italy for purposes of establishing computer-consignee eligibility.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Archie Andrews, Director, Exporters' Service Staff, Office of Export Administration, telephone: (202) 377–5247 or 377–4811.

SUPPLEMENTARY INFORMATION: Section 13(a) of the Export Administration Act of 1979 ("the Act") exempts regulations promulgated thereunder from the public participation in rulemaking procedures

of the Administrative Procedure Act. Section 13(b) of the Act, which

determining that they comply fully with their obligations under the Act.

Section 4k was enacted as part of the Commodity Futures Trading

DEPARTMENT OF ENERGY

and extensive reporting requirements on those electric utilities covered by Title I

Summary

Reports filed under Order No. 48 must

of the Administrative Procedure Act. Section 13(b) of the Act, which expressed the intent of Congress that where practicable "regulations imposing controls on exports" be published in proposed form, is not applicable because these regulations do not impose controls on exports. It has been determined that these regulations are not "significant" within the meaning of Department of Commerce Administrative Order 218-7 (44 FR 2082, January 9, 1979) and Industry and Trade Administration Administrative Instruction 1-6 (44 FR 2093, January 9, 1979) which implement Executive Order 12044 (43 FR 12661, March 23, 1978), "Improving Government Regulations." Therefore these regulations are issued in final form.

Supplement Nos. 2 and 3 to Part 373 [Amended]

Accordingly, Supplements Nos. 2 and 3 to Part 373 are amended as follows:

1. A footnote to Italy is inserted in Supplement No. 2 to read as follows:

*Includes San Marino and Vatican City.

2. Luxembourg, San Marino and Vatican City are deleted from Supplement No. 3.

(Secs. 13, and 15, Pub. L. 96-72, 93 Stat. 503, to be codified at 50 U.S.C. App. 2401, *et seq.*; Executive Order 12214, 45 FR 29783 (May 6, 1980); Department Organization Order 10-3, 45 FR 6141 (January 25, 1980); and Department Organization Order 41-1, 45 FR 11862 (February 22, 1980))

Dated: August 7, 1980.

Eric L. Hirschhorn,

Deputy Assistant Secretary for Export Administration.

BILLING CODE 3510-25-M

COMMODITY FUTURES TRADING COMMISSION

17 CFR Ch. 1

Interpretative Statement Regarding the Scope of the Term "Supervision" in the Associated Person Registration Requirement

AGENCY: Commodity Futures Trading Commission.

ACTION: Interpretative statement.

SUMMARY: The Commission is publishing this interpretative statement regarding the scope of the registration requirement under Section 4k of the Commodity Exchange Act as it applies to those individuals who supervise persons who solicit or accept customers' orders. The purpose of this notice is to assist affected individuals in determining that they comply fully with their obligations under the Act.

FOR FURTHER INFORMATION CONTACT: Robert P. Shiner, Assistant Director, Division of Trading and Markets, Commodity Futures Trading Commission, 2033 K Street N.W., Washington, D.C. 20581. Telephone: (202) 254-9703.

SUPPLEMENTARY INFORMATION: Section 4k(1) of the Commodity Exchange Act, 7 U.S.C. 6k(1) (1976), states in pertinent part:

> It shall be unlawful for any person to be associated with any futures commission merchant or with any agent of a futures commission merchant as a partner, officer, or employee (or any person occupying a similar status or performing similar functions), in any capacity which involves (i) the solicitation or acceptance of customers' orders (other than in a clerical capacity) or (ii) the *supervision of any person or persons so engaged*, unless such person shall have registered, under this Act, with the Commission. . . . (Emphasis added.)

The Commission has received inquiries concerning the scope of the associated person registration requirement as it applies to those individuals who supervise other associated persons on behalf of a futures commission merchant or its agent. The Commission believes that the registration requirement under Section 4k includes all those individuals in the line of supervisory authority over the associated persons who solicit and accept customers' orders.*

Section 4k was enacted as part of the Commodity Futures Trading Commission Act of 1974. The House Report on that Act provides some indication of Congressional intent with respect to the breadth of the registration requirement. That report states that Section 4k would "extend the requirements for registration to any person associated with a futures commission merchant or with any agent of a futures commission merchant in any capacity which involves . . . the supervision of persons" engaged in the solicitation or acceptance of customers' orders. H.R. REP. No. 93-975, 93d Cong., 2d Sess. 65 (1974).

Because of the organizational diversity of futures commission merchants and of their agents, it is not possible to provide specific guidance as to what positions at a given firm would require registration. It should be emphasized, however, that all persons, regardless of position title, who supervise associated persons must register. Since this requirement, as mentioned above, applies to all individuals in the line of supervisory authority, it includes positions up through that of the firm's chief operating officer. Thus, for example, depending upon the organization of each firm, the supervisors required to register might be the branch office manager and designated supervisor, district manager, vice-president in charge of commodity sales, vice-president in charge of the commodity department, the executive vice-president to whom these persons report, and the president of the firm.

In publishing this notice regarding those supervisors required to be registered under Section 4k, the Commission wishes to emphasize that it intends to enforce that Section in accordance with this Interpretation. Accordingly, any person failing to comply with this Interpretation will be subject to appropriate Commission action.

Issued in Washington, D.C., on August 11, 1980.

Jane K. Stuckey,

Secretary of the Commission, Commodity Futures Trading Commission.

[FR Doc. 80-24656 Filed 8-13-80; 8:45 am]

BILLING CODE 6351-01-M

* In connection with the initial organization of the Commission, staff reports were prepared concerning the proper implementation of the Act, and one such report (Report for the Commodity Futures Trading Commission, *Questions Respecting the Registration of Associated Persons*, Project No. 204 (1975)) specifically discussed the interpretation of Section 4k as it relates to supervisory personnel.

The Report stated that three approaches could be taken. First, the Commission could view the term "supervision" narrowly, as applying only to the immediate supervisor of the employee who is engaged in the solicitation or acceptance of customers' orders. Second, the Commission could construe the term to include not only the immediate supervisors and those in the supervisory "chain-of-command" but also to include anyone who has policy-making responsibility with respect to these activities or who supervises persons with such responsibility. The third approach would be to include not only the immediate supervisors, but also all those persons in the supervisory "chain-of-command" of a futures commission merchant or its agent. It is this third approach which the Report recommended and which the Commission has followed and concerning which it is now giving the public general notice.

While this Interpretation deals with the question of who must register under Section 4k(1)(ii) of the Act, Commission rule 166.3, 17 CFR 166.3 (1979), concerns the scope of the supervisory obligations of registrants other than non-supervisory associated persons and, of course, would apply to those who must register under Section 4k(1)(ii) in accordance with this Interpretation.

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 290

[Docket No. RM79-6; Order No. 48-B]

Collection of Cost of Service Information Under Section 133 of the Public Utilities Policies Act of 1978

August 7, 1980.

AGENCY: Federal Energy Regulatory Commission, DOE.

ACTION: Final Rule.

SUMMARY: The Federal Energy Regulatory Commission hereby amends its regulations regarding the collection of cost of service information under section 133 of the Public Utilities Regulatory Policy Act of 1978 to provide utilities required to submit data under that section with instructions for submitting the required information.

EFFECTIVE DATE: August 7, 1980.

FOR FURTHER INFORMATION CONTACT: Daniel G. Lewis, Assistant to the Director, Office of Electric Power Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, (202) 376-9227.

SUPPLEMENTARY INFORMATION:

Background

On September 28, 1979, the Federal Energy Regulatory Commission (Commission) issued Order No. 48, containing final regulations implementing section 133 of the Public Utility Regulatory Policies Act of 1978 (PURPA).[1] On January 4, 1980, the Commission issued Order No. 48-A, granting in part and denying in part petitions for reconsideration of certain provisions of Order No. 48.[2]

Section 290.102(b) of Order No. 48 provides that the information required to be submitted by utilities "shall be submitted on suitable standard forms prescribed by the Commission or in any form otherwise determined by the Commission." The present order amends § 290.102 to provide respondent utilities with instructions for submitting the required information by November 1, 1980. The order further states the Commission's intention to consider refinement and extension of these instructions following its review of the first submissions under these regulations.

In seeking to fulfill the purpose of section 133, Order No. 48 places new and extensive reporting requirements on those electric utilities covered by Title I of PURPA. Whether these reporting requirements should include new standard forms, thereby assuring uniformity among the submissions, has not yet been determined. Uniform submissions would facilitate use of the information by some interested parties [3] and any compliance review that is necessary. However, there are arguments against the prescription of standard forms, including the fact that many of the required data have already been developed by respondent utilities for their own purposes and would have to be transcribed to such standard forms as we might prescribe. Because the time in which utilities must submit their first reports is only about three months away, it is urgent to provide respondents with basic instructions now so as to enable them to meet the first reporting date. This can be done with instructions that permit latitude in format. Even if we determine now that standard forms are desirable, their preparation and adoption would take more time and would jeopardize effective compliance, which would not serve the overall purposes of the law. We think it better to give respondent utilities the opportunity to take advantage of the existing report formats and media, where these are applicable and thus seek the means to minimize new reporting costs to the extent possible.

However, it is important that the data be available to users in convenient form. The required information is expected to be used, at least initially, on a case by case basis, involving one utility or a very small number of utilities. The Congressional purpose was to provide for the availability of information that would be used primarily by persons interested in retail electric rate proceedings in the various states. As a consequence, the filed information must be ready for use in locations that are readily accessible to such interested persons. For this reason, the filings must be self-contained. The potential users must not have the burden from which the Congressional act would relieve them of having to depend on data in a variety of reports that the utilities would file with Federal or State agencies, some of which might not only be inaccessible, but even unknown to some interested persons.

Summary

Reports filed under Order No. 48 must be legible and complete. They must be capable of being understood by a person who is familiar with the data requirements of Order No. 48 and generally familiar with utility accounting and operating terminology and practices.

It is our conclusion that a minimal and adequate reporting format consistent with the objectives set forth above is a set of data presentations, of the respondent utilities' design and choosing, having clear and unambiguous correspondence to the paragraphs and subparagraphs of the regulations that specify data requirements. The presentations must be clearly labeled as to the paragraph of the regulations treated, and must be arranged in the order in which the items are to appear.

As an appendix to this order, but not a part of it, the Commission has included a Staff Advisory Statement describing specific formats that may be used, at each respondent utility's option, for reporting certain information specified in the regulations. Commission Staff is hereby directed to review the submitted information and by February 1, 1981, advise the Commission as to the need for refinement and extension of the reporting instructions, including the need for standard forms. To the extent that standard forms are included in Staff recommendations, such forms may or may not be similar to those included in the Staff Advisory Statement attached hereto. The comments of utilities and other interested parties will be sought on any standard forms proposed in Staff recommendations.

Effective Date

The revision to § 290.102(b) is intended to inform persons required to file data under 18 CFR Part 290 by November 1, 1980, of the way in which such data to be submitted is to be organized. There is an immediate need for regulations to give direction to those who are preparing data submissions for the approaching deadline. In addition, the regulation is a procedural one relating to the format and organization of data submittals already required by Part 290. For these reasons, good cause exists to adopt this revision effective immediately.

(Public Utility Regulatory Policies Act, (16 U.S.C. 2801-2645), Department of Energy Organization Act, (42 U.S.C. 7101-7352), Exec. Order No. 12009, 3 CFR Part 142 (1978))

In consideration of the foregoing, the Commission revises Part 290 of Chapter I, Title 18, *Code of Federal Regulations*, as set forth below.

[1] 44 FR 48,687 (1979).

[2] 45 FR 2,023 (1980).

[3] In particular, this would appear pertinent to the intervention activities of the Secretary of Energy, as well as to those users or other interested persons who express a national concern with retail electric ratemaking procedures, such as some industrial groups and some consumer or conservationist groups.

By the Commission.

Kenneth F. Plumb,

Secretary.

Part 290, Subchapter K, Chapter I of the Code of Federal Regulations, § 290.102 is revised in paragraph (b) to read as follows:

§ 290.102 Compliance.

* * * * *

(b)(1) *Form of the information.* The information prescribed in Subparts B, C, D, and E of this part shall be submitted as a set of presentations corresponding to the named paragraphs which are listed in outline in paragraph (b)(2) of this section. The presentations are to be of each respondent utility's design and choosing: *Provided,* That each presentation is clearly identified with the name of the utility, the date of submission, and the paragraph or subparagraph of this part to which the information corresponds. The presentations must be arranged in order corresponding to the order given in paragraph (b)(2) of this section following, and must be preceded by a title sheet as prescribed in paragraph (b)(3) of this section following. The presentations must be clear and legible, and suitable headings and identification must be provided for numerical data. The presentations may be tabular or descriptive according to the nature of the information prescribed.

(2) *List of required items for information.* Those paragraphs and subparagraphs of Order No. 48 that identify specific information requirements are as follows:

Subpart B—Accounting Cost Information

Section 290.201 Rate Base Information

(a) Plant accounts
(b) Depreciation reserve
(c) Depreciation expense
(d) Construction work in progress
(e) Prepayments
(f) Accumulated deferred income tax
(g) Materials and supplies
(h) Electric plant held for future use
(i) Nuclear fuel materials
(j) Common utility plant and expenses

Section 290.202 Operating Expense Information

(a) Operating and maintenance expense accounts
(b) Payroll
(c) Taxes

Section 290.203 Income and Revenue Related Tax Information

(a) Tax rates
(b) Differences in income items and deductions
(c) Itemized deductions
(d) Adjustments to taxes

Section 290.204 Rate of Return Information

(a) Capitalization
(b) Costs of capital

Section 290.205 Costing Periods

Subpart C—Marginal Cost Information

Section 290.302 Generation Cost Information

(a) Production planning information for existing generating plants
(b) Production planning information for planned additions to generating capacity
(c) Factors affecting existing generating units
(d) Planning method used
(e) Other sources of information
(f) Ten year resource projection
(g) Net annual cost of the generating unit or units that will be installed to meet increases in peak demand

Section 290.303 Energy Cost Information

(a) Typical hourly marginal energy costs
(b) Other information on marginal energy costs
(c) Pool hourly marginal energy costs
(d) Procedures and models used
(e) Hydroelectric units
(f) Effect of purchased power costs
(g) Marginal energy costs by costing period and by year
(h) Calculated marginal energy costs by costing period
(i) Effect of energy loss

Section 290.304 Transmission Cost Information

(a) Plant information
(b) Operating and maintenance expense

Section 290.305 Distribution and Customer Cost Information

(a) Plant information
(b) Operating and maintenance expense

Section 290.306 Other Cost Information

(a) Customer expenses
(b) Sales expenses
(c) Administrative and general expenses
(d) Certain taxes
(e) Electric plant in service
(f) General plant

DEPARTMENT OF COMMERCE

International Trade Administration

19 CFR Part 355

Dextrines and Soluble or Chemically Treated Starches Derived From Potato Starch From the European Community; Revocation of Countervailing Duty Order

AGENCY: International Trade Administration, Department of Commerce.

ACTION: Revocation of countervailing duty order.

SUMMARY: This notice is to advise the public that, as a result of a negative injury determination by the International Trade Commission, the Department of Commerce is revoking the countervailing duty order on dextrines and soluble or chemically treated starches derived from potato starch from the European Community. The table in Part 355, Annex III of the Commerce Regulations is amended to reflect this revocation.

EFFECTIVE DATE: January 1, 1980.

FOR FURTHER INFORMATION CONTACT: Stephen Nyschot, Office of Compliance, International Trade Administration, U.S. Department of Commerce, Room 1126, Washington, D.C. 20230 (202-377-2209).

SUPPLEMENTARY INFORMATION: A notice of "Final Countervailing Duty Determination," T.D. 80-2, was published in the Federal Register of December 19, 1979 (44 FR 75135). The notice stated that the Treasury Department had determined that exports of dextrine and soluble or chemically treated starches derived from potato starch from the European Community were provided bounties or grants, within the meaning of section 303 of the Tariff Act of 1930 (19 U.S.C. 1303). Accordingly, imports into the United States of this merchandise were subject to countervailing duties.

On January 1, 1980, Title I of the Trade Agreements Act of 1979 (93 Stat. 150) (the TAA) went into effect. On January 2, 1980, the authority for administering the countervailing duty law was transferred from the Treasury Department to the Department of Commerce (the Department). Since the member states of the European Community were "countries under the Agreement" as of January 1, 1980, the Department referred this case to the International Trade Commission (ITC) for a material injury determination in accordance with section 104(a)(1) of the TAA. Effective January 1, liquidation was suspended and estimated countervailing duties were collected (see 45 FR 12860, February 27, 1980). The ITC published a negative material injury decision in the Federal Register of May 7, 1980 (45 FR 30182).

As a result, the Department hereby revokes T.D. 80-2 with respect to all merchandise entered, or withdrawn from warehouse, for consumption on or after January 1, 1980.

The Department will instruct Customs officers to proceed with liquidation of all such entries of the subject merchandise without regard to countervailing duties and to refund any estimated countervailing duties collected with respect to such entries. Entries, or withdrawals from warehouse, for consumption made from December 19, 1979, through December 31, 1979, are subject to countervailing duties as set forth in T.D. 80-2.

It should be noted that the ITC's negative injury decision also applies to dextrines and soluble or chemically treated starches derived from corn starch from European Community, which product was the subject of a separate affirmative "Final Countervailing Duty Determination" by the Department on March 21, 1980 (45 FR 18414).

Consistent with section 705(c)(2) of the Tariff Act of 1930 the Department terminated the corn starch investigation at the time the ITC published notice of its negative injury determination.

The table in section 355, Annex III, Commerce Regulations (19 CFR Part 355, Annex III, 45 FR 4949), is amended under the country heading "European Communities" by deleting from the column headed "Commodity," the words "Dextrines and soluble or chemically treated starches derived from potato starch"; from the column headed "Treasury Decision," the number "80-2"; and from the column headed "Action," the words "Bounty declared-rate."

This revocation and notice publication are in accordance with section 104(a)(3)(B) of the TAA (93 Stat. 191, 19 U.S.C. 1671 note).

John D. Greenwald,

Deputy Assistant Secretary for Import Administration.

August 11, 1980.

BILLING CODE 3510-25-M

ENVIRONMENTAL PROTECTION AGENCY

21 CFR Part 193

[FRL 1589-6; FAP 9H5222/R63]

Cyano(3-Phenoxyphenyl)Methyl-4-Chloro-Alpha-(1-Methylethyl)Benzeneacetate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes a tolerance for residues of the pesticide cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate in or on dried apple pomace at 0.2 part per million (ppm). The regulation was requested by Shell Chemical Co. This rule establishes a maximum permissible level for residues of cyano in dried apple pomace.

EFFECTIVE DATE: Effective on August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Franklin D. R. Gee, Product Manager (PM) 17, Registration Division (TS-767), Office of Pesticide Programs, Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460, 202/426-9417.

SUPPLEMENTARY INFORMATION: Notice was published in the Federal Register of July 20, 1979 (44 FR 42773) that Shell Chemical Co. had filed a food additive petition (FAP 9H5222) with EPA. This petition proposed that 40 CFR Part 193 be amended to establish tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the food commodity dried apple pomace at 0.2 ppm. No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance included a rat acute oral toxicity study with a median lethal dose (LD_{50}) of 1-3 grams (gm)/kilogram (kg) of body weight (bw) in water and 450 milligrams (mg)/kg of bw in dimethylsulfoxide (DMSO); a 90-day dog feeding study with a no-observable-effect level (NOEL) of 500 ppm; and an 18-month mouse feeding study with a NOEL of 100 ppm with no oncogenic effects at the highest level fed (3,000 ppm); a 24-month rat feeding study with a NOEL of 250 ppm (the highest level fed) with no oncogenic effects; a three-

generation rat reproduction study with a NOEL of 250 ppm (the highest level fed); teratology studies in mice and rabbits (both negative at the highest dose of 50 mg/kg of bw/day); and the following mutagenicity studies: Mouse dominant lethal (negative at 100 mg/kg of bw, which was the highest level fed), mouse host-mediated bioassay (negative at 50 mg/kg of bw, which was the highest level fed); AMES test in vitro (negative), and a bone marrow cytogenic study in the Chinese hamster (negative at 25 mg/kg of bw). The following studies assessing neurological effects were performed: A hen study negative at 1g/mg/kg of bw for 5 days, repeated again at 21 days; a rat acute study with an NOEL of 200 mg/kg of bw; a 15 month rat feeding study resulted in a systemic NOEL of 500 ppm and a NOEL of 1500 ppm with respect to nerve damage.

The pesticide is considered useful for the purpose for which the tolerance is sought. Establishment of the tolerance will protect the public health. Therefore, the regulation amending 21 CFR Part 193 by adding § 193.86 is set forth below.

Any person adversely affected by this regulation may, on or before September 15, 1980, file written objections with the Hearing Clerk, EPA, Room M–3708 (A–110), 401 M Street, SW, Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested the objections must be supported by grounds legally sufficient to justify the relief sought.

Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other "specialized" procedures. This regulation has been reviewed and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective date: August 14, 1980.

(Sec. 408(d)(2), 68 Stat. 514, (21 U.S.C. 346a(e))

Dated: August 8, 1980.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Therefore, Subpart A of 21 CFR Part 193 is amended by adding § 193.86 to read as follows:

§ 193.86 Cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate.

A tolerance is established for residues of the insecticide cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the following food additive commodity:

Commodity	Parts per million
Dried apple pomace	0.2

BILLING CODE 6560-01-M

DEPARTMENT OF JUSTICE

Office of Justice Assistance, Research, and Statistics

28 CFR Part 42

Nondiscrimination in Federally Assisted Programs

AGENCY: Office of Justice Assistance, Research, and Statistics (OJARS), Law Enforcement Assistance Administration (LEAA), National Institute of Justice (NIJ), Bureau of Justice Statistics (BJS), Justice.

ACTION: Final rules.

SUMMARY: OJARS is adopting, as final, two amendments to its Nondiscrimination Regulations originally proposed for comment on May 20, 1980. 45 FR 33652. New 28 CFR 42.203(b)(8) specifically prohibits recipients of financial assistance under the Justice System Improvement Act (JSIA) or Juvenile Justice (JJ) Act from depriving any person of his or her constitutional rights on the basis of race, color, religion, national origin, or sex. New 28 CFR 42.204(b) prohibits certain awards of assistance under the JSIA or the JJ Act until the applicant's Equal Employment Opportunity Program (EEOP) has been approved by OJARS.

OJARS is also making technical and typographical corrections to its previously published final rules.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: David I. Tevelin, Attorney-Advisor, OJARS, Office of General Counsel, (202) 724–6235.

SUPPLEMENTARY INFORMATION: OJARS received only four comments on the proposed amendments, two on the constitutional rights issue and two on the EEOP issue.

On the constitutional rights issue, one commenter asked why a deprivation of rights on the basis of handicap was not prohibited. The OJARS Nondiscrimination Regulations implement section 815(c) of the Justice System Improvement Act of 1979, which proscribes discrimination on only the grounds of race, color, religion, national origin, or sex. Accordingly, these regulations are not the appropriate vehicle to enjoin conduct discriminating against the handicapped. Discrimination against the handicapped in IEAA-, NIJ-, and BJS-financed programs is addressed in the Department of Justice's regulations, "Nondiscrimination Based on Handicap in Federally Assisted Programs," 45 FR 37620 (June 3, 1980).

The other commenter on this issue commended the amendment for its application of the constitutional rights accorded juveniles in *In Re Gault* to JSIA agencies' recipients. To the extent that a recipient denies juveniles the rights accorded by that case on the basis of race, color, religion, national origin, or sex, such conduct is prohibited by section 42.203(b)(8).

With respect to the EEOP review issue, one commenter suggested that OJARS conduct a pre-award review of all grants for $250,000 or more, rather than $500,000 or more. Prior to proposing this amendment, OJARS reviewed all announced grant programs, and the size of the grants likely to be awarded under them in FY 1980, and concluded that it could conduct a thorough and timely review of only the (approximately) 35 awards that would exceed $500,000. Our conclusion has not changed in this regard.

The other commenter suggested doing pre-award reviews of non-governmental applicants' EEOP's as well. OJARS' present EEOP regulations do not, however, require non-governmental applicants to prepare EEOP's. This issue is being examined during the agency's present efforts to revise the EEOP regulations, and will be highlighted for comment when those revisions are proposed in the **Federal Register** in the near future.

Accordingly, 28 CFR Part 42 is amended in the following paragraphs. Paragraph (b)(8) is added to § 42.203; paragraph (a) is published for clarity:

§ 42.203 Discrimination prohibited.

(a) No person in any State shall on the ground of race, color, religion, national origin, or sex be excluded from participation in, be denied the benefits of, be subjected to discrimination under, or denied employment in connection with any program or activity funded in whole or in part with funds made available under the JSIA or the Juvenile Justice Act.

(b) A recipient may not, directly or through contractual or other arrangements, on the grounds set forth in paragraph (a) of this section:

* * * * *

(8) Subject any individual to physical abuse or summary punishment, or deny any individual the rights guaranteed by the Constitution to all persons;

* * * * *

Section 42.204 is amended to add paragraph (b) as follows:

* * * * *

§ 42.204. Applicant's Obligations.

* * * * *

(b) Every unit of State or local government and every agency of such unit that applies for a grant of $500,000 or more under the JSIA or the Juvenile Justice Act, must submit a copy of its current Equal Employment Opportunity Program (if required to develop one under 28 CFR 42.301, et. seq.) to OJARS at the same time it submits its grant application. No application for $500,000 or more will be approved until OJARS has approved the applicant's EEOP.

* * * * *

In addition, the following technical and typographical corrections are being made, as final, in the OJARS Nondiscrimination Regulations otherwise adopted as final on April 30, 1980. 45 FR 28704.

1. The last sentence of paragraph 9 in the "Supplementary Information" portion of the preamble to the regulations, 45 FR 28705, is deleted as incorrect and inconsistent with the commentary on section 42.205(c)(1). OJARS does not have "jurisdiction" to investigate a complaint, if the agency complained against is not receiving OJARS, LEAA, NIJ, or BJS assistance at the time the complaint is received.

§ 42.202 [Amended]

2. In 28 CFR 42.202(r), "criminal justice control" is corrected to read "criminal justice council."

§ 42.205 [Amended]

3. 28 CFR 42.205(c)(4) is corrected to read: "If, within 30 days, the Office's recommendations for compliance are not met, or voluntary compliance is not secured, the matter will be forwarded to the Director of OJARS for a determination of compliance or non-compliance. The determination shall be made no later than 14 days after the conclusion of the 30-day period. If the Director makes a determination of non-compliance with section 815(c)(1) of the JSIA, the Office shall institute administrative proceedings pursuant to § 42.208 et seq."

§ 42.206 [Amended]

4. In 28 CFR 42.206(a) (1) and (2), "IEAA" is corrected to read "LEAA."

Robert F. Diegelman,

Assistant Administrator, Office of Planning and Management.

[FR Doc. 80-24587 Filed 8-13-80; 8:45 am]

BILLING CODE 4410-18-M

DEPARTMENT OF TRANSPORTATION

Coast Guard

33 CFR Part 164

[CGD 79–148]

Electronic Relative Motion Analyzer

AGENCY: Coast Guard, DOT.

ACTION: Final rule.

SUMMARY: This rule requires self-propelled vessels of 10,000 gross tons or more that are U.S. vessels or call at a U.S. port, and that carry oil or liquid hazardous materials in bulk as cargo or in residue, to have an electronic relative motion analyzer (ERMA) installed by July 1, 1982. This requirement is mandated by Section 5 of the Port and Tanker Safety Act of 1978 (Pub. L. 95–474). It is intended to help minimize the occurrence of collisions involving those vessels which may have the potential of creating environmental harm. Because of the confusion concerning applicability that was made evident by comments on the notice of proposed rulemaking, additional comments on applicability, as clarified by this final rule, are invited.

DATES: 1. This amendment is effective on July 1, 1982. 2. Comments must be received by September 29, 1980.

ADDRESSES: Comments on the applicability and definitions should be submitted to the Commandant (G–CMC/24) (CGD 79–148), U.S. Coast Guard, Washington, DC, 20593. All comments and copies of the final evaluation are available for examination at the Marine Safety Council (G–CMC/24), Room 2418, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593.

FOR FURTHER INFORMATION CONTACT: Mr. Fred Schwer, Project Manager, Office of Marine Environment and Systems (G–WWM–2/11), Room 1608, U.S. Coast Guard Headquarters, 2100 Second Street, SW., Washington, DC 20593, (202) 426–4958.

SUPPLEMENTARY INFORMATION: In response to the President's message to Congress of March 17, 1977, a notice of proposed rulemaking on this subject was published on May 16, 1977 (42 FR 24871). Public hearings were held in San Diego, California, on June 16, 1977, and in Washington, DC, on June 21, 1977. The proposal was withdrawn on July 24, 1978 (43 FR 32112) in order to allow the U.S. to encourage and participate in a parallel international action conducted by the Intergovernmental Maritime Consultative Organization (IMCO).

The U.S. Congress, in October 1978, enacted the Port and Tanker Safety Act (the Act) (Pub. L. 95–474). Section 5(7)(J) of the Act requires certain vessels of 10,000 gross tons or more to be equipped with, among other things, an "electronic relative motion analyzer" by July 1, 1982. In response both to the Presidential directive and to the Act, a second notice of proposed rulemaking was published by the Coast Guard on February 21, 1980 (45 FR 11790).

DRAFTING INFORMATION: The principal persons involved in drafting this document are Mr. Fred Schwer, Office of Marine Environment and Systems, Project Manager, and Lieutenant Commander Jack Orchard, Office of Chief Counsel, Project Attorney.

DISCUSSION: Fourteen letters of comment on the docket were received. Six of the letters, plus numerous telephone calls to the Project Manager, made it evident that the applicability of the proposed rule was unclear. The rule is intended to implement Section 5(7)(J)(ii) of the Port and Tanker Safety Act of 1978 and derives its applicability from the Act. In summary, this rule applies to any self-propelled vessel of 10,000 gross tons or more that is a U.S. vessel or calls at a U.S. port, and carries:

1. Oil in bulk as cargo or in cargo residue; or

2. Liquid hazardous material in bulk as cargo or in cargo residue. Some definitions have been added to this final rule to clarify the scope of its applicability.

Note particularly that the term "self-propelled vessel" includes those combinations of a pushing vessel and a vessel being pushed ahead which are rigidly connected in a composite unit and are required by Rule 24(b) of the "International Regulations for Preventing Collisions at Sea," 1972 ('72 COLREGS) (App. A to 33 CFR Part 87), to exhibit the lights prescribed in Rule 23 for "Power Driven Vessels Underway". This language also is consistent with IMCO's proposed amendment to Regulation 12 of Chapter V of the "International Convention on Safety of Life at Sea, 1974" (SOLAS '74), which will require these composite units to carry navigation equipment prescribed for ships of comparable aggregate tonnage.

Several callers have asked whether non-revenue cargo is included in the

One commenter cited the possibility that a mariner could set the alarm

adequacy of the standards. The Coast Guard is required to report annually to

nonsignificant. A final evaluation has

any port or place subject to the jurisdiction of the United States, must

as they can by manually plotting a single target; and

Several callers have asked whether non-revenue cargo is included in the term "cargo". "Cargo" means either revenue or non-revenue cargo. The rule does not apply to ships that carry only "bunker" fuel for their own use, regardless of quantity.

"Bulk" means material in any quantity that is shipped, stored, or handled without benefit of label, mark, or count. In this application it means liquid material that is pumped on or off the vessel, into or from integral or fixed independent tanks. It does not apply to marine portable tanks or containers that are handled as "package" products.

One commenter suggested that the applicability of the regulations should be extended to include public vessels. Section 5(4)(A) of the Act specifically excepts public vessels. This rule, as noted above, is intended to implement the Act. Therefore, it is beyond the authority of the Coast Guard, acting under the Act, to broaden its applicability.

Four commenters took issue with the United State' unilateral action, which they consider to be inconsistent with recent actions taken by IMCO. The U.S. Government, through the U.S. Congress, has determined that immediate action is necessary to protect the waters of the nation from environmental damage by vessels which have the greatest potential for creating harm. With the exception of the legislatively mandated implementation date of July 1, 1982, and the requirement for audible and visual contact alarms, both of which are required by the Act, the Standards contained in this regulation are compatible with the IMCO standard. Furthermore, the proposed amendment to SOLAS' 74 will require all vessels of 10,000 gross tons or more to have the devices. Implementation of that requirement would start on January 1, 1984. The Coast Guard will conduct further rulemaking before that date as may be required by our treaty obligations.

Four letters of comment called attention to the possibly dangerous effect of "operational warnings". They contended that audible and visual alarms to warn of newly acquired targets will condition the watchstander to observe the radar only "when the bell rings." This certainly is a possibility and could be a danger, but it is one that can be offset by proper training in the use of radar and ERMA. However, the risk of negative conditioning is problematical. In reality, some watchstanders do not pay sufficient attention to the radar now and casualties caused by inattentive watchstanding do occur.

One commenter cited the possibility that a mariner could set the alarm feature at a zero range setting, thereby effectively disabling the mechanism. This is quite true, but it is a useful capability. In channels and crowded waterways, an alarm-disabling feature is necessary to avoid continuous alerting of the watchstander. Again, training in the proper use of the device will eliminate most misuse.

Four letters of comment asserted that extensive ERMA training is necessary before the units come into widespread use. The commenters consider the device to be dangerous in the hands of an untrained or undertrained operator and likely to cause collisions rather than to avert them. The Coast Guard agrees that, like any tool, an ERMA can be misused. However, it is not agreed that extensive training is necessary. It has been demonstrated many times that 30 to 60 minutes of familiarization is adequate to permit a reasonably intelligent person with a knowledge of radar plotting to effectively use the devices. Thereafter, practice increases proficiency. The key to proper use is the realization that ERMA is a time and labor saving tool, not a decision making machine. It provides the operator with timely information in an easy to understand format, from which an informed navigating decision may be made.

Three commenters urged that the ERMA be capable of accepting electronic inputs from either of the two radars required on vessels of 10,000 gross tons or more. The Coast Guard agrees that an interswitching capability can be useful. However, interswitching requires compatible radar systems. Recent advances in radar technology have led to new directions in radar design, at least one of which is electronically incompatible with existing radars. A required interswitching capability at this time could choke-off development of these very promising concepts.

Four commenters recommended various technical changes to the standard. Some of those unquestionably have merit. However, the standard cited in this rulemaking is essentially that which has been agreed to internationally. Unilaterally amending the international standard to achieve incremental improvements of questionable value to safety is not considered a reasonable course of action.

Two commenters recommended that the U.S. Coast Guard monitor the performance of the devices as they go into widespread service and report to IMCO and to the U.S. Congress on the adequacy of the standards. The Coast Guard is required to report annually to the Congress on its progress in implementing the Act. Should a revision of the standard become necessary, the mechanism exists for the report of this fact to Congress. Regarding IMCO, international standards are under continuous review by the Organization. As more shipboard experience with the devices is gained, necessary changes to the standard will become evident and will be incorporated as the need dictates.

One commenter suggested that U.S. "grandfather" devices which are already installed on many ships. The Act does not allow the Coast Guard to accept a lesser standard than that of the Maritime Administration. Internationally, administrations may accept a standard less than IMCO's until 1991, but vessels calling at U.S. ports will have to comply with one of the standards described in this rulemaking.

One commenter suggested that failure of the ERMA be added as a required report under 33 CFR Part 164.53. The Coast Guard disagrees. Reports under that section are intended to cover only those items of navigational equipment that may be essential for the safe passage of a ship from the sea into port. The ERMA may be helpful, but it is not essential.

The wording of paragraph 164.38(c)(1), as it appeared in the NPRM, has been changed to eliminate references to 1984 and 1985. These dates were in reference to the proposed SOLAS '74 carriage requirements for the devices. However, the wording caused some confusion about the implementation date of this rule, which is July 1, 1982, as stated above. The SOLAS '74 references are not a factor in this rulemaking.

Although the "Port and Tanker Safety Act of 1978" refers to an "electronic relative motion analyzer" (ERMA), the term used by IMCO is "automatic radar plotting aid" (ARPA). As was mentioned in the preamble to the NPRM, this rulemaking adopts the IMCO term to avoid confusion and to promote standardized terminology for these devices.

This rule will become effective on July 1, 1982. If, as a result of comments, the Coast Guard decides that further clarification of its applicability is desirable, due notice will be given in the **Federal Register** within 120 days of publication of this rule.

This final rule has been reviewed under the Department of Transportation's "Regulatory Policies and Procedures" (FR 11034, February 26, 1980) and is determined to be nonsignificant. A final evaluation has been prepared and is included in the public docket.

In view of the foregoing Part 164 of Chapter I of Title 33, Code of Federal Regulations is amended as follows:

1. By revising § 164.01 to read as follows:

164.01 Applicability.

(a) This part (except for §§ 164.38 and 164.39) applies to each self-propelled vessel of 1600 or more gross tons (except foreign vessels described in § 164.02) when it is operating in the navigable waters of the United States except the St. Lawrence Seaway.

2. By revising § 164.02(a) to read as follows:

§ 164.02 Applicability exception for foreign vessels.

(a) This part (including §§ 164.38 and 164.39) does not apply to vessels that—

* * * * *

3. By adding § 164.38 and appendices A and B to that section to read as follows:

§ 164.38 Automatic radar plotting aids (ARPA).

(a) Definitions: As used in this section—

"Bulk" means material in any quantity that is shipped, stored, or handled without benefit of package, label, mark or count and carried in integral or fixed independent tanks.

"Hazardous material" means any liquid material or substance which is flammable or combustible, is designated a hazardous substance under section 311(b) of the Federal Water Pollution Control Act, as amended (33 U.S.C. 1321), or is designated as a hazardous material under Section 104 of the Hazardous Material Transportation Act (49 U.S.C. 1803).

"Oil" means oil of any kind or in any form.

"Self-propelled vessel" includes those combinations of pushing vessel and vessel being pushed ahead which are rigidly connected in a composite unit and are required by Rule 24(b) of the International Rules for Preventing Collisions at Sea, 1972 (App. A to 33 CFR Part 87) to exhibit the lights prescribed in Rule 23 for a "Power Driven Vessel Underway".

(b) Except as allowed by paragraph (c) of this section each self-propelled vessel, except a public vessel, of 10,000 gross tons or more carrying oil or any hazardous material in bulk as cargo or in residue that is a U.S. vessel or operates on or enters the navigable waters of the United States, or which transfers oil or hazardous materials in any port or place subject to the jurisdiction of the United States, must, not later than July 1, 1982, be fitted with an Automatic Radar Plotting Aid which:

(1) Complies with the standard for such devices adopted by the Intergovernmental Maritime Consultative Organization in its "Operational Standards for Automatic Radar Plotting Aids" (See Appendix A);

(2) Provides both visual and audible warnings, described in paragraphs 3.5.1 and 3.5.2 of Appendix A; and

(3) Has a permanently affixed label containing—

(i) The name and address of the manufacturer; and

(ii) The following statement:

"This device was designed and manufactured to comply with the Intergovernmental Maritime Consultative Organization's 'Operational standards for automatic Radar Plotting Devices' ".

(c)(1) In lieu of the device required by paragraph (b) of this section, an Automatic Radar Plotting Aid which does not fully conform to the standard adopted by the Intergovernmental Maritime Consultative Organization but is certified by the manufacturer to comply with the U.S. Maritime Administration's "Collision Avoidance System Specification" (See Appendix B), may be retained until January 1, 1991.

(2) The devices allowed under this paragraph must have a permanently affixed label containing—

(i) The name and address of the manufacturer; and

(ii) The following statement:

"This device was designed and manufactured to comply with the U.S. Maritime Administration's 'Collision Avoidance System Specification'."

(92 Stat. 1471, (46 U.S.C. 391(a), as amended); 49 CFR 1.46(n)(4))

August 7, 1980.

W. E. Caldwell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Marine Environment and Systems.

Appendix A—Performance Standards For Automatic Radar Plotting Aids (ARPA)

1 Introduction

1.1 The Automatic Radar Plotting Aids (ARPA) required by Regulation 12, Chapter V of the 1974 SOLAS Convention, as amended,* should, in order to improve the standard of collision avoidance at sea:

.1 Reduce the work-load of observers by enabling them to automatically obtain information so that they can perform as well with multiple targets as they can by manually plotting a single target; and

.2 Provide continuous, accurate and rapid situation evaluation.

1.2 In addition to the General Requirements for Electronic Navigational Aids (Resolution A.281(VIII)), the ARPA should comply with the following minimum performance standards.

2 Definitions

2.1 Definitions of terms in these performance standards are given in Annex 1.

3 Performance Standards

3.1 *Detection*

3.1.1 Where a separate facility is provided for detection of targets, other than by the radar observer, it should have a performance not inferior to that which could be obtained by the use of the radar display.

3.2 *Acquisiton*

3.2.1 Target acquisition may be manual or automatic. However, there should always be a facility to provide for manual acquisition and cancellation. ARPA with automatic acquisition should have a facility to suppress acquisition in certain areas. On any range scale where acquisition is suppressed over a certain area, the area of acquisition should be indicated on the display.

3.2.2 Automatic or manual acquisition should have a performance not inferior to that which could be obtained by the user of the radar display.

3.3 *Tracking*

3.3.1 The ARPA should be able to automatically track, process, simultaneously display and continously update the information on at least:

.1 20 targets, if automatic acquisition is provided, whether automatically or manually acquired; or

.2 10 targets, if only manual acquisition is provided.

3.3.2 If automatic acquisition is provided, description of the criteria of selection of targets for tracking should be provided to the user. If the ARPA does not track all targets visible on the display, targets which are being tracked should be clearly indicated on the display. The reliability of tracking should not be less than that obtainable using manual recording of successive target positions obtained from the radar display.

3.3.3 Provided the target is not subject to target swop, the ARPA should continue to track an acquired target which is clearly distinguishable on the display for 5 out of 10 consecutive scans.

3.3.4 The possibility of tracking errors, including target swop, should be

*This amendment has not yet been ratified.

V 45 A G 14 80 UMI

minimized by ARPA design. A qualitative description of the effects of error sources on the automatic tracking and corresponding errors should be provided to the user, including the effects of low signal to noise and low signal to clutter ratios caused by sea returns, rain, snow, low clouds and non-synchronous emission.

3.3.5 The ARPA should be able to display on request at least four equally time-spaced past positions of any targets being tracked over a period of at least eight minutes.

3.4 *Display*

3.4.1 The Display may be a separate or integral part of the ship's radar. However, the ARPA display should include all the data required to be provided by a radar display in accordance with the performance standards for navigational radar equipment adopted by the Organization.

3.4.2 The design should be such that any malfunction of ARPA parts producing data additional to information to be produced by the radar as required by Resolution A.222(VII) should not affect the integrity of the basic radar presentation.

3.4.3 The size of the display on which ARPA information is presented should have effective display diameter of at least 340 mm.

3.4.4 The ARPA facilities should be available on at least the following range scales:

.1 12 or 16 miles;
.2 3 or 4 miles.

3.4.5 There should be a positive indication of the range scale in use.

3.4.6 The ARPA should be capable of operating with a relative motion display with "north-up" and either "head-up" or "course-up" azimuth stabilization. In addition, the ARPA may also provide for a true motion display. If true motion is provided, the operator should be able to select for his display either true or relative motion. There should be a positive indication of the display mode and orientation in use.

3.4.7 The course and speed information generated by the ARPA for acquired targets should be displayed in a vector or graphic form which clearly indicates the target's predicted motion. In this regard:

.1 ARPA presenting predicted information in vector form only should have the option of both true and relative vectors;
.2 An ARPA which is capable of presenting target course and speed information in graphic form, should also, on request, provide the target's true and/or relative vector;
.3 Vectors displayed should be either time adjustable or have a fixed time-scale;
.4 A positive indication of the time-scale of the vector in use should be given.

3.4.8 The ARPA information should not obscure radar information in such a manner as to degrade the process of detecting targets. The display of ARPA data should be under the control of the radar observer. It should be possible to cancel the display of unwanted ARPA data.

3.4.9 Means should be provided to adjust independently the brilliance of the ARPA data and radar data, including complete elimination of the ARPA data.

3.4.10 The method of presentation should ensure that the ARPA data is clearly visible in general to more than one observer in the conditions of light normally experienced on the bridge of a ship by day and by night. Screening may be provided to shade the display from sunlight but not to the extent that it will impair the observer's ability to maintain a proper lookout. Facilities to adjust the brightness should be provided.

3.4.11 Provisions should be made to obtain quickly the range and bearing of any object which appears on the ARPA display.

3.4.12 When a target appears on the radar display and, in the case of automatic acquisition, enters within the acquisition area chosen by the observer or, in the case of manual acquisition, has been acquired by the observer, the ARPA should present in a period of not more than one minute an indication of the target's motion trend and display within three minutes the target's predicted motion in accordance with paragraphs 3.4.7, 3.6, 3.8.2 and 3.8.3.

3.4.13 After changing range scales on which the ARPA facilities are available or resetting the display, full plotting information should be displayed within a period of time not exceeding four scans.

3.5 *Operational Warnings*

3.5.1 The ARPA should have the capability to warn the observer with a visual and/or audible signal of any distinguishable target which closes to a range or transits a zone chosen by the observer. The target causing the warning should be clearly indicated on the display.

3.5.2 The ARPA should have the capability to warn the observer with a visual and/or audible signal of any tracked target which is predicted to close to within a minimum range and time chosen by the observer. The target causing the warning should be clearly indicated on the display.

3.5.3 The ARPA should clearly indicate if a tracked target is lost, other than out of range, and the target's last tracked position should be clearly indicated on the display.

3.5.4 It should be possible to activate or de-activate the operational warnings.

3.6 *Data Requirements*

3.6.1 At the request of the observer the following information should be immediately available from the ARPA in alphanumeric form in regard to any tracked target:

.3 Predicted target range at the closest point of approach (CPA);
.4 Predicted time to CPA (TCPA);
.5 Calculated true course of target;
.6 Calculated true speed of target.

3.7 *Trial Manoeuvre*

3.7.1 The ARPA should be capable of simulating the effect on all tracked targets of an own ship manoeuvre without interrupting the updating of target information. The simulation should be initiated by the depression either of a spring-loaded switch, or of a function key, with a positive identification on the display.

3.8 *Accuracy*

3.8.1 The ARPA should provide accuracies not less than those given in paragraphs 3.8.2 and 3.8.3 for the four scenarios defined in Annex 2. With the sensor errors specified in Annex 3, the values given relate to the best possible manual plotting performance under environmental conditions of plus and minus ten degrees of roll.

3.8.2 An ARPA should present within one minute of steady state tracking the relative motion trend of a target with the following accuracy values (95 percent probability values):

3.8.3 An ARPA should present within three minutes of steady state tracking the motion of a target with the following accuracy values (95 percent probability values):

3.8.4 When a tracked target, or own ship, has completed a manoeuvre, the system should present in a period of not more than one minute an indication of the target's motion trend, and display within three minutes the target's predicted motion in accordance with paragraphs 3.4.7, 3.6, 3.8.2 and 3.8.3

3.8.5 The ARPA should be designed in such a manner that under the most favorable conditions of own ship motion the error contribution from the ARPA should remain insignificant compared to the errors associated with the input sensors, for scenarios of Annex 2.

3.9 *Connexions with other equipment*

3.9.1 The ARPA should not degrade the performance of any equipment providing sensor inputs. The connexion

of the ARPA to any other equipment should not degrade the performance of that equipment.

3.10 *Performance test and warnings*

3.10.1 The ARPA should provide suitable warnings of ARPA malfunction to enable the observer to monitor the proper operation of the system. Additionally test programmes should be available so that the overall performance of ARPA can be assessed periodically against a known solution.

3.11 *Equipment used with ARPA*

3.11.1 Log and speed indicators providing inputs to ARPA equipment should be capable of providing the ship's speed through the water.

Annex 1 to Appendix A—Definitions of Terms To Be Used Only in Connexion With ARPA Performance Standards

Relative course—The direction of motion of a target related to own ship as deduced from a number of measurements of its range and bearing on the radar. Expressed as an angular distance from North.

Relative speed—The speed of a target related to own ship, as deduced from a number of measurements of its range and bearing on the radar.

True course—The apparent heading of a target obtained by the vectorial combination of the target's relative motion and ship's own motion*. Expressed as an angular distance from North.

True speed—The speed of a target obtained by the vectorial combination of its relative motion and own ship's motion*.

Bearing—The direction of one terrestrial point from another. Expressed as an angular distance from North.

Relative motion display—The position of own ship on such a display remains fixed.

True motion display—The position of own ship on such display moves in accordance with its own motion.

Azimuth stabilization—Own ship's compass information is fed to the display so that echoes of targets on the display will not be caused to smear by changes of own ship's heading.

/North-up—The line connecting the center with the top of this display is North.

/Head-up—The line connecting the center with the top of the display is own ship heading.

/Course-up—An intended course can be set to the line connecting the center with the top of the display.

*For the purpose of these definitions there is no need to distinguish between sea or ground stabilization.

Heading—The direction in which the bow of a vessel is pointing. Expressed as an angular distance from North.

Target's predicted motion—The indication on the display of a liner extrapolation into the future of a target's motion, based on measurements of the target's range and bearing on the radar in the recent past.

Target's motion trend—An early indication of the target's predicted motion.

Radar Plotting—The whole process of target detection, tracking, calculation of parameters and display of information.

Detection—The recognition of the presence of a target.

Acquisition—The selection of those targets requiring a tracking procedure and the initiation of their tracking.

Tracking—The process of observing the sequential changes in the position of a target, to establish its motion.

Display—The plan position presentation of ARPA data with radar data.

Manual—An activity which a radar observer performs, possibly with assistance from a machine.

Automatic—An activity which is peformed wholly by a machine.

ANNEX 2 Appendix A—Operational Senarios

For each of the following scenarios predictions are made at the target position defined after previously tracking for the appropriate time of one or three minutes:

Scenario 1

Own ship course—000°
Own ship speed—10 kt
Target range—8 n.m.
Bearing of target—000°
Relative course of target—180°
Relative speed of target—20 kt

Scenario 2

Own ship course—000°
Own ship speed—10 kt
Target range—1 n.m.
Bearing of target—000°
Relative course of target—090°
Relative speed of target—10 kt

Scenario 3

Own ship course—000°
Own ship speed—5 kt
Target range—8 n.m.
Bearing of target—045°
Relative course of target—225°
Relative speed of target—20 kt

Scenario 4

Own ship course—000°
Own ship speed—25 kt
Target range—8 n.m.
Bearing of target—045°
Relative course of target—225°
Relative speed of target—20 kt

ANNEX 3 to Appendix A—Sensor Errors

The accuracy figures quoted in paragraph 3.8 are based upon the following sensor errors and are appropriate to equipment complying with the Organization's performance standards for shipborne navigational equipment.*

Note: σ means "standard deviation"

Radar

Target Glint (Scintillation) (for 200 m length target)

Along length of target σ = 30 m. (normal distribution)

Across beam of target σ = 1 m. (normal distribution)

Roll-Pitch Bearing. The bearing error will peak in each of the four quadrants around own ship for targets on relative bearings of 045°, 135°, 225° and 315° and will be zero at relative bearings of 0°, 90°, 180° and 270°. This error has a sinusoidal variation at twice the roll frequency. For a 10° roll the mean error is 0.22° with a 0.22° peak sine wave superimposed.

Beam shape—assumed normal distribution giving bearing error with σ = 0.05.

Pulse shape—assumed normal distribution giving range error with σ = 20 metres.

Antenna backlash—assumed rectangular distribution giving bearing error ± 0.5 maximum.

Quantization

Bearing—rectangular distribution ± 0.01° maximum.

Range—rectangular distribution ± 0.01 n.m. maximum.

Bearing encoder assumed to be running from a remote synchro giving bearing errors with a normal distribution σ = 0.03°

Gyro compass

Calibration error 0.5°.

Normal distribution about this with σ = 0.12°.

*In calculations leading to the accuracy figures quoted in paragraph 3.8, these sensor error sources and magnitudes were used. They were arrived at during discussions with national government agencies and equipment manufacturers and are appropriate to equipments complying with the Organization's draft performance standards for radar equipment (preliminary) (NAV XXII/WP.14), gyro compasses (NAV XXI/9, Annex X) and logs (preliminary) (NAV XXII/WP.15).

Independent studies carried out by national government agencies and equipment manufacturers have resulted in similar accuracies, where comparisons were made.

Log

Calibration error 0.5 kt

advance warning time (TCPA—Time to Closest Point of Approach). Means shall

Appendix B—U.S. Maritime Administration Collision Avoidance System Specification

A collision system designed as a supplement to both surface search navigational radars via interswitching shall be installed. The system shall provide unattended monitoring of all radar echoes and automatic audio and visual alarm signals that will alert the watch officer of a possible threat. The display shall be contained within a console capable of being installed adjacent to the radar displays in the wheelhouse and may form a part of the bridge console.

Provision for signal input from the ship's radars, gyro compass, and speed log, without modification to these equipments shall be made. The collision avoidance system, whether operating normally or having failed, must not introduce any spurious signals or otherwise degrade the performance of the radars, the gyro compass or the speed log.

Computer generated display data for each acquired target shall be in the form of a line or vector indicating true or relative target course, speed and both present and extrapolated future positions. Data shall be automatically displayed on a cathode ray tube or other suitable display contrivance sufficiently bright and unobstructed to permit viewing by more than one person at a time.

In addition to displaying the collision potential of the most threatening fixed and moving targets, the system shall be capable of simultaneously showing land masses.

The system display shall include a heading indication and bearing ring. The system shall also have the capability of allowing the operator to select "head-up" and to cancel the vector or line presentation of any of the targets. The presentation shall be non-smearing when changing modes or display scales in order to permit rapid evaluation of the displayed data.

Target acquisition, for display data purposes, may be manual, automatic or both, as specified by Owner.

For any manual acquisition system the alarms shall be initiated by a preset minimum range; and likewise for any automatic acquisition system the alarms shall be initiated by a preset minimum acceptable passing distance (CPA—Closest Point of Approach) and a preset advance warning time (TCPA—Time to Closest Point of Approach). Means shall be provided to silence the audio alarm for a given threat but the alarm shall resound upon a subsequent threat. The visual alarm shall continue to operate until all threats have been eliminated. If the collision avoidance system fails to perform as indicated above, after the system is set for unattended monitoring, the system shall produce both audio and visual warning alarms.

The system shall be capable of simulating a trial maneuver.

In addition to the target display, an alpha-numeric readout shall be provided which can present range, bearing, course, speed, CPA and TCPA for any selected target, either on the target display or by other display means.

The collision avoidance system shall be energized from the interior communications panel board in the wheelhouse.

The collision avoidance function may be incorporated in an integrated conning system, provided that failure of any other integrated system component will not degrade the collision avoidance function.

Approval of Revision of the West Virginia State Implementation Plan

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The purpose of this notice is to approve, with certain conditions, a revision of the West Virginia State Implementation Plan (SIP) for the attainment and maintenance of National Ambient Air Quality Standards (NAAQS). The revision consists of plans for attaining NAAQS for total suspended particulates (TSP) in the Steubenville-Weirton-Wheeling Interstate Air Quality Control Region (AQCR) and in those portions of Union and Winfield Magisterial Districts in Marion County west of Interstate Route 79, for attaining NAAQS for sulfur dioxide (SO_2) in the New Manchester-Grant Magisterial District, and for attaining NAAQS for ozone (O_3) in the Kanawha Valley Intrastate AQCR. West Virginia submitted the revision to meet the requirements of Part D (Plan requirements for Nonattainment Areas) of the Clean Air Act (the Act), as amended in 1977.

EPA has placed conditions on its approval of West Virginia's SIP revision to assure that West Virginia will correct certain deficiencies in the revision. EPA's conditions include deadlines by which West Virginia must make the necessary corrections. EPA has published a proposed rulemaking notice elsewhere in today's **Federal Register** which solicits public comment on the appropriateness of the deadlines.

EFFECTIVE DATE: This action is effective as of August 14, 1980.

ADDRESSES: Copies of the revision and accompanying support materials are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Air Programs Branch, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, PA. 19106, ATTN: Patricia Sheridan

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460

West Virginia Air Pollution Control Commission, 1558 Washington Street, East, Charleston, West Virginia, ATTN: Mr. Carl Beard

FOR FURTHER INFORMATION CONTACT: Raymond D. Chalmers, Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, 10th Floor, Sixth and Walnut Streets, Philadelphia, PA. 19106, Telephone Number: 215-597-8309

SUPPLEMENTARY INFORMATION:

I. Introduction

A. General

The Clean Air Act (the Act) amendments of 1977 required States to revise their State Implementation Plans (SIPs) for all areas where primary health related National Ambient Air Quality Standards (NAAQS) or secondary welfare related NAAQS had not been attained.

On June 18, 1979, the Honorable John D. Rockefeller IV, Governor of the State of West Virginia, submitted to EPA a proposed SIP revision for West Virginia's nonattainment areas. EPA published a notice of receipt of the proposed SIP revision at 44 FR 43298 (1979). This notice described the proposed revision and the requirements of the Act, discussed deficiencies of the proposed revision with respect to the Act's requirements, and solicited public comment.

West Virginia's SIP revision addresses all of the present nonattainment areas in the State. It should be noted that the revision takes into account several areas that EPA is redesignating in a notice published elsewhere in today's **Federal Register**.

EPA designated West Virginia's nonattainment areas in the **Federal Register** on March 3, 1978, 43 FR 8962, and on September 12, 1978, 43 FR 40502. EPA designated the Steubenville-Weirton-Wheeling Interstate Air Quality Control Region (AQCR), the portions of Union and Winfield Magisterial Districts in Marion County that are west of Interstate Route 79, and the area including Kanawha County and Valley Magisterial District in Fayette County as primary and secondary nonattainment for total suspended particulates (TSP). EPA designated the Parkersburg-Tygart Magisterial District in Wood County as secondary nonattainment for TSP. In addition, EPA designated the New Manchester-Grant Magisterial District in Hancock County and the Wellsburg Magisterial District in Brooke County as primary nonattainment for sulfur dioxide (SO_2). Finally EPA designated the Kanawha Valley Intrastate AQCR as primary nonattainment for ozone (O_3).

EPA is redesignating two of these areas today. EPA is redesignating Kanawha County and the adjacent Valley Magisterial District in Fayette County from primary and secondary nonattainment for TSP to secondary nonattainment for TSP. EPA is also redesignating the Wellsburg Magisterial District in Brooke County from primary nonattainment for SO_2 to attainment for SO_2.

B. Requirements for Nonattainment Area SIP Revisions

All SIP revisions must meet the requirements of section 110 and Part D of the Act and of EPA's implementing regulations, which are codified at 40 CFR Part 51. Each plan must be based on adequate State legal authority, must have been subject to public review and comment at one or more hearings, must contain an adequate control strategy for the attainment of air quality standards, must contain all regulations or other legal requirements needed to implement the control strategy, and must assure the attainment of air quality standards by the deadlines established in the Act.

The specific requirements for an approvable SIP are discussed in the General Preamble published on April 4, 1979, 44 FR 20372 and in the following supplements:

July 2, 1979, 44 FR 38583
August 28, 1979, 44 FR 50371
September 17, 1979, 44 FR 53761
November 23, 1979, 44 FR 67182

The following list summarizes the basic requirements for nonattainment area plans:

1. Evidence that the SIP revision was adopted by the State after reasonable notice and public hearing.
2. A provision for expeditious attainment of the standards.
3. A determination of the level of control needed to attain the standards.
4. An accurate emissions inventory.
5. Provisions for reasonable further progress (RFP) as defined in Section 171 of the Clean Air Act.
6. An identification of emissions growth.
7. A permit program for major new or modified sources that is consistent with Section 173 of the Clean Air Act.
8. Use of Reasonably Available Control Technology (RACT) control measures as expeditiously as practicable.
9. Inspection and Maintenance (I/M), if necessary, as expeditiously as practicable.
10. Necessary transportation control measures.
11. Enforceable regulations.
12. An identification of and commitment to the resources necessary to carry out the plan.
13. Commitments to comply with schedules.
14. Evidence of public, local government, and State legislative involvement and consultation.

C. Discussion of Conditional Approval

A discussion of the conditional approval of certain elements in West Virginia's plan and its practical effect appears in a Supplement to the General Preamble, 44 FR 38583, July 2, 1979 and in 44 FR 67182, November 23, 1979. The conditional approval requires the State to submit additional materials by the deadlines identified in this notice and proposed elsewhere in today's **Federal Register**. There will be no extensions of conditional approval deadlines when they are made final.

EPA will follow the procedures described below when determining if the State has satisfied the conditions:

1. If the State submits the required additional documentation according to schedule, EPA will publish a notice in the **Federal Register** announcing receipt of the material. The notice of receipt will also announce that the conditional approval is continued pending EPA's final action on the submittal.

2. EPA will evaluate the State's submittal to determine if the condition is fully met. After review is complete, a **Federal Register** notice will be published proposing or taking final action either to find the condition has been met and approve the plan, or to find the condition has not been met, withdraw the conditional approval and disapprove the plan. If the plan is disapproved the section 110(a)(2)(I) restrictions on growth will be in effect.

3. If the State fails to submit in a timely manner the required materials needed to meet a condition, EPA will publish a **Federal Register** notice shortly after the expiration of the time limit for submittal. The notice will announce that the conditional approval is withdrawn, the SIP is disapproved and Section 110(a)(2)(I) restrictions on growth are in effect.

If a State has failed to submit the required data to meet any condition contained in this notice, EPA will at that time consider whether the funding restrictions contained in Sections 176(a) and 316 are also appropriate (*see* 44 FR 33473, June 11, 1979).

Although public comment is solicited on the deadlines, and the deadlines may be changed in light of comment, the State remains bound by its commitment to meet the proposed deadlines. Only a EPA approved change in the deadlines can release a State from this obligation.

D. Discussion of Compliance Requirements

footnote to the chart. Sources subject to plan requirements and deadlines

specific demonstration of attainment for such areas, West Virginia had included

complies with the Ohio SIP's limitation on SO_2 emissions.

categories from which TSP emission reductions are expected.

approved because the Legislative Rulemaking Review Committee had

D. Discussion of Compliance Requirements

Congress established new attainment dates under Section 172(a) to provide additional time for previously regulated sources to comply with new, more stringent requirements and to permit previously uncontrolled sources to comply with newly applicable emission limitations. These new deadlines were not intended to give sources that failed to comply with pre–1977 plan requirements by the earlier deadlines more time to comply with those requirements. As stated by Congressman Paul Rogers in discussing the 1977 Amendments:

"The added time for attainment of the national ambient air quality standards was provided, if necessary, because of the need to tighten emission limits or bring previously uncontrolled sources under control. Delays or relaxation of emission limits were not generally authorized or intended under part D."

(123 Cong. Rec. H11958, daily ed. November 1, 1977).

To implement Congress' intention that sources remain subject to pre-existing plan requirements, sources cannot be granted variances extending compliance dates beyond attainment dates established prior to the 1977 Amendments. EPA cannot approve such compliance date extensions even though a Section 172 plan revision with a later attainment date has been approved. However, a compliance date extension beyond a preexisting attainment date may be granted if it will not contribute to a violation of an ambient standard or a PSD increment. This subject is discussed further in the General Preamble for Proposed Rulemaking, 44 Fed. Reg. 20373–74 (April 4, 1979).

In addition, sources subject to pre-existing plan requirements may be relieved of complying with such requirements if a Section 172 plan imposes new, more stringent control requirements that are incompatible with controls required to meet the pre-existing regulations. Decisions on the incompatibility of requirements will be on a case-by-case basis.

The 1978 edition of 40 CFR Part 52 lists in the subpart for West Virginia the applicable deadlines for attaining ambient standards (attainment dates) required by Section 110(a)(2)(A) of the Act. For each nonattainment area where a revised plan provides for attainment by the deadlines required by section 172(a) of the Act, the new deadlines are substituted on West Virginia's attainment data chart in 40 C.F.R. Part 52. The earlier attainment dates under Section 110(a)(2)(A) are referenced in a footnote to the chart. Sources subject to plan requirements and deadlines established under Section 110(a)(2)(A), prior to the 1977 Amendments, remain obligated to comply with those requirements. These sources must also comply with the new Section 172 plan requirements.

E. Definitions

In the following sections of this notice there are several references to the term "rollback." To avoid confusion or misunderstanding, this term is defined here. Rollback is a proportional model used to calculate the degree of improvement in ambient air quality needed to attain a national ambient air quality standard.

II. Background

This section describes West Virginia's submittals for attaining NAAQS for O_3, SO_2, and TSP.

A. General

The elements of West Virginia's submittal listed below apply to each of West Virginia's attainment plans. These elements are required by Section 172(b) of the Clean Air Act.

1. *Pre-Construction Review and Emission Offsets*—West Virginia did not submit a regulation requiring preconstruction review and emission offsets.

2. *Analysis of Effects*—West Virginia did not submit an analysis of the health, welfare, economic, energy, and social effects of its SIP revision.

3. *Public Participation*—West Virginia certified that the SIP revision meets all notice and hearing requirements and other requirements for public participation.

4. *Involvement and Consultation*—West Virginia demonstrated that local government officials and the public were involved in the preparation of the SIP revision.

5. *Financial and Manpower Commitments*—West Virginia certified that it will expend the financial and manpower resources needed to implement its plan.

B. Ozone

West Virginia submitted an attainment plan and regulations for the Kanawha Valley Intrastate AQCR. This is the State's only nonattainment area for ozone. The area encompasses Putnam County, Kanawha County, and Kanawha and Falls Magisterial Districts in Fayette County.

EPA has determined that the Kanawha Valley Intrastate AQCR is a rural ozone nonattainment area. Although EPA does not require a specific demonstration of attainment for such areas, West Virginia had included such a demonstration in its June 18, 1979 submittal. Subsequently, West Virginia decided to revise its SIP revision for ozone. On November 21, 1979, West Virginia submitted a revised ozone plan to EPA that did not include a demonstration of attainment. This was the only significant change in the SIP revision. This November 21 submittal is now West Virginia's official SIP revision for ozone.

EPA's major requirement for rural ozone nonattainment areas is that States adopt regulations requiring certain categories of Volatile Organic Compound (VOC) sources to use reasonably available control technology (RACT). *See* the Administrator's Memorandum on Criteria for Proposing Approval of Revision to Plans for Nonattainment Areas 43 Fed. Reg. 2673, May 19, 1978.

The only categories of VOC sources in West Virginia that must be controlled are petroleum refineries, bulk gasoline terminals, and stored petroleum liquids. West Virginia's SIP revision includes regulations requiring RACT for these source categories.

EPA will be designating additional categories of VOC sources for which RACT will be required. West Virginia commits in its SIP revision to adopt all necessary VOC regulations for such categories.

EPA also requires States to submit VOC emission inventories for rural ozone nonattainment areas. West Virginia's submittal includes an inventory of major categories of VOC sources.

C. Sulfur Dioxide

West Virginia submitted an attainment plan for the New Manchester-Grant Magisterial District in Hancock County. This is the only nonattainment area for SO_2 in West Virginia.

The Wellsburg Magisterial District in Brooke County was also a nonattainment area for SO_2 at the time West Virginia submitted its SIP revision. West Virginia did not address this area in its SIP revision because it had requested the redesignation of the area to "attainment." EPA is approving this request in a notice published elsewhere in today's **Federal Register**.

West Virginia's SIP submittal for New Manchester indicates that the Ohio Edison Company's W. H. Sammis Power Plant is the cause of the violations of SO_2 standards in New Manchester. The SIP submittal shows that New Manchester will attain SO_2 air quality standards when the Sammis plant complies with the Ohio SIP's limitation on SO_2 emissions.

D. Total Suspended Particulates

West Virginia's SIP submittal addressed the State's four TSP nonattainment areas. These are the Steubenville-Weirton-Wheeling Interstate AQCR, the Parkersburg-Tygart Magisterial District, the area including Kanawha County and the Valley Magisterial District in Fayette County, and the area including the portions of Union and Winfield Magisterial Districts west of Interstate Route 79 in Marion County.

Governor Rockefeller stated, when he submitted the SIP revision, that the West Virginia Legislative Rulemaking Review Committee had not yet approved the TSP regulations included in the revision. EPA proposed the revision, on July 24, 1979, with the anticipation that the West Virginia Legislative Rulemaking Committee would approve the regulations submitted with the revision.

West Virginia's submittal for the Steubenville-Weirton-Wheeling Interstate AQCR provides for attaining primary TSP standards by December 31, 1982. The State requested an extension, until July 1, 1980, of the deadline for submitting a plan to attain secondary TSP standards. The State's submittal indicates that attainment of primary standards will be assured by the enforcement of existing regulations for controlling TSP emissions. The State used a rollback model to demonstrate the adequacy of the emission reductions required by these regulations.

West Virginia's submittals for the Parkersburg-Tygart Magisterial District and the area including Kanawha County and the Valley Magisterial District in Fayette County provide for attaining secondary TSP standards by December 31, 1985. West Virginia's strategy for attaining TSP standards is to control fugitive dust emissions. West Virginia submitted a proposed regulation, Regulation XVII, to limit fugitive dust emissions.

West Virginia's submittal for the area including the portions of Union and Winfield Magisterial Districts west of Interstate Route 79 in Marion County provides for the attainment of both primary and secondary TSP standards by December 31, 1980. The submittal states that the emission reductions needed to attain standards will result from the shutdown of a coke plant owned by the Sharon Steel Corporation.

West Virginia's submittals for all four areas include TSP emission inventories. These inventories show the source categories from which TSP emission reductions are expected.

West Virginia's submittals include graphs that show expected TSP emission reductions in each nonattainment area. These graphs show that West Virginia commits to reasonable further progress towards attainment.

West Virginia's submittals also provide for expected growth in TSP emissions. The submittals indicate that additional TSP emissions from major TSP sources will be accommodated by an offset regulation. West Virginia's submittals also include allowances for increases in the emissions of area sources.

III. EPA Evaluation

EPA's evaluations of West Virginia's submittals for attaining NAAQS for O_3, SO_2, and TSP are given in this section. EPA's evaluations indicate whether West Virginia's submittals are approved, conditionally approved, or disapproved.

A. General

The elements of West Virginia's submittal listed below apply to each of West Virginia's attainment plans. These elements are required by Sections 110 and 172(b) of the Clean Air Act.

1. *Adoption by the State*—The regulations included in West Virginia's SIP revision had not been approved by the West Virginia Legislative Rulemaking Review Committee at the time EPA proposed West Virginia's SIP revision. According to Chapter 29A–3 of the Code of West Virginia, the Legislative Rulemaking Review Committee must approve all new air pollution control regulations before they become State law. The Committee can approve regulations either by direct vote, or by failing to act on them within six months of receiving them.

On September 24, 1979, the Legislative Rulemaking Review Committee acted on West Virginia's proposed regulations. The Committee approved new Regulations III, XXI, XXIII, and XXIV, and revisions to Regulation VIII, but did not approve new Regulations XVII and XVIII or Revisions to Regulation VI and VII.

On December 19, 1979, the Governor of West Virginia submitted Regulations III, VIII, XXI, XXIII, and XXIV to EPA. The Governor asked EPA to include these regulations in the West Virginia SIP.

On March 27, 1980, the Director of the West Virginia Air Pollution Control Commission notified EPA that Regulations XVII and XVIII and the revisions of Regulations VI and VII were approved because the Legislative Rulemaking Review Committee had failed to act on them within the required six months time period.

The Governor of West Virginia has not submitted Regulations XVII and XVIII or revised Regulations VI and VII to EPA for incorporation in the West Virginia SIP. Accordingly, EPA has based its decisions on the SIP on the plans submitted by the Governor on June 18, 1979, and on the regulations submitted by him on September 24, 1979.

2. *Pre-Construction Review and Emission Offsets*—West Virginia's SIP revision does not include a regulation requiring pre-construction review and emission offsets. Section 172(b)(6) of the Clean Air Act requires such a regulation.

West Virginia has agreed to adopt a regulation requiring pre-construction review and emission offsets and to submit this regulation to EPA for incorporation into the West Virginia SIP. Until this regulation is incorporated into the SIP, West Virginia has agreed to keep in effect a temporary regulation requiring pre-construction review and emission offsets. Although this temporary regulation meets the requirements of Section 173 of the Clean Air Act, it will not be included in the West Virginia SIP. Therefore, the regulation will not be enforceable by EPA, but only by West Virginia. To assure that Federal Requirements are met, West Virginia will submit all permits issued under the provisions of this temporary regulation to EPA for approval as SIP revisions.

EPA approves the West Virginia SIP revision on the condition that West Virginia meets the following requirements. First, the State of West Virginia must submit an adequate regulation requiring pre-construction review and emission offsets to EPA; second, West Virginia must keep a temporary regulation requiring pre-construction review and emission offsets in effect until EPA approves a permanent regulation, and third, West Virginia must submit all permits issued under the provisions of its temporary pre-construction review and offset regulation to EPA as SIP revisions.

Elsewhere in today's **Federal Register**, EPA is soliciting public comment on the acceptability of a deadline for submittal of the pre-construction review and emission offsets regulation.

3. *Analysis of Effects*—West Virginia has not submitted an analysis of the health, welfare, economic, energy, and social effects of its SIP revision as required by Section 172(b)(9) of the Clean Air Act. However, EPA has reviewed a draft of the analysis West

Virginia intends to submit, and has concluded from this review that the

means for determining if the SIP's requirements are being met

Plan Revisions for Nonattainment Areas, 44 FR 20376 (April 4, 1979), the

measures, West Virginia agreed to adopt

preliminary review revealed instances

weighted average and which also meet certain other requirements of the policy,

Virginia intends to submit, and has concluded from this review that the West Virginia SIP should not cause any major adverse effects. Therefore, EPA approves this portion of West Virginia's SIP revision on the condition that West Virginia submits an adequate analysis of its SIP's effects to EPA. In accordance with the requirements of Section 172(b)(9) of the Clean Air Act, EPA also requires West Virginia to submit a summary of the public comments on the analysis. Elsewhere in today's **Federal Register**, EPA is soliciting public comment on the acceptability of a September 30, 1980, deadline for submitting this analysis.

4. *Adequate Regulations*—The regulations adopted by West Virginia impose requirements on stationary sources of air pollution in West Virginia. However, in order to provide flexibility, the regulations authorize West Virginia to modify certain requirements of the regulations. The requirements of the regulations with respect to an individual source may be modified if the source can show that such modifications are necessary and will not prevent the regulation's objectives from being attained.

The approval of alternate control plans, programs or designs under this authority may result in applicable State requirements which differ from requirements of the State Implementation Plan approved by EPA. Both West Virginia and EPA desire to avoid potential conflicts between State and Federal requirements for the abatement of air pollution. Therefore, West Virginia has adopted an administrative rule establishing a procedure under which West Virginia's Air Pollution Control Commission will enter any approved alternate control plan as a Consent Order, and will notify EPA of its action and ask the Governor to submit the action as a plan revision so that the Agency may review the Order for approval and incorporation in the State Implementation Plan. This evaluation is very important because the requirements of an approved State Implementation Plan remain applicable to a source notwithstanding changes to the State's regulations, until such time as EPA approves the incorporation of those changes in the Plan.

West Virginia has also adopted an administrative rule establishing the requirement that EPA review and approve any changes in the test methods used to verify compliance with West Virginia's regulations. EPA's approval of such changes will be required before EPA will accept the new test methods as means for determining if the SIP's requirements are being met.

EPA considers these two procedural rules to be essential. They are needed to assure that the requirements of West Virginia's regulations do not differ from requirements of the West Virginia SIP approved by EPA.

5. *Public Participation*—All notice and hearing requirements and other requirements for public participation have been met.

6. *Involvement and Consultation*—West Virginia has involved local government officials and the public in the preparation of the SIP revision.

7. *Financial and Manpower Commitments*—West Virginia has committed to expend the financial and manpower resources necessary to implement its plan.

B. Ozone

West Virginia's submittal for O_3 addresses the Kanawha Valley Intrastate AQCR. The Kanawha Valley Intrastate AQCR is West Virginia's only O_3 nonattainment area.

1. *Control Strategy*—EPA has determined that the Kanawha Valley Intrastate AQCR is a rural nonattainment area for O_3. This determination was made since the AQCR does not contain any "urbanized area" with a population of over 200,000.

EPA does not require a specific demonstration of attainment of the O_3 standard or an accompanying demonstration of reasonable further progress for rural O_3 nonattainment areas. Also, EPA does not require mobile source control measures such as automobile inspection and maintenance programs or transportation control measures. *See* the Administrator's memorandum on Criteria for Approval of 1979 SIP revisions, 43 Fed. Reg. 21673, May 19, 1978.

EPA has only one major control strategy requirement for rural ozone nonattainment areas. States must adopt regulations requiring RACT for VOC source categories which are covered by EPA's control technique guideline documents and which contain VOC sources that have the potential to emit 100 or more tons of VOCs per year.

The only categories of such VOC sources in West Virginia are petroleum refineries, bulk gasoline terminals, and stored petroleum liquids. West Virginia has adopted regulations for these source categories. West Virginia has certified that in the Kanawha Valley there are no other major sources within the categories addressed by the CTG documents.

As noted in the General Preamble for Proposed Rulemaking on Approval of Plan Revisions for Nonattainment Areas, 44 FR 20376 (April 4, 1979), the minimum acceptable level of stationary source control for ozone SIPs, such as West Virginia's, includes RACT requirements for VOC sources covered by CTGs the EPA issued by January 1978 and schedules to adopt and submit by each future January additional RACT requirements for sources covered by GTGs to EPA issued by the previous January. West Virginia has agreed to adopt VOC regulations for additional VOC source categories if CTG documents published in the future make such regulations necessary.

West Virginia's VOC control strategy meets EPA's requirements. Therefore, West Virginia's control strategy for O_3 is acceptable.

2. *Emission Inventory*—West Virginia submitted an inventory listing the VOC emissions of various categories of VOC sources. EPA indicated in its July 24, 1979, proposal of West Virginia's SIP revision that the State's VOC inventory was required to be more detailed. Accordingly, EPA asked West Virginia to submit an inventory listing the emissions of individual VOC sources. On October 10, 1979, West Virginia submitted such an inventory; EPA has found it to be adequate.

3. *RACT As Expeditiously as Practicable*—In the notice of proposed rulemaking, EPA identified three RACT deficiencies in West Virginia's VOC regulations. All three items have been addressed by West Virginia in a September 24, 1979 letter.

EPA now agrees with West Virginia that a 90 percent collection efficiency requirement is not needed in Section 4.01(b) of Regulation XXI, which applies to stored petroleum liquids. This regulation is actually an equipment specification and no EPA test method currently exists to measure a collection efficiency from this type of source. This regulation is approved.

In the letter of September 24, 1979, West Virginia certified that the words "during the transfer of gasoline" have been deleted from Section 3.21 of Regulation XXIII, which covers VOC emissions from bulk gasoline terminals. Therefore, this deficiency has been rectified and the regulation is approved.

EPA commented that Section 4.04 of Regulations XXI, XXIII and XXIV, a section which provides for alternative control measures, should allow alternative control measures to be approved only when equivalent emission reductions can be achieved or when more stringent controls are technologically or economically infeasible. To assure that Section 4.04 does not allow improper control measures, West Virginia agreed to adopt a procedural rule requiring all alternative control methods to be submitted to EPA as SIP revisions. West Virginia adopted this rule on November 20, 1979.

4. *Enforceability*—In the notice of proposed rulemaking, EPA recommended that the VOC regulations be made future-effective to avoid possible imposition of penalities under Section 120 of the Clean Air Act. West Virginia has chosen to retain the immediately-effective approach. However, West Virginia did change the effective date from July 6, 1979 to October 27, 1979. Because future-effective regulations are not required by the Clean Air Act, EPA approves West Virginia's regulatory approach.

There are currently no EPA test methods which apply to Regulations XXI and XXIV. These regulations are enforced through equipment and operating specifications. Regulation XXIII, however, does require a test method and West Virginia has agreed to adopt an acceptable test method. EPA is approving Regulation XXIII on the condition that West Virginia submit this test method as a SIP revision. In a notice which appears elsewhere in today's **Federal Register**, EPA is soliciting public comment on the acceptability of a September 30, 1980 deadline for that submittal.

EPA now agrees that a definition of "fuel gas system" is not needed in Section 4.02(a)(2) of Regulation XXIII. The definition of this term is considered general knowledge within the industry concerned. Therefore, EPA approves this regulation.

Also, EPA has decided to accept the wording of the definition of "condensate" in Section 3.05 of Regulation XXIII. West Virginia correctly pointed out that the basic meaning is not altered by EPA's suggested wording. EPA approves this definition.

EPA noted in the notice of proposed rulemaking that the definition of "Volatile Organic Compound" in Regulations XXI and XXIV did not state that methane is not considered a VOC. This was correctly included in Regulation XXIII. Defining VOC as including methane has no effect on the enforcement of Regulations XXI and XXIV since they are equipment and operating specification regulations. Therefore, even though West Virginia's definition of VOC for these regulations is incorrect, Regulations XXI and XXIV are enforceable and are acceptable. EPA approves these regulations.

EPA also stated in the notice of proposed rulemaking that the Agency's preliminary review revealed instances where the language of the regulations needed clarification. Upon further review EPA has decided that no changes are necessary.

C. Sulfur Dioxide

West Virginia submitted an attainment plan for the New Manchester-Grant Magisterial District in Hancock County. This is the only nonattainment area for SO_2 in West Virginia.

The Wellsburg Magisterial District in Brooke County was also a nonattainment area for SO_2 at the time West Virginia submitted its SIP revision. West Virginia did not address this area in its SIP revision because it had requested the redesignation of the area to "attainment." EPA is approving this request in a notice published elsewhere in today's **Federal Register**.

1. *Control Strategy and Demonstration of Attainment*—West Virginia indicates in its control strategy that the New Manchester area will attain standards for SO_2 after the Sammis power plant complies with the SO_2 emission limitations of the Ohio SIP. Therefore, West Virginia did not submit new or revised SO_2 regulations for the area.

West Virginia's demonstration states that "modeling results show that the annual mean level of SO_2 in New Manchester should decrease by 20 $\mu g/m^3$ when the Sammis plant comes into compliance with Ohio's sulfur emission standards. When this reduction is applied to the calendar year 1977 arithmetic mean, an annual mean of 81 $\mu g/m^3$ results." West Virginia's demonstration concludes that "this, in conjunction with the apparent improvement in SO_2 air quality, demonstrates attainment of the primary annual standard of 80 $\mu g/m^3$." West Virginia's demonstration also shows that the 24-hour primary standard for SO_2 has been met in the New Manchester area. Finally, the demonstration states that there should be no violations of the secondary SO_2 standard after the Sammis plant comes into compliance.

Sammis, which is owned by the Ohio Edison Company, is not now in compliance with the Ohio SIP's emission limitations for SO_2. However, on February 11, 1980, EPA published a notice, 45 Fed. Reg. 9101, announcing an interim enforcement policy for SO_2 sources in Ohio. EPA's interim policy, as explained in that notice, is to refrain from initiating SO_2 enforcement actions in Ohio against SO_2 sources which can meet Ohio's current SO_2 emission limitations applied on a 30 day rolling weighted average and which also meet certain other requirements of the policy.

Ohio Edison has attempted to meet these requirements. The Company has had several units at Sammis burn lower sulfur coal. However, EPA has not yet received sufficient information from Ohio Edison to determine if Sammis meets the requirements of EPA's interim enforcement policy.

West Virginia's SO_2 monitor in New Manchester has registered attainment since 1977. However, several violations have been registered through the end of 1979 at an SO_2 monitoring network established by Ohio Edison. No violations have been recorded at Ohio Edison's monitors through the first quarter of 1980.

In view of the data from West Virginia's monitor and the most recent monitoring data from the Ohio Edison network, EPA agrees with West Virginia that no new or revised SO_2 regulations are needed for the New Manchester area at this time.

D. Total Suspended Particulates

There are now four areas in West Virginia which EPA finds to be nonattainment areas for TSP. These are the Steubenville-Weirton-Wheeling Interstate AQCR, the Parkersburg-Tygart Magisterial District, Kanawha County and the adjacent Valley Magisterial District in Fayette County, and the portions of Union and Winfield Magisterial Districts in Marion County west of Interstate Route 79.

West Virginia submitted plans for all these areas. EPA's decisions to approve, conditionally approve, or disapprove these plans are related below. West Virginia submitted only one new regulation for controlling TSP emissions. This regulation, Regulation III, "To Prevent and Control Air Pollution From the Operation of Hot Mix Asphalt Plants," is acceptable. West Virginia also submitted a revised version of Regulation VIII, "Ambient Air Quality Standards for Sulfur Oxides and Particulate Matter." The revised version of Regulation VIII is acceptable.

1. *Control Strategies and Demonstrations of Attainment.*—(a) *Steubenville-Weirton-Wheeling Interstate AQCR*—West Virginia's submittal for the Steubenville-Weirton-Wheeling AQCR states that attainment of primary TSP standards will occur by December 31, 1982. The State's submittal indicates that attainment will be assured by the enforcement of existing regulations for controlling TSP emissions.

West Virginia's demonstration of attainment for the Steubenville-Weirton-Wheeling Interstate AQCR is based on

rollback. Rollback can be an acceptable technique for demonstrating that TSP

requested that EPA allow it until July 1, 1980, to submit an alternative plan. EPA

October 10, 1979, West Virginia submitted such an inventory.

contains examples of standards which EPA has found to be RACT for iron and

Environmental Protection Agency's January 16, 1979 Emission Offset

this regulation. Until it can adopt this regulation, West Virginia will keep in

rollback. Rollback can be an acceptable technique for demonstrating that TSP standards will be attained; however, rollback does have limitations. In some cases rollback may fail to require sufficient emission reductions. This can occur when actural source-receptor relationships are not the same as those assumed by the rollback model. Actual source-receptor relationships in the Steubenville-Weirton-Wheeling Interstate AQCR will be identified in the future when a consultant under contract to EPA completes a currently ongoing TSP study. This study is expected to be completed in the fall of 1980.

West Virginia's demonstration of attainment for the Steubenville-Weirton-Wheeling Interstate AQCR is based on an acceptable model. Therefore, EPA finds the demonstration acceptable. However, EPA believes that the study of source-receptor relationships in the Steubenville-Weirton-Wheeling Interstate AQCR may show that additional TSP controls are needed to bring the AQCR into attainment. If the study shows that additional controls are necessary, EPA will require West Virginia to submit a new plan for the AQCR. EPA has the authority to require such a plan under Section 110(a)(2)(H) of the Clean Air Act.

West Virginia's plan for the Steubenville-Weirton-Wheeling Interstate AQCR does not demonstrate that less than RACT will bring the AQCR into attainment. Therefore, RACT is required for the AQCR. *See* the *General Preamble for Proposed Rulemaking on Approval of State Implementation Plan Revisions for Nonattainment Areas*, 44 FR 20372, April 4, 1979. For this reason, EPA requires West Virginia to revise Regulation VII as indicated below in the section on RACT for TSP.

West Virginia has requested that EPA allow it until July 1, 1980, to submit a plan for attaining secondary TSP standards. EPA is proposing this request in a notice published elsewhere in today's **Federal Register.**

(b) *Parkersburg-Tygart Magisterial District*—West Virginia's submittal for the Parkersburg-Tygart Magisterial District provides for the attainment of secondary TSP standards by December 31, 1985. The strategy for attaining standards is to control fugitive dust emissions. West Virginia's failure to submit Regulation XVII to EPA for inclusion in the West Virginia SIP makes it impossible for EPA to enforce this strategy. Therefore, EPA considers that West Virginia no longer has an attainment plan for the Parkersburg-Tygart Magisterial District. West Virginia, after being notified of this fact, requested that EPA allow it until July 1, 1980, to submit an alternative plan. EPA is proposing this request in a notice published elsewhere in today's **Federal Register.**

(c) *Kanawha County and the Valley Magisterial District in Fayette County*—Kanawha County and the Valley Magisterial District in Fayette County have until today been designated as primary nonattainment areas for TSP. On April 6, 1979, West Virginia requested the redesignation of these areas to only secondary nonattainment for TSP. West Virginia assumed in developing its plan for these areas that EPA would approve their redesignation. EPA proposed their redesignation on August 20, 1979, 44 FR 48723, and is approving their redesignation in a notice published elsewhere in today's **Federal Register.**

West Virginia's submittal for Kanawha County and the Valley Magisterial District in Fayette County provides for the attainment of secondary TSP standards by December 31, 1985. The strategy for attaining standards is to control fugitive dust emissions. West Virginia's failure to submit Regulation XVII to EPA for inclusion in the West Virginia SIP makes it impossible for EPA to enforce this strategy. Therefore, EPA considers that West Virginia no longer has an attainment plan for Kanawha County and the Valley Magisterial District in Fayette County. West Virginia, after being notified of this fact, requested that EPA allow it until July 1, 1980, to submit an alternative plan. EPA is proposing this request in a notice published elsewhere in today's **Federal Register.**

(d) *Winfield and Union Magisterial Districts (Marion County)*—West Virginia's submittal for Winfield and Union Magisterial Districts in Marion County provides for the attainment of both primary and secondary TSP standards. The plan shows that these areas will attain TSP standards because of the shutdown of a large coke plant. The plan demonstrates by air quality modeling that the shutdown of this plant will bring about the attainment of primary and secondary TSP standards by December 31, 1980. Therefore, EPA approves the plan.

2. *Emission Inventory*—West Virginia submitted an inventory listing the TSP emissions of various categories of TSP sources. EPA indicated in its July 24, 1979, proposal of West Virginia's SIP revision that the State's TSP inventory was required to be more detailed. Accordingly, EPA asked West Virginia to submit an inventory listing the emissions of individual TSP sources. On October 10, 1979, West Virginia submitted such an inventory.

EPA has determined, since the publication of its proposal of West Virginia's SIP revision, that it is consistent with Agency policy to approve categorical TSP inventories whenever a SIP contains such an inventory and EPA is aware that supporting source-by-source documentation exists elsewhere. Therefore, West Virginia's categorical TSP inventory is acceptable.

Nevertheless, EPA has reviewed West Virginia's inventory of emissions of individual sources. EPA has found several discrepancies in this inventory. West Virginia has indicated in discussions with EPA that it believes most of these discrepancies can be resolved by the submission of additional information. EPA will continue to work with West Virginia to assure that the State's source-by-source inventory is adequate.

(3) *Margin for Growth*—EPA noted in its proposal of the West Virginia SIP revision for TSP that the revision did not contain an adequate provision for the growth of major TSP sources. As noted elsewhere in this notice, EPA is approving West Virginia's SIP on the condition that West Virginia adopts an offset regulation and meets other requirements.

West Virginia's attainment demonstration includes a provision for the growth of TSP emissions from area sources. As stated in the notice of proposed rulemaking, EPA asked for additional documentation of these growth estimates. On October 10, 1979, West Virginia submitted the additional information.

West Virginia has agreed to adopt an offset regulation and has provided for additional TSP emissions from new area sources. Therefore, EPA approves this section of West Virginia's SIP revision.

4. *Reasonably Available Control Technology (RACT)*—EPA's proposal of the West Virginia SIP revision indicated Regulations VI and VII were deficient in that they did not require RACT. On September 24, 1979, West Virginia stated in a letter to EPA that it believed Regulation VI did require RACT since it contained a 20% opacity standard. EPA has reviewed the State's contention and agrees that Regulation VI does require RACT. The issue of the Regulation VII was resolved in discussions between EPA's and West Virginia's representatives. Regulation VII must contain more specific requirements to assure that RACT is required for certain sources. West Virginia has agreed to make the necessary revisions. (The rulemaking docket on this Notice contains examples of standards which EPA has found to be RACT for iron and steel-making facilities, with supporting data, as well as acceptable test methods and definitions to ensure sufficient clarity for enforcement purposes.)

EPA approves this portion of West Virginia's SIP on the condition that West Virginia revises Regulation VII and submits this revised Regulation to EPA. Elsewhere in today's **Federal Register,** EPA is proposing a February 1, 1981, deadline for submittal of the revised regulation.

5. *Enforceability*—EPA's proposal of the West Virginia SIP revision noted several deficiencies in Regulation XVII. Regulation XVII is not part of West Virginia's SIP revision. Accordingly, any deficiencies in it are no longer an issue.

EPA's proposal also noted several deficiencies with Regulation VIII, which establishes West Virginia's air quality standards for SO_2 and TSP. EPA noted that section 3.01 of Regulation VIII was deficient in that it only required attainment of NAAWS at sampling sites.

Upon closer examination, EPA has determined that the standards of Regulation VIII can be enforced in all areas of West Virginia. Therefore, EPA now believes Section 3.01 of Regulation VIII to be acceptable.

EPA also noted that the sampling methods specified in Regulation VIII were inadequate. West Virginia has notified EPA that it will be revising its air monitoring requirements to comply with 40 CFR Part 58, and that 40 CFR Part 58 must be complied with for all monitoring for SIP purposes performed in the State. The State's response satisfies the concern EPA raised earlier about the sampling methods specified in Regulation VIII. Furthermore, compliance with 40 CFR Part 58 is not required to meet the requirements of Part D of the Clean Air Act.

IV. Comments and Responses

This section describes the pertinent comments EPA has received on West Virginia's SIP revision and gives EPA's responses to those comments.

A. General

EPA received comments on the general aspects of the West Virginia SIP revision from the Commonwealth of Pennsylvania and from the West Virginia Chamber of Commerce. These comments and EPA's responses are given below:

1. *Pennsylvania's Comments*—The notice indicates that a "major issue" with the West Virginia SIP revision is the lack of a preconstruction review program that meets the requirements of Section 173 of the Clean Air Act and the Environmental Protection Agency's January 16, 1979 Emission Offset Interpretative Ruling. The notice elsewhere states, "EPA proposed to conditionally approve the plan where there are *minor* deficiencies and the State provides assurances that it will submit corrections on a specified schedule" (emphasis added). The notice solicits comments on what items should be conditionally approved. Because the plan has a major deficiency—the lack of an acceptable preconstruction review program—I recommend against conditional approval unless West Virginia demonstrates that it will handle new construction in nonattainment areas under their existing procedures in a manner that is consistent with Section 173 of the Act and that will be equitable with other States.

Response: West Virginia has agreed to adopt a permanent regulation requiring preconstruction review that will meet the requirements of Section 173 of the Clean Air Act and of EPA's final Emission Offset Interpretative Ruling. West Virginia will keep a temporary regulation requiring preconstruction review and emission offsets in effect until it adopts a permanent regulation. EPA considers the present lack of a permanent regulation a minor deficiency.

2. *Chamber of Commerce's Comments*—a. The July 24, 1979 notice of proposed rulemaking includes a number of references to changes which EPA will require in regulations which are included as a part of the State's proposed SIP with respect to both ozone and total suspended particulates. In both cases these changes deal with redefining RACT and with enforceability.

Our review of these suggested changes indicates that many of them are of a substantive nature which have not been the subject of any public hearing or comment before the State agency. We therefore suggest that it would be inappropriate for these changes to be made in the SIP without first going through further hearings at the State level to assure compliance with the letter and spirit of the public notice and hearing requirements of the Clean Air Act and of State law.

Response: West Virginia adopted or revised only five of the nine regulations that EPA critiqued in the July 24, 1979 notice of proposed rulemaking. West Virginia did not make any significant changes in these regulations.

West Virginia has agreed to adopt a regulation requiring preconstruction review and emission offsets. The State will observe all public notice and hearing requirements before adopting this regulation. Until it can adopt this regulation, West Virginia will keep in effect a temporary regulation requiring pre-construction review and emission offsets. West Virginia has adhered to all requirements of West Virginia law in adopting this temporary regulation.

West Virginia has agreed to submit to EPA an adequate analysis of the health, welfare, economic, energy, and social effects of its SIP revision. West Virginia will follow all public notice and hearing requirements before submitting this analysis to EPA.

West Virginia has agreed to revise Regulation VII. West Virginia will follow all public notice and hearing requirements when revising this Regulation.

West Virginia has agreed to adopt an adquate test method for Regulation XXIII. This test procedure will be adopted in accordance with the requirements of West Virginia law.

In conclusion, all changes required in West Virginia's SIP revisions will be made in accordance with Federal public notice and hearing requirements.

b. The 1977 Amendments to the Clean Air Act established the requirement now contained in Section 172(b)(9) that a nonattainment plan must provide for "(A) an identification and analysis of air quality, health, welfare, economic, energy, and social effects of the plan provisions required by this subsection and of the alternatives considered by the States, and (B) a summary of the public comments on such analysis."

No such analysis has been made with respect to West Virginia's proposed SIP and certainly no opportunity has been provided for public comment on any such analysis. It is plain on the face of the legislative history of the Clean Air Act that Congress intended that the SIP should evidence public cognizance of the economic, energy and social effects of the plan. 2 U.S. Code, Cong. & Admin. News 1536 (95th Cong., First Sess. 1977).

Response: EPA has approved the West Virginia SIP on the condition that West Virginia submits an analysis of the SIP's effects to EPA. EPA also requires West Virginia to submit a summary of the public comments on the analysis at that time. The public will be given additional opportunity to comment on the analysis after EPA proposes it in the **Federal Register.**

B. Ozone.

EPA received comments on West Virginia's SIP revision for O_3 both from a private citizen and from the State of New Jersey. These comments and EPA's responses are given below:

1. *Citizen's Comments*—a. The Kanawha Valley Intrastate AQCR is

designated a rural nonattainment area for ozone. This designation is reasonable in determining that adoption of transportation measures is unnecessary, but not in determining that RACT is unnecessary. Transportation is an area source and justifiably must be looked at on a broad scale. However, the population density around VOC sources in the Kanawha Valley is similar to population densities in urban nonattainment areas for ozone.

Response: For rural nonattainment areas, States must adopt regulations requiring RACT for major sources for which EPA has published a CTG, and must commit to adopt additional regulations requiring RACT for major sources covered by future CTGs, 43 FR 21673, May 19, 1978. West Virginia has satisfied this requirement.

It must be pointed out that attainment of ambient air quality standards is the goal of the SIP. Major sources are selected for control in rural areas because they have the potential to contribute to the ambient air quality problem. Mechanisms such as New Source Performance Standards (NSPS), National Emission Standards for Hazardous Air Pollutants (NESHAPs), and State and local regulations are intended to control localized air pollution problems.

b. The Administrator should require the application of RACT in the Kanawha Valley to demonstrate RFP and attainment. In applying RACT, West Virginia should be required to provide for attainment as expeditiously as practicable. West Virginia has submitted a control strategy demonstration. This action is commendable and shows a desire to resolve the problems caused by the chemical plants in the Kanawha Valley.

Response: Since the Kanawha Valley AQCR is a rural nonattainment area, West Virginia is not required to submit a RFP presentation or a control strategy demonstration. This is in accordance with EPA policy stated in Administrator's Memorandum on Criteria for Proposing Approval of Revision to Plans for Nonattainment Areas 43 FR 21673, May 19, 1979. West Virginia's new regulations apply to petroleum refineries, bulk gasoline terminals, and stored petroleum liquids. The SIP did not contain and is not required to contain regulations for controlling emissions from chemical plants.

c. Some of the emission reductions which West Virginia uses to demonstrate achievement of the NAAQS are questionable.

Response: Same as response to comment b.

d. EPA outlines several corrections to West Virginia's SIP for ozone in the "RACT as Expeditiously as Practicable" and "Enforceability" sections in its notice of proposed rulemaking in the **Federal Register.** These corrections should be made on an appropriate schedule if a conditional approval of the ozone SIP is granted.

Response: The State must either correct or agree to correct all deficiencies of the SIP before approval or conditional approval can be given. EPA is proposing dates by which West Virginia must fulfill certain conditions in a notice published elsewhere in today's **Federal Register.** The public is being invited to comment on the acceptability of these dates.

2. *State of New Jersey's Comments.*—The State of New Jersey submitted comments on the proposed Part D ozone SIP revisions for several States. New Jersey contends that SIPs which do not include uniform Statewide controls for existing and new sources which meet the requirements of Part D will not attain the ozone standard. New Jersey urges the Administrator to disapprove ozone SIPs which do not include such Statewide measures. In addition, New Jersey argues as it did in objecting to the Administrator's ozone nonattainment area designations that entire States should be designated nonattainment, thereby requiring Part D SIP revisions Statewide.

Response: West Virginia's O_3 plan meets the requirement for rural O_3 nonattainment areas. Therefore, the Administrator has no basis for disapproving the O_3 plan. The Administrator considered all of New Jersey's objections to the designations and responded in the document entitled "Technical Support Document for Agency Policy Concerning Designation of Attainment, Unclassifiable, and Nonattatinment Areas for Ozone," dated January 1979. Availability of the document was announced in the February 1, 1979 **Federal Register,** 44 FR 6395. This document and the Administrator's response to New Jersey's comments are incorporated herein by reference.

C. *Sulfur Dioxide*

A citizen concerned about air pollution in West Virginia submitted comments on the SO_2 section of the West Virginia SIP revision. These comments and EPA's responses are given below:

1. *Citizen's Comments*—a. The proposed rule states that if a 20 ug/m^3 annual average reduction is realized once the Sammis Generating Station achieves compliance (required by October 19, 1979) then no further reductions in emissions by other facilities would be required to attain ambient SO_2 standards. West Virginia's SIP should be conditionally approved with a schedule specifying continuous review of the attainment status of the New Manchester-Grant Magisterial District. If attainment of ambient standards is not achieved by a reasonable date, then West Virginia should schedule further revisions as necessary.

Response: West Virginia's SIP revision indicates that New Manchester will attain SO_2 standards after the Sammis plant complies with the SO_2 emission limitations of the Ohio SIP. At this time EPA does not know when Sammis will finally comply with Ohio's limitations on SO_2 emissions. In these circumstances, EPA believes that December 31, 1982 is a reasonable date to expect New Manchester to attain air quality standards. If Sammis complies with Ohio's SO_2 emissions limitations before December 31, 1982, and New Manchester still fails to attain SO_2 standards, West Virginia will have to develop further SIP revisions to ensure that SO_2 air quality standards are attained.

b. In revising the SO_2 SIP, West Virginia assumed that the Wellsburg Magisterial District in Brooke County would be redesignated as a primary and secondary attainment area. EPA did not comment on this assumption. The SO_2 SIP should not be finalized unless the validity of this assumption is affirmed by EPA.

Response: EPA is redesignating the Wellsburg Magisterial District from primary and secondary nonattainment to attainment in a notice published elsewhere in today's **Federal Register.**

D. *Total Suspended Particulates*

The West Virginia Chamber of Commerce submitted comments on the TSP section of West Virginia's SIP submittal. These comments follow:

1. *Chamber of Commerce's Comments*—a. Regulation XVIII is deficient in several respects and should not be approved.

Response: West Virginia has not submitted Regulation XVII to EPA. Therefore, Regulation XVII is not part of the SIP revision.

b. As noted at the outset of your July 24, 1979 **Federal Register,** notice, the new provisions to the Clean Air Act, enacted in August, 1977, call upon all states to revise their SIP's with respect to those areas in which national ambient air quality standards are not being attained. The Commission and EPA have identified such areas in West Virginia to include the following regions with respect to total suspended particulates:

1. Kanawha County and portions of Fayette County.
2. Portions of Marion County, and
3. Hancock, Brooke, Ohio and Marshall Counties.

Even though nonattainment areas in West Virginia have been limited to these three, the Commission proposes to amend the SIP by including a new Regulation XVII, and revisions to certain existing regulations, which impose new or more stringent emission controls on sources located in the attainment areas of Putnam County, West Virginia. This unwarranted expansion of the scope of these regulations is in spite of the fact that there is no evidence to support the proposition that any sources in Putnam County contribute to the violations of ambient standards in any of the State's designated nonattainment areas."

Reponse: The Clean Air Act requires States to adopt all emission controls necessary to assure attainment of air quality standards. Each State has the responsibility of determining exactly which controls are necessary. EPA understands that the West Virginia Air Pollution Control Commission has determined that the regulation of sources in Putnam County is necessary to assure the attainment of air quality standards. Therefore, EPA accepts West Virginia's plans to regulate sources in Putnam County.

E. *National Comments*

EPA has receive several comments applying to the SIP revisions of all States. These comments and EPA's responses can be found in EPA's notice of final rulemaking for Delaware's Part D SIP revision, and in EPA's Rationale Document for this final ruelmaking. EPA's notice of final rulemaking for Delaware's Part D SIP revision can be found at 45 FR 14551 (1980).

EPA Actions

EPA's decisions to approve, conditionally approve, or disapprove West Virginia's SIP revisions for the attainment of TSP, O_3, and SO_2 standards are given in this section. Elsewhere in today's **Federal Register** EPA is proposing deadlines for meeting all conditions given in this section.

A. General

EPA approves West Virginia's SIP revisions for attaining primary TSP standards in the Steubenville-Weirton Wheeling Interstate AQCR and in those portions of Union and Winfield Magisterial Districts in Marion west of Interstate Route 79, for attaining the O_3 standard in the Kanawha Valley Interstate AQCR, and for attaining SO_2 standards in the New Manchester-Grant Magisterial District in Hancock County, on the condition that:

1. West Virginia adopts a permanent regulation requiring preconstruction review and emission offsets. This regulation must meet the requirements of Section 173 of the 1977 Clean Air Act Amendments.

2. West Virginia keeps a temporary regulation requiring preconstruction review and emission offsets in effect until EPA approves a permanent regulation.

3. West Virginia submits all permits issued under the provisions of its temporary preconstruction review and offset regulation to EPA for approval as SIP revisions.

4. West Virginia submits to EPA an adequate analysis of the health, welfare, economic, energy, and social effects of its SIP revision, and an adequate summary of the public comments on this analysis.

B. Ozone

EPA approves West Virginia's SIP revision for attaining the O_3 standard in the Kanawha Valley Intrastate AQCR on the condition that West Virigina adopts an adequate test method for Regulation XXIII and submits this test method to EPA as a SIP revision.

C. Sulfur Dioxide

EPA approves West Virginia's SIP revision for attaining SO_2 standards in the New Manchester-Grant Magisterial District in Hancock County.

D. Total Suspended Particulates

EPA approves West Virginia's SIP revisions for attaining TSP standards in the Steubenville-Weirton-Wheeling Interstate AQCR on the condition that West Virginia revises Regulation VII and submits this revised regulation to EPA for incorporation into West Virginia's SIP.

EPA approves West Virginia's plan for attaining primary and secondary TSP standards in those portions of Union and Winfield Magisterial Districts west of Interstate Route 79.

EPA finds that good cause exists for making this action immediately effective. EPA has a responsibility to take final action on these revisions as soon as possible in order to lift growth restrictions in those areas for which the State of West Virginia has submitted adequate plans in accordance with Part D requirements.

Note.—Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and have determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(42 U.S.C. 7401–642)

Dated: August 6, 1980.

Douglas M. Costle,

Administrator.

Title 40, Part 52 of the Code of Federal Regulations is amended as follows:

Subpart XX—West Virginia

1. Section 52.2520, paragraph (c) is amended by adding paragraphs (10) through (12) as follows:

§ 52.2520 Identification of plan.

* * * * *

(c) * * *

(10) Revised plans for attaining primary air quality standards for TSP and SO_2 submitted to EPA by the Governor of West Virginia on June 18, 1979. These plans are contained in a document entitled, "Revisions to the State Implementation Plan to Achieve and Maintain Air Quality Standards for Particulates, Sulfur Oxides, and Ozone."

(11) Revised plan for attaining the ozone standard submitted to EPA by the Governor of West Virginia on November 21, 1979.

(12) Revised Regulations III and VIII, and new Regulations XXI, XXIII, and XXIV, submitted to EPA by the Governor of West Virginia on December 19, 1979.

2. Section 52.2522, paragraph (b) relating to the Harrison power plant added at 45 FR 39255, June 10, 1980 is redesignated as (c) and a new paragraph (d) is added as follows:

§ 52.2522 Approval status.

* * * * *

(d) In addition, continued satisfaction of the requirements of Part D for the ozone portion of the SIP depends on the adoption and submittal of RACT requirements by July 1, 1980 for the sources covered by CTGs issued between January 1978 and January 1979 and the adoption and submittal by each subsequent January of additional RACT requirements for sources covered by CTGs issued by the previous January.

3. Section 52.2529 is added as follows:

§ 52.2529 Review of new sources and modifications.

EPA's approval of West Virginia's plans for attaining primary total suspended particulate standards in the Steubenville-Weirton-Wheeling Interstate AQCR and in those portions

of Union and Winfield Magisterial Districts in Marion County west of Interstate Route 79, for attaining the ozone standard in the Kanawha Valley Intrastate AQCR, and for attaining sulfur dioxide standards in the New Manchester-Grant Magisterial District in Hancock County, is given on the condition that:

(a) West Virginia adopts a permanent regulation requiring preconstruction review and emission offsets. This regulation must meet the requirements of Section 173 of the 1977 Clean Air Act Amendments.

(b) West Virginia keeps a temporary regulation requiring preconstruction review and emission offsets in effect until EPA approves a permanent regulation.

(c) West Virginia submits all permits issued under provisions of its temporary preconstruction review and offset regulation to EPA for approval as SIP revisions.

4. Sections 52.2530 is added as follows:

§ 52.2530 General requirements.

EPA's approval of West Virginia's plans for attaining primary total suspended particulate standards in the Steubenville-Weirton-Wheeling Interstate AQCR and in those portions of Union and Winfield Magisterial Districts in Marion County west of Interstate Route 79, for attaining the ozone standard in the Kanawha Valley Intrastate AQRC, and for attaining sulfur dioxide standards in the New Manchester-Grant Magisterial District in Hancock County, is given on the condition that West Virginia submits to EPA an adequate analysis of the health, welfare, economic, energy, and social effects of its SIP revision, and an adequate summary of the public comments on this analysis.

5. Section 52.2531 is added as follows:

§ 52.2531 Control strategy: (hydrocarbons).

(a) EPA's approval of West Virginia's plan for attaining the ozone standard in the Kanawha Valley Intrastate AQCR is given on the condition that West Virginia adopts an adequate test method for Regulation XXIII submits this test method to EPA as a SIP revision.

6. Section 52.2532 is added as follows:

§ 2532 Control strategy; particulate matter.

EPA's approval of West Virginia's plan for attaining total suspended particulate standards in the Steubenville-Weirton-Wheeling Interstate AQCR is given on the condition that West Virginia revises Regulation VII and submits this revised regulation to EPA for incorporation into the West Virginia SIP.

(b) West Virginia's does not have approved plans for attaining secondary TSP standards in the Steubenville-Weirton-Wheeling AQCR, Kanawha County and the adjacent Valley Magisterial District in Fayette County, and the Parkersburg Tygart Magisterial District in Wood County.

§ 52.2523 [Amended]

7. Section 52.2523 is amended by revising the chart of attainment dates to read as follows:

* * * * *

Air quality control region	Pollutant						
	Particulate matter		Sulfur oxides		Nitrogen dioxide	Carbon monoxide	Ozone
	Primary	Secondary	Primary	Secondary			
Steubenville-Weirton-Wheeling Interstate:							
a. New Manchester-Grant Magisterial District in Hancock County.	[1]a	[2]e	[1]g	[2]g	[4]h	[4]h	[4]h
b. Wellsburg Magisterial District in Brooke County.	[1]a	[2]e	[1]b	[2]c	[4]h	[4]h	[4]h
c. Remainder of AQCR	[1]a	[2]i	[1]b	[2]c	[4]h	[4]h	[4]h
Parkersburg-Marietta Interstate:							
a. Parkersburg-Tygart Magisterial District in Wood County.	[1]b	[2]i	[1]b	[2]c	[4]h	[4]h	[4]h
b. Remainder of AQCR	[1]b	[2]c	[1]b	[2]c	[4]h	[4]h	[4]h
Huntington-Ashland Portsmouth-Ironton Interstate	[1]b	[2]c	[1]b	[2]c	[4]h	[4]h	[4]h
Kanawha Valley Intrastate:							
a. Kanawha County	[1]b	[2]e	[1]b	[2]c	[4]h	[4]h	[4]i
b. Remainder of AQCR	[1]b	[2]c	[1]b	[2]c	[4]h	[4]h	[4]h
Southern West Virginia Intrastate:							
a. Valley Magisterial District in Fayette County.	[1]b	[1]e	[1]b	[1]c	[4]h	[4]h	[4]h
b. Remainder of AQCR	[1]b	[1]c	[1]b	[1]c	[4]h	[4]h	[4]h
North Central West Virgina Intrastate:							
a. In Marion County, all portions of Union and Winfield Magisterial Districts west of Intrastate Highway I–79.	[1]d	[2]e	[1]b	[1]c	[4]h	[4]h	[4]h
b. Remainder of AQCR	[1]b	[2]c	[1]b	[1]c	[4]h	[4]h	[4]h
Cumberland-Keyser Intrastate	[1]b	[2]c	[1]b	[1]c	[4]h	[4]h	[4]h
Central West Virgina	[1]b	[1]c	[1]b	[1]c	[4]h	[4]h	[4]h
Allegheny Intrastate	[1]b	[1]c	[1]b	[1]c	[4]h	[4]h	[4]h
Eastern Panhandle Intrastate	[1]b	[1]c	[1]b	[1]c	[4]h	[4]h	[4]h

a. December 31, 1982.
b. Air quality levels presently below primary standards or area is unclassifiable.
c. Air quality levels presently below secondary standards or area is unclassifiable.
d. December 31, 1980.
e. Plan for attaining secondary standards not yet submitted.
f. Plan for attaining primary standards not yet submitted.
g. Attainment expected as soon as the Sammis Power Plant meets the SO_2 limitations in the Ohio State Implementation Plan.
h. Air quality levels presently better than National Standards or area is unclassifiable.
i. This is a rural nonattainment area.

[1] Attainment date in 1972 plan was June 1975.
[2] Attainment date in 1972 plan was June 1977.
[3] Attainment date in 1972 plan was June 1978.
[4] Listed as attainment area in 1972 plan.

NOTE.—Sources subject to plan requirements and attainment dates established under Section 110(a)(2)(A) prior to the 1977 Clean Air Act Amendments remain obligated to comply with those requirements by the earlier deadlines. The earlier attainment dates are set out at 40 CFR Part 52.2523 (1978).

40 CFR Part 81

[FRL 1569-8]

Approval of Section 107 Designations for West Virginia; Designations of Areas for Air Quality Planning Purposes

AGENCY: Environmental Protection Agency.

ACTION: Final rule.

SUMMARY: The State of West Virginia has revised its list of air quality attainment designations for one area within the State with respect to particulate matter (TSP) and one area with respect to sulfur dioxide (SO_2). For TSP, the State has changed the designation for Kanawha County and the adjacent Valley Magisterial District in Fayette County from nonattainment of primary standards to nonattainment of secondary standards. For SO_2, the State has changed the designation for the Wellsburg Magisterial District from nonattainment of primary standards to attainment.

On April 6, 1979, West Virginia submitted these revisions to the Environmental Protection Agency (EPA), along with supporting information, for promulgation under Section 107(d) of the Clean Air Act.

This notice announces EPA's approval of these changes submitted by West Virginia. All other Section 107 designations for the State of West Virginia not discussed in this notice remain intact, 44 FR 40521, (September 12, 1978).

EFFECTIVE DATE: August 14, 1980.

ADDRESSES: Copies of the associated support material are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106, ATTN: Mr. Harold Frankford

West Virginia Air Pollution Control Commission, 1558 Washington Street, East, Charleston, West Virginia 25311, ATTN: Mr. Carl Beard

Public Information Reference Unit, Room 2922, EPA Library, U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, DC 20460

FOR FURTHER INFORMATION CONTACT:

Mr. Harold A. Frankford (3AH12), U.S. Environmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106, Phone: 215/597–8392

SUPPLEMENTARY INFORMATION:

Background

Section 107(d)(1) of the Clean Air Act requires the States to submit to the Administrator a list identifying all air quality control areas, or portions thereof, that have not attained the National Ambient Air Quality Standards (NAAQS). The Act further requires that the Administrator promulgate this list, with such modifications as he deems necessary, as required by Section 107(d)(2) of the Act. On March 3, 1978, 43 FR 8962, the Administrator promulgated nonattainment designations for West Virginia for total suspended particulates (TSP), sulfur dioxide (SO_2) and ozone (O_3). These designations were effective immediately and public comment was solicited. On September 12, 1978, in response to the comments received, the Administrator revised and amended certain of the original designations, 43 FR 40502.

The Act also provides that a State, from time to time, may review and revise its designations list and submit these revisions to the Administrator for promulgation (Section 107(d)(5) of the Act). The criteria and policy guidelines governing these revisions and the Administrator's review of them are the same that were used in the original designations and which are summarized in the **Federal Register** of March 3, 1978, 43 FR 8962; September 11, 1978, 43 FR 40412; and September 12, 1978, 43 FR 40502. West Virginia has revised its original designation list and on April 6, 1979, submitted these revisions to EPA.

On August 20, 1979, 44 FR 48723, the Environmental Protection Agency acknowledged receipt of these revised designations and solicited public comments on the acceptability of these changes.

Change to SO_2 Designation

The State of West Virginia has revised the SO_2 designation for the Wellsburg Magisterial District (Brooke County) from nonattainment of primary SO_2 standards to attainment. The State submitted air quality data showing no violations of SO_2 air quality standards during eight consecutive quarters (April, 1977 to March, 1979) of monitoring. Therefore, EPA redesignates this area to "better than national standards" in accordance with West Virginia's revision.

Change to TSP Designation

The State of West Virginia has revised the TSP designation for Kanawha County and the adjacent Valley Magisterial District in Fayette County from nonattainment of primary TSP standards to nonattainment of secondary TSP standards. The State submitted air quality data showing that no violations of the annual and 24-hour primary TSP standards have occurred during eight consecutive quarters (April, 1977 to March, 1979). However, the air quality data still show violations of the secondary (24-hour) TSP standard. Therefore, EPA approves the redesignation of this area to "does not meet secondary standards" in accordance with West Virginia's revision.

EPA Actions

Although this action is being taken as a final rule, EPA will consider comments at any time and make appropriate changes in attainment designations.

This SO_2 redesignation to attainment is being made immediately effective in order to lift the statutory restriction on construction of new or modified sources applying in nonattainment areas for which state implementation plan revisions have not been submitted by the State and approved by EPA. The TSP redesignation to nonattainment of secondary standards is being made immediately effective to relieve the state of the requirement to submit a plan revision for the attainment of the primary TSP standard. Elsewhere in today's **Federal Register**, EPA is proposing to extend until July 1, 1980 the deadline for the State's submittal of a plan revision for attainment of the secondary TSP standards.

All comments should be addressed to: Mr. Howard R. Heim, Jr., Chief (3AH12), Air Programs Branch, U.S. Enviornmental Protection Agency, Region III, Curtis Building, 6th & Walnut Streets, 10th Floor, Philadelphia, PA. 19106, Attn: 107WV–1.

Note.—Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and have determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(Sec. 107(d), 171(2), 301(a) of the Clean Air Act, as amended (42 U.S.C. 7407(d), 7501(2), 7601(a))

Dated August 6, 1980.

Douglas M. Costle,
Administrator.

40 CFR Part 180

[FRL 1569-5; PP 9F2210/R268]

Cyano(3-Phenoxyphenyl)Methyl-4-Chloro-Alpha-(1-Methylethyl) Benzeneacetate

AGENCY: Environmental Protection Agency (EPA).

ACTION: Final rule.

SUMMARY: This rule establishes tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl) benzeneacetate in or on apples and pears at 0.02 part per million (ppm). The regulation was requested by Shell Chemical Co. This rule establishes maximum permissible levels for residues of the subject insecticide in or on apples and pears.

EFFECTIVE DATE: Effective on August 14, 1980.

FOR FURTHER INFORMATION CONTACT:

Franklin D. R. Gee, Product Manager (PM) 17, Registration Division (TS–767), Office of Pesticide Programs, Environmental Protection Agency, 401 M

Street SW, Washington, D.C. 20460, 202/426-9417.

SUPPLEMENTARY INFORMATION: Notice was published in the Federal Register of July 20, 1979 (44 FR 42773) that Shell Chemical Company, 1025 Connecticut Avenue, NW, Suite 200, Washington, D.C. 20036, had filed a pesticide petition (PP 9F2210) with EPA. This petition proposed that 40 CFR 180.379 be amended by establishing tolerances for residues of the insecticide cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate in or on the raw agricultural commodities apples and pears at 0.02 ppm. No comments were received in response to this notice of filing.

The data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerances included a rat acute oral toxicity study with a median lethal dose (LD_{50}) of 1–3 grams (gm)/kilogram (kg) of body weight (bw) in water and 450 milligrams (mg)/kg of bw in dimethylsulfoxide (DMSO); a 90-day dog feeding study with a no-observable-effect level (NOEL) of 500 ppm; and an 18-month mouse feeding study with a NOEL of 100 ppm with no oncogenic effects at the highest level fed (3,000 ppm); a 24-month rat feeding study with a NOEL of 250 ppm (the highest level fed) with no oncogenic effects, a three-generation rat reproduction study with a NOEL of 250 ppm (the highest level fed); teratology studies in mice and rabbits (both negative at the highest dose of 50 mg/kg of bw/day); and the following mutagenicity studies: Mouse dominant lethal (negative at 100 mg/kg of bw, which was the highest level fed), mouse host-mediated bioassay (negative at 50 mg/kg of bw, which was the highest level fed); AMES test in vitro (negative), and a bone marrow cytogenic study in the Chinese hamster (negative at 25 mg/kg of bw). The following studies assessing neurological effects were performed: A hen study negative at lg/mg/kg of bw for 5 days, repeated again at 21 days; a rat acute study with a NOEL of 200 mg/kg of bw; a 15 month rat feeding study resulted in a systemic NOEL of 500 ppm and a NOEL of 1500 ppm with respect to nerve damage.

Data considered desirable but currently lacking are: (1) Further research on granulomas observed in an 18-month inch mouse study; and (2) a six-month non-rodent (preferably dog) oral feeding study. Action being taken to obtain the lacking information or other additionally needed information:

a. Petitioner has submitted a protocol to further study the granulomas in the mouse strain used.

b. The petitioner has agreed to submit the six-month non-rodent (preferably dog) oral feeding study within one (1) year from the date of notification by the Agency to conduct this study.

There are, at this writing, no pending regulatory actions against the registration of this pesticide.

There are established tolerances for residues in eggs, milk, meat, and poultry, which are adequate to cover secondary residues resulting from the proposed uses as delineated in 40 CFR 180.6(a)(2).

The pesticide is considered useful for the purpose for which the tolerance is sought, and it is concluded that the tolerances of 0.02 ppm established by amending 40 CFR 180.379 will protect the public health. It is concluded, therefore, that the tolerances be established as set forth below.

Any person adversely affected by this regulation may, on or before September 15, 1980, file written objections with the Hearing Clerk, EPA, Room M-3708 (A-110), 401 M Street, SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested the objections must be supported by grounds legally sufficient to justify the relief sought.

Note.—Under Executive Order 12044, EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other "specialized" procedures. This regulation has been reviewed and it has been determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

Effective date: August 14, 1980.

(Sec. 408(d)(2), 68 Stat. 514 (21 U.S.C. 346a(e)))

Dated: August 8, 1980.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

Therefore, Subpart C of 40 CFR Part 180 is amended by adding apples and pears at 0.02 ppm to § 180.379 to read as follows:

§ 180.379 Cyano(3-phenoxyphenyl)methyl-4-chloro-alpha-(1-methylethyl)benzeneacetate.

BILLING CODE 6560-01-M

DEPARTMENT OF TRANSPORTATION

Office of the Secretary

49 CFR Part 1

Delegation of Authority to the Federal Aviation Administrator; Aviation Safety and Noise Abatement Act of 1979

AGENCY: Office of the Secretary, DOT.

ACTION: Final rule.

SUMMARY: This rule delegates to the Administrator of the Federal Aviation Administration the authority to exercise the powers and duties of the Secretary of Transportation under the Aviation Safety and Noise Abatement Act of 1979 (94 Stat. 50; February 8, 1980). This action is needed to expressly provide the delegation of that authority and ensures that its exercise is consistent with similar and related functions and responsibilities of the Administrator under section 611 of the Federal Aviation Act of 1958, as amended.

DATES: Effective date—August 6, 1980. Comments must be received by October 14, 1980.

ADDRESSES: Comments should be sent to: Docket Clerk (Docket No. 400 Seventh Street SW., Room 10200, Washington, DC 20590. Comments are available for public examination at that address Monday through Friday from 9:00 a.m. to 5:30 p.m. Persons wishing to have receipt of their comments acknowledged must send a stamped, self-addressed post card with their comments. The docket clerk will return those post cards when the comments are docketed.

FOR FURTHER INFORMATION CONTACT: Jack Lusk, Office of Regulation and Enforcement, Department of Transportation, 400 Seventh Street, SW., Washington, DC 20590; telephone (202) 426-4723.

SUPPLEMENTARY INFORMATION:

Request for Comments

Although this action is in the form of a final rule, which involves the internal management and procedures of the Department and, thus, was not preceded by notice and public procedure, comments are invited on the rule. When the comment period ends, the Department will use the comments and any other available information to review the regulation. After the review, if the Department finds that changes are appropriate, it will adopt amendments to the regulation.

Need and Effect of the Amendment

On February 18, 1980, the President signed into law the Aviation Safety and Noise Abatement Act of 1979 (Pub. L. 96-193; 94 Stat. 50). The Act authorizes and directs the Secretary of Transportation to take various regulatory and nonregulatory actions concerning aviation noise control and abatement and safety in aviation. Under the Department of Transportation Act of 1966 (49 U.S.C. 1651, et seq.) and the regulations of the Secretary (49 CFR Part 1), the related functions and responsibilities are vested in the Federal Aviation Administrator. Similarly, section 611 of the Federal Aviation Act of 1958, as amended (49 U.S.C. 1431), authorizes and directs the Administrator to adopt and amend regulations for the control and abatement of aircraft noise and sonic boom. This action ensures that the purposes of the Aviation Safety and Noise Abatement Act of 1979 are fully realized in a manner compatible with related FAA regulations and programs. Since the Act concerns, in part, international aviation policy, questions and actions involving those matters would continue to be coordinated with the appropriate elements within the Office of the Secretary. This delegation is consistent with the provisions of sections 3(e)(3), 6(c), and 9(e) of the Department of Transportation Act (49 U.S.C. 1652(e)(3), 1655(c) and 1657(e)).

Regulatory Impact

The Department of Transportation, pursuant to its Regulatory Policies and Procedures Implementing Executive Order 12044, has determined that this is not a significant regulation. Further, since it involves regulations affecting only the internal process and delegation of authority within the Department, the anticipated impact of the amendment is so minimal that it does not warrant a full regulatory evaluation analyzing its economic impact.

Since this amendment to the regulations of the Secretary involves a matter relating to the management, organization, and delegation of agency powers and duties, I find, in accordance with 5 U.S.C. 553, that notice and public procedure thereon is unnecessary and good cause exists for making it effective in less than 30 days after publication in the Federal Register.

Adoption of the Amendment

Accordingly, § 1.47 of Part 1 of Title 49 of the Code of Federal Regulations (49 CFR 1.47) is amended, effective August 6, 1980, by adding a new paragraph (m) to read as follows:

§ 1.47 Delegations to Federal Aviation Administrator.

* * * * *

(m) Carry out the powers and duties vested in the Secretary by the Aviation Safety and Noise Abatement Act of 1979 (94 Stat. 50; 49 U.S.C. 2101 et seq.)

(Secs. 3(e), 6(c), and 9(e), Department of Transportation Act (49 U.S.C. 1652(e), 1655(c), and 1657(e)))

Issued in Washington, DC, on August 6, 1980.

Neil Goldschmidt,

Secretary of Transportation.

[FR Doc. 80-24244 Filed 8-13-80; 8:45 am]

BILLING CODE 4910-13-M

NATIONAL TRANSPORTATION SAFETY BOARD

49 CFR Part 840

Notification of Railroad Accidents; Amendment

AGENCY: National Transportation Safety Board.

ACTION: Final rule.

SUMMARY: This amendment establishes a 6-hour time limit for notification of railroad accidents, specifies that an estimate of the repair or current replacement cost to railroad and nonrailroad property shall be used in determining the damages resulting from such accidents, and requires notification of all passenger train accidents. The purpose of these changes is to eliminate unnecessary delay in determining whether notification is required, and to require prompt reporting of the designated railroad accidents to the Safety Board.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. Elmer Garner, Chief, Railroad Accident Division, 800 Independence Avenue, SW., Washington, D.C. 20594, (202) 472-6091.

SUPPLEMENTARY INFORMATION: On March 6, 1980, the National Transportation Safety Board published at 45 FR 14609 a proposed amendment to § 840.3 and invited interested persons to submit written comments by April 29, 1980. Comments were received from the Association of American Railroads (AAR), six individual railroads, the American Public Transit Association, one operator of a rail rapid transit system, and a member of Congress. The AAR comment incorporated the views of 16 railroads, three of which also provided separate comments. All of those commenting on behalf of the railroads and rail rapid transit systems opposed the Board's initial proposal to establish a 2-hour time limit for notification. Some advocated an 8-hour time limit while others favored either no change in the present requirement of notification "at the earliest practical moment" or a maximum allowance of 12 hours. Under the present requirement railroads and rapid transit systems have delayed notifying the Board of accidents from 8 hours to as much as several days. There is no practical necessity for most of the delays, which have resulted from waiting for a more precise estimate of damages, or channeling the reporting process through a central office, or the failure of a railroad employee to comply with the reporting requirements. Railroads and rapid transit companies should know the value of prompt investigations in the development of facts necessary to determine the probable cause of railroad accidents. Congress expects the Safety Board to make such investigations and, to do so, prompt notification is imperative. However, in considering the comments, the Board recognizes that the 2-hour time limit may at times be impractical due to remoteness of the accident site, adverse climatic conditions, inaccessibility, lack of communications, and other like causes. In order to give the railroads a greater degree of flexibility in those unusual situations, the Board has decided to modify this proposal to require notification of reportable accidents at the earliest practical time but not later than 6 hours after their occurrence. We expect the railroads to emphasize "earliest practical time" as the reporting deadline and to utilize the grace period solely in those cases when delay cannot be avoided.

The second proposal to use estimates of the repair or current replacement costs in determining whether an accident results in damages of $150,000 or more to railroad and nonrailroad property was also opposed by the railroads. In particular, the objection was made that such estimates will be drastically affected by the rate of inflation. This has been considered and in lowering the minimum damage figure for a reportable accident from $500,000 to $150,000 as of October 1, 1978, the Board stated: "If the cost of railroad

equipment and other factors should increase to the extent that the numbers

(2) Damages, based on a preliminary gross estimate, of $150,000 or more of

of the exceptions to the moratorium is that the provisions do

subsistence and handicraft purposes by Alaska Natives under Native exceptions

Area Director of the U.S. Fish and Wildlife Service for scientific research

Operation of the National Wildlife Refuge System published in November

equipment and other factors should increase to the extent that the numbers of accidents reported exceeds the handling capability of its staff, the Board will then raise the damage threshold figure to the appropriate level" (49 FR 44535–44536, September 28, 1978). Several of the comments suggested that the Board adopt the industry standard for calculating the depreciated or settlement value of railroad equipment to correct for inflation. Another suggestion was to further define the term "nonrailroad property" as property adjacent to the railroad right-of-way. However, it should be understood that the reporting threshold represents only an estimate of the present value of damaged property. In addition, damage to nonrailroad property must include all such damage to other than railroad property occurring as a result of an accident. If it is demonstrated that an upward revision of the reporting threshold is needed due to the rate of inflation, the Board will take appropriate action but sees no reason to do so at this time.

The rail rapid transit systems opposed elimination of the $10,000 damage figure as the reporting threshold for accidents involving passenger trains. In their view, the change will require the reporting of trivial or insignificant accidents such as hard couplings, motor flashovers, the transfer of passengers from a disabled train, and slow speed impacts during yard operations. These are examples of an overly strict interpretation of the term "accident" defined in the rules. The definition is limited to "any collision, derailment, or explosion involving railroad trains, locomotives, and cars; or any other loss-causing event involving the operation of such railroad equipment that results in a fatality or the emergency evacuation of persons" (49 CFR 840.2(b)). If this definition is adhered to, the reporting of "trivial" accidents such as those mentioned would not be required. For clarification, it should also be noted that a passenger train is considered to be a train in revenue service.

Accordingly, Part 840 of Title 49, Chapter VIII of the Code of Federal Regulations, is amended as follows:

1. By revising the introductory text of § 840.3(a) and paragraphs (a) (2) and (3) to read as follows:

§ 840.3 Notification of railroad accidents.

(a) A railroad shall notify the Board in the manner prescribed by paragraph (c) of this section at the earliest practical time but not later than six hours after the occurrence of an accident which results in—

* * * * *

(2) Damages, based on a preliminary gross estimate, of $150,000 or more of the repair or current replacement cost to railroad and nonrailroad property; or

(3) Involvement of a passenger train.

* * * * *

(49 U.S.C. 1903(a)(1)(C), (a)(6))

Signed at Washington, D.C., on August 6, 1980.

Patricia A. Goldman,

Acting Chairman.

BILLING CODE 4910-58-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 18

Transfer for Scientific Research Purposes of Marine Mammal Parts Taken Under the Alaska Native Exemption Provision of the Marine Mammal Protection Act of 1972

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule.

SUMMARY: The current regulation governing the transfer of marine mammals and marine mammal parts taken by Alaska Natives for subsistence or handicraft purposes does not allow transfer to non-Natives for the purpose of scientific research. This amendment allows transfers for scientific research purposes to be made to a duly authorized representative of the Alaska Area Director of the U.S. Fish and Wildlife Service. Researchers now have a regulatory mechanism to obtain specimens which would otherwise be unavailable for scientific use.

EFFECTIVE DATE: August 14, 1980.

ADDRESSES: Please address correspondence to the Director, U.S. Fish and Wildlife Service, Federal Wildlife Permit Office, Washington, D.C. 20240. Information on this amendment is available for review during business hours of 7:45 a.m. to 4:15 p.m., Monday through Friday in Room 605, 1000 N. Glebe Road, Arlington, VA.

FOR FURTHER INFORMATION CONTACT: Mr. Richard M. Parsons, Chief, Federal Wildlife Permit Office, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1937).

SUPPLEMENTARY INFORMATION:

Background

Subject to certain exceptions, the Marine Mammal Protection Act of 1972, hereinafter referred to as the Act, imposes a moratorium on the taking of marine mammals (16 U.S.C. 1371). One of the exceptions to the moratorium is that the provisions do

* * * not apply with respect to the taking of any marine mammal by any Indian, Aleut, or Eskimo who dwells on the coast of the North Pacific Ocean or the Arctic Ocean if such taking (1) is for subsistence by Alaskan natives who reside in Alaska, or (2) is done for purposes of creating and selling authentic native articles of handicrafts and clothing:

Provided, That only authentic native articles of handicrafts and clothing may be sold in interstate commerce: *And provided further,* That any edible portion of marine mammals may be sold in native villages and towns in Alaska or for native consumption. For the purposes of this subsection, the term "authentic native articles of handicrafts and clothing" means items composed wholly or in some significant respect of natural materials, and which are produced, decorated, or fashioned in the exercise of traditional native handicrafts without the use of pantographs, multiple carvers, or other mass copying devices. Traditional native handicrafts include, but are not limited to weaving, carving, stitching, sewing, lacing, beading, drawing, and painting, and (3) in each case, is not accomplished in a wasteful manner.

The exemption and regulations implementing it contain a number of restrictions on the transfer of marine mammals and marine mammal parts taken under the exemption (16 U.S.C. 1371(b); 50 CFR 18.23(b)). These restrictions contain no exception for sale, donation or transfer of such specimens for scientific research purposes. Thus, valuable scientific specimens are currently being lost.

The Secretary of the Interior is authorized under section 112(a) of the Act (16 U.S.C. 1382(a)) to prescribe such regulations as are necessary and appropriate to carry out the purposes of the Act for those species for which he has responsibility. In enacting the Act, Congress found that "there is inadequate knowledge of the ecology and population dynamics of such marine mammals and of the factors which bear upon their ability to reproduce themselves successfully" (16 U.S.C. 1361(3)).

The proper management of marine mammals requires information on age structure of the population, nutrition, disease, reproduction and other factors. Much of this information is available by analysis of samples from dead animals. The Act's purpose of preventing unnecessary taking of marine mammals would be well-served if scientists were allowed access to specimens from animals which are already dead, animals which would not have to be killed for research purposes.

Effect of the Amendment

This amendment allows the transfer of marine mammal parts, taken for subsistence and handicraft purposes by Alaska Natives under Native exceptions of the Act, to the Alaska Area Director for purposes of scientific research. It allows scientists access to data from specimens which would otherwise be unavailable to them.

Transfer for scientific research purposes is allowed only to a duly authorized representative of the Alaska Area Director of the U.S. Fish and Wildlife Service. This allows for transfer of specimens to qualified scientists with a need for such specimens. The Alaska Area Director would review scientists' qualifications and provide written approval for legitimate scientific research. Transfer for personal use is not authorized by this amendment.

The Administrative Procedure Act and the Department's regulations governing rulemaking generally require a notice of proposed rulemaking and an opportunity for public comment on rules adopted by the Service (5 U.S.C. 553(b)). However, an exception to this requirement is provided if it is found for good cause that notice and an opportunity for comment are impracticable or contrary to the public interest (5 U.S.C. 553(b)(B)). Because valuable biological specimens from marine mammals taken by Alaska Natives for subsistence and handicraft purposes are being lost, the Service for good cause finds that notice and public procedure on this rule is impracticable and contrary to the public interest. This rule is effective on August 14, 1980, as provided in 5 U.S.C. 553(d)(1) and 43 CFR 14.5(b)(5), because it relieves a restriction.

This rule is issued under the authority of section 112 of the Marine Mammal Protection Act of 1972 (16 U.S.C. 1382) and was prepared by Bob Batky, Staff Biologist, Federal Wildlife Permit Office.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14. The Service has also determined that this final rule will not have a significant impact on the quality of the human environment and therefore does not require an environmental impact statement under section 102(2)(C) of the National Environmental Policy Act of 1969 (42 U.S.C. 4332) and 40 CFR 1508.13.

Accordingly, Part 18 of Title 50, Code of Federal Regulations, is hereby amended as follows:

§ 18.23 [Amended]

1. Paragraph (b)(1) of § 18.23 is amended by deleting the word "No" and inserting in lieu thereof the words, "Except for a transfer to a duly authorized representative of the Alaska Area Director of the U.S. Fish and Wildlife Service for scientific research purposes, no * * *"

2. Paragraph (b)(2) of § 18.23 is amended by deleting the word "No" and inserting in lieu thereof the words, "Except for a transfer to a duly authorized representative of the Alaska Area Director of the U.S. Fish and Wildlife Service for scientific research purposes, no * * *"

Dated: August 1, 1980.

Robert S. Cook,

Acting Director, Fish and Wildlife Service.

[FR Doc. 80-24595 Filed 8-13-80; 8:45 am]

BILLING CODE 4310-55-M

50 CFR Part 32

Opening of the Great Dismal Swamp National Wildlife Refuge, Virginia, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Great Dismal Swamp National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATE: November 1, 8, 15, 22, 29 and December 10, 11, 12, 1980.

FOR FURTHER INFORMATION CONTACT: Ralph M. Keel, Jr., Great Dismal Swamp National Wildlife Refuge, Box 349, Suffolk, Virginia 23434, Telephone No. 804–539–7479.

SUPPLEMENTARY INFORMATION: The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established: and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which Great Dismal Swamp National Wildlife Refuge was established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer is permitted only on designated areas shown on maps available at refuge headquarters, and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158. Hunting shall be in accordance with all state regulations subject to the following special conditions:

(1) Species to be taken: Whitetail deer.

(2) Bag Limits: One per day, either sex.

(3) Season: November 1, 8, 15, 22, 29 and December 10, 11, 12).

(4) Hunting equipment: Shotguns only, no smaller bore than 20 gauge, loaded with buckshot and/or rifled slugs.

(5) Possession of other weapons or ammunition prohibited.

(6) Dogs are prohibited.

(7) Hunting hours—same as state hunting hours. All hunters must be clear of hunting areas by two hours after the close of local hunting hours.

(8) Possession of loaded firearms in or on a vehicle or shooting from a vehicle is prohibited.

(9) Possession of loaded firearms in or on a refuge road or shooting from or on a road is prohibited.

(10) Camping and fires on refuge are prohibited.

(11) All hunters under 18 years of age must be accompanied by an adult.

(12) All wounded deer will be reported to refuge personnel immediately, so that data on wounded deer can be gathered. All deer taken on the area must be brought to the check station to be checked out. Jawbones may be removed by refuge personnel.

(13) Shooting at wildlife other than deer is prohibited.

(14) All hunters are required to wear a minimum of 400 total square inches of a safety fluorescense color material on the head, chest, and back.

(15) Before any hunter is issued a permit, he/she must meet the following Hunter Qualification Standards:

(a) Hunters-Applicants must have a written certification from a range officer (civilian or military), police officer, or refuge personnel that they have performed the following qualifications test or tests:

(1) Shotgun with rifle slugs: Place three consecutive shots in a 12–inch bullseye from 30 yards or better from

an offhand position. This is a lifetime qualification subject to verification.

(2) Shotguns with buckshot: Place five shot pellets in a 20-inch bullseye target from a range of 30 yards.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR, Part 14.

August 7, 1980.

Wm. C. Ashe,

Acting Regional Director, Fish and Wildlife Service.

FR Doc. 80-24541 Filed 8-13-80; 8:45 am]

BILLING CODE 4310-55-M

50 CFR Part 32

Opening of the Bombay Hook National Wildlife Refuge, Delaware, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulation.

SUMMARY: The Director has determined that the opening to hunting of Bombay Hook National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1980 through February 28, 1981.

FOR FURTHER INFORMATION CONTACT: Don Perkuchin, Bombay Hook National Wildlife Refuge, R.D. #1, Box 147, Smyrna, Delaware 19977, Telephone No. 302-653-9345.

SUPPLEMENTARY INFORMATION: The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which Bombay Hook National Wildlife Refuge was established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of ducks, geese, and coots is permitted on areas designated by signs as open to hunting including the South Waterfowl Hunting Area, the West Waterfowl Hunting Area, the Young Waterfowlers Area, and the South Upland Hunting Area.

Hunting shall be in accordance with all State and Federal regulations covering the hunting of ducks, geese, and coots subject to the following special conditions:

1. Hunting is permitted on the West Waterfowl Hunting Area from one-half hour before sunrise to 12 noon local standard time, Tuesdays, Thursdays, and Saturdays (except November 8) during the goose season.

2. Hunting in the South and West Waterfowl Areas and Young Waterfowlers Area shall be only from existing numbered blinds. The possession of an uncased gun or shooting while outside of a blind is prohibited on these areas except when in active pursuit of crippled waterfowl. In such cases the hunter may fire at only the crippled bird.

3. Hunting is permitted in the South Waterfowl Hunting Area only on Monday, Wednesday, Friday, and Saturday, during the State duck season.

4. The necessary permit to enter the South Waterfowl Hunting Area will be issued each hunting day by a ticket-lottery system at one and one-half hours before legal shooting time at the checking station at Port Mahon. Hunters arriving after the lottery will be issued permits on a first-come, first-served basis. Permits will be surrendered at the checking station within one-half hour after sunset. The necessary permit to enter the West Waterfowl Hunting Area may be obtained by applying to the refuge manager for advance reservation. The permits for advance reservations will be cancelled if the holder is not present one hour prior to the start of legal shooting time on the date of his reservation. These forfeited permits and permits not reserved by advance reservation will be awarded to other hunters by lottery on the morning of the hunt. All hunters will check out through the headquarters checking station prior to leaving the refuge.

5. Each hunting permittee using the West Waterfowl Hunting Area will pay a recreation fee of $10.00 prior to entrance into the hunting area. A recreation fee of $2.00 per hunter will be charged on the South Waterfowl Hunting Area prior to entrance into the hunting area. Non-ambulatory individuals using the Young Waterfowl Hunting Area will pay a recreation fee of $5.00 per blind prior to entrance into the hunting area.

6. Not more than four persons may occupy a blind at any one time on the West Waterfowl Hunting Area nor more than three on the South Waterfowl Hunting Area.

7. The Young Waterfowlers Area will be open from one-half hour before sunrise to 12:00 noon local standard time on Saturdays and holidays to young hunters who present evidence of having completed the prescribed training program. Two youths, accompanied by an instructor who may not possess ammunition or possess or discharge a firearm, may use one blind. Two blinds within the Young Waterfowlers Area will also be utilized on Tuesdays by non-ambulatory individuals. These individuals will be selected in cooperation with the Delaware Division of Vocational Rehabilitation. Two hunters accompanied by an assistant who may not possess ammunition or possess or discharge a firearm, may use each blind.

8. Waterfowl hunters on all four areas are required to use steel shotshells and may not have in their possession lead shotshells. No hunter may have in their possession or use in one day more than 12 shells on the West Waterfowl Hunting Area or 15 shells on the Young Waterfowlers Hunting Area.

9. Hunters, when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment, and ammunition.

Public hunting of rails and gallinules, mourning doves, woodcock, crows, and common snipe on the 169 acre South Upland Hunting Area is permitted during the regular state seasons.

Hunting shall be in accordance with all Federal and State regulations covering the hunting of rails and gallinules, mourning doves, woodcock and common snipe.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of upland game on the 169 acre South Upland Hunting Area is permitted during the regular state season in accordance with all Federal and State regulations covering upland game hunting.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer is permitted only on designated areas. Hunting shall be in accordance with all state regulations subject to the following special conditions:

1. Season: (a) Archery—Hunting by bow and arrow on the regular Deer Hunting Area is permitted on the first four Saturdays of the season from September 6 through October 4. Hunting by bow and arrow on the South Upland Hunting Area is permitted during the entire season.

(b) Shotgun—Hunting with shotguns on the regular Deer Hunting Area is permitted only on November 7, 8, 10 and 12, 1980. Hunting with shotguns on the South Upland Hunting Area is permitted during the entire state season. Hunting with shotguns by non-ambulatory individuals on the Special Deer Hunting Area is permitted on November 10 and 14, 1980.

(c) Primitive Firearms—Hunting with primitive firearms on the Regular Deer Hunting Area is permitted on October 10 and 11, 1980. Hunting with primitive firearms on the South Upland Hunting Area is permitted during the entire state season.

2. Hunter Qualification Requirements: All deer hunters are required to show proof of completion of hunter qualification test and possess a valid hunter qualification card. Qualification tests are required every three years to maintain a valid card. Tests must be completed and passed with the weapon which the individual uses during the hunt. Qualification requirements for each weapon are as follows:

(a) Archery—The hunter must place three out of five arrows in the 9x14 inch chest area of standard size deer target at 25 yards.

(b) Shotgun—The hunter must place three consecutive slugs in a 12-inch circle at 30 yards from the standing position.

(c) Primitive Firearms—The hunter must place three consecutive rounds in a 12-inch circle at 50 yards, firing from the offhand position.

3. Permit Requirements: All deer hunters, regardless of type of weapon, are required to obtain a daily permit prior to hunting on the Regular Deer Hunting Area. Daily permits are not required on the South Upland Area. Procedures for obtaining daily permits are as follows:

(a) Archery—Permits are issued at the Dutch Neck Gate Refuge Entrance on a first-come, first-served basis one hour before shooting time on the days of the hunt. The maximum number of hunters admitted to the Regular Deer Hunting Area at any one time will be 80.

(b) Shotgun—Permits are obtained by applying to the refuge manager in writing for an advance reservation. Successful applicants are selected by public lottery. Individuals who have been selected for advance reservation must appear at refuge headquarters prior to one hour before legal shooting time on the day of the hunt to be issued a permit. Failure to appear will result in forfeiture of the reservation. Forfeited permits and permits not reserved by advance reservations will be awarded to standby hunters by lottery one hour before the start of legal shooting time. The maximum number of hunters admitted to the Regular Deer Hunting Area at any one time will be 50.

Shotgun hunters utilizing the Special Deer Hunting Area will be restricted to non-ambulatory individuals as selected in cooperation with the Delaware Division of Vocational Rehabilitation. The maximum number of hunters admitted to the Special Deer Hunting Area at one time will be ten.

(c) Primitive weapon—Permits are issued at the Dutch Neck Gate Refuge Entrance on a first-come, first-served basis one hour before shooting time on the days of the hunt. The maximum number of hunters admitted to the Deer Hunting Area at any one time will be 50.

4. Only blinds, platforms or scaffolds that are erected and removed each day of the hunt may be used. Written permission from the refuge manager is required for the construction or use of any such artificial structure.

5. Target practice or the test firing of any weapon is not permitted.

All the refuge hunting areas are shown on maps available at refuge headquarters and from the Regional Director, U.S. Fish and Wildlife Service, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Administrative needs require that the Bombay Hook Refuge hunting seasons be held concurrent with the Delaware State hunting season dates. It is therefore found impracticable to issue regulations that would be effective 30 days after publication in accordance with Department of the Interior general policy.

Wm. C. Ashe,

Deputy Regional Director, Fish and Wildlife Service.

August 7, 1980.

BILLING CODE 4310-55-M

50 CFR Part 32

Opening of the Prime Hook National Wildlife Refuge, Delaware, to Hunting

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to hunting of Prime Hook National Wildlife Refuge is compatible with the objectives for which the area was established, will utilize a renewable natural resource, and will provide additional recreational opportunity to the public.

DATES: September 1, 1980 through February 28, 1981.

FOR FURTHER INFORMATION CONTACT: George O'Shea, Assistant Refuge Manager, Prime Hook National Wildlife Refuge, R.D. #1, Box 195, Milton, Delaware 19968, Telephone No. 302-684-8419, under the administration of Bombay Hook National Wildlife Refuge.

SUPPLEMENTARY INFORMATION: The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to administer such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (1) that any recreational use permitted will not interfere with the primary purpose for which the area was established; and (2) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which Prime Hook National Wildlife Refuge was established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

2. Field possession of waterfowl or

Tom A. Saunders, Area Manager, U.S.

required for the construction or use of

of the hunt area(s) are available at

1. Blinds—only temporary blinds

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

Public hunting of ducks, geese, and coots, is permitted on the 1,180 acre Waterfowl Hunting Area.

Hunting shall be in accordance with all Federal and State regulations covering the hunting of migratory game birds subject to the following special conditions:

1. Permits will be issued by a ticket-lottery system at two hours before legal shooting time. Hunters arriving after the lottery will be issued permits on a first-come, first-served basis until 3:00 p.m. Permits will be surrendered at the checking station within one hour after sunset. When leaving a blind unoccupied for any reason the permit must be turned in and a new permit must be completed at the check station before hunting again.

2. Hunting shall be only from blinds at locations designated by refuge personnel. The possession of an uncased gun or shooting while outside of a blind is prohibited except when in active pursuit of crippled waterfowl. In such cases the hunter may fire at only the crippled waterfowl. Three hunters per blind permitted.

3. The area is open each Monday, Wednesday, Friday, and Saturday, throughout the duck hunting season.

4. Access to the waterfowl hunting area will be at designated boat access points.

5. Steel shotshells are required for all waterfowl hunters. No waterfowl hunters shall have in their possession lead shotshells.

6. Hunters, when requested by Federal or State enforcement officers, must display for inspection all game, hunting equipment and ammunition.

Public hunting of rails, gallinules, mourning doves, common snipe, woodcock, and crows is permitted only on the 2,185 acre North Hunting Area. Hunting shall be in accordance with all Federal and State regulations covering the hunting of rails, gallinules, mourning doves, woodcock, common snipe and crows.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

Public hunting of upland game is permitted only on the 2,185 acre North Hunting Area. Hunting shall be in accordance with all State and Federal regulations covering the hunting of upland game subject to the following conditions:

1. Hunting hours will be from one-half hour before sunrise to one-half hour after sunset.

2. Field possession of waterfowl or coots is prohibited on the North Hunting Area.

3. Practice and target shooting is prohibited.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Public hunting of deer is permitted only on the 2,185 acre North Hunting Area. Hunting shall be in accordance with all State regulations covering the hunting of deer subject to the following conditions:

Archery Hunt

1. Archery hunters must show proof of completion of an archery qualification test. This test will consist of placing three out of five arrows in the 9 × 14 inch chest area of a standard size deer target at twenty-five yards. Hunters qualified in 1977 must requalify. The qualification is valid for three years only.

2. Seasonal permits are required for the North Hunting Area and will be issued at the Prime Hook Refuge office Mondays through Fridays between 7:30 a.m. and 4:00 p.m. Permits may also be requested by mail. Those permits must be returned to the refuge office by the end of the deer hunting seasons.

3. Only blinds, platforms or scaffolds that are erected and removed each day for the hunt may be used. Written permission from the refuge manager is required for the construction or use of any such artificial structures.

Firearms Hunt

1. Primitive firearm and shotgun hunters must possess a valid firearms qualification card. The test for muzzleloaders will consist of placing three consecutive rounds in a 12-inch bullseye at 50 yards firing from the standing position. The test for shotgun hunters will consist of placing three consecutive slugs in a 12-inch target at a distance of 30 yards from the standing position.

2. Permits are required for all deer hunting. These permits are available free of charge and will be issued by mail to successful applicants selected by a pre-season drawing.

3. The number of shotgun hunters admitted to the open area will be restricted to 25 preselected hunters per day.

4. Permits must be returned to the refuge office within five days of the closure of the deer hunting season.

5. Only blinds, platforms or scaffolds that are erected and removed each day of the hunt may be used. Written permission from the refuge manager is required for the construction or use of any such artificial structure.

The Waterfowl Hunting Area and the North Hunting Area are shown on maps available at refuge headquarters and from the Regional Director, One Gateway Center, Suite 700, Newton Corner, Massachusetts 02158.

The provisions of these special regulations supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

Administrative needs require that Prime Hook Refuge hunting seasons be held concurrent with the Delaware State hunting seasons. It is therefore found impracticable to issue regulations that would be effective 30 days after publication in accordance with Department of the Interior general policy.

Wm. C. Ashe,

Deputy Regional Director, Fish and Wildlife Service.

50 CFR Part 32

Hunting; National Wildlife Refuges in Iowa, Kansas, Missouri and portions of Nebraska

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Special regulations.

SUMMARY: The Director has determined that the opening to sport hunting of certain National Wildlife Refuges is compatible with the objectives for which the areas were established, will utilize a renewable natural resource, and will provide additional recreational opportunities to the public. These special regulations describe the condition under which sport hunting will be permitted on portions of certain National Wildlife Refuges in Iowa, Kansas, Missouri and portions of Nebraska.

DATES: Period covered—September 1, 1980 to January 31, 1981. See State regulations for waterfowl seasons.

FOR FURTHER INFORMATION CONTACT: The Area Manager or appropriate refuge manager at the address or telephone numbered listed below:

Tom A. Saunders, Area Manager, U.S. Fish and Wildlife Service, 2701 Rockcreek Parkway, Suite 106, North Kansas City, Missouri 64116, Telephone: 816/374–6166

George Gage, Refuge Manager, DeSota National Wildlife Refuge, RR #1, Box 114, Missouri Valley, Iowa 51555, Telephone: 712/642–4121

Michael J. Long, Refuge Manager, Flint Hills National Wildlife Refuge, P.O. Box 128, Hartford, Kansas 66854, Telephone: 316/392–5553

Keith Hansen, Refuge Manager, Kirwin National Wildlife Refuge, Kirwin, Kansas 67644, Telephone: 913/543–6673

Gerry Clawson, Refuge Manager, Mingo National Wildlife Refuge, RR #1, Box 8, Puxico, Missouri 63960, Telephone: 314/222–3589

Charles Darling, Refuge Manager, Quivira National Wildlife Refuge, P.O. Box "G", Stafford, Kansas 67578, Telephone: 316/486–2393

Al Manke, Refuge Manager, Swan Lake National Wildlife Refuge, P.O. Box 68, Sumner, Missouri 64681, Telephone: 816/856–3323

SUPPLEMENTARY INFORMATION: Donald G. Young is the primary author of these special regulations.

General Conditions

1. Hunting is permitted on National Wildlife Refuges indicated below in accordance with 50 CFR Part 32, all applicable State regulations:

The Refuge Recreation Act of 1962 (16 U.S.C. 460k) authorizes the Secretary of the Interior to adminster such areas for public recreation as an appropriate incidental or secondary use only to the extent that it is practicable and not inconsistent with the primary objectives for which the area was established. In addition, the Refuge Recreation Act requires (a) that any recreational use permitted will not interfere with the primary purpose of which the area was established; and (b) that funds are available for the development, operation, and maintenance of the permitted forms of recreation.

The recreational use authorized by these regulations will not interfere with the primary purposes for which these National Wildlife Refuges were established. This determination is based upon consideration of, among other things, the Service's Final Environmental Statement on the Operation of the National Wildlife Refuge System published in November 1976. Funds are available for the administration of the recreational activities permitted by these regulations.

2. A list of special conditions applying to the individual refuge hunts and a map of the hunt area(s) are available at refuge headquarters. Portions of refuges which are closed to hunting are designated by signs and/or delineated on maps.

3. Access points on certain refuges are limited to designated roads or other specified areas. Vehicles use on all refuge areas is restricted to designated roads and lanes.

4. Only steel shot ammunition may be used during refuge migratory waterfowl hunts. Possession of lead or other toxic shot in any guage is prohibited during such hunts.

§ 32.12 Special regulations; migratory game bird hunting for individual wildlife refuge areas.

Missouri

Mingo National Wildlife Refuge

Waterfowl hunting is permitted only on areas designated by signs as being open to hunting, subject to the following conditions:

1. Dogs may be used to retrieve downed waterfowl within the hunting area.

2. Hunting in or entering any cultivated field, pasture or dike area is prohibited.

3. Waterfowl hunting is restricted to steel shot only. Possession of lead shot in the hunting area is prohibited during the waterfowl hunting season.

4. The use of outboard or electric motors is prohibited.

Swan Lake National Wildlife Refuge

Public hunting for geese only is permitted only on designated areas comprising 2,500 acres within Swan Lake National Wildlife Refuge, Missouri. Hunting shall be in accordance with all applicable State and Federal regulations subject to the following conditions:

1. Each hunter must obtain a State permit prior to hunting, hunt only from an impartially assigned blind, and fire no than ten (10) shells.

2. Daily bag as determined by applicable State and Federal laws.

3. Use or possession of shells loaded with any material other than steel shot is prohibited.

4. Authorized officials may retrieve legally shot geese falling inside the refuge boundary for the hunters who shot them.

Kansas

Quivira National Wildlife Refuge

Public hunting of ducks, geese, coots, mourning doves, snipe, rails and woodcock is permitted only on the areas designated by signs as being open to hunting subject to the following conditions:

1. Blinds—only temporary blinds constructed above ground of natural vegetation are permitted.

2. Dogs—not to exceed two per hunter may be used only for retrieving.

3. Waterfowl hunting is restricted to steel shot only.

Flint Hills National Wildlife Refuge

Public hunting of mourning doves, rails, woodcock, Wilson's snipe, ducks, geese, coots, and mergansers is permitted, but only on the area designated by signs as open to hunting.

Refuge hunting shall be subject to the following special conditions:

1. Vehicle access shall be restricted to designated parking areas and to existing roads as shown on refuge leaflets.

2. Blind construction by the public is permitted but limited to temporary above ground construction. Constructed blinds become the property of the Government. Blind construction does not constitute a reservation of hunting space. Daily occupancy of blinds erected on refuge hunting units will be determined on a first-come-first-serve basis.

3. The transportation or possession of firearms is not permitted on the Neosho River from the northern refuge boundary to and including the point where the river empties into John Redmond Reservoir, and extending to the southern refuge boundary, as marked by buoys.

4. Waterfowl hunting is restricted to steel shot only.

Kirwin National Wildlife Refuge

Public hunting of mourning doves, ducks, geese, and coots is permitted only on the areas designated by signs as being open to hunting.

Refuge hunting shall be subject to the following special conditions:

1. Blinds—Temporary blinds constructed above ground from natural vegetation are permitted. Digging of holes or pits to serve as blinds is prohibited.

2. Waterfowl hunting is restricted to steel shot only.

Iowa

Desoto National Wildlife Refuge

1. Migratory game bird hunting is permitted only on an area comprising 174 acres located adjacent to U.S. Highway 30 on the north side of the refuge.

2. Hunting season will be November 1, 1980 and continue through the closing date of the snow goose season to be set by the Iowa Conservation Commission, both dates are inclusive.

3. Shooting hours will be consistent with State regulations regarding opening

hours and shall continue until 12 noon daily.

4. Only waterfowl species (ducks, geese and coots) may be taken.

5. All hunting will be by refuge permit only. Advance reservations for a specific date will be accepted by mail, or in person at refuge headquarters between the hours of 8:00 a.m.–5:00 p.m., Monday through Friday from September 1 through September 28, 1980. A drawing to determine successful applicants will be held on Monday, September 29, 1980. Should openings remain following the drawing, reservations will be accepted on a first-come, first-serve basis on and after October 6, 1980. Reservations will not be accepted by telephone. Individuals will be allowed only one reservation at any one time. When this reservation is used, the individual may apply for an unfilled date. Applicants for reservation must be at least 16 years of age or older. A $3.00 fee must accompany each request for a reservation and this must be in the form of a check or money order made payable to "U.S. Fish and Wildlife Service." Each reservation holder will be entitled to bring two additional hunters in order to utilize the 3-person blinds. Each person will be charged a $2.00 blind-use fee when registering to hunt.

6. Reservations are non-transferable and fees will not be refunded. No provisions shall be made for "standby" hunters.

7. All hunters must hunt from refuge-constructed 3-person blinds only.

8. Blinds will be assigned on a drawing basis each day of the hunt.

9. All hunting will be from assigned blinds only with the exception that wounded birds may be pursued and shot within the shooting zone line (within 40 yards of blind, as posted). Wounded birds may be pursued beyond this point up to the retrieval zone line within 100 yards of blind, as posted), but guns must remain within the shooting zone.

10. Hunters will be required to check in and out at the refuge check station on each hunting day.

11. Permit holders must park in assigned parking lots within the hunting area. Non-refuge hunters may not use the refuge parking areas as access to private lands.

12. Hunters are allowed the use of decoys (personal or rented at check station) and retrieving dogs (one per hunter). Goose decoys, up to 3 dozen may be rented at the refuge check station at a charge of $1.00 per dozen. Hunters will be responsible for rented decoys and will be charged for any decoys lost or damaged.

13. Only shotguns capable of holding three shells or less will be permitted.

14. Only steel shot loads will be allowed in the hunting area.

15. A maximum of 25 shells per hunter will be allowed per day.

16. Camping is not allowed in the refuge.

17. All litter, including empty shotgun shells is to be picked up before leaving the blind site.

Nebraska

DeSoto National Wildlife Refuge

1. Migratory game bird hunting is permitted only on an area comprising 326 acres located west of the Missouri River in Washington County, Nebraska.

2. Hunting season will be November 1, 1980 and continue through December 9, 1980, both dates inclusive.

3. Hunting will be permitted only on Sunday, Tuesday, Thursday and Saturday during the open season.

4. Shooting hours will be consistent with State regulations regarding opening hours and shall continue until 12 noon daily.

5. Only waterfowl species (ducks, geese and coots) may be taken.

6. All hunting will be by refuge permit only. Advance reservations for a specific date will be accepted, by mail or in person, at refuge headquarters between the hours of 8:00 a.m.–5:00 p.m., Monday through Friday from September 1 through September 26, 1980. A drawing to determine successful applicants will be held on Monday, September 29, 1980. Should openings remain following the drawing, reservations will be accepted on a first-come, first-serve basis on and after October 6, 1980. Reservations will not be accepted by telephone. Individuals will be allowed only one reservation at any one time. When this reservation is used, the individual may apply for an unfilled date. Applicants for reservations must be at least 16 years of age or older. A $3.00 fee must accompany each request for a reservation and this must be in the form of a check or money order made payable to "U.S. Fish and Wildlife Service." Each reservation holder will be entitled to bring two additional hunters in order to utilize the 3-person blinds. Each person will be charged a $2.00 blind-use fee when registering to hunt.

7. Reservations are non-transferable and fees will not be refunded. No provision shall be made for "standby" hunters.

8. All hunters must hunt from refuge-constructed 3-person blinds only.

9. Blinds will be assigned on a drawing basis each day of the hunt.

10. All hunting will be from assigned blinds only with the exception that wounded birds may be pursued and shot within the shooting zone (within 40 yards of blind as posted). Wounded birds may be pursued beyond this point up to the retrieval zone line (within 100 yards of blind as posted), but guns must remain within the shooting zone.

11. Hunters will be required to check in and out at the refuge check station on each hunting day.

12. Permit holders must park in assigned parking lots within the hunting area. Non-refuge hunters may not use the refuge parking areas as access to private lands.

13. Hunters are allowed the use of decoys (personal or rented at check station) and retrieving dogs (one per hunter). Goose decoys up to 3 dozen may be rented at the refuge check station at a charge of $1.00 per dozen. Hunters will be responsible for rented decoys and will be charged for any decoys lost or damaged.

14. Only shotguns capable of holding three shells or less will be permitted.

15. Only steel shot loads will be allowed in the hunting area.

16. A maximum of 25 shells per hunter will be allowed per day.

17. Camping is not allowed on the refuge.

18. All litter, including empty shotgun shells, is to be picked up before leaving the blind site.

§ 32.22 Special regulation; upland game; for individual wildlife refuge areas.

Kansas

Quivira National Wildlife Refuge

Hunting of ring-necked pheasants, bobwhite quail, squirrel and rabbits is permitted but only on the area designated by signs as open to hunting subject to the following conditions:

1. The use of rifles is prohibited for taking squirrel and rabbits.

2. The hunting of any species after sunset is prohibited.

3. The hunting of all upland game will close at the end of the ring-necked pheasant and/or bobwhite quail seasons.

4. Dogs—not more than two per hunter.

Flint Hills National Wildlife Refuge

The public hunting of small game animals, upland game birds, fur bearing animals and non-game animals is permitted, but only on the area designated by signs as open hunting subject to the following special conditions:

1. The use of rifles or pistols are prohibited on the refuge.

2. Vehicles access shall be restricted to designated parking areas and existing roads, as shown on refuge leaflets.

3. Dogs may be used only for hunting and retrieving small game animals and game birds. Dogs may not be used for hunting fur bearing animals and non-game animals, either by sight or trailing by scent.

Kirwin National Wildlife Refuge

The public hunting of pheasant, quail, rabbits and squirrels is permitted but only on the area designated by signs as open to hunting. The hunting of all small game will close at the end of the ring-necked pheasant and/or bobwhite quail seasons.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

Missouri

Mingo National Wildlife Refuge

Hunting of deer and turkey is permitted on areas designated by signs or maps as being open to hunting subject to the following conditions:

1. Hunting with bows and arrows only is permitted.

2. Hunters must register when entering the refuge and record kill when leaving.

3. Hunting from permanent tree stands (one that is connected to the tree by nails, screws, etc.) is prohibited.

4. All tree stands must be identified with the name and address of the hunter using it.

5. Hunters are not permitted to enter those areas shown as being closed on the refuge hunting map.

6. Hunters are permitted on the refuge from one hour before sunrise until one hour after sunset.

Kansas

Kirwin National Wildlife Refuge

Public hunting of deer with bow and arrow is permitted but only on areas designated by signs as open to hunting. Portable blinds and ladders are permitted. All portable blinds must be removed by the close of the season. No permanent tree blinds or stands may be built.

Flint Hills National Wildlife Refuge

Public hunting of deer, with bow and arrow is permitted but only on the area designated by signs as open to hunting subject to the following special conditions:

1. The area is open to big game hunting for white-tailed deer only.

2. Any use of rifles or pistols are prohibited on the refuge.

Iowa

DeSoto National Wildlife Refuge

1. Archery hunting of deer on the Iowa side is permitted only on an area comprising 600 acres located on the southeast portion of the refuge.

2. Hunting will be permitted October 11, 1980 through December 5, 1980, all dates inclusive.

3. Portable blinds and ladders are permitted. No permanent tree blinds or stands may be built, or may any nails, wire, or other foreign material be used in any manner. All portable blinds must be removed by the close of the season. No firearms are permitted on the areas.

4. Vehicles shall be confined only to designated parking lots. Overnight camping is not allowed on the area.

5. Only those persons possessing a valid state permit will be allowed to enter the area.

Nebraska

DeSoto National Wildlife Refuge

1. Archery hunting of deer on the Nebraska side is permitted only on an area comprising 1,000 acres located on the west side of the Missouri River.

2. Hunting will be permitted September 20, 1980 through October 31, 1980 and December 10, 1980 through December 31, 1980, all dates inclusive.

3. Portable blinds and ladders are permitted. No permanent tree blinds or stands may be built, or may any nails, wire, or other foreign material be used in any manner. All portable blinds must be removed by the close of the season. No firearms are permitted on the areas.

4. Vehicles shall be confined only to designated parking lots. Overnight camping is not allowed on the area.

5. Only those persons possessing a valid State permit will be allowed to enter the area.

Special Regulations

1. Muzzleloader hunting of deer is permitted on an area comprising approximately 3,350 acres located in the central portion of the refuge.

2. Hunting season will be December 13, 1980 through December 17, 1980, both dates are inclusive.

3. A total of 100 special permits will be issued for the hunt by the Nebraska Game and Parks Commission. Only those persons possessing a valid State permit will be allowed to enter the area. Muzzleloader rifles are the only weapons allowed and deer of either sex are the only legal wildlife species that may be taken during the hunt. Discharging firearms from or across all roads open to vehicle traffic including adjacent rights-of-way is prohibited. Camping and pets are not permitted on the refuge.

4. Entry to the open area will be permitted one hour before shooting hours. Shooting hours will be one-half hour before sunrise to one-half hour before sunset. All permit holders and vehicles must be out of the designated hunting area no later than one hour after sunset.

5. Vehicles shall be confined to designated roads, parking areas, and field access approaches. Parking is not permitted on asphalt roads.

6. Parking is permitted along graveled roads.

7. Portable blinds and ladders are permitted. No permanent blinds or stands may be built, or may any nails, wire, or other foreign materials be used.

Note.—The Department of the Interior has determined that this document is not a significant rule and does not require a regulatory analysis under Executive Order 12044 and 43 CFR Part 14.

The provisions of these special regulations which generally govern hunting on wildlife areas and which are set forth in Title 50, Code of Federal Regulations, Part 32. The public is invited to offer suggestions and comments at any time.

Dated: August 5, 1980.

Donald G. Young,

Assistant Area Manager, Refuges and Wildlife.

BILLING CODE 4310-55-M

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

7 CFR Part 908

[Valencia Orange Reg. 659]

Valencia Oranges Grown in Arizona and Designated Part of California; Limitation of Handling

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Final rule.

SUMMARY: This regulation establishes the quantity of fresh California-Arizona Valencia oranges that may be shipped to market during the period August 15–August 21, 1980. Such action is needed to provide for orderly marketing of fresh Valencia oranges for this period due to the marketing situation confronting the orange industry.

EFFECTIVE DATE: August 15, 1980.

FOR FURTHER INFORMATION CONTACT: Malvin E. McGaha, 202–447–5975.

SUPPLEMENTARY INFORMATION: *Findings.* This regulation is issued under the marketing agreement, as amended, and Order No. 908, as amended (7 CFR Part 908), regulating the handling of Valencia oranges grown in Arizona and

designated part of California. The agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendations and information submitted by the Valencia Orange Administrative Committee and upon other available information. It is hereby found that the action will tend to effectuate the declared policy of the act.

This action is consistent with the marketing policy for 1979–80 which was designated significant under the procedures of Executive Order 12044. The marketing policy was recommended by the committee following discussion at a public meeting on January 22, 1980. A final impact analysis on the marketing policy is available from Malvin E. McGaha, Chief, Fruit Branch, F&V, AMS, USDA, Washington, D.C. 20250, telephone 202–447–5975.

The committee met again publicly on August 12, 1980 at Los Angeles, California, to consider the current and prospective conditions of supply and demand and recommended a quantity of Valencia oranges deemed advisable to be handled during the specific week. The committee reports the demand for Valencia oranges has improved.

It is further found that there is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044, and that it is impracticable and contrary to the public interest to give preliminary notice, engage in public rulemaking, and postpone the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553). It is necessary to effectuate the declared purposes of the act to make these regulatory provisions effective as specified, and handlers have been apprised of such provisions and the effective time.

Section 908.959 is added as follows:

§ 908.959 Valencia Orange Regulation 659.

Order. (a) The quantities of Valencia oranges grown in Arizona and California which may be handled during the period August 15, 1980 through August 21, 1980, are established as follows:

(1) District 1: 353,000 cartons;
(2) District 2: 397,000 cartons;
(3) District 3: Open Movement.

(b) As used in this section, "handled," "District 1," "District 2," "District 3," and "carton" mean the same as defined in the marketing order.

(Secs. 1–19, 48 Stat. 31, as amended; (7 U.S.C. 601–674))

Dated: August 13, 1980.

Charles R. Brader

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 993

Dried Prunes Produced in California; Salable and Reserve Percentages

AGENCY: Agricultural Marketing Service.

ACTION: Final rule.

SUMMARY: This regulation establishes salable and reserve percentages applicable to prunes acquired by handlers during the 1980–81 crop year. This action is necessary to provide for orderly marketing under the marketing agreement and order in the interest of producers and consumers.

EFFECTIVE DATE: For the 1980–81 crop year beginning August 1, 1980.

FOR FURTHER INFORMATION CONTACT: J. S. Miller, Chief, Specialty Crops Branch, Fruit and Vegetable Division, USDA, Washington, D.C. 20250, (202) 447–5053.

SUPPLEMENTARY INFORMATION: This final action has been reviewed under USDA procedures established in Secretary's Memorandum 1955 to implement Executive Order 12044, and has been classified as "not significant". This regulation is issued under marketing order No. 993, which regulates the handling of dried prunes produced in California. The order is effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674). The action is based upon the recommendation and information submitted by the Prune Administrative Committee, and other information. The Committee is the agency established under the order. It is hereby found that establishing the salable percentage at 100 percent and the reserve percentage at 0 percent, as hereinafter set forth, for the 1980–81 crop year will tend to effectuate the declared policy of the act.

The establishment of the salable and reserve percentages imposes no restrictions on marketing during the 1980–81 crop year.

The marketing policy for the 1980–81 crop year adopted by the Prune Administrative Committee at its meeting of June 24, 1980, was based on the production estimate released by the California Crop and Livestock Reporting Service on June 1, 1980, and other estimates developed by the Prune Administrative Committee, including demand, and carryover requirements. Total 1980 production of California dried prunes was estimated at 160,000 tons natural condition weight. The Committee gave further consideration to its marketing policy at a meeting held July 29, 1980. The recommended salable and reserve percentages are based upon the following estimates:

	Natural condition tons
Supply	
1. Estimated production	160,000
2. Carryover July 31, 1980	38,162
3. Total supply available	198,162
Demand	
4. Estimated domestic trade demand	100,000
5. Estimated export trade demand	55,000
6. Desirable carryout July 31, 1981	30,000
7. Total estimated trade requirements	185,000
Reserve	
8. Apparent reserve	13,162

This action was recommended at a public meeting at which all present could state their views. There is insufficient time between the date when information became available upon which this regulation is based and when the action must be taken to warrant a 60-day comment period as recommended in E.O. 12044. It is further found that it is impractical and contrary to the public interest to give preliminary notice, engage in public rulemaking, and that good cause exists for not postponing the effective date until 30 days after publication in the **Federal Register** (5 U.S.C. 553), in that: (1) Handlers will begin receiving prunes soon and therefore must know what regulation will be effective for the 1980–81 crop year, (2) no useful purpose would be served by delaying the effective date of this action, (3) the Committee held an open meeting on June 24, and July 29, 1980, after giving notice thereof and interested persons were given the opportunity to submit

information and views at that meeting; and (4) this regulation impose no restrictions on the handling of prunes.

Therefore, a new § 993.216 is added to Subpart—Salable and Reserve Percentages—which reads as follows:

§ 993.216 Salable and reserve percentages for prunes for the 1980–81 crop year.

The salable and reserve percentages for the 1980–81 crop year shall be 100 percent and 0 percent, respectively.

(Secs. 1–19, 48 Stat. 31 as amended (7 U.S.C. 601–674))

Dated: August 11, 1980.

Charles R. Brader,

Director, Fruit and Vegetable Division, Agricultural Marketing Service.

7 CFR Part 1001

[Docket No. AO–14–A58]

Milk in the New England Marketing Area; Hearing on Proposed Amendments to Tentative Marketing Agreement and Order

AGENCY: Agricultural Marketing Service, USDA.

ACTION: Public hearing on proposed rulemaking.

SUMMARY: The hearing is being held to consider changs in the order that have been proposed by milk plant operators and producer groups. The key proposals would adjust the prices for milk throughout the production area. Proponents contend that the requested order changes are needed to more nearly reflect the costs of transporting milk from farms and supply plants to city bottling plants.

DATE: Hearing will convene September 9, 1980.

ADDRESS: Hearing will be held at the Holiday Inn, 30 Worcester Road (Rt. 9), Framingham, Massachusetts 01701 (telephone 617–875–6151).

FOR FURTHER INFORMATION CONTACT: Clayton H. Plumb, Marketing Specialist, Dairy Division, Agricultural Marketing Service, U.S. Department of Agriculture, Washington, D.C. 20250, (202) 447–6273.

SUPPLEMENTARY INFORMATION: Notice is hereby given of a public hearing to be held at the Holiday Inn, 30 Worcester Road, Framingham, Massachusetts, beginning at 9:30 a.m., on September 9, 1980, with respect to proposed amendments to the tentative marketing agreement and to the order, regulating the handling of milk in the New England marketing area.

The hearing is called pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 *et seq.*), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

The purpose of the hearing is to receive evidence with respect to the economic and marketing conditions which relate to the proposed amendments, hereinafter set forth, and any appropriate modifications thereof, to the tentative marketing agreement and to the order.

The proposed amendments, set forth below, have not received the approval of the Secretary of Agriculture.

Proposed by Green Mountain Cooperative Federation, Inc.

Proposal No. 1

Revise paragraph (b) of § 1001.4 to read as follows:

§ 1001.4 Plant.

* * * * *

(b) Bulk reload points (separate premises used for the purpose of transferring bulk milk from one tank truck to another tank truck or to stationary storage tanks, while en route from dairy farmers' farms to a plant, and from which premises milk is not transferred by pipeline for the processing or packaging of milk and milk products.) The cooling of milk, collection or testing of samples, and washing and sanitizing of tank trucks at the premises shall not disqualify it as a bulk reload point under this paragraph.

Proposal No. 2

Revise § 1001.41 to read as follows:

§ 1001.41 Classification of inventories.

Inventories of fluid milk products at the end of each month shall be classified as Class I milk pending final disposition of the fluid milk product, if the handler requests such classification or does not claim a Class II classification of any fluid milk products received.

Proposal No. 3

Revise paragraph (a) of § 1001.47 to read as follows:

§ 1001.47 Additional assignments to Class I and Class II milk.

(a) At pool distributing plants that have received bulk fluid milk products from other pool plants, assign to Class II milk, a quantity of receipts from producers and cooperative associations in their capacity as handlers under Section 1001.9(d) equal to 10 percent of skim milk and 25 percent of butterfat in the plant's Class I route disposition or the remaining Class II milk at the plant, whichever is less.

* * * * *

Proposal No. 4

Revise paragraph (g) of § 1001.52 to read as follows:

§ 1001.52 Plant location adjustments.

* * * * *

(g) The location adjustments for each plant shall be the amounts shown in the following table for the zone in which the plant is located:

Location Adjustments for Determination of Zone Price

Distance to basing point (miles)	Plant location zone	Class I and blended price adjustments (cents per hundredweight)
1 to 10	1	+66.0
11 to 20	2	+66.2
21 to 30	3	+64.4
31 to 40	4	+62.6
41 to 50	5	+60.8
51 to 60	6	+59.0
61 to 70	7	+57.2
71 to 80	8	+55.4
81 to 90	9	+49.6
91 to 100	10	+47.3
101 to 110	11	+45.0
111 to 120	12	+42.7
121 to 130	13	+40.4
131 to 140	14	+38.1
141 to 150	15	+13.8
151 to 160	16	+11.5
161 to 170	17	+9.2
171 to 180	18	+6.9
181 to 190	19	+4.6
191 to 200	20	+2.3
201 to 210	21	+0.0
211 to 220	22	−2.3
221 to 230	23	−4.6
231 to 240	24	−6.9
241 and over	25	−9.2

Proposal No. 5

Add five new paragraphs to § 1001.52 to read as follows:

§ 1001.52 Plant location adjustments.

* * * * *

(h) For each 5.0 cents per gallon increase or decrease in the price of diesel fuel, measured as stated in paragraphs (i) and (j), the zone price differentials as stated in paragraph (g) of this section shall automatically be changed as follows:

§ 1001.52 Plant location adjustments.

* * * * *

For Zones 1 through 8. Each price zone differential as stated in paragraph (g) will be increased or decreased by 1 cent.

For Zones 9 through 20. Each price zone differential as stated in paragraph (g) of this section will be increased or decreased by .05 cents (one twentieth of one cent) per 100 pounds for each zone distant from the 21st zone.

For Zone 21. No change.

For Zones 22 through 25. Each price zone differential as stated in paragraph (g) of this section will be increased or decreased by .05 cents per 100 pounds for each zone distant from the 21st zone.

(i) For the purpose of paragraph (h) of this section, the price of diesel fuel shall be as reported monthly by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor for "diesel to commercial consumers, New England." If BLS should convert this report exclusively to an index basis, the index shall be converted to a per gallon equivalent on a basis consistent with the price in ( ) having been ( ) cents per gallon. (It is proposed that the base price be the announced price for the month of the hearing.)

(j) Whenever the price of diesel fuel to commercial users in New England, as specified in paragraph (i) of this section, shall have changed by 5.0 cents per gallon or more from ( ) cents per gallon, the zone price differentials shall automatically be appropriately adjusted as stated in paragraph (h) of this section. If the total increases or decreases in the price of diesel fuel exceed 5.0 cents per gallon, the excess shall become a part of the basis for subsequent automatic adjustments, except that, in the case of the initial automatic adjustments in zone price diferentials, all cumulative fuel price increases or decreases from the ( ) base of ( ) cents per gallon, shall be compensated in the automatic adjustment to the extent that the fuel price increases or decreases can be measured in full multiples of 5.0 cents per gallon. If there are subsequent changes in the price of diesel fuel—after the initial automatic zone differential adjustment—which cause a further aggregate increase or decrease 5 cents or more per gallon, beyond the increase or decrease last compensated by an automatic adjustment, an additional automatic adjustment shall be made in the zone price differential schedule. Similar additional adjustments shall be made whenever the uncompensated amount of change in the price of diesel fuel equals or exceeds 5 cents per gallon.

(k) The effective date of these automatic revisions in zone price differentials will be the first day of the month after the release, in the Boston office of BLS, of the diesel fuel price or index of price on which the adjustment depends, except that the initial "catch-up" adjustment shall become effective on the first day of the first month this amendment becomes a part of Milk Order No. 1.

(l) The computations related to paragraphs (h) through (k) of this section shall be performed in the office of the Market Administrator, using the latest available data, which may in some instances be identified as "preliminary", or otherwise less than final. In the event of revisons of data, or refinement of computational methods, appropriate adjustments will be made in the zone price differentials on the first day of the first month following the revision or the refinement. There will be no retroactive adjustments in zone price differentials.

Proposed by Association of New England Milk Dealers, Inc.

Proposal No. 6

Revise paragraph (b) of § 1001.4 to read as follows:

§ 1001.4 Plant.

* * * * *

(b) Bulk reload points (premises used for the purpose of transferring bulk milk from one tank truck to another tank truck while en route from dairy farmers' farms to the plant of final destination). The cooling of milk, collection or testing of samples, washing and sanitizing of tank trucks, use of the same premises and facilities for receiving and shipping of milk and milk products and the maintenance and use of stationary storage tanks used exclusively for reloading bulk milk shall not disqualify it as a bulk reload point under this paragraph. Any premises which would otherwise be a bulk reload point under this paragraph shall not be considered a bulk reload point in any of the months of July through December in which all of the milk moved from farmers' farms to the premises is received by a handler who qualifies his supply plants as pool plants under § 1001.5b(c) and who requests that the facility not be considered a bulk reload point in that month.

* * * * *

Proposal No. 7

Revise paragraph (b) of § 1001.5b to read as follows:

§ 1001.5b Supply plant.

* * * * *

(b) It is a plant from which in any month of August and December at least 5 percent, and in any month of September through November at least 15 percent, of its total receipts of milk from

dairy farmers' farms is shipped as fluid milk products, including as diverted milk, to pool distributing plants.

* * * * *

Proposal No. 8

Revise § 1001.41 to read as follows:

§ 1001.41 Classification of inventories.

Inventories of fluid milk products at the end of each month shall be classified as Class I milk pending final disposition of the fluid milk products, if the handler requests such classification or does not claim a Class II classification of any fluid milk products received.

Proposal No. 9

Revise paragraph (a) of § 1001.47 to read as follows:

§ 1001.47 Additional assignments to Class I and Class II milk.

(a) For handlers operating one pool distributing plant that has received bulk fluid milk products from other pool plants, assign to Class II milk, a quantity of receipts from producers and cooperative associations in their capacity as handlers under § 1001.9(d) equal to 15 percent of skim milk and 50 percent of butterfat in the plant's Class I route disposition or the remaining Class II at the plant, whichever is less. For handlers operting more than one pool distributing plant, assign to Class II milk a quantity of receipts from producers and cooperative associations in their capacity as handlers under § 1001.9(d) at each distributing plant equal to 15 percent of skim milk and 50 percent of butterfat in the pool distributing plant's Class I route disposition. If any of the handler's pool distrbuting plants receive from other pool plants a quantity less than 15 percent of skim milk and 50 percent of butterfat of its Class I route disposition, then the remainder shall be eligible for use at the handler's other pool distributing plants.

* * * * *

Proposal No. 10

Revise paragraph (a) of § 1001.50 to read as follows:

§ 1001.50 Class prices.

* * * * *

(a) *Class I price.* The Class I price at the plants located in Zone 21 shall be the basic formula price for the second preceding month plus $2.30.

* * * * *

Proposal No. 11

Revise paragraph (g) of § 1001.52 to read as follows:

the transportation differential in (a)

§ 1001.40 Classes of utilization.

any amendments thereto that may result

§ 1001.52 Plant location adjustments.

* * * * *

(g) The location adjustments for each plant shall be the amounts shown in the following table for the zone in which the plant is located:

Location Adjustments for Determination of Zone Price

Distance to basing point (miles)	Plant location zone	Class I and blended price adjustments (cents per hundredweight)
1 to 10	1	+68.0
11 to 20	2	+66.2
21 to 30	3	+64.4
31 to 40	4	+62.6
41 to 50	5	+60.8
51 to 60	6	+59.0
61 to 70	7	+57.2
71 to 80	8	+55.4
81 to 90	9	+49.6
91 to 100	10	+47.9
101 to 110	11	+45.0
111 to 120	12	+42.7
121 to 130	13	+40.4
131 to 140	14	+38.1
141 to 150	15	+13.8
151 to 160	16	+11.5
161 to 170	17	+9.2
171 to 180	18	+6.9
181 to 190	19	+4.6
191 to 200	20	+2.3
201 to 210	21	+0
211 to 220	22	−2.3
221 to 230	23	−4.6
231 to 240	24	−6.9
241 and over	[1] 25	[2]−9.2

[1] Includes 25 and over.

[2] Class I and blended price location adjustments applicable to plants located in subsequent zones shall be obtained by extending the table for each additional 10 miles at the rate of 2.3 cents plus the automatic fuel adjustment as determined under paragraph (h) of this section. in no event shall the Class I or blended price at any zone be less than the Class II price for the month.

Proposal No. 12

Add five new paragraphs to § 1001.52 to read as follows:

§ 1001.52 Plant location adjustments.

* * * * *

(h) For each 5.0 cents per gallon increase or decrease in the price of diesel fuel, measured as stated in paragraphs (i) and (j) of this section, the zone price differentials as stated in paragraph (g) of this section shall automatically be changed as follows:

For Zones 1 through 8. Each price zone differential stated in paragraph (g) will be increased or decreased by 1 cent.

For Zones 9 through 20. Each price zone differential stated in paragraph (g) will be increased or decreased by .05 cents (one twentieth of one cent) per 100 pounds for each zone distant from the 21st zone.

For Zone 21. No change.

For Zones 22 through 25 and over. Each price zone differential as stated in paragraph (g) of this section will be increased or decreased by .05 cents per 100 pounds for each zone distant from the 21st zone.

(i) For the purpose of paragraph (h) of this section, the price of diesel fuel shall be as reported monthly by the Bureau of Labor Statistics (BLS) of the U.S. Department of Labor for "Diesel to commercial consumers, New England". If BLS should convert this report exclusively to an index basis, the index shall be converted to a per gallon equivalent on a basis consistent with the price in ( ) having been ( ) cents per gallon. (It is proposed that the base price be the announced price for the month of the hearing.)

(j) Whenever the price of diesel fuel to commercial users in New England, as specified in paragraph (i) of this section, shall have changed by 5.0 cents per gallon or more than ( ) cents per gallon, the zone price differentials shall automatically be appropriately adjusted as stated in paragraph (h). If the total increases or decreases in the price of diesel fuel exceed 5.0 cents per gallon, the excess shall become a part of the basis for subsequent automatic adjustments, except that, in the case of the initial automatic adjustments in zone price differentials, all cumulative fuel price increases or decreases from the ( ) base of ( ) cents per gallon, shall be compensated in the automatic adjustment to the extent that the fuel price increases or decreases can be measured in full multiples of 5.0 cents per gallon. If there are subsequent changes in the price of diesel fuel—after the initial automatic zone differential adjustment—which cause a further aggregate increase or decrease 5 cents or more per gallon, beyond the increase or decrease last compensated by an automatic adjustment, an additional automatic adjustment shall be made in the zone price differential schedule. Similar additional adjustments shall be made whenever the uncompensated amount of change in the price of diesel fuel equals or exceeds 5 cents per gallon.

(k) The effective date of these automatic revisions in zone price differentials will be the first day of the month after the release, in the boston office of BLS, of the diesel fuel price or index of price on which the adjustment depends, except that the initial "catch-up" adjustment shall become effective on the first day of the first month this amendment becomes a part of Milk Order No. 1.

(l) The computations related to paragraphs (h) through (k) of this section shall be performed in the office of the Market Administrator, using the latest available data, which may in some instances be identified as "preliminary", or otherwise less than final. In the event of revisions of data, or refinement of computational methods, appropriate adjustments will be made in the zone price differentials on the first day of the first month following the revision or the refinement. There will be not retroactive adjustments in zone price differentials.

Proposal No. 13

This is an alternative proposal if Proposals 11 and 12 are not adopted:

Add a new § 1001.52a and revise § 1001.61(b) as follows:

§ 1001.52a Transportation and receiving cost credit.

Each handler that operates a pool supply plant shall be entitled to a transportation and receiving cost credit for the shipments of fluid milk products to pool distributing plants, to the extent of the quantity of such shipments that are assigned to Class I milk. The rates of the credit shall be as follows:

(a) The transportation credit differential shall be determined from the following table by taking the difference in the amount specified for the zone in which the pool supply plant is located, less the amount specified for the zone in which the pool distributing plant is located:

Transportation Credit Differential

Plant zone location	Transportation credit differential [1]
Zone:	
1	.00
2	.50
3	1.00
4	1.50
5	2.00
6	2.50
7	3.00
8	3.50
9	4.00
10	4.50
11	5.00
12	5.50
13	6.00
14	6.50
15	7.00
16	7.50
17	8.00
18	8.50
19	9.00
20	9.50
21	10.00
22	10.50
23	11.00
24	11.50
25	12.00

[1] Cents per hundredweight.

(b) Receiving cost credit shall be at the rate of 8 cents per hundredweight for all zones.

(c) For each 5 cents per gallon increase or decrease in the price of diesel fuel, subsequent to November 1979, as measured by the bureau of Labor Statistics (BLS), of the U.S. Department of Labor for "Diesel to commercial consumers, New England", the transportation differential in (a) shall be increased or decreased .05¢ per hundredweight for each zone distant from Zone 1 to Zone 25. Zone 1 will remain at zero. This computation shall be performed by the Market Administrator's office.

(d) In no event shall the combined rate under the preceding paragraphs of this section, plus the rate of the location adjustment under § 1001.52 cause the effective Class I price at any zone to be lower than the blended price for that zone.

§ 1001.61 Computation of basic blended price.

* * * * *

(b) Deduct the amount of the plus adjustments and add the amount of the minus adjustments that are applicable under §§ 1001.52 and 1001.53 and deduct the transportation credit applicable under § 1001.52a.

Proposed by National Farmers Organization

Proposal No. 14

Revise paragraph (c) of § 1001.15 to read as follows:

§ 1001.15 Diverted milk.

* * * * *

(c) milk reported as diverted milk that fails to meet the requirements set forth in this section, shall be considered as having been moved directly from the dairy farmers' farms to the plant of physical receipt, and if that plant is a nonpool plant the milk shall be excluded from producer milk. If the handler fails to designate the dairy farmers whose milk is to be so excluded, the entire quantity of milk that the handler caused to be moved from dairy farmers' farms directly to nonpool plants during the month shall be excluded from producer milk.

Proposed by Moser Farms Dairy, Inc.

Proposal No. 15

Revise § 1001.33(d) to read as follows:

§ 1001.33 Notices to producers.

* * * * *

(d) If butterfat tests of the producer's milk are determined in accordance with any approved method by any state or commonwealth, the handler shall give the producer within 7 days after the end of each sampling period a written notice of the producer's average butterfat test for the period.

Proposal No. 16

Add a new § 1001.40(b)(9) to read as follows:

§ 1001.40 Classes of utilization.

* * * * *

(9) Any shrinkerage of butterfat in excess of 2 percent of milk handled shall be classified as Class II shrinkage of up to 3 percent of milk handled if the butterfat testing is of 4 or less fresh samples during any month.

Proposal No. 17

Add a new provision to read as follows:

Notwithstanding the provisions of any section in accounting and assignments of milk (skim milk and butterfat) the handler shall not be charged with any excess in butterfat that can be offset by an amount of skim milk shrinkage up to 1 percent of butterfat in milk handled during any month, provided that this shall only apply one time in each 3-month period comprised of 4 quarters in a year.

Proposed by Association of Rhode Island Milk Dealers, Inc.

Proposal No. 18

Revise § 1001.52 to provide additional location adjustments to the Class I and blended prices at plants located in Rhode Island, the Massachusetts counties of Barnstable, Bristol, or Plymouth. As an alternative proposal, provide that handlers located in Rhode Island, the Massachusetts counties of Barnstable, Bristol, or Plymouth shall pay a set differential above the Zone 1 blended price to producers for milk received directly from such producer's farms. (The additional location adjustments or "direct delivery differential" shall be an amount that reflects the additional cost per hundredweight to move milk from northern New England to plants in Rhode Island or southeastern Massachusetts compared to plants in the vicinity of Boston.)

Proposed by Massachusetts Milk Control Commission

Proposal No. 19

In § 1001.52(g) fix location adjustments beyond Zone 24 at the Zone 24 level.

Proposal No. 20

Revise the order to provide that the Zone 1 plant location price shall apply to all Class I packaged fluid milk product disposition.

Proposed by Dairy Division, Agricultural Marketing Service

Proposal No. 21

Make such changes as may be necessary to make the entire marketing agreement and the order conform with any amendments thereto that may result from this hearing.

Copies of this notice of hearing and the order may be procured from the Market Administrator, 230 Congress Street, Room 403, Boston, MA 02110, or from the Hearing Clerk, Room 1077–S, U.S. Department of Agriculture, Washington, DC 20250, or may be there inspected.

From the time that a hearing notice is issued until the issuance of a final decision in a proceeding, Department employees involved in the decisional process are prohibited from discussing the merits of the hearing issues on an ex parte basis with any person having an interest in the proceeding. For this particular proceeding, the prohibition applies to employees in the following organizational units: Office of the Secretary of Agriculture; Office of the Administrator, Agricultural Marketing Service; Office of the General Counsel; Dairy Division, Agricultural Marketing Service (Washington office only); and Office of the Market Administrator, New England Marketing Area.

Procedural matters are not subject to the above prohibition and may be discussed at any time.

Signed at Washington, D.C., on August 11, 1980.

William T. Manley,

Deputy Administrator, Marketing Program Operations.

DEPARTMENT OF ENERGY

Economic Regulatory Administration

10 CFR Part 212

[Docket No. ERA-R-80-20]

Equal Application Rule; Cancellation of Public Hearing

AGENCY: Economic Regulatory Administration, Department of Energy.

ACTION: Notice of cancellation of public hearing.

SUMMARY: On July 8, 1980, the Economic Regulatory Administration of the Department of Energy issued a Notice of Change in Hearings Schedule (45 FR 46811, July 11, 1980) concerning proposed alternative amendments to the Mandatory Petroleum Pricing Regulations modifying or eliminating the equal application rule with respect to sales of gasoline. The Notice announced a public hearing in San Francisco, California, to be held at the Golden Gate Way Holiday Inn, 1500 Van Ness Avenue, on August 15, 1980. The San

Francisco public hearing is hereby cancelled because of lack of sufficient interest.

The Washington, D.C. hearing on this matter remains scheduled for August 19–20, 1980.

FOR FURTHER INFORMATION CONTACT:

BILLING CODE 6450–01–M

FEDERAL RESERVE SYSTEM

12 CFR Part 205

[Reg. E; EFT–2]

Electronic Fund Transfers; Proposed Official Staff Interpretation

AGENCY: Board of Governors of the Federal Reserve System.

ACTION: Proposed official staff interpretation.

SUMMARY: In accordance with 12 CFR 205.13(b)(2)(ii), the Board staff is publishing for comment official staff interpretation EFT–1 of Regulation E, Electronic Fund Transfers, regarding the preemption of certain provisions of the Michigan statute governing electronic fund transfers. Based upon a section-by-section comparison, inconsistent state law provisions are preempted by the federal act, unless they are more protective of the consumer, as provided by § 205.12 of Regulation E.

DATES: Comments must be received on or before September 15, 1980.

ADDRESS: Comments (which should include a reference to EFT–1) may be mailed to Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, or delivered to Room B–2223, 20th and Constitution Avenue, NW., Washington, D.C., between 8:45 a.m. and 5:15 p.m. Comments may be inspected in Room B–1122 between 8:45 a.m. and 5:15 p.m.

FOR FURTHER INFORMATION CONTACT:

Susan M. Werthan, Staff Attorney, Division of Consumer and Community Affairs, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 (202–452–3867).

SUPPLEMENTARY INFORMATION: (1) The text of official staff interpretation EFT–1 is published with identifying details deleted to the extent required to prevent a clearly unwarranted invasion of personal privacy. The Board maintains and makes available for public inspection and copying a current index providing identifying information for the public, subject to certain limitations stated in 12 CFR Part 261.6.

(2) Interested persons are invited to submit relevant comment. The letter is being issued as a proposal, rather than in final form, with comment particularly being solicited on the section-by-section analysis used to determine which provisions of the state statute are inconsistent and preempted by federal law.

(3) After comments are considered, this official staff interpretation may be amended, may be withdrawn or may remain unchanged. Final action regarding this official staff interpretation will appear in the Federal Register.

(4) Authority: 15 U.S.C. 1693m(d).

§ 205.12(a) and (b)—Premption of certain provisions of the Michigan statute governing electronic fund transfers.

This is in response to your letter of . . ., in which you request that the Board determine to what extent the Michigan statute governing electronic fund transfers is preempted by the federal Electronic Fund Transfer Act. Your request was made pursuant to § 205.12 of Regulation E.

By amending 12 CFR § 265.2(h), the Board has delegated to the Director of the Division of Consumer and Community Affairs its authority to make preemption determinations. The Director has exercised the Board's authority under § 919 of the act to decide which provisions of the state statute are preempted and is communicating that decision through this official staff interpretation. As § 919 provides, if it is determined that a state law requirement is inconsistent, financial institutions will incur no liability for a good faith failure to comply with that state law.

In applying § 919 of the act and § 205.12 of the regulation a section-by-section analysis of the Michigan statute with reference to Regulation E was made. Attention was also given to the comparison of groups of related sections. The statutory language supports this analysis since it refers to inconsistencies in "provisions" of federal and state statutes. This approach also addresses both purposes in § 902(b) of the act by contributing to the protection of individual consumer rights and the establishment of a basic framework of rights for participants in EFT systems. Finally, this approach avoids the formation of very complex hybrid rules resulting from preemption of individual requirements in each section.

The following general analysis was used in making the section-by-section comparison. If state law is the same as federal law, no preemption occurs. If state law is different from federal law, but financial institutions can comply with both, state law is not prempted and institutions must comply with both laws. If state law is different from federal law, and institutions may violate state law when complying with federal law, the laws are inconsistent within the meaning of § 205.12(a) and (b). In this case, if state law is more protective of the consumer, state law is not preempted. Otherwise, federal law preempts state law and institutions need comply only with federal law.

You ask that several specific sections of the Michigan statute be preempted. After comparing the inconsistencies in each requirement of each section, the section was viewed as a whole in order to make the final preemption decision on a section-by-section basis. The final preemption determination are as follows:

1. Section 13 of the Michigan statute regarding issuance of unsolicited access devices is inconsistent with § 205.5 of Regulation E, but is more protective of the consumer. Therefore, it is not preempted by the federal law. The main provisions of state law contributing to this decision are the requirement that an unsolicited access device be accepted in writing by the consumer and that additional information be given to the consumer after acceptance.

2. Section 5(4) of the state statute, which defines unauthorized use of an access device, is not inconsistent with § 205.2(1) of Regulation E and is not preempted.

3. Section 14 of the state statute, which governs the consumer's liability for unauthorized use of an account, is inconsistent with § 205.6 of Regulation E and is preempted. The state provision is not more protective of the consumer since the negligence standard of liability could result in the consumer's increased exposure to liability.

4. Section 15 of the state statute governing error resolution procedure is inconsistent with and preempted by § 205.11 of Regulation E. Since the state statute permits a possible 70 days for errors to be resolved, but Regulation E permits only 45 days, Michigan law is not more protective of the consumer. This conclusion is supported by the fact that § 205.12(b)(3) of the regulation specifically lists longer time periods for error resolution as one of the standards for preemption.

5. Sections 17 and 18 of the state statute, which cover receipts and periodic statements, are inconsistent with § 205.9 of Regulation E and are preempted. Section 205.12(b)(4) provides that one of the standards for preemption is any state law provision for

receipts of periodic statements that are different in content from those required under federal law. Differences exist between the Michigan statute and the EFT Act. Also, the state statute is not more protective of the consumer since it provides for the consumer's paying the cost of getting a receipt if a machine cannot furnish one at the time of a transfer.

6. Section 19 of the state statute regarding initial disclosures is inconsistent with § 205.7 of Regulation E, but is not preempted. Since the state provision requires initial discloures to be given when an access card is issued, rather than at any time before the first electronic fund transfer is made, as Regulation E provides, the state law is more protective of the consumer. Therefore, the Michigan provision stands.

Although the Michigan statute's initial disclosure section stands, certain items in the disclosure statement will have no conform to the federal requirements where substantive sections of federal law have preempted state law. Therefore, the liability disclosure and the error resolution disclosure must conform to the federal requirements.

The staff notes that the scope of the Michigan statute is narrower than that of the federal EFT Act since it covers only terminal-based transfers. As a result, the federal provisions continue to govern EFTs outside the scope of the state statute, such as preauthorized transfers.

This is an official staff interpretation of Regulation E, issued pursuant to § 205.13(b)(2) of Regulation E. It is limited to the facts and issues discussed above.

Sincerely,

Janet Hart,

Director.

Dated: August 8, 1980.

Board of Governors of the Federal Reserve System

Theodore E. Allison,

Secretary of the Board.

BILLING CODE 6210–01–M

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

14 CFR Part 39

[Airworthiness Docket No. 80–ASW–29]

Bell Model 47 Series Helicopter; Airworthiness Directives

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to adopt a new airworthiness directive (AD) that would require installation of safety washers and longer bolts on each tail rotor blade pitch control link on Bell Model 47 Series helicopters equipped with the 47–641–170 series tail rotor hub and blades. The proposed AD is needed to prevent possible fatigue failure of the tail rotor pitch control link. Failure of the control link would result in loss of tail rotor blade control and helicopter directional control.

DATES: Comments must be received on or before September 15, 1980. Proposed effective date of the adopted rule will be November 1, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Regional Counsel, Attention: Docket No. 80–ASW–29, Southwest Region, Federal Aviation Administration, PO Box 1689, Fort Worth, Texas 76101.

FOR FURTHER INFORMATION CONTACT:

James H. Major, Airframe Section, Engineering and Manufacturing Branch, ASW–212, Federal Aviation Administration, PO Box 1689, Forth Worth, Texas 76101, telephone (817) 624–4911, extension 516.

SUPPLEMENTARY INFORMATION: Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views, or arguments as they may desire. Communications should identify the regulatory docket number and be submitted in triplicate to the address specified above. All communications received on or before the closing date for comments will be considered by the Director before taking action on the proposed rule. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Office of Regional Counsel, Federal Aviation Administration, Southwest Region, 4400 Blue Mound Road, Fort Worth, Texas, for examination by interested persons.

There have been three reports of tail rotor pitch link fatigue failures on Bell Model 47G–2A–1, 47G–4, and 47G–5A helicopters that reportedly resulted in loss of tail rotor blade pitch control and subsequent loss of helicopter directional control. Excessive wear of the rod end bearing could allow the rod end housing to slide down on the tail rotor pitch horn boss, restrict the flapping action of the blade as a result of interference and impose excessive bending loads on the pitch link. The noted reports concern Model 47 series helicopters equipped with the improved tail rotor blades of 47–641–170 series tail rotor hub and blade assembly. Since this condition is likely to develop on other Model 47 series helicopter equipped with this tail rotor hub and blade assembly, the proposed AD would require removal of two bolts, installation of two new longer bolts, and two special washers on the blade pitch horn, and replacement of excessively worn rod end bearings within 100 hours' time inservice after November 1, 1980. The special washer will prevent the rod end bearing housing from sliding down on the tail rotor pitch horn boss after the bearing has become excessively worn and thereby prevent interference and excessive bending loads on the pitch link.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of Part 39 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following new airworthiness directive:

Bell: Applies to all Model 47 series helicopters and military Model H–13, OH–13, and TH–13T series helicopters, including modified versions, certificated in all categories, that are equipped with the 47–641–170 series tail rotor hub and blade assemblies.

Compliance required within 100 hours' time inservice after November 1, 1980.

To prevent loss of directional control as a result of possible tail rotor pitch link failure, accomplish the following, unless already accomplished in accordance with Bell Helicopter Textron Alert Service Bulletin No. 47–80–5, Rev. A, dated April 29, 1980.

(a) Remove the tail rotor pitch link from each blade pitch horn.

(b) Inspect the pitch link bearings for axial and radial play. Remove bearings having .015 inch or more of play or looseness, and install serviceable bearings.

(c) Install bolts P/N NAS1304–30D or 20–057–4–30D (used with pitch horn, P/N 47–641–189–1, –3, or –5), or P/N NAS1304–32D, or 20–057–4–32D (used with pitch horn, P/N 47–641–187–7) as appropriate, with washer, P/N 47–641–187–1 or –3 under the bolt head or nut, and washer P/N 47–641–189–3 between the link bearing and pitch horn with bevel towards the bearing. Torque nuts 80 to 100 inch-pounds and install cotter pins.

(d) Determine that no binding or interference occurs in the blade controls when the tail rotor controls are full left and right, and the tail rotor hub is flapped to each stop. Track the tail rotor blades in accordance with the appropriate Model 47 maintenance manual if a rod end bearing or a link is replace in accordance with paragraph (b) of this AD.

(e) Equivalent means of compliance with this AD may be approved by the Chief, Engineering and Manufacturing Branch, FAA, Southwest Region.

(Bell Helicopter Textron Operations Safety Notice OSN 47–79–1 dated October 19, 1979, also pertains to this subject.)

(Secs. 313(a), 601, 603, Federal Aviation Act of 1958, as amended, (49 U.S.C. 1354(a), 1421, and 1423); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); 14 CFR 11.85)

Note.—The FAA has determined that this document involves a proposed regulation which is not considered to be significant under the procedures and criteria prescribed by Executive Order 12044 and as implemented by interim Department of

Transportation guidelines (43 FR 9582; March 8, 1978).

they may desire. Communications should identify the regulatory docket or

provision of Executive Order 12044, as implemented by Department of

number and be submitted in triplicate to

"V–338 From Linden, Calif., via Hangtown, Calif. to Lake Tahoe, Calif." is added

Avenue, SW., Washington, D.C. 20591;

BILLING CODE 4910-13-M

---

14 CFR Part 39

[Docket No. 80-NW-39-AD]

Airworthiness Directives: Boeing Model 747 Series Airplanes Equipped With B. F. Goodrich Slides

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of Proposed Rule Making (NPRM).

SUMMARY: This proposed rule making would require replacement of escape slide bayonet/spring mechanical restraints on Boeing Model 747 series airplanes equipped with B. F. Goodrich Slides with shear pin mechanical restraints. Replacement is necessary due to corrosion of the bayonet/spring type restraint, possibly causing failure of the escape slide.

DATES: Comments must be received on or before October 1, 1980.

ADDRESSES: Send comments on the proposed rule in duplicate to: Federal Aviation Administration, Northwest Region, Office of the Regional Counsel, Attention: Airworthiness Rules Docket, Docket No. 80-NW-39-AD, 9010 East Marginal Way South, Seattle, Washington, 98108.

FOR FURTHER INFORMATION CONTACT: Mr. Roger S. Young, Airframe Section, ANW-212, Engineering and Manufacturing Branch, FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108, telephone (206) 767-2516.

SUPPLEMENTARY INFORMATION: One escape slide failed during a deployment due to corrosion on the bayonet/spring type mechanical restraint. These restraints control the unfolding of the escape slide when inflated. Six of twenty-six operators surveyed reported finding restraints with varying amounts of corrosion. Since this condition is likely to exist or develop on other B. F. Goodrich slides this proposal requires replacement of the bayonet/spring restraints.

Comments Invited

Interested persons are invited to participate in the making of the proposed rule by submitting such written data, views or arguments as they may desire. Communications should identify the regulatory docket or notice number and be submitted in duplicate to the address specified above. All communications received on or before the closing date for comments specified above will be considered by the Administrator before taking action on the proposed rule. The proposals contained in this notice may be changed in the light of comments recieved. All comments submitted will be available both before and after the closing date for comments in the Rules Docket for examination by interested persons. A report summarizing each FAA/public contact concerned with the substance of this proposal will be filed in the Rules Docket.

Availability of NPRMS

Any person may obtain a copy of this Notice of Proposed Rule Making (NPRM) by submitting a request to the Federal Avaition Administration, Northwest Region, Office of the Regional Counsel, Attention: Airworthiness Directive Rules Docket No. 80-NW-39-AD, 9010 East Marginal Way South Seattle, Washington 98108.

The Proposed Amendment

Accordingly, the Federal Aviation Administration proposes to amend § 39.13 of the Federal Aviation Regulations (14 CFR 39.13) by adding the following Airworthiness Directive:

Boeing: Applies to all Model 747 airplanes equipped with B. F. Goodrich slides.

Within one (1) year after the effective date of this AD, unless already accomplished, install shear pin mechanical restraints to affected escape slides in accordance with B. F. Goodrich Service Bulletins 25-054 dated March 4, 1980, 25-055 dated March 5, 1980, or 25-056 dated March 6, 1980, or later FAA approved revisions, or an equivalent installation approved by the Chief, Engineering and Manufacturing Branch, FAA Northwest Region.

All persons affected by this proposal who have not already received these documents from the manufacturer, may obtain copies upon request to Boeing Commercial Airplane Company, P.O. Box 3707, Seattle, Washington 98124. These documents may also be examined at FAA Northwest Region, 9010 East Marginal Way South, Seattle, Washington 98108.

(Secs. 313(a), 601, and 603, Federal Aviation Act of 1958, as amended (49 U.S.C. 1354(a), 1421, and 1423); Sec. 6(c)), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.85)

Note.—The FAA has determined that this document involves a regulation which is not considered to be significant under the provision of Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979).

Issued in Seattle, Washington, on August 4, 1980.

E. O'Connor,

Acting Director Northwest Region.

The incorporation by reference provisions in the document were approved by the Director of the Federal Register on June 19, 1967.

[FR Doc. 80-24427 Filed 8-13-80; 8:45 am]

14 CFR Part 71

[Airspace Docket No. 80-AWE-12]

Designation of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate new VOR Federal Airways V-332, from Friant, Calif., to Red Bluff, Calif., and V-338 from Linden, Calif., to Lake Tahoe, Calif. This alteration would provide a bypass route in the Sacramento area, and permit additional flexibility for arrival/departures in the Sacramento terminal area.

DATES: Comments must be received on or before September 15, 1980.

ADDRESSES:

Send comments on the proposal in triplicate to: Director, FAA Western Region, Attention: Chief, Air Traffic Division, Docket No. 80-AWE-12, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-204), Room 916, 800 Independence Avenue SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT: Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received on or before September 15, 1980, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would designate two new VOR Federal Airways in the vicinity of Sacramento, Calif.; V-332, from Friant, Calif., direct to Hangtown, Calif., direct to Red Bluff, Calif., and V-338, from Linden, Calif., direct to Hangtown, direct to Lake Tahoe, Calif. These new airways would permit the traffic flow flexibility necessary to expedite arrival/departure traffic in the Sacramento, Calif., area. Also, VOR/DME approach procedures for the Placerville, Calif., airport at Hangtown would be established. The Hangtown VOR/DME (HNW) is located at Lat. 38°43'31"N., Long. 120°44'52"W., and will be commissioned in September 1980. Subpart C of Part 71 was republished in the **Federal Register** on January 2, 1980 (45 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 307) as follows:

Under § 71.123

"V-332 From Friant, Calif., via Hangtown, Calif., to Red Bluff, Calif." is added

"V-338 From Linden, Calif., via Hangtown, Calif.; to Lake Tahoe, Calif." is added.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 8, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C., 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would establish a part-time control zone at Newport, Oreg. This airspace is to protect aircraft executing instrument approach and departure procedures established for Newport Municipal Airport. The proposed action would designate an area within a 5-mile radius of the Newport Municipal Airport (Lat. 44°34'48"N., Long. 124°03'25"W.) and within 4 miles each side of the Newport VORTAC 357°T(336°M) radial extending from the 5-mile radius to 9 miles northwest of the VORTAC. The effective time would be from 0900 to 1700 local time. Section 71.171 of Part 71 was republished in the **Federal Register** on January 2, 1980 (45 FR 356).

ICAO Considerations

As part of this proposal relates to the navigable airspace outside the United

States, this notice is submitted in consonance with the International Civil Aviation Organization (ICAO) International Standards and Recommended Practices.

Applicability of International Standards and Recommended Practices by the Air Traffic Service, FAA, in areas outside domestic airspace of the United States is governed by Article 12 of, and Annex 11 to, the Convention on International Civil Aviation, which pertains to the establishment of air navigational facilities and services necessary to promoting the safe, orderly, and expeditious flow of civil air traffic. Their purpose is to insure that civil flying on international air routes is carried out under uniform conditions designed to improve the safety and efficiency of air operations.

The International Standards and Recommended Practices in Annex 11 apply in those parts of the airspace under the jurisdiction of a contracting state, derived from ICAO, wherein air traffic services are provided and also whenever a contracting state accepts the responsibility of providing air traffic services over high seas or in airspace of undetermined sovereignty. A contracting state accepting such responsibility may apply the International Standards and Recommended Practices in a manner consistent with that adopted for airspace under its domestic jurisdiction.

In accordance with Article 3 of the Convention on International Civil Aviation, Chicago, 1944, state aircraft are exempt from the provisions of Annex 11 and its Standards and Recommended Practices. As a contracting state, the United States agreed by Article 3(d) that its state aircraft will be operated in international airspace with due regard for the safety of civil aircraft.

Since this action involves, in part, the designation of navigable airspace outside the United States, the Administrator has consulted with the Secretary of State and the Secretary of Defense in accordance with the provisions of Executive Order 10854.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.171 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 356) by adding a control zone at Newport, Oreg., to read as follows:

Newport, Oreg.

Within a 5-mile radius of the Newport Municipal Airport, (Lat. 44°34'48" N., Long. 124°03'25" W.); within 4 miles each side of the Newport VORTAC 357° radial extending from the 5-mile radius to 9 miles northwest of the VORTAC. This control zone is effective from 0900 to 1700 hours, local time daily.

(Secs. 307(a), 313(a), and 1110, Federal Aviation Act of 1958 (49 U.S.C. 1348(a), 1354(a), and 1510; Executive Order 10854 (24 FR 9565); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 8, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

14 CFR Part 71

[Airspace Docket No. 80-ASO-38]

Proposed Alteration of Federal Airways, Orlando, Fla.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter Victor Airways V-3, V-152, V-159, V-267 and V-441 in the vicinity of Orlando, Fla. Alteration of these routes will provide a "bypass" airways system for the congested Orlando terminal area. This will reduce controller/pilot workload and reduce radio frequency congestion.

DATES: Comments must be received on or before September 15, 1980.

ADDRESSES:

Send comments on the proposal in triplicate to: Director, FAA Southern Region, Attention: Chief, Air Traffic Division, Docket No. 80-ASO-38, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320.

The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-24), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Charles R. Horne, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Southern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 20636, Atlanta, Ga. 30320. All communications received on or before September 15, 1980, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would alter Victor Airways V-3, V-152, V-159, V-267 and V-441 in the vicinity of Orlando, Fla. Alteration of these routes will provide a "bypass" airway system for the congested Orlando terminal area, reduce controller/pilot workload, and reduce radio frequency congestion. The primary use of the "bypass" airway system will be for routing low altitude en route aircraft around the Herndon and Orlando International Airports, and areas of nonlimited radar coverage during peak traffic periods. Section 71.123 of Part 71 was republished in the

Federal Register on January 2, 1980 (45 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 307) as follows:

Under V-3, after "Ormond Beach, Fla.;" add "including a W alternate from Vero Beach to Ormond, via INT Vero Beach 341°T(339°M) and Melbourne, Fla, 321°T(319°M) radials, INT Melbourne 321°T(319°M) and Ormond Beach 211°T(213°M) radials;"

Under V-152, all after "St. Petersburg, Fla." is deleted and "via INT St Petersburg 060°T(061°M) and Ormond Beach, Fla., 211°T(212°M) radials; Ormond Beach, including a S alternate via Lakeland, Fla., Orlando, Fla.; INT Orlando 048°T(049°M) and Ormond Beach 160°T(161°M) radials;" is substituted therefor.

Under V-159, after "Ocala, Fla.," add "including a S alternate from INT Vero Beach 317°T(319°M) and Melbourne, Fla., 297°T(299°M) radials, to Ocala via INT Melbourne 297°T(299°M) and Ocala 145°T(146°M) radials;"

Under V-267, after "Jacksonville, Fla.," delete "including an E alternate from Orlando to INT Ormond Beach, Fla., 308° and Jacksonville 174° radials via Ormond Beach;"

Under V-441, delete "Ocala 171° radials." and substitute "Ocala 182°T(182°M)." therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 7, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

[Airspace Docket No. 80-AGL-29]

Extension of VOR Federal Airway

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the description of VOR Federal Airway V-58 by extending the airway 77 miles west to EARED Intersection, thence via Clarion, Pa., 228°M radial to GRACE, Pa., Intersection. This action provides a shorter route for aircraft arriving at the Greater Pittsburgh, Pa., Metro area.

DATE: Comments must be received on or before September 15, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Great Lakes Region, Attention: Chief, Air Traffic Division, Docket No. 80-AGL-29, Federal Aviation Administration, 2300 East Devon, Des Plaines, Ill. 60016. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-204), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Lewis W. Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Great Lakes Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 2300 East Devon, Des Plaines, Ill. 60018. All communications recieved on or before September 15, 1980 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would alter VOR Federal Airway V-58 by extending it westward 77 miles to EARED Intersection, thence to GRACE Intersection. Designation of this extension would provide a more direct route to the Greater Pittsburgh Airport terminal area. In addition, the more direct and shorter route will result in significant fuel savings. Subpart C of Part 71 was republished in the Federal Register on January 2, 1980, (45 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 307) as follows:

Under V-58 "From Philipsburgh, Pa.;" is deleted and "From INT Franklin, Pa., 175°T(181°M) and Clarion, Pa., 222°T(228°M) radials, via INT Clarion 222°T(228°M) and Philipsburg, Pa., 272°T(279°M) radials; Philipsburg;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportaiton Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 8, 1980.

[Airspace Docket No. 80-EA-18]

Proposed Alteration of Transition Area; Chambersburg, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to alter the Chambersburg, Pa., Transition Area over Chambersburg Municipal Airport, Chambersburg, Pa. This alternation will provide protection to aircraft executing a new non-directional beacon (NDB) approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before September 29, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone 212-995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment.

The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Chambersburg, Pa., Transition Area. The airport is at present overlaid by a 700-foot area which will be expanded by the addition of an extension to the northeast, 3.5 miles in width and approximately 6 miles in length.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of the Federal Aviation Regulations so as to amend the Description of the Chambersburg, Pennsylvania, 700-foot floor transition area as follows:

Chambersburg, Pa.

In the text delete, "29 miles east of the VORTAC." and substitute therefor, 29 miles east of the VORTAC; within 3.5 miles each side of the NEAL NDB (39°59'05"N., 77°37'56"W.) 036° bearing extending from the NDB to 12 miles NE of the NDB.

(Sec. 307(a) of the Federal Aviation Act of 1958, [72 Stat. 749; 49 U.S.C. 1348(a)] and of Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.65)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a Skaneateles, N.Y., Transition Area. The airport will be overlaid by a 700-foot area with a radius of 5 miles around the airport and an extension to the northeast approximately 5 miles wide and 2 miles in length.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Skaneateless, New York 700-foot floor transition area as follows:

Skaneateles, N.Y.

That airspace extending upward from 700 feet above the surface within a 5-mile radius of the center 42°54'50"N., 76°26'20"W., of Lake Pines Aviation Airport, Skaneateles, New York within 2.5 miles each side of the Syracuse VORTAC 215° radial extending from the 5-mile radius area to 14.5 miles southwest of the Syracuse VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958 [72 Stat. 749; 49 U.S.C. 1348(a)] and of Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, telephone (212) 995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a Woodbine, N.J., Transition Area. The airport will be overlaid by a 700-foot area approximately 6.5 miles in radius around the airport with an extension approximately 1 mile long and 1.5 miles wide extending to the south.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Woodbine, New Jersey, 700-foot floor transition area as follows:

Woodbine, N.J.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center (39°13'06" N/74°47'37" W) of the Woodbine Municipal Airport, Woodbine, New Jersey, and within 1.5 miles each side of the Sea Isle, New Jersey, VORTAC 002 radial extending from the 6.5-mile radius area to a point 1 mile north of the VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958 [72 Stat. 749; 49 U.S.C. 1348(a)] and of Sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)]; and 14 CFR 11.65)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures [44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which

frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York, on July 17, 1980.

DATES: Comments must be received on or before September 29, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submittee will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate an Annville, Pa., Transition Area. The airport will be overlaid by a 700-foot area with a radius of 5 miles around the airport and an extension 8 miles wide and 4 miles in length extending from the radius to the south of the airport.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designation an Annville, Pennsylvania, 700-foot floor transition area as follows:

Annville, Pa.

That airspace extending upward from 700 feet above the surface within 5.0-mile radius of the center (40°19'00" N/76°32'15"W) of the Millard Airport, Annville, Pennsylvania and within 4.0 miles either side of the Ravine, Pennsylvania, VORTAC 169° radial extending southward from the 5.0-mile radius area to a point 26 miles from the VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65.)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York on July 17, 1980.

Lonnie D. Parrish,

Acting Director, Eastern Region.

Airspace Docket No. 80-EA-54

Proposed Alteration of Transition Area Greenville, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate a Greenville, PA., Transition Area over Greenville Municipal Airport, Greenville, PA. This designation will provide protection to aircraft executing a new VOR Runway 4 instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before September 29, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7 Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment.

The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a Greenville, Pa., Transition Area. The airport, will be overlaid by a 700-foot area with a radius of 6 miles around the airport and an extension approximately 9 miles wide and 4 miles in length extending from the radius area to the southwest of the airport.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Greenville, Pennsylvania 700 foot floor transition area as follows:

Greenville, Pa.

That airspace extending upward from 700 feet above the surface within an 6.0 mile radius of the center (41°26'49"N/80°23'30"W) of the Greenville Municipal Airport, Greenville, Pennsylvania and within 4.5 each side of the Youngstown, Pennsylvania, VORTAC 062 radial from the 6.0 mile radius area to a point 7 miles east of the VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York, on July 17, 1980.

Proposed Alteration of Transition Area, Quarryville, Pa.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rule making.

SUMMARY: This notice proposes to designate a Quarryville, Pa., Transition Area over Tanglewood Airport, Quarryville, Pa. This designation will provide protection to aircraft executing a new VOR-DME-B instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before September 29, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT: Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

Comments invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to designate a Quarryville, Pa., Transition Area. The airport will be overlaid by a 700-foot area 6.5 miles in radius around the airport and with an extension of approximately 4.5 miles wide and 11 miles in length extending from the radius to the north of the airport.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations by designating a Quarryville, Pennsylvania, 700-foot floor transition area as follows:

Quarryville, Pa.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the center (39°51'00"N/76°12'55"W) of Tanglewood Airport, Quarryville, Pennsylvania, and within 4.5 miles each side of the Lancaster, Pennsylvania, VORTAC 168° radial extending from the 6.5-mile radius area to the VORTAC.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Proposed Alteration of Transition Area; Sidney, N.Y.

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter the Sidney, N.Y., Transition Area over Sidney Municipal Airport, Sidney, N.Y. This alteration will provide protection to aircraft executing a new VOR Runway 25 instrument approach which has been developed for the airport. An instrument approach procedure requires the designation of controlled airspace to protect instrument aircraft utilizing the instrument approach.

DATES: Comments must be received on or before September 29, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Chief, Airspace and Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430. The docket may be examined at the following location: FAA, Office of Regional Counsel, AEA-7, Federal Building, J.F.K. International Airport, Jamaica, New York 11430.

FOR FURTHER INFORMATION CONTACT:

Douglas Ambrose, Airspace & Procedures Branch, AEA-530, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430, Telephone (212) 995-3391.

Comments Invited

Interested parties may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Eastern Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, J.F.K. International Airport, Jamaica, New York 11430. All communications received on or before September 29, 1980, will be considered before action is taken on the proposed amendment. The proposals contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this notice of proposed rulemaking (NPRM) by submitting a request to the Chief, Airspace & Procedures Branch, AEA-530, Eastern Region, Federal Aviation Administration, Federal Building, Jamaica, New York 11430, or by calling (212) 995-3391.

Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart G of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) to alter the Sidney, N.Y., Transition Area. The Airport is at present overlaid by a 700-foot area which will be extended to the northeast by approximately 10 miles in length and 12 miles in width. A major portion of the extension, however, is composed of the Oneonta and Norwich, N.Y., Transition Areas.

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.181 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as follows:

1. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the description of the Sidney, NY 700-foot floor transition area as follows:

Sidney, N.Y.

In the text delete, "from a 080° bearing to a 215° bearing from the airport", and substitute therefor, "from a 080° bearing to a 215° bearing from the airport and within 9.5 miles northwest and 4.5 miles southeast of the Rockdale VORTAC 218°/038° radials extending from 8.5 miles southwest to 11 miles northeast of the Rockdale VORTAC."

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The Federal Aviation Administration has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by Department of Transportation Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operation, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation.

Issued in Jamaica, New York, on July 17, 1980.

14 CFR Part 71

[Airspace Docket No. 80-AWE-11]

Designation and Alteration of VOR Federal Airways

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to designate new VOR Federal Airways V-22 and V-317 in the vicinity of San Diego, Calif., and alter V-460 by extending the airway from Julian, Calif., to new VORTAC at Poggi, Calif. These changes would better define en route traffic flows and terminal operations in the San Diego area. Consequently, this action would simplify and increase flight safety.

DATE: Comments must be received on or before September 15, 1980.

ADDRESSES: Send comments on the proposal in triplicate to:
Director, FAA Western Region,
Attention: Chief, Air Traffic Division,
Docket No. 80-AWE-11, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009.
The Official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-204), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591.

An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Lewis Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received on or before September 15, 1980 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA-430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426-8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11-2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart C of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) that would designate new VOR Federal Airways V-22 from Oceanside, Calif., to Poggi, Calif., and V-317 from Mission Bay, Calif., via Poggi, to Imperial, Calif. Also, V-460 would be extended from Julian, Calif., to Poggi. The new Poggi VORTAC, identification PGY, will be located at Lat. 32°36'37" N., Long. 116°50'42" W. This action would improve en route traffic flow and terminal operations in the San Diego, Calif., Area, thereby, increasing flight safety. Subpart C of Part 71 was republished in the Federal Register on January 2, 1980 (45 FR 307).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 71.123 of Part 71 of the Federal Aviation Regulations (14 CFR Part 71) as republished (45 FR 307) as follows:

Under V-460—"From Julian, Calif.," is deleted and "From Poggi, Calif., via Julian, Calif.;" is substituted therefor.

"V-317—From Mission Bay, Calif., via Poggi, Calif., to Imperial, Calif." is added.

"V-22—From Oceanside, Calif., via INT Oceanside 143°T(129°M) and Poggi, Calif., 350°T(336°M) radials; to Poggi." is added.

(Secs. 307(a) and 313(a), Federal Aviation act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C. on August 6, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air, Traffic Rules Division.

Alteration of Jet Routes

AGENCY: Federal Aviation Administration (FAA), DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: This notice proposes to alter several jet routes in the vicinity of Los Angeles, Calif. These changes would improve traffic flow between Los Angeles and San Francisco, Calif. In addition, these alterations would permit greater flexibility for maneuvering traffic in terminal areas, thereby reducing congestion and delays.

DATE: Comments must be received on or before September 15, 1980.

ADDRESSES: Send comments on the proposal in triplicate to: Director, FAA Western Region, Attention: Chief, Air Traffic Division, Docket No. 80-AWE-10, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. The official docket may be examined at the following location: FAA Office of the Chief Counsel, Rules Docket (AGC-204), Room 916, 800 Independence Avenue, SW., Washington, D.C. 20591. An informal docket may be examined at the office of the Regional Air Traffic Division.

FOR FURTHER INFORMATION CONTACT:

Lewis Still, Airspace Regulations Branch (AAT-230), Airspace and Air Traffic Rules Division, Air Traffic Service, Federal Aviation Administration, 800 Independence Avenue, SW., Washington, D.C. 20591; telephone: (202) 426-8525.

SUPPLEMENTARY INFORMATION:

Comments Invited

Interested persons may participate in the proposed rulemaking by submitting such written data, views or arguments as they may desire. Communications should identify the airspace docket number and be submitted in triplicate to the Director, Western Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, 15000 Aviation Boulevard, P.O. Box 92007, Worldway Postal Center, Los Angeles, Calif. 90009. All communications received on or before September 15, 1980 will be considered before action is taken on the proposed amendment. The proposal contained in this notice may be changed

in the light of comments received. All comments submitted will be available, both before and after the closing date for comments, in the Rules Docket for examination by interested persons.

Availability of NPRM

Any person may obtain a copy of this Notice of Proposed Rulemaking (NPRM) by submitting a request to the Federal Aviation Administration, Office of Public Affairs, Attention: Public Information Center, APA–430, 800 Independence Avenue, SW., Washington, D.C. 20591, or by calling (202) 426–8058. Communications must identify the docket number of this NPRM. Persons interested in being placed on a mailing list for future NPRMs should also request a copy of Advisory Circular No. 11–2 which describes the application procedures.

The Proposal

The FAA is considering an amendment to Subpart B of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) that would realign Jet Route 5, 6, 126, and 501 in the vicinity of Los Angeles, Calif. These alterations would improve traffic flow in the San Francisco, Calif/Los Angeles corridor. Also, traffic congestion and delays at jet route merge points would be eliminated. Controller workload would be reduced by aligning jet routes in areas where aircraft are normally vectored. Section 75.100 of Part 75 was republished in the **Federal Register** on January 2, 1980 (45 FR 732).

The Proposed Amendment

Accordingly, pursuant to the authority delegated to me, the Federal Aviation Administration proposes to amend § 75.100 of Part 75 of the Federal Aviation Regulations (14 CFR Part 75) as republished (45 FR 732) as follows:

Under Jet Route 5 "From Los Angeles, Calif., via the INT of the Palmdale, Calif., 291° and the Bakersfield, Calif., 149° radials; Bakersfield; Reno, Nev.;" is deleted and "From Seal Beach, Calif., via Porterville, Calif.; Reno, Nev.;" is substituted therefor.

Under Jet Route 6 "From the INT of the Salinas, Calif., 145° and the Palmdale, Calif., 291° radials via Palmdale; Hector, Calif.;" is deleted and "From Big Sur, Calif., via INT Big Sur 137°T(121°M) and Palmdale, Calif., 291°T(276°M) radials; Palmdale; hector, Calif.;" is substituted therefor.

Under Jet Route 126 "From Los Angeles, Calif., via the INT of the Los Angeles 319° and the Avenal, Calif., 145° radials; Avenal; Stockton, Calif.; Sacramento, Calif.;" is deleted and "From Los Angeles, Calif., via Santa Barbara, Calif.; Salinas, Calif.; Sacramento, Calif.;" is substituted therefor.

Under Jet Route 501 "From Point Reyes, Calif.," is deleted and "From Santa Barbara, Calif., via Big Sur, Calif.; Point Reyes, Calif.;" is substituted therefor.

(Secs. 307(a) and 313(a), Federal Aviation Act of 1958 (49 U.S.C. 1348(a) and 1354(a)); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)); and 14 CFR 11.65)

Note.—The FAA has determined that this document involves a proposed regulation which is not significant under Executive Order 12044, as implemented by DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979). Since this regulatory action involves an established body of technical requirements for which frequent and routine amendments are necessary to keep them operationally current and promote safe flight operations, the anticipated impact is so minimal that this action does not warrant preparation of a regulatory evaluation and a comment period of less than 45 days is appropriate.

Issued in Washington, D.C., on August 8, 1980.

B. Keith Potts,

Acting Chief, Airspace and Air Traffic Rules Division.

BILLING CODE 4910-13-M

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

18 CFR Part 260

[Docket No. RM80–69]

Proposed Revision To Annual Report of Gas Supply for Certain Natural Gas Pipelines: Form No. 15

Issued: August 7, 1980.

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of proposed rulemaking.

SUMMARY: By this Notice, the Federal Energy Regulatory Commission proposes to amend Form No. 15 (Interstate Pipelines' Annual Report of Gas Supply). The proposed amendments include changing the number of schedules contained in the form, the format of those schedules and statements in the form, and the instructions for completion of the form. As a result, the reporting burdens will be reduced by approximately one third. The proposed changes are a product of the Commission's ongoing effort to eliminate unnecessary reporting burdens and to update its forms.

DATE: Comments are due September 26, 1980.

ADDRESS: Comments to this Notice should be addressed to the Office of Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Washington, D.C. 20426, and should reference Docket No. RM80–69.

FOR FURTHER INFORMATION CONTACT: Wayne Thompson, Chief, Gas Supply Branch, Office of Pipeline and Producer Regulation, Federal Energy Regulatory Commission, 825 North Capitol Street NE., Room 4402–B, Washington, D.C. 20426 (202) 357–9077.

SUPPLEMENTARY INFORMATION:

The Federal Energy Regulatory Commission (Commission) is engaged in an ongoing effort to eliminate unnecessary reporting burdens. This rulemaking to amend Form No. 15, Annual Report of Gas Supply for Certain Natural Gas Pipelines, is part of that effort and reflects an evaluation of data needed by the Commission to carry out its regulatory functions. The proposed amendments to the content, format, and instructions of Form No. 15 should result in a significant reduction in respondent burden and improve the quality of the responses filed under Form No. 15.[4]

A. Background

Form No. 15 was instituted to obtain an annual report of the total gas supply of each pipeline company under the jurisdiction of the Commission.[1] This gas supply consists of the pipeline company's owned reserves, producer contracts for which the producer has received a certificate to sell the gas to the pipeline,[2] gas purchase contracts with other jurisdictional pipelines,[3] purchases of gas from foreign suppliers, purchases of Liquefied Natural Gas (LNG), Synthetic Natural Gas (SNG),[4] and short-term or other purchases over which the Commission has regulatory authority.

Form No. 15 provides the Commission with information needed to address gas supply issues in certificate applications, to perform depreciation analyses in rate cases and to make determinations concerning new or increased sales, the extension of facilities, or the abandonment of services.

There are at least four problems which have become evident in the use of the current Form No. 15: (1) excessive detail is prescribed for individual reservoirs; (2) definitions and data requests in the form do not conform to changes resulting from passage of the Natural Gas Policy Act (NGPA); (3) definitions are not adequately standardized to permit cross checks with other data; and (4) the format of the computer printout ("hard copy") is designed for computer use, rather than human use.

By this rulemaking, the Commission is proposing certain changes in the form which will address these problems. In addition, the Commission's review of regulatory burdens indicates that the proposed revisions to Form No. 15 will make the form more concise, will better facilitate its use and will reduce respondent burdens.

B. Current Format

Form No. 15 is currently composed of: (1) forty-five pages of filing instructions (pp. 0001–0045); (2) three unnumbered statements—"Disclosure of Other Gas Supply Filings With Federal Agencies" (p. 0046), "Synopsis of Pipeline Company Gas Supply" (p. 0047), and "Gas Procurement Activity Statement" (p. 0048); (3) four schedules designed more for computer use rather than for completion by hand—"Schedule No. I—System Deliverability Summary," "Schedule No. II—Reservoir Data and Dedicated Remaining Recoverable Salable Reserves," "Schedule No. III—Deliverability Estimate for Each Supply Source," and "Schedule No. IV—Committed Reserves and Deliverability Estimates for Other Supply Sources;" and (4) a "Footnote Data" page.

C. Summary of Proposed Changes

1. General

The Commission proposes to revise and clarify Form No. 15 and its instructions, including consolidating and renumbering its schedules and reporting statements. The schedules would also be redesigned to better facilitate completion by hand. As a result of these revisions, the reporting requirement of the respondent pipelines should be reduced by approximately one third.

An "Identification Schedule" (page 1) which includes a certification section would be added to the form, on which the reporting pipeline company would identify itself, state the number of pages submitted for each statement and schedule, and attest to the accuracy of the reported information. "Synopsis of Pipeline Company Gas Supply" (page 0047) would be shortened to "Synopsis of Gas Supply" and renumbered as page 2; "Disclosure of Other Gas Supply Filings With Federal Agencies" (page 0046) would be redesignated as page 3; and the "Gas Procurement Activity Statement" (page 0048) would be identified as page 4. The current "Schedule I—System Deliverability Summary," would remain Schedule I (page 5); the present "Schedule II—Reservoir Data and Dedicated Remaining Recoverable Salable Reserves" and "Schedule III—Deliverability Estimate for Each Supply Source" would be combined into "Schedule II—Reservoir Data, Field Data, Salable Reserve Data and Deliverability Estimate" (page 6); and the current "Schedule IV—Committed Reserves and Deliverability Estimates for Other Supply Sources" would be renumbered as the new Schedule III (page 7). The "Footnote Data" page (page 8) would be revised to include certain classification and footnote codes for reporting the required data.

A requirement to report a "Class Code" on each statement and schedule would be deleted. A space would be provided on each statement and schedule for designating the report as "an original" or "a resubmission." A resubmission would be filed when reportable data have changed from the originally filed form. Only such altered data and data of resubmission would have to be reported. Finally, a separate instruction is included for the attachment of pipeline system maps.[5]

2. Statements

The first substantive statement, "Synopsis of Gas Supply" (new page 2) would be changed as follows: Items 4 through 10 of the old form which pertain to information from the last certificate application would be deleted. For purposes of clarification with reference to gas reserves, two lines are proposed to be added to the statement entitled, "Company Owned Recoverable Gas in Underground Storage," and "Gas Balance Due From Exchange Agreements (Positive or Negative)."

The second statement, "Disclosure of Other Gas Supply Filings With Federal Agencies" (new page 3) would remain essentially the same. The definition of the term "affiliates" would be included for purposes of clarification.

The third statement, "Gas Procurement Activity Statement" (page 4) would be essentially unchanged.

3. Schedules

The following items would be deleted from "Schedule I—System Deliverability Summary" (page 5): "Annual Requirements"[6] (for all years except the current year), "Gas Curtailments" (Line Nos. 03–22); "Firm Gas Sales," "Interruptible Gas Sales," "Other Use Gas," "Reserve Life Index," and "Short Term Contract Volume" (Line No. 25). The item labeled, "Contracted" which is presently reported under "Current Gas Supply" would be retitled "Producer Dedicated" for purposes of clarification.

The new "Schedule II—Reservoir Data, Field Data, Salable Reserve Data, and Deliverability Estimate" (page 6) would be the product of extensive revisions and deletions as a result of the merger of the current Schedules II and III. The schedule would be used only for reservoir and field data—all "Group" data would be required to be reported on the new Schedule III. Elements eliminated from each form would be as follows:

Current Schedule II

Group Code
Line No. 1—FPC Natural Gas Area
Line No. 2—Type calculation
Total Producing Completions
Total Net Completions
Dedicated Percentage of Sellers Reserves
Decline Factor MMCF Per PSI
Cumulative Wet Gas Production at Current Pressure
Current Z Value
Terminal Z Value
Depth Classification
Basic Lithology
Line No. 4—Recovery Factor
Productive Area—Acres
Average Net Thickness—Feet
Reservoir Volume—Acre/Feet
Porosity
Porosity By (How porosity is determined)
Connate Water
Connate Water By (How connate water is determined)
Initial Z Value
Yield Barrels Per MMCf
FVF (Initial Formation Volume Factor)
Mole Percent H_2S
Mole Percent N_2
Mole Percent CO_2

[1] Form No. 15 was initially promulgated in 1964: Order No. 279, Docket No. R–239, 29 FR 4874 (April 7, 1964). It has undergone four revisions since that date: Order No. 337, Docket No R–308, 32 FR 3292 (February 25, 1967), revised the form to allow companies with comparatively small volumes of reserves to file an abbreviated report, and made certain conforming amendments; Order 399, Docket No. R–308, 35 FR 6982 (May 1, 1970), amended the form to require respondents to submit estimates of productive capacity Mcf/d, maximum daily quantity Mcf/d for each source of gas supply, and gas reserves by independent producer rate schedules, and made other minor changes; Order No. 476, Docket No R–308, 38 FR 6810 (March 13, 1973), amended the form with reference to the reserves report; and Order No. 546, Docket No. R–308, 41 FR 9688 (March 8, 1976), revised the form to require that respondents disclose gas reserves filings with other Federal agencies.

[2] Pursuant to the Natural Gas Policy Act (NGPA), producers are no longer required to obtain certificates in certain instances. (*See* sections 302, 312 and 601, NGPA.)

[3] Pursuant to the NGPA, pipelines are permitted to purchase gas from nonjurisdictional companies. (*See* sections 302, 303 and 311, NGPA.)

[4] Also known as "Substitute" Natural Gas.

[5] Elimination of the requirement to file individual reservoir area outline maps reduces the respondents' map filing burden by over 50 percent.

[6] Estimated total pipeline system annual gas requirements.

[4] FERC Form No. 15 (Attachment A) is not being printed by the **Federal Register.** Copies are available in the Office of Public Information.

Current Schedule III

3. Instructions

owned and controlled by producers and that amount to less than 50 billion cubic

DEPARTMENT OF THE TREASURY

pockets, pocket flaps, belts and belt

Current Schedule III

Line No. 1—all data elements
Line No. 2—all data elements
Line No. 3—Pc (Shut-in pressure)
Pt (Flowing pressure)
Pf (Formation pressure)
PS (Sandface pressure)
C (Coefficient C in back pressure equation)
n (value of slope n)
Q (rate of flow)
Duration Flow
Wellhead Open Flow
Absolute Open Flow
Daily Productive Capacity—Non-Associated Gas
Daily Productive Capacity—Associated and Solution Gas

Three data elements would be added to the new Schedule II for clarification purposes: "New Reservoirs," "Extensions", and "Revisions (Plus or Minus)."

The new "Schedule III—Committed Reserves and Deliverability Estimates for Other Supply Sources" (page 7) would require the filing of field data by those companies which are not required to file Schedule II,[7] or when there is insufficient data to file Schedule II. In these instances, the field name and code would be substituted for group name and code. The following items would be deleted from Schedule III: "FPC Natural Gas Area" (Line No. 1); "Daily Productive Capacity for Undesignated Gas," "Daily Productive Capacity for Non-Associated Gas," and "Daily Productive Capacity for Associated and Solution Gas" (Line No. 2); and "Gas Volume Not Scheduled" (Line No. 3). A requirement for filing "Type of Gas" is added for clarification. The Commission also proposes an additional line item entitled, "Intrastate or Interstate"[8] in order to identify the type of gas sale. Finally, certain changes are proposed for the current "Committed Reserves" portion of the form in order to better distinguish company owned production and reserves from contracted purchases and reserves. Thus, "Company Owned" is replaced by "Company Owned Remaining Dry Gas;" "Owned and Contracted" is now "Remaining Contracted Gas;" "Gas Purchased and/or Produced" is replaced by "Contracted Gas Purchased" and a new item, "Company Owned Dry Gas Produced" is added.

[7] Companies with gas reserves which are owned and controlled by producers and which amount to less than 50 billion cubic feet of natural gas at the end of any reporting year; or companies which purchase their entire supply of natural gas from other companies subject to Form No. 15 requirements, and/or from foreign suppliers.

[8] *See also* section 311, NGPA.

3. Instructions

The reporting instructions and definitions are proposed to be changed to reflect revisions in and to clarify reporting requirements of Form No. 15. While the schedules will be revised to better facilitate completion by hand, the Commission will retain its preference that respondents file a magnetic tape (computer copy) of the form.[9] In order to ease the data processing burdens for respondent companies, the Commission has requested the Energy Information Administration (EIA) to develop a computer program which would translate the current requirements into the proposed format. As a result, respondents could continue to file magnetic tape copies under the current format without reprogramming their computers.[10] The "hard copy" (computer printout) would, however, still have to be filed in the proposed format. The Commission specifically seeks views on this proposal from the affected respondents.

The Commission would also revise certain of the form's definitions to reflect other changes and to correspond to provisions in currently applicable statutes.

The proposed changes should provide the Commission with more meaningful data in a more usable form and should ease respondent burdens substantially. Because of these advantages, it is proposed that the changes described in this Notice should be implemented in time for the report due on or before April 1, 1981.

In addition to the above-described changes to Form No. 15, the Commission proposes to amend those regulations which reference Form No. 15. Section 260.7 would be changed to designate the form as "FERC" Form No. 15. In the prescription, the term "interstate pipeline companies, as defined by the Natural Gas Policy Act," would replace "natural gas company, as defined by the Natural Gas Act." Section 260.7a would be amended to provide for the filing of a statement of gas transported by pipelines for other companies. Other revisions would be made to reflect changes in the effective date and in schedule and statement designations, and to clarify the prescription of the form.

D. Written Comment Procedures

The Commission invites interested persons to submit written data, views and other information concerning the matters set out in this Notice. An original and 14 copies of such comments should be filed with the Commission by September 28, 1980. Comments should be submitted to the Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, NE., Washington, D.C. 20426 and should reference Docket No. RM80–69.

All written submissions will be placed in the Commission's public files and will be available for public inspection in the Commission's Office of Public Information, Room 1000, 825 North Capitol Street, NE., Washington, D.C. 20426 during regular business hours.

(Department of Energy Organization Act, 42 U.S.C. 7101–7352; E.O. 12009, 42 FR 46267; Natural Gas Act, 42 U.S.C. 3301–3432)

In consideration of the foregoing, the Commission proposes to amend Form No. 15 as set forth in Attachment A, and Part 260, Chapter I, Title 18 of the Code of Federal Regulations as set forth below.

By direction of the Commission.

Kenneth F. Plumb,

Secretary.

1. Part 260—Statements and Reports (Schedules) is amended in the Table of Contents and in the text by revising §§ 260.7 and 260.7a to read as follows:

PART 260—STATEMENTS AND REPORTS (SCHEDULES)

* * * * *

Sec.
260.7 FERC Form No. 15, Interstate pipelines' annual report of gas supply.
260.7a Annual statement of gas transported by interstate natural gas pipelines for other interstate natural gas pipelines.

* * * * *

§ 260.7 FERC Form No. 15, Interstate pipelines' annual report of gas supply.

(a) *Prescription.* The form of Interstate Pipelines' Annual Report of Gas Supply, designated herein as FERC Form No. 15, is prescribed for the year 1980 and thereafter.

(b) *Filing requirements.* (1) *Who must file.* (i) *Generally.* All interstate pipeline companies, as defined by the Natural Gas Policy Act, section 2(15), shall prepare and file with the Energy Information Administration (EIA) an original and four copies of FERC Form No. 15.

(ii) *Exceptions.* The following interstate pipelines shall prepare and file with EIA an original and four copies of only the Identification Schedule (with Certification) (page 1), the "Synopsis of Gas Supply" (page 2) and Schedule III of FERC Form No. 15: (A) each interstate pipeline with gas reserves that are owned and controlled by producers and that amount to less than 50 billion cubic feet of natural gas at the end of any reporting year; or (B) each interstate pipeline that purchases its entire supply of natural gas from other interstate pipelines subject to the provisions of this section, and/or from foreign suppliers.

(2) *When to file.* Such reports shall be filed on or before April 1 for each calendar year ending December 31 of the previous year.

§ 260.7a Annual statement of gas transported by interstate pipelines for other interstate pipelines.

Each interstate pipeline, as defined by the Natural Gas Policy Act, section 2(15), which only transports natural gas for another interstate pipeline shall prepare and file with the Energy Information Administration an original and four copies of a statement which contains the name and address of each interstate pipeline for which it transports the gas. Such statement shall be filed on or before April 1 for each calendar year ending December 31 of the previous year.

[FR Doc. 80-24599 Filed 8-13-80; 8:45 am]
BILLING CODE 6450-85-M

[9] *See* Attachment A for the revised instructions for magnetic tape filings.

[10] In order for the translation program to be successful, EIA could make no exceptions for magnetic tape filings.

High-Cost Natural Gas Produced From Wells Drilled In Deep Water; Extension of Time for Comment

AGENCY: Federal Energy Regulatory Commission.

ACTION: Notice of Extension of Time for Comment.

SUMMARY: On July 11, 1980, the Federal Energy Regulatory Commission issued a Notice of Proposed Rulemaking. (High-Cost Natural Gas Produced From Wells Drilled in Deep Waters, 45 FR 47863, July 17, 1980.) The notice prescribed a comment period ending August 11, 1980. The comment period on this rulemaking is hereby extended to September 10, 1980.

FOR FURTHER INFORMATION CONTACT:
Kenneth F. Plumb, Secretary, Office of the Secretary, Federal Energy Regulatory Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, (202) 357–8400.

Customs Service

19 CFR Part 177

[521743]

Garments With Traditional, but Primarily Decorative Features: Garments With Simulated Features: Ornamented Wearing Apparel; Change of Practice Considered

AGENCY: U.S. Customs Service, Department of the Treasury.

ACTION: Proposed change of practice.

SUMMARY: This document gives notice that the Customs Service is reviewing the current uniform and established practice of classifying certain garments with traditional, but primarily decorative, features as nonornamented wearing apparel. The practice of classifying certain garments with simulated features as nonornamented is also under review. The Customs Service is considering whether it must classify garments with traditional, but primarily decorative features, and garments with simulated features, as ornamented wearing apparel. The Customs Service is seeking public comment as to whether a recent decision of the Customs Court requires these changes.

DATE: Comments (preferably in triplicate) must be received on or before: September 15, 1980.

ADDRESS: Comments should be addressed to the Commissioner of Customs, Attention: Regulations and Research Division, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

FOR FURTHER INFORMATION CONTACT:
Philip Robins, Classification and Value Division, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229 (202) 566–8181.

SUPPLEMENTARY INFORMATION:

Background

Pursuant to uniform and established practices, the Customs Service has classified various types of garments with traditional features which are also decorative as nonornamented wearing apparel. These features have included epaulets on raincoats, bush-safari jackets, and military-style garments, D-rings on the belts of trenchcoats, and overlaid yokes on Western-style shirts. It has also been the practice to classify garments with simulated features as nonornamented wearing apparel on the ground that the simulation is of a feature otherwise functional. These features have included simulated buttonholes, pockets, pocket flaps, belts and belt segments, or front openings (plackets).

Recently, in *The Ferriswheel* v. *United States*, C.D. 4844 (February 21, 1980), the United States Customs Court held Scottish Highland jackets, having traditional (but primarily decorative) epaulets, and braid which simulates buttonholes, to be thereby ornamented. In holding the merchandise to be classifiable as ornamented wearing apparel, the court found the jacket epaulets and braid to be primarily ornamental or decorative, i.e., intended primarily to enhance the beauty and appearance of the garments by adornment or embellishment. *Blaimoor Knitwear Corp.* v. *United States*, 60 Cust. Ct. 388, C.D. 3398, 284 F. Supp. 315 (1968). That the ornamental braid and epaulets are traditional in Highland dress, the court held, did not preclude classification as ornamented wearing apparel. While *Ferriswheel upheld* the Customs classification in that case, this opinion may be contrary to Customs' uniform and established practice of classifying other types of garments with traditional, but primarily decorative features, as nonornamented wearing apparel.

Proposed Change of Practice

The Customs Service is considering whether the opinion in the *Ferriswheel* case requires it to classify all garments having traditional, but primarily decorative, features as ornamented wearing apparel. Such a change of practice might affect raincoats, bush-safari jackets, and military-style garments, all having epaulets, trenchcoats with D-rings, and Western-style shirts with overlaid yokes, as well as all other garments with traditional features which might be considered to be primarily decorative.

The Customs Service is also considering whether the opinion in this case also requires it to classify garments with simulated features as ornamented wearing apparel. Subject to this change of practice would be garments with simulated buttonholes, pockets, pocket flaps, belts and belt segments, or front openings (plackets), as well as garments with any other simulated feature, notwithstanding that such simulation is of a feature otherwise functional.

The Customs Service seeks public comment as to the applicability of this opinion and as to whether these traditional and simulated features are primarily decorative or primarily functional.

Authority

Inasmuch as the proposed change of practice will affect the assessed duties

on garments subject to such change, the Customs Service is giving this notice and opportunity for comment in accordance with section 315(d) of the Tariff Act of 1930, as amended (19 U.S.C. 1315(d)), and section 177.10(c)(1) of the Customs Regulations (19 CFR 177.10(c)(1)).

Consideration will be given to any written comments submitted in writing to the Commissioner of Customs. Comments submitted will be available for public inspection in accordance with section 103.8(b), Customs Regulations (19 CFR 103.8(b)), during regular business hours at the Regulations and Research Division, Headquarters, Room 2428, U.S. Customs Service, 1301 Constitution Avenue, NW., Washington, D.C. 20229.

Drafting Information

The principal author of this notice was Harold I. Loring, Regulations and Research Division, U.S. Customs Service. However, personnel from other offices of the U.S. Customs Service participated in developing this notice, both on matters of style and substance.

R. E. Chasen,

Commissioner of Customs.

Approved: August 5, 1980.

Richard J. Davis,

Assistant Secretary of the Treasury.

[FR Doc. 80-24644 Filed 8-13-80; 8:45 am]

BILLING CODE 4810-22-M

INTERNATIONAL TRADE COMMISSION

19 CFR Part 207

Investigations To Review Outstanding Antidumping and Countervailing Duty Determinations and Outstanding Suspension Agreements

AGENCY: United States International Trade Commission.

ACTION: Proposed rule.

SUMMARY: The proposed amendment sets forth procedures for the conduct of Commission investigations to review suspension agreements under sections 704 and 734 of the Tariff Act of 1930 and determinations under sections 704(h)(2), 705(b), 734(h)(2), and 735(b) of the Tariff Act and determinations under the Antidumping Act, 1921, and the duty-free merchandise provisions of section 303(b) of the Tariff Act.

DATE: Comments on the proposed rule should be submitted on or before September 15, 1980.

ADDRESS: Comments on the proposed rule should be submitted to the Secretary, U.S. International Trade Commission, 701 E Street, NW, Washington, D.C. 20436.

FOR FURTHER INFORMATION CONTACT: Edward Easton, Esq., Office of the General Counsel, U.S. International Trade Commission, 701 E Street, NW, Washington, D.C., telephone (202) 523-0379.

SUPPLEMENTARY INFORMATION: Section 207.45 of the Commission's Rules of Practice and Procedure implements section 751 of the Tariff Act. The proposed amendments to the rule set forth a new procedure for the Commission decision whether to review an outstanding antidumping or countervailing duty determination upon receipt of a request for such a determination. The proposed amendment also changes the determination of the Commission in these investigations and investigations to review a suspension agreement accepted under section 704 or 734 of the Tariff Act to conform to the provisions of section 751 of the Tariff Act.

Section 207.45(a)(1) makes reference to "alleged" changed circumstances in describing the Commission's determination in investigations to review a suspension agreement accepted under section 704 or 734 of the Tariff Act. The proposed amendments would require the Commission to determine whether a request for a review of a suspension agreement "shows changed circumstances sufficient to warrant the review" prior to the institution of an investigation to determine "whether, in light of the changed circumstances, the agreement continues to eliminate completely the injurious effect of imports of the merchandise." This sequence and the standard for the determination are provided for in section 751 of the Tariff Act. Accordingly, the Commission proposes to remove the word "alleged" from § 207.45(a)(1).

Section 207.45(a)(2) provides the standard for a Commission determination in investigations to review outstanding antidumping and countervailing duty determinations. The subsection makes reference to "changed circumstances . . . which indicate" that an industry in the United States would not be threatened or the establishment of such an industry would not be materially retarded, if the countervailing duty order or antidumping order were modified or revoked. The linkage of changed circumstances with the threat of material injury or the possibility of material retardation is not provided for in section 751 of the Tariff Act and could possibly have a more restrictive effect than a standard relying only on the concepts of threat of material injury and the possibility of material retardation. Accordingly, the Commission proposes to delete the reference to changed circumstances in § 207.45(a)(2).

The Commission also proposes to change the formulation of the material injury determination in § 207.45(a) from the threat of material injury or material retardation to the standard found for countervailing duty investigations under section 104(b) of the Trade Agreements Act of 1979 (19 U.S.C. 1671 note); i.e., whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry in the United States would be materially retarded, by reason of imports of the merchandise covered by the countervailing duty order or the antidumping order if the order were to be revoked.

Section 207.45(b) provides for the procedures to be followed in review investigations authoized by section 751 of the Tariff Act. At present § 207.45(b) provides that the procedures set forth in subpart C of Part 207, Title 19, shall be applicable to investigations conducted under section 207.45. This section also provides that investigations conducted under section 207.45 shall be completed within 120 days. Inquiries have been made concerning the starting date for the calculation of the 120 day period. The proposed amendment of this subsection would have the 120 days period run from the date of the insitution of an investigation.

Section 207.45(b) as it is now written does not provide the bifurcated procedure suggested in section 751 of the Tariff Act. Section 751 provides that the requests for the review of suspension agreements or countervailing duty or antidumping determinations must show changed circumstances sufficient to warrant a review. Only after the Commission is satisfied that the showing required is sufficient is the institution of a review investigation called for. Section 207.45(b) has been redrafted to provide for this sequential, bifurcated procedure. In the event that the Commission finds that a request does not show changed circumstances sufficient to warrant a review, the Commission shall publish a notice to this effect in the **Federal Register**. This publication is provided for in subsection 516A(a)(1)(C) of the Tariff Act.

The proposed rule reads as follows:

§ 207.45 Investigation to review outstanding determination.

(a) *Purpose.* Upon the receipt of information concerning, or upon a request for a review of, a determination concerning a suspension agreement accepted under section 704 or 734 of the Act or an affirmative determination made under section 704(h)(2), 705(b), 734(h)(2), or 735(b) of the Act, or under the Antidumping Act or section 303(b) of the Act, which shows changed circumstances sufficient to warrant a review of such determination, the Commission shall institute an investigation to determine, as the case may be, (1) whether, in light of the changed circumstances, the agreement continues to eliminate completely the injurious effect of imports of the merchandise; or (2) whether an industry in the United States would be materially injured, or would be threatened with material injury, or the establishment of an industry in the United States would be materially retarded, by reason of imports of the merchandise covered by the countervailing duty order or the antidumping order if the order were to be revoked. In the absence of good cause shown, no investigation under this section 207.45 shall be instituted within 24 months of the date of publication of the notice of the suspension or determination.

(b) *Procedures.* (1) *Commencement of Proceedings.*

(i) *Upon receipt of a request.* A proceeding is commenced by filing with the Commission the original and nineteen (19) true copies of a request. Requests for a review investigation may be filed by any person. All requests shall set forth a description of changed circumstances sufficient to warrant the institution of a review investigation by the Commission under this section.

(ii) *Upon the initiative of the Commission.* Upon receipt of information concerning a suspension agreement accepted under section 704 or 734 of the act or an affirmative determination made under 704(h)(2), 705(b), 734(h)(2), or 735(b) of the Act, which shows changed circumstances sufficient to warrant a review of such determination, the Commission shall initiate an investigation to review such determination.

(2) *Institution of an investigation.* Within thirty (30) days after receipt of a request or, in exceptional circumstances, as soon after receipt of a request as possible, the Commission shall determine whether the request shows changed circumstances sufficient to warrant a review and, if so, shall institute an investigation. The investigation shall be instituted by notice published in the **Federal Register** and shall be completed within 120 days of the date of institution. If the Commission determines that a request does not show changed circumstances sufficient to warrant a review, the request will be dismissed and a notice of the dismissal shall be published in the **Federal Register** stating the reasons therefor.

(3) *Procedures set forth in Subpart C of Part 207.* The procedures set forth in §§ 207.21 through 207.24 and § 207.28 of this part shall apply to all investigations instituted under this § 207.45.

(Sec. 751, June 17, 1930, as amended, July 26, 1979, Pub. L. 96-39, 93 Stat. 175 (19 U.S.C. 1675))

By order of the Commission.

Kenneth R. Mason,

Secretary.

August 7, 1980.

BILLING CODE 7020-02-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of the Secretary

24 CFR Parts 804, 805, 841

[Docket No. R-80-856]

Maximum Limit on Total Development Cost; Transmittal of Proposed Rule to Congress

AGENCY: Department of Housing and Urban Development.

ACTION: Notice of transmittal of proposed rule to Congress under Section 7(0) of the Department of HUD Act.

SUMMARY: Recently enacted legislation authorizes Congress to review certain HUD rules for fifteen (15) calendar days of continuous session of Congress prior to each such rule's publication in the **Federal Register**. This notice lists and summarizes for public information a proposed rule which the Secretary is submitting to Congress for such review. This rule would establish a maximum limit on the total development cost of low-income public housing and Indian housing projects developed under the United States Housing Act of 1937.

FOR FURTHER INFORMATION CONTACT: Burton Bloomberg, Director, Office of Regulations; Office of General Counsel, 451 7th Street SW., Washington, D.C. 20410 (202) 755-6207.

SUPPLEMENTARY INFORMATION: Concurrently with issuance of this notice, the Secretary is forwarding to the Chairmen and Ranking Minority Members of both the Senate Banking, Housing, and Urban Affairs Committee and the House Banking, Finance and Urban Affairs Committee the following rulemaking document.

24 CFR Parts 804, 805 and 841—Maximum Limit on Total Development Cost

(Sec. 7(0) of the Department of HUD Act. (42 U.S.C. 3535(0)), sec. 324 of the Housing and Community Development Amendments of 1978)

Issued at Washington, D.C. August 8, 1980.

Moon Landrieu,

Secretary, Department of Housing and Urban Development.

Bureau of Alcohol, Tobacco and Firearms

27 CFR Parts 5, 13, 19, 170, 173, 186, 194, 195, 196, 197, 200, 201, 211, 212, 213, 231, 240, 250, 251 and 252

[Notice No. 347; Ref: Notice No. 329, TD-ATF-62]

Implementing the Distilled Spirits Tax Revision Act of 1979 (Pub. L. 96-39)

AGENCY: Bureau of Alcohol, Tobacco and Firearms, Department of the Treasury.

ACTION: Extension of comment period.

SUMMARY: This notice extends the comment period for Notice No. 329, Implementing the Distilled Spirits Tax Revision Act of 1979 (Pub. L. 96-39), until October 15, 1980. Notice No. 329 was published in the **Federal Register** on December 11, 1979 (44 FR 71612).

DATE: The comment period for Notice No. 329 is extended until October 15, 1980.

ADDRESS: Comments should be submitted to the Chief, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, P.O. Box 385, Washington, DC 20044 (Notice No. 329).

FOR FURTHER INFORMATION CONTACT: Edward J. Sheehan or E. J. Ference, Regulations and Procedures Division, Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Telephone: 202-566-7626.

SUPPLEMENTARY INFORMATION:

Background

On December 11, 1979, the Bureau of Alcohol, Tobacco and Firearms (ATF) published a notice of proposed rulemaking cross-reference to temporary regulations (Notice No. 329) to obtain comments on the temporary regulations for implementation of the Distilled

Spirits Tax Revision Act of 1979, Subtitle A of Title VIII of the Trade Agreements Act of 1979 (Pub. L. 96–39). The temporary regulations were published as Treasury Decision TD–ATF–62 in the **Federal Register** of December 11, 1979 (FR 44 71613). Those temporary regulations will remain in effect until superceded by final regulations. In the development of the final rule, ATF intends to—

(1) Eliminate unnecessary regulatory sections;

(2) Incorporate ATF rulings and industry circulars into the final regulations; and

(3) Rewrite the regulations into language that is more understandable.

Further comment from consumers and industry members will aid ATF in attaining these goals. For that reason, and due to comments received from an industry group, ATF is changing the comment period closing date for the notice and temporary regulations from September 11, 1980, to October 15, 1980.

Disclosure of Comments

Copies of written comments or data are available for public inspection in the ATF Reading Room, Room 4407, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, DC, between the hours of 9:00 a.m. and 4:30 p.m., Monday through Friday.

ATF will not recognize any material in comments designated as confidential or as not to be disclosed; and any material that the commenter considers to be confidential or inappropriate for disclosure to the public should not be included in the comments. The name of any person submitting comments is not exempt from disclosure.

Drafting Information

The principal author of this document is E. J. Ference of the Bureau of Alcohol, Tobacco and Firearms. However, other personnel of the Bureau and of the Treasury Department have participated in the preparation of this document, both in matters of substance and style.

Authority

This notice is issued under the authority contained in 26 U.S.C. 7805 (68a Stat. 917).

Signed: August 8, 1980.

G. R. Dickerson,

Director.

ENVIRONMENTAL PROTECTION AGENCY

40 CFR Part 52

[FRL 1570-2]

State of West Virginia—Proposed Deadlines for Correcting Deficiencies in West Virginia's SIP Revision for Nonattainment Areas

AGENCY: Environmental Protection Agency.

ACTION: Proposed rulemaking.

SUMMARY: Elsewhere in today's **Federal Register**, EPA is conditionally approving the West Virginia State Implementation Plan (SIP) in instances where the plan is deficient and the State has assured EPA that it will submit corrections. Conditional approvals mean that restrictions under Sections 110, 176, and 316 of the Clean Air Act will not apply unless West Virginia fails to submit the necessary corrections or EPA fails to approve them. This notice solicits comments on the adequacy of the deadlines established for conditionally approved items.

DATE: Comments must be submitted on or before September 15, 1980.

ADDRESS: Copies of the materials submitted by the State of West Virginia are available for public inspection during normal business hours at the following locations:

U.S. Environmental Protection Agency, Region III, Curtis Building, Tenth Floor, Sixth and Walnut Streets, Philadelphia, PA 19106, ATTN: Raymond D. Chalmers

Public Information Reference Unit, EPA Library, Room 2922, U.S. Environmental Protection Agency, 401 M Street, SW., Washington, D.C. 20460

All comments on the proposed revision submitted within 30 days of publication of this notice will be considered and should be addressed to:

Howard Heim, Chief (3AH10), Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, PA 19106, ATTN: AH300aWVA

FOR FURTHER INFORMATION CONTACT:

Mr. Raymond D. Chalmers (3AH12), Air Programs Branch, U.S. Environmental Protection Agency, Region III, Curtis Building, Sixth and Walnut Streets, Philadelphia, PA 19106, Telephone: 215–597–8309.

SUPPLEMENTARY INFORMATION: Elsewhere in today's **Federal Register**, EPA has published a notice approving, with certain conditions, West Virginia's State Implementation Plan (SIP) revision for attaining total suspended particulae (TSP), ozone (O_3), and sulfur dioxide (SO_2) air quality standards. This notice proposes the deadlines associated with the conditions EPA has established.

The SIP revisions that EPA has conditionally approved, and the conditions and deadlines EPA has established for correcting the deficiencies in these revisions, are:

1. West Virginia's SIP revision for attaining primary total suspended particulate standards in the Steubenville-Weirton-Wheeling Interstate AQCR and in those portions of Union and Winfield Magisterial Districts in Marion County west of Interstate Route 79, for attaining the ozone standard in the Kanawha Valley Intrastate AQCR, and for attaining sulfur dioxide standards in the New Manchester—Grant Magisterial District in Hancock County, is approved on the condition that:

(a) West Virginia adopts a permanent regulation requiring preconstruction review and emission offsets by (nine months after publication date of this notice). This regulation must be submitted to EPA for inclusion in the West Virginia SIP.

(b) West Virginia keeps a temporary regulation requiring preconstruction review and emission offsets in effect until EPA approves a permanent regulation.

(c) West Virginia submits all permits issued under the provisions of it temporary preconstruction review and offset regulations to EPA as SIP revisions.

(d) West Virginia submits to EPA by September 30, 1980, an adequate analysis of the health, economic, energy and social effects of its SIP revision, and an adequate summary of the public comments on this analysis.

2. West Virginia's SIP revision for attaining the ozone standard in the Kanawha Valley Intrastate AQCR is approved on the condition that West Virginia submits an adequate test method for Regulation XXIII to EPA by September 30, 1980 for inclusion in the West Virginia SIP.

3. West Virginia's SIP revision for attaining total suspended particulate standards in the Steubenville-Weirton-Wheeling Interstate AQCR is approved on the condition that West Virginia revises Regulation VII and submits this revised regulation to EPA by February 1, 1981 for incorporation into the West Virginia SIP.

EPA invites the public to submit comments on whether the deadlines discussed above are acceptable and should be approved as a revision of the West Virginia State Implementation Plan. Comments should be submitted to the address given above.

The Administrator's decision to approve or disapprove the proposed revision will be based on the comments received and on a determination of whether the revision conforms to the requirements of Section 110(a)(2) of the Clean Air Act and of 40 CFR Part 51, Requirements for Preparation, Adoption, and Submittal of Implementation Plans.

Note.—Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and have determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(42 U.S.C. 7401–642)

Dated: March 5, 1980.

Jack J. Schramm,

Regional Administrator.

[FR Doc. 80-24556 Filed 8-13-80; 8:45 am]

BILLING CODE 6560-01-M

40 CFR Part 52

[FRL 1570-1]

State of West Virginia—Proposed Extension of the Deadline for Attaining Secondary TSP Standards

AGENCY: Environmental Protection Agency.

ACTION: Proposed rule.

SUMMARY: The State of West Virginia has asked EPA to approve a new deadline of July 1, 1980, for the State to submit State Implementation Plan (SIP) revisions for attaining secondary total suspended particulate (TSP) standards in the Steubenville-Weirton-Wheeling Interstate Air Quality Control Region (AQCR), the Tygart Magisterial District in Wood County, and Kanawha County and Valley Magisterial Distict of Fayette County. This notice requests public comment on whether this new deadline should be approved.

DATE: Comments must be submitted on or before September 15, 1980.

ADDRESSES: Copies of the proposed SIP revision and the accompanying support documents are available for inspection during normal business hours at the following offices:

U.S. Environmental Protection Agency, Air Programs Branch, Curtis Building, 6th & Walnut Streets, Philadelphia, PA 19106, ATTN: Raymond D. Chalmers

West Virginia Air Pollution Control Commission, 1558 Washington Street, East Charleston, West Virginia 25311. ATTN: Carl G. Beard, II

Public Information Reference Unit, EPA Library Room 2922, U.S. Environmental Protection Agency, 401 M Street, SW. (Waterside Mall), Washington, D.C. 20460

All comments on the proposed revision submitted within 30 days of publication of this notice will be considered and should be directed to:

Mr. Howard R. Heim, Chief, Air Programs Branch (3AH10), Air, Toxics & Hazardous Material Division, U.S. Environmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, PA 19106. ATTN: AK300bWVA.

FOR FURTHER INFORMATION CONTACT:

Raymond D. Chalmers, U.S. Envornmental Protection Agency, Region III, 6th & Walnut Streets, Philadelphia, PA 19106, Telephone Number: (215) 597–8309.

SUPPLEMENTARY INFORMATION: The Clean Air Act (CAA) Amendments of 1977 required States to submit SIP revisions for all areas where National Ambient Air Quality Standards (NAAQS) had not been attained. The CAA established a deadline of January 1, 1979, for the submission of these SIP revisions.

West Virginia submitted a SIP revision for attaining primary NAAQS for total suspended particulates, sulfur dioxide, and ozone. This SIP revision is being approved, with certain conditions, in a notice published elsewhere in today's **Federal Register.**

West Virginia has not submitted an adequate SIP revision for attaining secondary NAAQS for total suspended particulates (TSP) for three areas. Such a revision is required to assure the attainment of secondary TSP standards in the Steubenville-Weirton-Wheeling Interstate AQCR, the Tygart Magisterial District in Wood County, and Kanawha County and Valley Magisterial District of Fayette County.

West Virginia has asked EPA to approve a new deadline of July 1, 1980, for the submission of this revision. West Virginia requested that EPA approve this new deadline under the authority delegated EPA by Section 110(b) of the Clean Air Act. Section 110(b) of the CAA authorizes EPA to extend the period for submission of any plan which implements a national secondary ambient air quality standard for a period not to exceed eighteen months from the date otherwise required for the plan's submission.

EPA has listed the requirements a State must meet to receive an extension in 40 CFR 51.31. Three major requirements are listed. First, a request for an extension must be for areas in a priority I or II region. All the areas for which West Virginia has requested extensions are in priority I or II regions. Second, a request for an extension must show that attainment of secondary standards will require emission reductions exceeding those which can be achieved through the application of reasonably available control technology (RACT). EPA believes that emission reductions exceeding those which can be achieved through the application of RACT will be needed to bring into attainment those areas for which West Virginia has requested extensions. Third, a request made with respect to any State's portion of an interstate region must either be submitted jointly with requests for such extensions from all other States within the region, or show that all other States within the region have been notified of the request. West Virginia has requested extensions for two areas that are part of interstate regions. These are the West Virginia portion of the Steubenville-Weirton-Wheeling Interstate AQCR and the Tygart Magisterial District in Wood County. West Virginia has notified Ohio of its request for an extension in these areas.

EPA believes that West Virginia has met the requirements for obtaining a new deadline of July 1, 1980 for the submission of a SIP revision for attaining secondary TSP standards in the Steubenville-Weirton-Wheeling Interstate AQCR and the Tygart Magisterial District in Wood County, and Kanawha County and Valley Magisterial District of Fayette County. Therefore, EPA is proposing approval of West Virginia's request for a new deadline of July 1, 1980 for submitting a SIP revision for these areas.

EPA invites the public to submit comments on whether West Virginia's deadline for submitting plans for attaining secondary TSP standards should be changed. Comments should be submitted to the address given above.

The Administrator's decision to approve or disapprove the proposed revision will be based on the comments received and on a determination of whether the amendments meet the requirements of Section 110(b) of the Clean Air Act and of 40 CFR Part 51.

Note.—Under Executive Order 12044 EPA is required to judge whether a regulation is "significant" and therefore subject to the procedural requirements of the Order or whether it may follow other specialized development procedures. EPA labels these other regulations "specialized." I have reviewed this regulation and have

V 45 A G 14 80 UMI

determined that it is a specialized regulation not subject to the procedural requirements of Executive Order 12044.

(42 U.S.C. 7401–642)

Dated: March 5, 1980.

Jack J. Schramm,

Regional Administrator.

BILLING CODE 6560-01-M

40 CFR Part 80

[FRL 1560–1]

Fuels and Fuel Additives; Petition To Repeal Lead Phasedown Regulations

AGENCY: Environmental Protection Agency (EPA).

ACTION: Denial of petition to repeal regulations controlling lead content in gasoline.

SUMMARY: On January 17, 1980, Du Pont Corporation (Du Point) submitted a petition seeking repeal of certain EPA regulations controlling the lead content in gasoline (the "lead phasedown regulations"). Du Pont also submitted an addendum to that petition dated May 19, 1980. EPA has examined Du Pont's petition, the addendum, and information submitted by Du Pont and others in support of the petition and finds that the various submissions do not contain new information warranting a new rulemaking proceeding to consider revision or revocation of the regulations. For this reason EPA denies Du Pont's petition.

ADDRESS: Information concerning this action may be found in Docket EN 79–14, Central Docket Section, Environmental Protection Agency, Gallery I–West Tower, 401 M St., S.W., Washington, D.C. 20460.

FOR FURTHER INFORMATION CONTACT: Susan Finder, Attorney-Advisor, Fuels Section, Field Operations and Support Division, U.S. Environmental Protection Agency, at (202) 472–9367.

SUPPLEMENTARY INFORMATION:

Background

The original lead phasedown regulations were promulgted on December 6, 1973 (38 FR 33734), under Section 211(c) of the Clean Air Act, 42 U.S.C. 7545(c). They established a 0.5 gram per gallon (gpg) final standard effective January 1, 1979. In promulgating the 0.5 gpg standard the Administrator took into consideration the known health effects of lead exposure and the difficulty of establishing a safe exposure level, and concluded "it would be prudent to reduce preventable lead exposure from automobiles emitting airborne lead to the fullest extent possible." (38 FR 1259, January 10, 1973.)

Refiners and lead manufacturers sought judicial review of the regulations. The U.S. Court of Appeals for the District of Columbia Circuit set aside the regulations by a 2–1 vote on December 20, 1974. On March 17, 1975, the Court granted the Agency's petition for rehearing *en banc* and vacated the prior judgment and opinions, and on March 19, 1976, upheld the regulations. *Ethyl Corp.* v. *EPA*, 541 F.2d. 1 (en banc) (D.C. Cir. 1976), *Cert. denied* 426 U.S. 941 (1976). The Court concluded that the Administrator had not been arbitrary and capricious in promulgating the regulations but had in fact "handled an extraordinarily complicated problem with great care and candor" (541 F.2d. at 47).

EPA amended the regulations on September 28, 1976, to provide for a standard of 0.8 gpg effective January 1, 1978, and a 0.5 gpg standard effective October 1, 1979 (41 FR 42675). These amendments were designed to give refiners sufficient time to install the equipment necessary to meet the reduced lead level without causing a gasoline shortage.

The interruption of crude oil supplies from Iran in 1979 led the Agency to believe that a further temporary relaxation might be warranted. Therefore, on June 6, 1979, EPA proposed to amend the lead phasedown regulations to permit refiners to meet a 0.8 gpg standard until October 1, 1980, provided these refiners would produce increased percentages of unleaded gasoline (44 FR 33116). On June 20, 1979, a public hearing was held in Washington, D.C., on the proposed amendments. Du Point participated in the rulemaking. On September 12, 1979, the regulations were amended substantially as proposed ("the 1979 rulemaking") (44 FR 53144). At that time, EPA made clear that "we continue to believe that a 0.5 gpg lead standard should be achieved as rapidly as possible for purposes of public health but that this *short-term* relaxation should not have a substantial health effect." *Id.* (emphasis added).

Under 307(b)(1) of the Act, 42 U.S.C. § 4607(b)(1), the time for seeking judicial review of the 1979 rulemaking expired on November 11, 1979.[1] Du Pont did not seek judicial review.

On January 17, 1980, the Du Pont Corporation submitted a document to the Environmental Protection Agency entitled "Petition to Repeal Regulations Controlling Lead Content in Gasoline."[2] On May 19, 1980, Du Pont submitted an addendum to the petition. In general, the petition seeks to show that because of decreased demand for gasoline and an increasing proportion of vehicles using unleaded gasoline, revocation of the lead phasedown regulations would make little difference in terms of compliance with the national ambient air quality standard for lead and, further, that it would offer certain energy benefits.[3]

Criteria for Review of Du Pont's Petition

Du Pont asserts that it is submitting its petition in accordance with certain procedures set forth in *Oljato Chapter of the Navajo Tribe* v. *EPA*, 515 F.2d 654, 666 (D.C. Cir. 1975), which govern petitions for revision of rules promulgated under the Clean Air Act. The procedures described in *Oljato* are essentially that: (1) a petition for revision of such a rule, along with any supporting material, should first be submitted to the Agency; (2) the Agency should respond to the petition and, if it

[1] The **Federal Register** notice appeared on September 12, 1979. Section 307(b)(1) of the Act states, in relevant part, that "a petition for review shall be filed within sixty days from the date notice of such promulgation appears in the **Federal Register**, except that if such petition is based solely on grounds arising after such sixtieth day, then any petition for review shall be filed within sixty days after such grounds arise."

[2] The Petrochemical Energy Group and the Ethyl Corporation also submitted information in support of the petition. Their submissions have been considered in this decision and are referred to below as appropriate.

[3] With its petition, Du Pont submitted nine exhibits:

Exhibit 1, a copy of the original phasedown regulations (38 FR 33734);

Exhibit 2, a copy of EPA's environmental impact statement for its ambient air standard for lead;

Exhibit 3, a Du Pont technical brief, "Forecast of Gasoline Demand Through 1990";

Exhibit 4, a technical paper by three Du Pont engineers, "Projections of Motor Vehicle Fuel Demand and Emissions";

Exhibit 5, a Du Pont memorandum, "Projected Air Lead Quality";

Exhibit 6, "Unleaded Gasoline Sales in Two Metropolitan Areas";

Exhibit 7, "Critique of a Study by the U.S. Department of Housing and Urban Development on Gasoline Lead Use and Blood Lead Levels of Children in New York City," by Du Pont employee E. S. Jacobs;

Exhibit 8, a copy of "Fact Sheet on the President's Program," April 4, 1979; and

Exhibit 9, a letter from the Du Pont Corporation, commenting on Docket No. ERA–R–77–7 (Department of Energy), Motor Gasoline De-Control.

In its addendum, Du Pont submitted the following items:

Appendix A, Affidavit of Anthony J. Yankel, P. E., one of the three author of a study considered by EPA in connection with establishing the national ambient air standard for lead; and

"Analysis of a Study by the Department of Housing and Urban Development on Blood Lead Levels of Children in New York City," by Emmet S. Jacobs and Charles G. Pfeifer, of Du Pont's Petroleum Laboratory.

denies the petition, set forth its reasons; and (3) if the petition is denied, the petitioner may seek judicial review pursuant to Section 307(b) of the Act. *Oljato, supra*, 515 F.2d at 666. By this notice the Agency is responding to Du Pont's petition and is setting forth the reasons for its decision.[4]

The scheme devised in *Oljato* was designed to address the situation where purportedly new information becomes available after promulgation of a rule. The Court concluded that such "new information" should be presented to the Agency first so that it may determine what administrative action, if any, should be taken before the matter is reviewed by a court. Under this scheme, the threshold determination to be made is whether a petitioner has submitted "new information."

If the information supporting a petition was raised or could have been raised in the original rulemaking, I do not consider it new information of the sort contemplated by the *Oljato* scheme and, accordingly, would not view it as warranting my reopening the previous rulemaking. This view is consistent with Section 307(d)(7)(B) of the Act, which governs certain petitions for reconsideration.[5] Moreover, to hold otherwise would permit a petitioner to circumvent the limitation on judicial review specified in Section 307(b)(1) of the Act. That section reads in pertinent part:

> Any petition for review under this subsection shall be filed within sixty days from the date notice of such promulgation, approval, or action appears in the Federal Register, except that if such petition is based solely on grounds arising after such sixtieth day, then any petition for review under this subsection shall be filed within sixty days after such grounds arise.

Section 307(b)(1) is designed to bring about a measure of finality to Agency rulemaking by limiting the period during which challenges can be made. If a party could cure its failure to seek judicial review during the period specified by petitioning the Agency for revision or revocation of the original rulemaking, based on information that was available at the time of the original rulemaking, and then seeking judicial review of the Agency's action on the petition, one of the main purposes of Section 307(b)(1) would be defeated.[6]

Assuming the information presented in the petition is "new" in the sense that it was not and could not have been presented in the original rulemaking, I must then determine whether it warrants my convening a supplemental rulemaking to consider revision or revocation of the regulations in question.

Although the Act does not provide specific criteria for making such a determination in the context of petitions for revision or revocation of regulations, it does not leave me completely without guidance. Section 307(d)(9)(A) suggests that the ultimate test of my threshold decision on such a position (i.e., my determination whether the petition and supporting materials warrant further rulemaking proceedings) is whether, in light of the information presented, the decision is arbitrary, capricious, or an abuse of discretion.[7] In addition, Section 307(d)(7)(B) provides some guidance in determining whether new information warrants the commencement of supplementary proceedings.[8] That section requires me to convene a proceeding for reconsideration if the new grounds presented are of "central relevance to the outcome of the rule." In another situation, I have interpreted this phrase as meaning that the petitioner must demonstrate that its objections, if assumed to be true, would cause me to seriously consider changing the rule previously promulgated. Denial of Petition for Reconsideration or Revision of the Lead Ambient Air Quality Standards, 45 FR 41211 (June 18,1980).

As a general matter, I conclude that the proper test in assessing new information in the context of a petition for revision or revocation of a rule is roughly the same as that for petitions for reconsideration under Section 307(d)(7)(B); that is, whether the petitioner has demonstrated that its objections, if assumed to be true, would cause me to seriously consider revising or revoking the rule previously promulgated.[9]

In summary, the criteria I am applying in deciding whether to initiate a new rulemaking proceeding in response to Du Pont's petition are that: (1) The petition must be based on information that was not and could not reasonably have been presented during the original rulemaking; and (2) Du Pont's objections, if assumed true, must be of such significance that they would cause me to seriously consider revising or revoking the regulations.

Discussion

Du Pont's petition and the supporting material fail to meet the criteria specified above. For the most part, Du Pont has relied on information that was presented or could have been presented during the 1979 rulemaking. Furthermore, none of the information submitted by Du Pont is of such significance that it would cause me to seriously consider revising or revoking the rule.

Therefore, I am not required to review once again the regulations as promulgated. Indeed, I continue to believe that the lead phasedown regulations are a reasonable exercise of my authority under Section 211 of the Clean Air Act to protect public health and welfare.

[4] Du Pont also cites Section 108(c) of the Act, 42 U.S.C. 7408(c), as a basis for its petition. Section 108(c) concerns review and revision of air quality criteria documents and information on air pollution control techniques issued under Section 108(a)(2) and (b)(1). Du Pont has not explained its pertinence to revision or revocation of the lead phasedown regulations, which were promulgated under Section 211(c) of the Act. For present purposes, I believe it is sufficient to indicate my conclusion that Section 108(c), if pertinent at all, would not alter the criteria I have used in evaluating Du Pont's petition.

[5] Section 307(d)(7)(B) requires me to convene a proceeding to reconsider a rule if the person raising an objection can demonstrate, among other things, that it was impractical to raise such objection during the comment period or that the grounds for such objection arose after the comment period but within the time specified for judicial review. Du Pont has not relied on this section as the basis for its petition, and I have previously determined that Section 307(d)(B) is only applicable where the grounds for a petition arise after the comment period but within sixty days from the date a rule is published in the Federal Register. *See* Denial of Petition for Reconsideration or Revision of the Lead Ambient Air Quality Standards, 45 FR 41211 (June 18, 1980). In enacting Section 307(d)(7)(B), however, Congress was aware of the *Oljato* decision and intended to confirm it, particularly in requiring that purportedly new information be presented first to EPA so that the Agency may determine, in the first instance, whether supplementary proceedings are warranted. *See* H.R. Rep. No. 95–294, 95th Cong., 1st Sess. 323 (1977). Accordingly, I believe it is appropriate to view Section 307(d)(7)(B) as offering some guidance in assessing petitions for review that purport to be based on new information and are subject to the procedures set forth in *Oljato*.

[6] In a somewhat analogous context, the courts have viewed with disfavor attempts to present information or arguments in judicial review that could have been (but were not) first presented during the rulemaking process. *E.g., Lead Industries Association* v. *EPA*, No. 78–2201, slip op. at 87–88 (D.C. Cir. June 27, 1980); *American Iron and Steel Institute* v. *EPA*, 526 F.2d 1027, 1050 (3rd Cir. 1975). Similarly, Congress provided in Section 307(d)(7)(B) that "only an objection to a rule or procedure which was raised with reasonable specificity during the period for public comment (including any public hearing) may be raised during judicial review." Congress obviously sought to have parties raise all available objections during the rulemaking proceeding or not at all. The only exception provided is for objections based on "new information" of the sort specified in Section 307(d)(7)(B).

[7] *Cf. Union Electric* v. *EPA*, 427 U.S. 246, 256 (1975).

[8] *See* note 5, *supra*.

[9] For purposes of this decision, I have found it unnecessary to decide whether a greater or lesser showing is required to meet this test under Section 307(d)(7)(B) than in the present context. Nor have I found it necessary to decide whether or how circumstantial factors (for example, the imminence of scheduled reviews of regulations) may affect decisions on other petitions for revision or revocation of regulations.

I. A Major Portion of the Information Submitted by Du Pont Is Not "New Information"

Exhibits 1 and 2, identified in footnote 3 above, were generated by EPA prior to the promulgation of the September 1979 amendments to the phasedown regulations. Because EPA was obviously aware of these documents during the 1979 rulemaking, they cannot be considered to be "new information." Exhibit 9 was submitted by Du Pont to a Department of Energy rulemaking proceeding on Motor Gasoline De-Control in January 1979. Du Pont clearly had the opportunity to submit the information to EPA during the Agency's rulemaking.

Two other documents submitted by Du Pont, "An Analysis of a Study by the Department of Housing and Urban Development on Blood Lead Levels of Children in New York City" and Exhibit 7, "Critique of a Study by the U.S. Department of Housing and Urban Development on Gasoline Lead Use and Blood Lead Levels of Children in New York City," challenge a HUD study considered by EPA in the 1979 rulemaking. Du Pont is not submitting new data contradicting the results of the study, but is merely fashioning arguments why EPA should not rely on the study. Had Du Pont believed any reliance on the study was misplaced, it had the opportunity to state its objections fully during the 1979 rulemaking.

Du Pont also argues that substantial energy savings are possible if the lead phasedown regulations are revoked. In support of this argument, Du Pont submitted a copy of the press release for the president's Energy Message of April 5, 1979. The EPA was, of course, aware of the press release during the 1979 rulemaking, and Du Pont could, in any event, have submitted it at that time. The EPA was also aware, during the 1979 rulemaking, of the argument concerning the possible energy savings that might result from revocation of the phasedown program. Indeed, the Ethyl Corporation presented information in support of that argument in the 1979 rulemaking.[10] The energy arguments made now are virtually identical to those made and considered in the 1979 rulemaking. Therefore, they can hardly be regarded as new.

As is evident from the discussion above, much of the information Du Pont cites to support its petition was or could have been raised during the 1979 rulemaking. To that extent, I do not view the petition as presenting new information that would warrant my convening a proceeding for revision or revocation of the regulation. Nevertheless, I will discuss the information submitted and explain why it would not cause me to reconsider the regulations.

II. The Information Submitted by Du Pont Is Not of Such Significance That it Would Cause Me to Seriously Consider Changing the Rule Previously Promulgated

In general, the information submitted by Du Pont covers three subject areas: projected air quality, gasoline lead and blood lead levels, and the economic and energy impacts of revoking the phasedown requirements. Assuming for present purposes that all of the information submitted is true, none of it is of such significance that I would seriously consider revising or revoking the phasedown regulations.

A. Submissions Concerning Projected Air Quality

Du Pont cites its Exhibits 3–6 as demonstrating that because of the growth of unleaded gasoline use, due to sales of newer cars requiring unleaded gasoline, revoking the phasedown regulations would affect only minimally compliance with the national ambient air quality standards (NAAQS) for lead. Because the NAAQS for lead are intended to protect the public health with an adequate margin of safety,[11] Du Pont argues that the phasedown regulations are no longer necessary on health grounds. To the contrary, Du Pont's own analysis (assuming it is accurate) shows that the regulations are needed and to a greater extent than previously thought.

Du Pont uses its ESCON (estimated consumption) model (Exhibit 4) along with new gasoline demand estimates (Exhibit 3) to generate the projections of ambient air lead levels contained in Exhibit 5. Recent data submitted by Du Pont suggest both reduced total annual gasoline usage as well as reduced rate of change-over from leaded to unleaded gasoline. The newly projected lead levels indicate rates of compliance by air quality control regions (ACQRs) with the NAAQS for lead different from the estimates Du Pont submitted in the 1979 rulemaking. Du Pont's current projections suggest that 17 AQCR's will not comply with the NAAQS for lead in 1980, even if the lead phasedown regulations are preserved, while 28 AQCRs would not comply if the phasedown regulations were revoked. The corresponding numbers for 1982 are 6 and 14 respectively. In other words, by Du Pont's own analysis, the lead phasedown regulations are in fact necessary if 11 AQCR's in 1980 and 8 AQCR's in 1982 are to achieve the reductions in ambient lead levels needed to protect the public from the hazards of airborne lead.

In comments (docket EN–79–14, II–B–2–08) and testimony on the 1979 proposal (transcript of June 20, 1979 hearing at 103–104), Du Pont claimed that maintaining the 0.8 gram per gallon standard indefinitely ("arrested phasedown") would result in 22 AQCRs not complying with the ambient air lead standard in 1980, while going to 0.5 gpg in October 1980 would result in 20 noncomplying AQCRs. The projections for 1982 were 22 and 9, respectively. According to Du Pont's statement at that time, if the phasedown requirements were revoked "the number of regions not meeting the standard would not be much different at any one time from that of the arrested phasedown case." (EN–79–14, II–B–2–08, Du Pont's prepared statement at 13). In response, the Agency concluded that compliance with NAAQS for lead of two additional AQCRs in 1980, along with other factors, was sufficient reason for maintaining the phasedown program with 0.5 gpg becoming effective October 1, 1980. The information now indicating that attainment of the NAAQS in 11 AQCRs in 1980 depends on the phasedown regulations (assuming the information is correct) is an even more compelling reason for preserving the phasedown requirements than the information in the earlier record.

The significant increase in non-complying regions that would result if the phasedown regulations were revoked would, of course, raise the numbers of persons whose health potentially would be threatened by excess lead exposure. Although the Du Pont projections (assuming they are accurate) indicate that "natural phasedown" (that resulting from the increasing proportion of vehicles that require unleaded gasoline) would achieve the same degree of compliance with the NAAQS for lead as would the current regulations in 1985, the intervening five years could be critical for the millions whose health could be affected adversely. Moreover, data from Du Pont indicate that the shift from leaded to unleaded gasoline is proceeding slower than was earlier anticipated. Even with decreased demand, the slower shift will limit the effectiveness of a natural phasedown, and will make the phasedown regulations even more important to the protection of public health.

In addition, Du Pont has not addressed the problem of lead from dustfall (deposited lead) in any of the documents submitted with its petition. Lead from auto emissions contributes to the amount of lead in non-air sources such as soil, vegetation, and surfaces near highways and streets. In promulgating the original phasedown regulations, the EPA sought to decrease the amount of deposited lead, noting that:

> lead from gasoline is the most ubiquitous source of lead found in both the air and the dirt and dust in urban areas. Human exposure to this lead takes place by inhalation and by ingestion of dirt and dust contaminated by air lead fallout. Since exposure to lead among the general population is widespread, it is reasonable that efforts be made to reduce preventable sources of lead exposure including lead emissions from gasoline.

38 FR 33734–5 (1973). In *Ethyl,* the Court of Appeals specifically upheld EPA's reliance on evidence concerning lead exposure from dustfall. *Ethyl, supra,* 541 F.2d at 46. The NAAQS for lead were not designed to protect against exposure from non-air sources, including those resulting from automobile emissions.[12] For these reasons, Du Pont's basis premise, that attainment of the NAAQS will protect health fully from all effects resulting from lead emissions from automobiles, is incorrect. I continue to believe that it is prudent to reduce such emissions, by means of the phasedown regulations, to minimize their contribution to non-air sources of exposure.

Du Pont also submitted an affidavit by Anthony Yankel, one of the authors of one of the studies to which EPA referred in the preamble to the regulations establishing the NAAQS for lead.[13] In his affidavit, Mr. Yankel claims he has discovered an error of 25 percent or more in a model used to predict air lead levels in the study. He also objects to the manner in which EPA considered the study in establishing the NAAQS for lead.

In response to a separate petition filed by the Lead Industries Association, Inc., seeking revision of the NAAQS for lead, I concluded after careful consideration that Mr. Yankel's affidavit did not provide an adequate basis to warrant a supplemental rulemaking proceeding to revise the NAAQS for lead. Among other things, I concluded that his assertions, if assumed to be correct, were not centrally relevant to the outcome of the rulemaking on the NAAQS.[14] 45 FR 41211.

The only apparent relevance Mr. Yankel's affidavit would have to the lead phasedown regulations would be to the extent it called into question the level of the NAAQS for lead, which was one of the factors EPA considered in the 1979 rulemaking. Since I have previously determined that the affidavit does not warrant commencement of a proceeding to revise the NAAQS, I now conclude that it does not warrant commencement of a proceeding to revise or revoke the lead phasedown regulations.

B. Submissions Concerning Gasoline Lead and Blood Lead Levels

As noted above Du Pont submitted two documents to challenge a Housing and Urban Development (HUD) study considered by EPA in the 1979 rulemaking. This study by Dr. Irwin Billick and two associates[15] strongly suggested a highly significant relationship between geometric mean blood lead levels and the amount of lead present in gasoline sold during the same period.

Du Pont makes two claims concerning the HUD study: (1) the author of the study, Dr. Irwin Billick, used gasoline lead data that were not representative of lead consumption during the period of study; and (2) his method of analysis does not result in a correlation between gasoline lead and blood lead levels, let alone a prediction of an appropriate gasoline lead level to protect human health. For present purposes, I need not decide the merits of these claims. As indicated below, I would not seriously consider changing the phasedown requirements even if the claims were shown to be true. Nonetheless, I believe it is appropriate to indicate that I have some reservations concerning the merits of the claims.

As to the representativeness of the gasoline lead data used in the study, Du Pont claims that the study should have used data from gasoline sold only in New York City, and not from the New York metropolitan area.[16] However, it appears to have been reasonable to use three-state regional gasoline consumption data to calculate lead levels during 1970–76, because many cars fill up in the New Jersey, Connecticut, or suburban New York areas, where gasoline prices tend to be lower than in the inner city.[17] In addition, the lead levels that Dr. Billick computed are supported by data accumulated by the Motor Vehicle Manufacturers Association (MVMA) for New York City during this period.[18]

As to Du Pont's second claim, Dr. Billick appears to have derived a direct correlation between gasoline lead and blood lead levels. Changes in gasoline lead levels were followed, point by point, by changes in children's blood lead levels. Dupont has raised arguments that the statistics underlying the study are not reliable for various reasons such as that only a particular population was studied, that the study was not longitudinal, and that the number of samples and type of blood samples changed during the period of the study. First, these so-called errors would not necessarily alter the results of the study. The results only purported to apply to the population sampled. Second, and more importantly, the elements Du Pont raised, if true, would not explain the simultaneous concomitance shown between blood lead levels and gasoline lead. That is, the correlation demonstrated between blood lead levels and lead in gasoline could be shown t be unrealiable only if there was a third factor, somehow tied to one of the other two, which could have led to the corresponding rise and fall in measured blood lead levels and gasoline lead levels. Du Pont has not suggested the existence of such a factor. Statistical analysis by Billick shows that for black children in New York City, approximately 80% of the variation observed in blood lead levels can be explained by variations in gasoline lead levels. For these reasons, I conclude that

[10] Analysis by Turner, Mason and Solomon, consulting engineers, entitled "Impact of Lead Antiknock Usage on Gasoline Production and Crude Oil Consumption," dated July 20, 1979, in docket EN–79–14. Ethyl also submitted the analysis in support of the Du Pont petition as Exhibit B. The comments of the Petrochemical Energy Group, addressing this point, are virtually identical to those submitted by the Group during the 1979 rulemaking.

[11] The ambient air lead standard of 1.5 micrograms per cubic meter was set based on my judgment that the level was the maximum ambient level allowable to protect public health from airborne lead. 43 FR 46246 (1978). The lead standard was upheld in *Lead Industries Association, Inc.* v. *EPA,* No. 78–2201 (D.C. Cir. June 27, 1980)

[12] *See, e.g.,* 43 FR 46253–54 (Oct. 5, 1978).

[13] "The Silver Valley Lead Study—The Relationship Between Childhood Lead Levels and Environmental Exposure," 27 J.A. Air Pollut. Cont. Ass'n 783–87 (1977).

[14] In *Lead Industries Association, Inc* v. *EPA* No. 78–2201 (D.C. Cir. June 27, 1980) (on motion to hold in abeyance), the Court noted a number of questions concerning both the accuracy and the significance of the Yankel affidavit and concluded that it did not warrant the Court's delaying a decision on the merits of the NAAQS for lead. Slip opinion at 8–10.

[15] Billick, Curran, and Shier, *Relation of Pediatric Blood Lead Levels to Lead in Gasoline,* No. II–A–4 in Docket No. EN–79–14.

[16] Du Pont has included in its addendum data on gasoline lead levels from a private survey conducted by the Ethyl Corporation from 1972 to 1978. These data seem questionable since they show no seasonal fluctuation in gasoline lead use, as is normally found to be the case.

[17] *See, e.g.,* American Automobile Association Fuel Gauge Report, July 1, 1980.

[18] MVMA National Fuel Surveys: Fall Season—January 15, 1976, Spring Season—July 15, 1976, Fall Season—January 15, 1977.

the Billick study is evidence of a correlation between blood lead levels and lead in gasoline.

In any event, even if the HUD study had not been considered in the 1979 rulemaking, I would have reached the same conclusion concerning the desirability of achieving the 0.5 gpg level. It should be noted that the original phasedown regulations were promulgated and upheld without the evidence contained in the HUD study.[19] For these reasons, I would not seriously consider changing the lead phasedown requirements even if Du Pont's objections to the HUD study were shown to be valid.

C. Submissions Regarding Energy Considerations

Lastly, Du Pont suggests that certain energy benefits would occur if the regulations were revoked. I do not read Du Pont's petition as arguing that these potential benefits provide an independent ground for revocation of the regulations. Moreover, as indicated previously, the information submitted on this point was submitted or could have been submitted in the 1979 rulemaking. Indeed, the arguments made are virtually identical to those considered in the 1979 rulemaking.

For these and other reasons, discussed below, I would not seriously consider revoking or revising the phasedown regulations even if Du Pont's energy arguments were shown to be correct. Although I need not decide their merits for present purposes, I believe it is appropriate to indicate that other information suggests that these arguments are overstated.

Reducing the lead content of gasoline does result in slightly higher usage of crude oil to provide constant gasoline output. As a review of the lead phasedown regulations reveals, the record has always shown that there is some energy penalty. Yet, currently gasoline stocks are at a high level, and gasoline demand has decreased.[20] Alternative technology exists for increasing octane levels in gasoline.[21] Other products, which do not apear to cause health related problems, such as ethanol, methyl tertiary-butyl ether (MBE), and tertiary-butyl alcohol (TBA), may be substituted in part for tetraethyl lead.[22] For these reasons, it appears that revoking the phasedown regulations would increase gasoline availability only minimally.

In any event, I believe Congress intended me to base regulation of fuels and fuel additives under Section 211(c)—the statutory basis for the phasedown regulations—primarily on protection of health, assuming that I may consider economic or social costs of the regulations at all.[23] Considering the nature of the health effects against which the phasedown regulations are intended to protect—particularly for Black and Hispanic urban children, who are exposed to large quantities of lead from automobile sources and may be especially sensitive to the harmful effects of lead [24]—I would not consider it appropriate to revoke the regulations even if the energy arguments made now were both new and shown to be correct.

Conclusion

For the reasons stated above Du Pont's petition is denied.

Note.—This is a nationally applicable, final Agency action. Under Section 307(b)(1) of the Clean Air Act, 42 U.S.C. 7607(b)(1), judicial review of this action is available *only* by the filing of a petition for review in the U.S. Court of Appeals for the District of Columbia Circuit within 60 days of [date of publication]. Under Section 307(b)(2), today's action may not be challenged later in a separate judicial proceeding brought by EPA to enforce the lead phasedown requirements.

Dated: August 7, 1980.

Douglas M. Costle,

Administrator.

[FRL 1570-6; OPP-00127]

FIFRA Scientific Advisory Panel; Open Meeting

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule notice.

SUMMARY: There will be a two-day meeting of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) Scientific Advisory Panel to discuss Subpart M: Data Requirements for Biorational Pesticides of the Guidelines for Registering Pesticides in the United States, and Subpart N: Chemistry Requirements: Environmental Fate. The meeting will be open to the public.

DATE: Thursday and Friday, September 4 and 5, 1980, from 9:00 a.m. to 5:00 p.m. daily.

ADDRESS: The meeting will be held at the: Marriott Hotel, 1999 Jefferson Davis Highway, Arlington, VA, 703–521–5500.

FOR FURTHER INFORMATION CONTACT: H. Wade Fowler, Jr., Executive Secretary, FIFRA Scientific Advisory Panel (TS–766), Office of Pesticide Programs, Rm. 803, Crystal Mall, Building No. 2, 1921 Jefferson Davis Highway, Arlington, VA 22202, 703–557–7560.

SUPPLEMENTARY INFORMATION: The agenda for this meeting is:

1. Review by the Panel on proposed rulemaking on Subpart M: Data Requirements for Biorational Pesticides of the Guidelines for Registering Pesticides in the United States;

1. Review by the Panel on proposed rulemaking on Subpart N: Chemistry Requirements, Environmental Fate of the Guidelines for Registering Pesticides in the United States;

3. Completion of any unfinished business from previous Panel meetings; and

4. In addition, the agency may present status reports on other ongoing programs of the Office of Pesticide Programs.

Copies of draft documents concerning item 1 and item 2 may be obtained by contacting William Preston, Hazard Evaluation Division (TS–769), Rm. 800, Crystal Mall, Building No. 2, at the address given above, telephone: 703–557–1405.

Any member of the public wishing to attend or submit a paper should contact Dr. H. Wade Fowler, Jr., at the address or phone listed above to be sure that the meeting is still scheduled and to confirm the Panel's agenda. Interested persons are permitted to file written statements before or after the meeting, and may, upon advance notice to the Executive Secretary, present oral statements to the extent that time permits. All statements will be made part of the record and will be taken into consideration by the Panel in formulating comments or in deciding to waive comments. Persons desirous of making oral statements must notify the Executive Secretary and submit the required number of copies of a summary no later than September 2, 1980.

Individuals who wish to file written statements are advised to contact the Executive Secretary in a timely manner to be instructed on the format and the number of copies to sumbit to ensure appropriate consideration by the Panel.

The tentative date for the next Scientific Advisory Panel meeting is October 7 and 8, 1980.

(Sec. 25(d), as amended, (92 Stat. 819; (7 U.S.C. 136)); sec. 10(a)(2), 86 Stat. 770 (5 U.S.C. App.))

Dated: August 8, 1980.

Edwin L. Johnson,

Deputy Assistant Administrator for Pesticide Programs.

[CGD 77-162]

Damage Stability Standards for Great Lakes Bulk Dry Cargo Vessels

AGENCY: Coast Guard, DOT.

ACTION: Advance notice of proposed rulemaking.

SUMMARY: The purpose of this notice is to inform the public of: (1) The plans and approximate scheduling for a regulatory proposal on improved damage stability/survivability standards for Great Lakes bulk dry cargo vessels of 1600 gross tons or more; (2) The effort to date including public response to a previous ANPRM concerning such a proposal; and (3) The results of the Maritime Administration's (MarAd) study of "Economic Benefits of Improved Watertight Subdivision for Great Lakes Bulk Carriers" with regard to the crew and ship safety viewpoint. This notice also provides interested parties with an opportunity to review and comment upon the MarAd study prior to the development of a stability standard by the Coast Guard.

DATE: Comments must be received on or before November 12, 1980.

ADDRESS: Copies of the Maritime Administration sponsored report on the economic benefits of subdivision of Great Lakes bulk carriers, (Report No. MA–RD–940–79031), are available for examination in Room 1206, Ship Characteristics Branch, Merchant Marine Technical Division (G–MMT–5/12), U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, D.C., 20593. Copies of this report may be purchased from the National Technical Information Service, Springfield, Virginia, 22151.

Comments may be mailed to Commandant (G–CMC/24), (CGD 77–162), U.S. Coast Guard, Washington, D.C., 20593. Comments may be delivered to and will be available for inspection or copying at the Marine Safety Council (G–CMC/24) Room 2418, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, D.C., 20593, (202) 426–1477, between the hours of 7 a.m. and 5 p.m. Monday through Thursday.

FOR FURTHER INFORMATION CONTACT: Mr. Jay Howell, Merchant Marine Technical Division (G–MMT–5/12), Room 1206, U.S. Coast Guard Headquarters, 2100 Second St., SW., Washington, D.C., 20593, (202) 426–2187. Normal business hours are 7 a.m. to 5 p.m., Monday through Thursday.

SUPPLEMENTARY INFORMATION

On March 16, 1978, the Coast Guard issued an Advance Notice of Proposed Rulemaking (ANPRM) at 43 FR 10946, concerning the development of damage stability standards for Great Lakes bulk dry cargo vessels. This ANPRM indicated that a minimum level of subdivision was under consideration, solicited comments on specific questions of a technical and economic nature, and referred to the ongoing Maritime Administration (MarAd) study of economic benefits of watertight subdivision of Great Lakes vessels. Nineteen comments were received in response to the ANPRM.

Drafting Information

The principal persons involved in drafting this notice are Mr. Jay Howell, Project Manager, Office of Merchant Marine Safety, and Lcdr. Jack Orchard, Project Attorney, Office of the Chief Counsel.

Discussion

The Coast Guard's primary objective in formulating damage stability standards for Great Lakes bulk dry cargo vessels is to reduce the loss of life associated with vessel sinkings on the Great Lakes, especially losses caused by catastrophic, rapid sinkings which preclude the employment of lifesaving equipment. A secondary consideration is to prevent traffic blockages caused by loss of buoyancy in restricted channels. In addition, damage stability standards are intended to produce vessel designs that provide sufficient resistance to flooding incidents to save the vessel and its cargo.

As evidenced by the responses to the ANPRM, the concept of damage stability standards for Great Lakes vessels is a complex issue. The need for improved crew and vessel safety measures has been generally recognized since the tragic loss of the S.S. Edmund Fitzgerald. Therefore, the philosophy of including some kind of damage stability standard in future designs was not questioned by the commenters. Few commenters questioned the technical feasibility of providing either one or two compartment subdivision for both new vessel construction and as a retrofit on existing vessels. However, opinions differed as to how this should be accomplished. Some commenters expressed a lack of confidence in "guillotine" gates acting as barriers to provide watertight subdivision on vessels configured for self-unloading. (Self-unloading ships employ a conveyor system which runs the length of the cargo space, typically 75% to 90% of the vessel length, to unload the bulk cargo. To provide watertight integrity between bulkheads, "guillotine" gates or similar devices are used to create a seal around the conveyor belt where it passes through a bulkhead.)

The economic impact of imposing a damage stability standard received considerable attention, with widely varied opinions concerning feasibility or advisability, particularly with respect to existing vessels. One company indicated that establishing a retroactive subdivision standard would probably bankrupt its operation. Commenters who opposed a subdivision standard suggested several alternative methods which might improve the safety of Great Lakes vessels: procedural steps such as assuring hatch cover weathertight integrity; more extensive vessel traffic control; and modification of load lines to the pre-1969 standard (which required greater freeboard values).

Builders, naval architects, and seamen's unions expressed varying degrees of enthusiasm for damage stability standards. However, no definitive suggestions were made regarding what standard to impose or what damage assumptions to use. The commenters urged the Coast Guard to recognize the effects of longitudinal subdivision on damage stability, and to consider technical problems such as additional piping requirements and longitudinal strength in the damaged condition.

The MARAD Subdivision Study

Several commenters requested the opportunity to review the MarAd study, "Economic Benefits of Improved Watertight Subdivision for Great Lakes Bulk Carriers", before they provided their comments regarding this ANPRM. The study examines the economic effect of fitting Great Lakes bulk dry carriers with one or two compartment subdivision. It compares the cost of providing various levels of compartmentation with the cost savings which may be realized through a reduction in the number of vessels which are sunk. Standard economic analysis procedures were used in the

study to determine the change in the expected Net Present Value (NPV) of a vessel with respect to the risk of sinking, for each level of subdivision considered. Net Present Value is a standard measure of the economic worth of a vessel, which can be calculated using the initial cost, annual operating costs, annual revenues, economic life span, and end-of-life salvage value. However, the NPV at some future date cannot be determined because these variables are subject to random elements of risk which could incur large, unpredictable salvage and repair costs or could cut short the economic life span of the vessel. Therefore, the NPV should be expressed as a probabilistic quantity such as the "Expectation Value" of NPV. This value, symbolized mathematically as E(NPV), varies as the risk of sinking changes, so it can be used as a measure of merit in comparisons of safety systems (safety related design considerations or pieces of safety equipment). Each safety related system can be associated with both a cost and a change in the risk of sinking. If the cost of the safety system exceeds the increase in E(NPV) associated with the decrease in risk achieved by the system, the value of the vessel is decreased, and an economic disbenefit is said to occur.

Conversely, if the increase in E(NPV) associated with the decrease in risk achieved by the safety system exceeds the cost of the system, the value of the vessel increases and an economic benefit accrues. The relationship between the risk of sinking and the change in E(NPV) is a complex one which is highly dependent on the cost of sinking and the initial economic assumptions: ship price, operating costs, revenues, and the interest rate.

The initial assumptions made will determine the outcome of the study regarding both the quantitative assessment of the benefit or disbenefit and the conclusions reached. A salient point established early in the study is that a safety system of any kind is an economic liability to the vessel on which it is installed unless it is actually used to save the vessel or the lives of its crew, at which point practically any expense may be economically justified. The Coast Guard has reviewed the MarAd study with particular regard to ship survivability and crew safety rather than to economic benefit alone, and finds the study quite encouraging on these two points.

The study shows the Coast Guard that:

(1) Either one or two compartment subdivision protection is physically achievable on virtually all current Great Lakes ship arrangements if it is incorporated in the initial design.

(2) The number of additional bulkheads required to achieve a one or two compartment standard of subdivision may be quite small. In some cases, especially for one compartment protection, no more bulkheads are needed, but a slightly different arrangement of the same number of bulkheads provides the desired level of subdivision protection.

(3) The study utilizes the time honored standard of an average collision penetration of B/5 in its evaluation. The Coast Guard supports this decision as a first step for evaluation purposes. However, it may be proper to consider the greater possibility of minor damage (less than 760 mm (30 inches) penetration) in regard to the relative vulnerability of the ship to any impact penetration.

Alternatives To increase Survivability

The MarAd study and the PRM responses suggest several alternatives for improving damage stability or survivability, including several preventative measures. These alternatives can be categorized as either operational procedures or design and construction features.

Each of the suggested alternatives in the study can be effective in preventing or mitigating the effects of some of the mechanisms of vessel loss caused by flooding, so each should be analyzed before deciding on the most effective course of action. Alternative design and construction features include: compartmentation (such as that assumed in the MarAd study); other subdivision measures (including longitudinal bulkheads); stronger hatch covers and/or improved hatch and vent cover seals; and additional pumps. Alternative operational procedures include: weather limited operations (a heavy weather warning system); vessel traffic control; increased freeboard requirements; and hatch cover closure inspections.

Within each category of alternative there is a range of measures which could be instituted to improve the survivability or damage stability of Great Lakes bulk dry cargo vessels. The increased level of safety or survivability to be achieved is comparable to the magnitude of the changes made, thus the alternatives are susceptible to evaluation to ensure that an effective level of safety is achieved at a reasonable cost. The variety of worthwhile alternatives and combination of alternative measures which could be imposed is significant, so evaluation will require a considerable review effort by the Coast Guard. The damage stability measures adopted should be effective against most of the five major mechanisms of vessel loss:

(a) Loss of transverse stability (capsizing),
(b) Loss of longitudinal strength,
(c) Foundering,
(d) Plunging,
(e) Flooding from impact damage (collision, grounding, pier or tug impact, etc).

Passive containment systems such as compartmentation or subdivision are still attractive alternatives for several reasons: they are the traditional, proven methods of providing for damage stability in ship design; they are effective in four of the five major mechanisms of vessel loss listed above (with the exception of plunging); they require no crew action (other than maintenance) to function; and no international agreements would be necessary to implement a subdivision requirement. However, installation of additional bulkheads on existing vessels would be an expensive and time consuming process. In addition, if the hull girder is to withstand the loading in the flooded condition, longitudinal strengthening may be necessary. Extra bulkheads may also require the installation of additional piping systems, another expensive item.

Active prevention systems such as vessel traffic control and weather limited operation would require little or no direct vessel modification to achieve an increase in vessel safety. However, such systems would require active participation by the vessel's Master, improved weather and wave forecasting capabilities, and additional communications equipment. International agreements with Canada and compliance by foreign Masters would be required. In addition, these schemes would not mitigate the effects of an actual casualty (such as providing additional time for lifesaving measures). Furthermore, the increased communications system and weather/wave forecasting capability would require a substantial annual increase in Coast Guard budget allocations for both equipment and personnel to provide coverage over the Great Lakes region. Finally, it should be recognized that prevention systems alone will provide no protection in the event of flooding, should it occur despite all precautions.

Future Plans

Although this ANPRM is intended primarily to inform interested parties of the status of this rulemaking effort, comments and suggestions regarding subdivision and damage stability standards for Great Lakes bulk dry cargo vessels are solicited. The Coast Guard intends to evaluate the MarAd study as well as comments by the public regarding this study prior to publication of a proposed set of regulations.

(R.S. § 4405, (46 U.S.C. 375); R.S. § 4417, (46 U.S.C. 391); R.S. § 4462, (46 U.S.C. 416))

Henry H. Bell,

Rear Admiral, U.S. Coast Guard, Chief, Office of Merchant Marine Safety.

BILLING CODE 4910-14-M

Research and Special Programs Administration

49 CFR Parts 171, 173, 178

[Docket No. HM-176; Notice No. 80-7]

Specification and Usage Requirements for New DOT 3AL Seamless, Aluminum Cylinders

AGENCY: Materials Transportation Bureau (MTB), Research and Special Programs Administration, D.O.T.

ACTION: Notice of proposed rulemaking.

SUMMARY: The MTB proposes to amend the Department's Hazardous Materials Regulations to establish a new specification for aluminum cylinders and to authorize use of these cylinders for certain hazardous materials. A proposed new § 178.46 would contain the specification for the new 3AL aluminum cylinder which, bascially, would be constructed in accordance with recommended specifications contained in two petitions for rulemaking and the requirements specified in existing exemptions for aluminum cylinders. This proposed rule change would provide for greater acceptance of aluminum cylinders by purchasers and would terminate six exemptions authorizing use of over 1,000,000 cylinders.

DATE: Comments must be received November 1, 1980.

ADDRESS: Comments must be addressed to the Dockets Branch, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590 (phone (202) 426-3148). Comments should identify the docket and be submitted, if possible, in five copies. The Dockets Branch is located in Room 8426 of the Nassif Building, 400 7th Street, S.W., Washington, D.C. Office hours are 8:30 a.m. to 5 p.m., Monday thru Friday.

FOR FURTHER INFORMATION CONTACT: Arthur Mallen, Chief, Technology Division, Office of Hazardous Materials Regulation, Materials Transportation Bureau, U.S. Department of Transportation, Washington, D.C. 20590 (202-755-4906).

SUPPLEMENTARY INFORMATION: This proposed rule is based in part on the Compressed Gas Association's (CGA) petition dated November 3, 1975, and Airco Industrial Gases' (AIG) petition dated April 2, 1979, to add a new high pressure aluminum cylinder specification to Part 178. The proposed rule differs from the petitioners' requests on the following points.

Qualification, Maintenance and Filling of Cylinders

The applicable requirements pertaining to usage, maintenance, qualification and requalification of aluminum cylinders proposed by the petitioners are similar to current requirements specified for DOT 3A and DOT 3AA cylinders. This proposal modified the requests of the petitioners by incorporating certain requirements specified in existing aluminum cylinder exemptions (DOT-E 6498, 6567, 6668, 7042, 7941 and 8364) as follows:

(1) Since data on compatibility with aluminum is limited or nonexistent for some of the materials authorized in the exemptions and for many materials authorized for shipment in DOT 3A and DOT 3AA cylinders, the MTB proposes to allow only those materials authorized in existing exemptions for which satisfactory compatibility data are available to be charged and shipped in the proposed aluminum cylinders.

(2) Because of the lack of supporting retest data for aluminum cylinders, a ten year retest frequency (49 CFR 173.34(e)(11), (14), and (15)) and a visual inspection in lieu of a hydrostatic retest (49 CFR 173.34(e)(10)) would not be authorized. This matter will be addressed in a future rulemaking action when sufficient retest data has been accumulated to support such an action. The MTB invites public participation in the accumulation of this data.

(3) A "rejection elastic expansion" which is used as "service control" for DOT 3A and 3AA cylinders charged in accordance with 49 CFR 173.302(c) is not available for aluminum cylinders. Therefore, filling of aluminum cylinders would be limited to 100 per cent of the marked service pressure.

(4) When used in oxygen service, aluminum cylinders would be required:

(a) To have straight threads only;

(b) To have a marked service pressure not exceeding 3000 psi; and

(c) To be cleaned in compliance with Federal Specification RR-C-901b in order to remove contaminants that would support ignition.

(5) Due to the absence of industry justification and the lack of information on the compatibility of aluminum with certain hazardous materials listed in Part 173, manifolding of aluminum cylinders would not be authorized.

Specification for Aluminum Cylinders

The specification for aluminum cylinders in this proposed rule varies from the petitioners' proposals as follows:

(1) The MTB is proposing that inspections be performed by independent inspection agencies approved in accordance with §§ 173.300a or 173.300b. The duties of the inspector would be clarified so that certain specified tests must be witnessed or performed by the inspector, and certain quality controls using documented data must be verified by the inspector.

(2) To assure compliance with the material specification, the inspector, material producer or cylinder manufacturer would be required:

(a) To perform a chemical analysis on each melt or cast of material;

(b) To obtain a certified chemical analysis from the material manufacturer for each melt of material; or,

(c) To perform a check analysis on one cylinder out of each lot of 200 cylinders or less if in lieu of a certified chemical analysis a certificate indicating compliance with the material specification is obtained.

(3) In this proposal "Reporting volumetric capacity and tare weight" is not included in the listing of specific duties of the inspector (§ 178.46-4(d)). A specific listing of this duty is considered unnecessary since it would be performed in the process of fulfilling item (10) of 178.46-4(d)—"Preparing and providing the required report to the purchaser, cylinder maker, and the Associate Director for OE.

(4) A definition of a "lot" size, and "significant design change" would be provided.

(5) Starting material would be required to be traceable to cast stock and would be required to have uniform equiaxed grain structure not exceeding 250 microns average.

(6) The acceptable results obtained from certain physical and mechanical properties tests would be restricted to standards which are consistent with properties of cylinders manufactured under existing exemptions as follows:

(a) The elongation requirements would be changed from 10 percent to 14 percent using a 4D bar or 2 inch gauge length test specimen,

(b) The flattening test would be changed from 10t to 9t, and

(c) The minimum burst pressure would be increased from 2.3 to 2.5 times the marked service pressure; failure would be required to initiate in the sidewall; and the failed cylinder would be required to remain in one piece.

(7) An internal bottom knuckle radius of 12 percent of the inside diameter of the cylinder would be specified to minimize stress concentrations created by the transition from sidewall to bottom of the cylinder.

(8) The requirement for openings would be patterned after the more specific requirements in 49 CFR 178.45.

(9) Cylinders containing certain hazardous materials would be required to be packaged in strong outside packagings for proper protection of valves, safety devices or other connections.

(11) The flattening test procedure and the test result would be revised for consistency with current manufacturing practice. An acceptable level for failure would be specified for test results. An alternate bend test using an appropriately sized mandrel in lieu of performance of a flattening test would be authorized.

(12) As required by the regulations for other cylinder specifications, the symbol of the maker would be required to appear on the cylinder.

(13) The proposed rule would require an inspector to report the following additional information:

(a) the temper designation, along with the alloy designation, of the material;

(b) The flattening test result as a multiple of the actual sidewall thickness; and

(c) The design and the actual minimum thickness of the sidewall.

(14) The proposed rule would set the cyclic pressurization rate for the design qualification test at not more than 10 cycles per minute. In the absence of test data there is concern that a faster rate of cycling would not allow adequate time for the cylinder metal to fully respond to the stress reversals.

Cylinders determined to be in full compliance with the requirements specified in an exemption will be allowed to be re-marked with the appropriate cylinder specification number.

In addition to receiving comments on the other issues in this proposal, the MTB is taking the opportunity to solicit comments on hazardous materials being shipped in alumium cylinders. Comments should address or provide information on the following:

(1) A listing of materials actually shipped under exemption or other authority indicating the quantity shipped by cylinders, in cubic feet (gas), gallons (liquid) or some other unit of measurement along with a listing of the sources from which the compatibility data was derived such as shipping experience, tests, etc.

(2) Data to support or refute the 3000 psi service pressure limitation for aluminum cylinders in oxygen service.

(3) Data on the compatibility of aluminum with other hazardous materials not authorized in this proposed rule.

There are certain hazardous materials and conditions in which they are shipped that are in need of further evaluation to justify authorization for their use in aluminum cylinders such as those listed below:

(1) *Cylinders charged with poison A liquid or gas.*

(a) *Pressure Relief Devices.*—Section 173.34(d) prohibits the use of pressure relief devices on steel DOT specification cylinders charged with Poison A gas and liquid. The use of a pressure relief device is prohibited because it has been determined that poisonous materials must be contained to the maximum extent possible under all conditions. This prohibition is intended to provide the maximum safeguard against leakage under normal transportation conditions, in addition to maintaing the maximum possible duration of containment in a fire situation. For these materials, containment of the contents up to burst pressure of the cylinder is considered a lesser risk than that of releasing the contents at pressure relief device settings, even though there is a chance of cylinder failure.

(b) In addition to delaying the release of hazardous materials until cylinder failure occurs by prohibiting the use of a pressure relief device, further delay of such release is accomplished by lengthening the time to cylinder failure by limiting the filling pressure at 70° F. to a pressure less than the marked service pressure (see § 173.337(a)(1)). Consideration, then must be given to the filling pressure limits at 70° F. for aluminum cylinders to equate the time to release (cylinder failure) of the hazardous material to no less than the time to release for steel cylinders currently specified.

(2) *Aluminum cylinders charged with fluorine and other strong oxidizers.*

Fluorine and other strong oxidizers have been compatible with the steel cylinders currently authorized. These same materials are considered compatible with aluminum at ambient temperatures; however, evaluations must be made to determine if elevated temperatures such as in a fire situation change the compatibility of these hazardous materials with aluminum. The compatibility is to be determined using steel cylinders as the criteria.

(3) *Pressure limitations for certain hazardous materials.*

Cylinders charged with carbon monoxide and other gaseous materials are currently required to be filled at pressures less than the marked service pressure. Some of the reasons for this requirement are the reactions between the hazardous materials and the cylinder material, reactions between impurities in the hazardous material and the cylinder material (See § 173.301(f) and (g)), and a concern for the release of toxic materials if charged to the marked service pressure, as discussed in paragraph (1)(a) above.

It is requested that comments and meaningful data be supplied on these and other similar hazardous materials and their shipping state to provide the information necessary to determine the conditions that must be imposed and the acceptability of the aluminum cylinder for shipment of these materials. In developing the comments and data, the following should be taken into consideration.

1. Elevated temperature data (to include fire conditions) for cylinders without a pressure relief device to determine steel and aluminum cylinder failure levels at various temperatures and developed pressures for:
   a. Liquids (poison A)
   b. Liquefied gases (poison A)
   c. Nonliquefied gas (poison A)
2. Effect of varying filling pressures at elevated temperatures to reach comparability with steel cylinders for the same materials listed above.
3. Elevated temperature reaction data for steel and aluminum cylinders filled with oxidizers currently authorized to be shipped in steel cylinders.
4. Corrosion or other reaction data for hazardous materials currently required to be shipped at pressures less than the cylinder marked service pressure.

The cylinder marking requirements proposed in this notice at § 178.46–15 are not fully consistent with the revised marking requirements proposed under Docket HM–172; Notice 80–2 (45 FR 9960) published on February 14, 1980. The MTB's consideration of final regulations under this rulemaking will take into account its decision concerning final regulations under Docket HM–172.

Primary drafters of this document are Arthur J. Mallen, Paul H. Seay, Jose Pena, Hattie Mitchell, Office of Hazardous Materials Regulation, MTB, and Douglas A. Crockett, Office of the Chief Counsel, Research and Special Programs Administration.

In consideration of the foregoing, it is proposed to amend Parts 171, 173, and 178 of Title 49 Code of Federal Regulations as follows:

PART 171—GENERAL INFORMATION, REGULATIONS AND DEFINITIONS

1. In § 171.7, paragraphs (d)(5)(x), (xi) and (xii), and (d)(23) would be added, paragraph (d)(19) would be revised to read as follows:

§ 171.7 Matter incorporated by reference.

* * * * *

(d) * * *

(5) * * *

(x) ASTM E–8–79 is titled "Standard Methods of Tension Testing of Metallic Materials," 1979 edition.

(xi) ASTM B–221–76 is titled "Standard Specification for Aluminum Alloy Extruded Bars, Rods, Shapes and Tubes," 1976 Edition.

(xii) ASTM E 290–77 is titled "Semi-Guided Bend Test for Ductility of Metallic Materials," 1977 edition.

* * * * *

(19) Federal Specification RR–C–901b is titled "Federal Specification, Cylinders, Compressed Gas: With Valve or Plug and Cap; ICC 3AA RR–C–901b, August 1, 1967."

* * * * *

(23) Aluminum Associations' Handbook is titled "Aluminum Standards and Data," Sixth Edition, 1979.

PART 173—SHIPPERS—GENERAL REQUIREMENTS FOR SHIPMENTS AND PACKAGINGS

2. In § 173.34, the Table in paragraph (e) would be amended by adding an entry "3AL" immediately following the entry "3A, 3AA"; paragraphs (e)(4) and (f)(4) would be revised, to read as follows:

§ 173.34 Qualification, maintenance and use of cylinders.

* * * * *

(e) * * *

Specification under which cylinder was made	Minimum retest pressure (pounds per square inch)	Retest period (years)
*	*	*
3AL	5/3 times service pressure	5
*	*	*
*	*	*

(4) A cylinder must be condemned when it leaks, or when internal or external corrosion, denting, bulging, or evidence of rough usage exists to the extent that the cylinder is likely to be weakened appreciably, or when the permanent expansion exceeds 10 percent of the total expansion, except that for DOT 4E aluminum cylinders, when the permanent expansion exceeds 12 percent of the total expansion. Except for DOT 3AL and DOT 4E aluminum cylinders, a cylinder condemned for excessive permanent expansion may be reheat-treated. (See paragraph (g) of this section.) DOT 4 series cylinders, condemned for other than excessive permanent expansion, may be repaired and rebuilt as otherwise provided in this section.

* * * * *

(f) * * *

(4) DOT 3AL and DOT 4E aluminum cylinders may not be reheat-treated and must be removed from service.

* * * * *

3. In § 173.119, paragraphs (a)(11), (f)(2) and (m)(9) would be revised to read as follows:

§ 173.119 Flammable liquids not specifically provided for.

(a) * * *

(11) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

(f) * * *

(2) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

(m) * * *

(9) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. All cylinder valves must be protected by one of the methods described in § 173.301(g) (1), (2), or (3) of this part. See § 173.34(e)(16).

* * * * *

4. In § 173.123, paragraph (a)(4) would be revised to read as follows:

§ 173.123 Ethyl chloride.

(a) * * *

(4) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

5. In § 173.124, paragraph (a)(2) would be revised to read as follows:

§ 173.124 Ethylene oxide.

(a) * * *

(2) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. All cylinders must be seamless or welded, and may not exceed 30 gallons nominal water capacity. Cylinders must be equipped with safety devices of the fusible plug type with threaded straight bore orifice and with yield temperature of 157° to 170° F. having a minimum vent area of 0.0055 square inch per pound of water capacity for cylinders not over 1-gallon capacity and 0.0012 square inch per pound of water capacity for all cylinders over 1-gallon capacity. Each cylinder must be tested for leakage at a pressure of at least 15 psig with an inert gas before each refilling. Filling must be such that the cylinder will not be liquid full at 185° F. Pressurizing valves must be provided for all cylinders over 1-gallon cacity. Educator tubes must be provided for all cylinders over 5-gallon capacity. Cylinders having a water capacity in excess of 1 gallon must be insulated with at least three coats of heat-retardant paint, of a type examined by the Bureau of Explosives and approved by the Associate Director for OE, applied over suitable primer and finished with suitable waterproof paint; or with other equally efficient insulation examined by the Bureau of Explosives and approved by the Associated Director for OE.

* * * * *

6. § 173.126 would be revised to read as follows:

§ 173.126 Nickel carbonyl.

Nickel carbonyl must be packed in specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. A cylinder used exclusively for nickel carbonyl may be given a complete external visual inspection in lieu of the interior hydrostatic pressure test required by § 173.34(e) of this part. Visual inspection must be in accordance with CGA Pamphlet C–6.

7. In § 173.134, paragraph (a)(1) would be revised to read as follows:

§ 173.134 Pyroforic liquids, n.o.s.

(a) * * *

(1) Except for acetylene cylinders, any steel or nickel cylinder prescribed for any compressed gas having a minimum design pressure of 175 pounds per square inch is authorized. Cylinders with valves must be: * * *

* * * * *

8. In § 173.135, paragraph (a)(6) would be revised to read as follows:

§ 173.135 Diethyl dichlorosilane, dimethyl dichlorosilane, ethyl dichlorosilane, ethyl trichlorosilane, methyl trichlorosilane, trimethyl chlorosilane, and vinyl trichlorosilane.

(a) * * *

(6) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

9. In § 173.136, paragraph (a)(5) would be revised to read as follows:

§ 173.136 Methyl dichlorosilane and trichlorosilane.

(a) * * *

(5) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

10. In § 173.137, paragraph (a)(3) would be revised to read as follows:

§ 173.137 Lithium aluminum hydride, ethereal.

(a) * * *

(3) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene. Valves or fittings must be protected from injury by a metal cap or equally efficient device securely attached to the cylinder.

11. § 173.138 would be revised to read as follows:

§ 173.138 Pentaborane.

Except for acetylene cylinders, any steel or nickel cylinder prescribed for any compressed gas is authorized. Each cylinder must be protected with a valve protection cap or must be packed in a strong wooden box and blocked therein so as to protect the valve from injury under conditions normally incident to transportation. Cylinders not exceeding 2 inches in diameter nor 6 inches in lenght, excluding the length of the valve, may also be packed in strong solid fiberboard boxes, having no outside dimension less than 4 inches, completely filled with layers of strong corrugated fiberboard, the center of which shall be cut out to fit the cylinder valve, and otherwise so designed that neither the clyinder nor the valve will be in contact with the wall of the box under conditions normally incident to transportation.

12. In § 173.141, paragraph (a)(9) would be revised to read as follows:

§ 173.141 Amyl mercaptan, butyl mercaptan, ethyl mercaptan, isopropyl mercaptan, propyl mercaptan, and aliphatic mercaptan mixtures.

(a) * * *

(9) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

13. In § 173.148, paragraph (a)(2) would be revised to read as follows:

§ 173.148 Monoethylamine.

(a) * * *

(2) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

14. In § 173.245, paragraph (a)(28) would be revised to read as follows:

§ 173.245 Corrosive liquids not specifically provided for.

(a) * * *

(28) Except for acetylene cylinders, any steel or nickel cylinder prescribed for any compressed gas is authorized. All cylinder valves must be protected by one of the methods described in § 173.301(g)(1), (2), or (3) of this part. See § 173.34(e)(16).

* * * * *

15. In § 173.251, paragraph (a)(1) would be revised to read as follows:

§ 173.251 Boron trichloride and boron tribromide.

(a) * * *

(1) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

16. In § 173.280, paragraph (a)(6) would be revised to read as follows:

§ 173.280 Trichlorosilanes.

(a) * * *

(6) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

17. In § 173.301, paragraphs (d)(2) and (3) would be revised; the Table in paragraph (h) would be amended by adding the entry "3AL" immediately following the entry "DOT3A," as follows:

§ 173.301 General requirements for shipment of compressed gases in cylinders.

* * * * *

(d) * * *

(2) Specification steel or nickel cylinders containing the following nonliquefied gases may be manifolded: boron trifluoride, carbon monoxide, ethylene, hydrogen, hydrocarbon gases, methane, and nitrogen trifluoride, provided individual cylinders are equipped with approved safety relief devices as required by § 173.34(d) or § 173.315(i) of this part: *and provided further,* that each cylinder is equipped with an individual shutoff valve that must be tightly closed while in transit. Manifold branch lines of these individual shutoff valves must be sufficiently flexible to prevent injury to the valves which otherwise might result from the use of rigid branch lines. A temperature measuring device may be inserted in one cylinder of a manifold installation in place of the shutoff valve.

(3) Specification steel or nickel cylinders containing the following gases may be manifolded: ethane, ethylene, liquefied hydrocarbon gas, hydrogen chloride (anhydrous), liquefied petroleum gas and propylene provide each cylinder is equipped with approved safety relief devices as required by § 173.34(d) or § 173.315(i) of this part: and provided further, that each cylinder is equipped with an individual shutoff valve that must be tightly closed while in transit. Each cylinder must be separately charged and means must be provided to insure that no interchange of cylinder contents can occur during transportation. Manifold branch lines to these individual shutoff valves must be sufficiently flexible to prevent injury to the valves which otherwise might result from the use of rigid branch lines.

* * * * *

(h) * * *

Cylinders
* * * * *
DOT 3AL
* * * * *

* * * * *

18. In § 173.302, paragraph (a)(4)(iii) would be revised; a new paragraph (a)(5) would be added; and paragraph (f) would be revised to read as follows:

§ 173.302 Charging of cylinders with nonliquefied compressed gases.

(a) * * *

(4) * * *

(iii) Each cylinder must be cleaned and tested for oil contamination in compliance with the requirements of Federal Specification RR–C–901b, paragraphs 3.7.2, 3.8.2 and 4.4.2.3. One cylinder selected at random from each lot of 200 or less must be tested and meet the standard of cleanliness specified.

(5) Specification 3AL (§ 178.46 of this subchapter) cylinders are authorized only for the following nonliquefied gases: air, argon, carbon monoxide, helium, hydrogen, krypton, methane, nitrogen, neon, oxygen and xenon. When used in oxygen service, aluminum cylinders must be in compliance with the following conditions:

(i) Cylinder must be equipped only with brass valves;

(ii) Cylinder must have only straight threads in the opening;

(iii) Each cylinder must be cleaned and tested for oil contamination in compliance with the requirements of Federal Specification RR–C–901b, paragraphs 3.7.2, 3.8.2 and 4.4.2.3. One cylinder selected at random from each lot of 200 or less must be tested and meet the standard of cleanliness specified; and

(iv) Cylinder must have a marked service pressure not exceeding 3,000 psi.

* * * * *

(f) *Carbon monoxide.* Carbon monoxide must be shipped in a specification 3A, 3AX, 3AA, 3AAX, 3AL, 3, 3E, or 3T, (§§ 178.36, 178.37, 178.46, 178.42, 178.45 of this subchapter) cylinder having a minimum service pressure of 1,800 psig. The pressure in the cylinder must not exceed 1,000 psig at 70°F. except that if the gas is dry and sulfur free, the cylinder may be charged to five-sixths of the cylinder service pressure or 2,000 psig, whichever is the lesser.

* * * * *

19. In § 173.304, paragraphs (a)(1) and (d)(3)(i) would be revised; the table in paragraph (a)(2) would be revised to authorize DOT 3AL cylinders with various service pressures for certain commodities as follows:

§ 173.304 Charging of cylinders with liquefied compressed gases.

(a) * * *

(1) Specifications 3,[1] 3A, 3AA, 3AL, 3B, 3BN, 3D, 3E, 4, 4A, 4B, 4BA, 4B–ET, 4BW, 4E, 9,[1] 25,[1] 26,[1] 38,[1] 39, 40,[1] or 41[1] (§§ 178.36, 178.37, 178.46, 178.38, 178.39, 178.41, 178.42, 178.48, 178.49, 178.50, 178.51, 178.55, 178.61, 178.65, 178.68 of this subchapter), cylinders except that no specification 3AL, 9, 39, 4E, 40, or 41 cylinders may be charged and shipped with a mixture containing a pyrophoric liquid, carbon bisulfide (disulfide), ethyl chloride, ethylene oxide, nickel carbonyl, spirits of nitroglycerin, or poisonous material (class A, B, or irritating material), unless specifically authorized in this part.

(2) * * *

Kind of gas	Maximum permitted filling density (see note 1)	Containers marked as shown in this column or of the same type with higher service pressure must be used except as provided in § 173.34 (a), (b), § 173.301(j) (see notes following table)
Anhydrous ammonia	54 pct	DOT–4; DOT–3AA480; DOT–3AAX480; DOT–3A480X; DOT–4A480; DOT–8; DOT–4AA480; DOT–3E1800, DOT–3AL480.

(d) * * *

(3) * * *

(i) Specification 3,[1] 3A, 3AA, 3AL, 3B, 3E, 4, 4A, 4B, 4BA, 4B240FLW, 4B240ET, 4BW, 4B240X,[1] 4E, 9,[1] 25,[1] 26,[1] 36,[1] 39, or 41[1] (§§ 178.36, 178.37, 178.46, 178.38, 178.42, 178.48, 178.49, 178.50, 178.51, 178.54, 178.55, 178.61, 178.68, 178.65, of this subchapter) cylinders. The internal volume of a specification 39 cylinder must not exceed 75 cubic inches.

20. In § 173.346, paragraph (a)(11) would be revised to read as follows:

§ 173.346 Poison B liquids not specifically provided for.

(a) * * *

(11) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

21. In § 173.354, paragraph (a)(3) would be revised to read as follows:

§ 173.354 Motor fuel antiknock compound or tetraethyl lead.

(a) * * *

(3) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

22. In § 173.358, paragraph (a)(7) would be revised to read as follows:

§ 173.358 Hexaethyl tetraphosphate; methyl parathion; organic phosphate compound; organic phosphorous compound; parathion; tetraethyl dithio pyrophosphate; and tetraethyl phyrophosphate, liquid.

(a) * * *

(7) Specification steel or nickel cylinders as prescribed for any compressed gas except acetylene.

* * * * *

23. In § 173.382, paragraph (a)(4) would be revised to read as follows:

§ 173.382 Irritating materials, not specifically provided for.

(a) * * *

Except for acetylene cylinders, any steel or nickel cylinder prescribed for any compressed gas is authorized. These cylinders must be qualified, maintained, and filled in accordance with §§ 173.34 and 173.301(g) of this part. If used for material with vapor pressures exceeding 25 psig at 70° F., they must also be retested as required by § 173.34(e).

* * * * *

PART 178—SHIPPING CONTAINER SPECIFICATIONS

24. The Table of Sections to Subpart C, Part 178 would be amended by adding an entry for § 178.46 to read as follows:

* * * * *

§ 178.46 Specification 3AL; seamless cylinders made of definitely prescribed aluminum alloys.

* * * * *

25. § 178.46 would be added to read as follows:

§ 178.46 Specification DOT-3AL; seamless cylinders made of definitely prescribed aluminum alloys.

§ 178.46-1 Compliance.

Each specification DOT 3AL seamless cylinder must comply with this section and § 173.24 of this subchapter.

§ 178.46-2 Size and service pressure.

(a) The maximum water capacity is 1000 pounds.

(b) The minimum service pressure is 150 psi (see § 173.300(h) of this subchapter).

§ 178.46-3 Inspection.

Inspections and verifications must be performed by an independent inspection agency approved in writing by the Associate Director for OE in accordance with § 173.300a of this subchapter. Chemical analyses and tests as specified must be made within the United States unless otherwise approved in writing by the Associate Director for OE in accordance with § 173.300b of this subchapter.

§ 178.46-4 Duties of the inspector.

(a) The inspector shall determine that all materials comply with this specification before releasing those materials for cylinder manufacture.

(b) The inspector shall verify compliance with the provisions of § 178.46-5(d)(1) by:

(1) Performing a chemical analyses on each melt or cast or other unit of starting material;

(2) Obtaining a certified chemical analysis from the material manufacturer for each melt or cast of material; or

(3) Performing a check analysis on one cylinder out of each lot of 200 cylinders or less, if in lieu of a certified chemical analysis a certificate indicating compliance with the material specification is obtained.

(c) The inspector shall verify ultrasonic inspection of all material by inspection or by obtaining the materials producer's certificate of ultrasonic inspection. Ultrasonic inspection must be performed or verified as having been performed in accordance with § 173.46-5(e).

(d) The inspector shall determine that each cylinder complies with this specification by:

(1) Making a complete internal inspection before closing;

(2) Making a complete external inspection;

(3) Verifying that heat treatment was proper;

(4) Selecting samples for all tests and check chemical analysis;

(5) Witnessing each test;

(6) Measuring the wall thickness and verifying that the prescribed minimum thickness was met;

(7) Verifying that the identification of material is proper;

(8) Verifying the threads, by gauge;

(9) Determining that each cylinder is marked in compliance with the specification; and

(10) Preparing and providing the required report to the purchaser, cylinder maker, and the Associate Director for OE.

(e) In this specification, a "lot" means a group of cylinders successively produced having the same:

(1) Size and configuration;

(2) specified material of construction;

(3) process of manufacture and heat treatment;

(4) equipment of manufacture and heat treatment; and

(5) Conditions of time, temperature and atmosphere during heat treatment.

In no case may the lot size exceed 200 cylinders. Any cylinder processed for use in the required destructive physical testing need not be counted as being one of the 200, but must have been processed with the lot.

§ 178.46-5 Authorized material and identification of material.

(a) Starting stock must be cast stock that is later scalped prior to extrusion of the cylinder shell. If starting stock is not cast stock, it must be traceable to scalped cast stock.

(b) Material with seams, cracks, laminations, or other defects likely to weaken the finished cylinder may not be used.

(c) Material must be identified by a suitable method that will identify the alloy, the aluminum producer's cast number, and when performed, the solution heat treat batch number during all manufacturing operations.

(d) The material must be of uniform quality. Only the following heat treatable aluminum alloys are permitted:

BILLING CODE 4910-60-M

(1) Chemical Composition Limits [1/]

Aluminum Association Alloy Designation Number	CHEMICAL COMPOSITION										
									Others [2/]		
	Si	Fe	Cu	Mn	Mg	Cr	Zn	Ti	Each	Total	Al
6351	0.7-1.3	0.50 Max	0.10 Max	0.40-0.8	0.40-0.8		0.20 Max	0.20 Max	0.05 Max	0.15 Max.	Remainder
6061	0.40-0.8	0.7 Max	0.15-0.40	0.15 Max	0.8-1.2	0.04-0.35	0.25 Max	0.15 Max	0.05 Max	0.15 Max	Remainder

(2) Physical Property Limits

Alloy and Temper	TENSILE STRENGTH - PSI		Elongation - Percent Minimum for 2" or 4D [3/] Size Specimen
	Ultimate-Minimum	Yield-Minimum	
6351-T6	42,000	37,000	14
6061-T6	38,000	35,000	14

1/ ASTM B 221-76 Standard Specification for Aluminum-alloy Extruded Bars, Rods, Shapes, and Tubes, Table 1 Chemical Composition Limits.

2/ Analysis is regularly made only for the elements for which specific limits are shown, except for unalloyed aluminum. If, however, the presence of other elements is suspected to be, or in the course of routine analysis is indicated to be in excess of specified limits, further analysis is made to determine that these other elements are not in excess of the amount specified. (Aluminum Association Standards and Data - Sixth Edition 1979).

3/ "D" represents specimen diameter.

BILLING CODE 4910-60-C

(e) Before parting, all starting stock must be 100 per cent ultrasonically inspected, along the length at right angles to the central axis from two positions at 90° to one another. The equipment and continuous scanning procedure must be capable of detecting and rejecting internal defects such as cracks which have an ultrasonic response greater than that of a calibration block with a 5/64-inch diameter flat bottomed hole.

(f) Cast stock must have uniform equiaxed grain structure not to exceed 250 microns average.

(g) Any starting stock not complying with the above must be rejected.

§ 178.46-6 Manufacture.

(a) Cylinder shells must be manufactured by the backward extrusion method and have a cleanliness level adequate to ensure proper inspection.

(b) No fissure or other defect is acceptable that is likely to weaken the finished cylinder below the design strength requirements. A reasonably smooth and uniform surface finish is required. If not originally free from such defects, the surface may be machined or otherwise conditioned to eliminate these defects.

(c) The cylinder base must have a thickness not less than the prescribed minimum wall thickness of the cylindrical shell. The interior of the base must be concave to pressure and have a basic torispherical, hemispherical, or ellipsoidal shape with the dish radius no greater than 1.2 times the inside diameter of the shell. The inside knuckle radius must not be less than 12 percent of the inside diameter of the cylindrical shell.

(d) For free standing cylinders the base thickness must be at least two times the minimum wall thickness at the juncture between the cylinder base and the floor when the cylinders are in the vertical position.

(e) Welding or brazing is prohibited.

(f) Each new design and any significant change to any acceptable design must be qualified for production by testing prototype samples as follows:

(1) Three samples must be subjected to 100,000 pressure reversal cycles between zero and service pressure or 20,000 pressure reversal cycles between zero and test pressure, at a rate not in excess of 10 cycles per minute, without failure.

(2) Three samples must be pressurized to destruction and failure must not occur at less than 2.5 times the marked cylinder service pressure. Each cylinder must remain in one piece. Failure must initiate in the cylinder sidewall in a longitudinal direction.

(g) In this specification "significant change" means a 10 percent or greater change in cylinder design wall thickness or diameter; a 20 percent or greater change in length, service pressure or rated capacity; and any change in material.

§ 178.46-7 Wall thickness.

(a) The minimum wall thickness must be such that the wall stress at the minimum specified test pressure may not exceed 80 per cent of the minimum yield strength and may not exceed 67 per cent of the minimum ultimate tensile strength as verified by physical tests in § 178.46-13.

(b) Calculations must be made by the formula:

$$S=[P(1.3D^2+0.4d^2)]/[D^2-d^2-d^2]$$

Where:

S=wall stress in pounds per square inch;
P=prescribed minimum test pressure in pounds per square inch (see § 178.46-11(c));
D=outside diameter in inches;
d=inside diameter in inches.

(c) The minimum wall thickness for any cylinder with an outside diameter greater than 5 inches must be 0.125 inch.

§ 178.46-8 Openings.

(a) Openings are permitted in heads only.

(b) The size of any centered opening in a head may not exceed one-half the outside diameter of the cylinder.

(c) Other openings are permitted in the head of a cylinder if:

(i) Each opening does not exceed 2.625 inches in diameter, or one-half the outside diameter of the cylinder;

(ii) Each opening is separated from each other by a ligament; and

(iii) Each ligament which separates two openings must be at least three times the average of the diameters of the two openings.

(d) All openings must be circular.

(e) All openings must be threaded. Threads must comply with the following:

(1) Each thread must be clean cut, even, without any checks, and to gauge.

(2) Taper threads, when used, must be the American Standard Pipe Thread (NPT) type complying with the USDC, NBS Handbook H-28, Part III, Section VII, or the National Gas Taper Thread (NGT) standard complying with NBS Handbook H-28, Part II, Sections, VII and IX.

(3) Straight threads conforming with National Gas Straight Thread (NGS) standards are authorized. These threads must comply with NBS Handbook H-28, Part II, Section VII and IX.

§ 178.46-9 Heat treatment.

Prior to any test, all cylinders must be subject to a solution heat treatment and aging treatment appropriate for the aluminum alloy used.

§ 178.46-10 Safety relief devices and protection for valves, safety devices, and other connections.

Pressure relief devices and protection arrangements for valves, pressure relief devices, and other connections must comply with §§ 173.34(d) and 173.301(g) of this subchapter.

§ 178.46-11 Hydrostatic test.

(a) Each cylinder must be subjected to an internal test pressure using the water jacket equipment and method or other suitable equipment and method. The testing apparatus must be operated in a manner so as to obtain accurate data. The pressure gauge used must permit reading to an accuracy of 1 percent. The expansion gauge must permit reading to an accuracy of 1 percent of total expansion or 0.1 cubic centimeter, whichever is greater.

(b) The test pressure must be maintained for a sufficient period of time to assure complete expansion of the cylinder. In no case may the pressure be held less than 30 seconds. If, due to failure of the test apparatus, the required test pressure cannot be maintained, the test may be repeated at a pressure increased by 10 percent or 100 psi, whichever is lower. If the test apparatus again fails to maintain the test pressure, the cylinder being tested must be rejected. Any internal pressure applied to the cylinder after heat treatment and before any official test may not exceed 90 percent of the test pressure.

(c) The minimum test pressure is the greatest of the following:

(1) 450 psi regardless of service pressure;

(2) Two times the service pressure for cylinders having service pressure less than 500 psi; or

(3) Five-thirds times the service pressure for cylinders having a service pressure of at least 500 psi.

(d) Permanent volumetric expansion may not exceed to 10 percent of total volumetric expansion at test pressure.

§ 178.46-12 Flattening test.

(a) The flattening test must be performed on one cylinder taken at random out of each lot of 200 or less by placing the cylinder between wedge shaped knife edges having a 60° included angle, and rounded in accordance with the following table. The longitudinal axis of the cylinder

must be at an angle 90° to the knife edges during the test.

(1) The yield strength must be determined by either the "offset"

appear near the serial number; then the date of test (such as 5-73 for May 1973).

Hydrostatic tests, flattening tests, tensile tests of material, and other tests, as

must be at an angle 90° to the knife edges during the test.

Table

Cylinder wall thickness in inches	Radius in inches
Under 0.150	0.500
0.150 to 0.249	.875
0.250 to 0.349	1.500
0.350 to 0.449	2.125
0.450 to 0.549	2.750
0.550 to 0.649	3.500
0.650 to 0.749	4.125

(b) An alternate bend test in accordance with ASTM E 290–77 performed on two test specimens cut from a ring, using a mandrel diameter not more than 6 times the wall thickness is authorized in the following cases:

(1) When the length of the cylindrical portion of the cylinder is less than 2 times the cylinder diameter; or

(2) When the wall thickness is greater than 0.500 inch.

(c) Each test cylinder must withstnd flattening to nine times the wall thickness without cracking. When the alternate bend test is used, the test specimens shall remain uncracked when bent around a mandrel in the direction of curvature of the cylinder wall, until the interior edges are at a distance apart not greater than the diameter of the mandrel.

§ 178.46–13 Physical test.

(a) Two test specimens cut from one cylinder representing each lot of 200 cylinders or less must be tested. The results of the test must conform to at least the minimum acceptable physical property limits for aluminum alloys as specified in § 178.46–5(d)(2).

(b) Specimens must be 4D bar or gauge length 2 inches with width not over 1½-inch taken in the direction of extrusion approximately 180° from each other and tested in accordance with ASTM E–8–79. The specimen, exclusive of grip ends, may not be flattened. Grip ends may be flattened to within one inch of each end of the reduced section. When the size of the cylinder does not permit securing straight specimens, the specimens may be taken in any location or direction and may be straightened or flattened cold by pressure only, not by blows. When such specimens are used, the inspector's report must show that the specimens were so taken and prepared. Heating of specimens for any purpose is forbidden.

(c) The yield strength in tension must be the stress corresponding to a permanent strain of 0.2 percent of the gauge length.

(1) The yield strength must be determined by either the "offset" method or the "extension under load" method as prescribed in ASTM Standard E–8–79.

(2) In using the "extension under load" method, the total strain (or "extension under load") corresponding to the stress at which the 0.2 percent permanent strain occurs may be determined with sufficient accuracy by calculating the elastic extension of the gauge length under appropriate load and adding thereto 0.2 percent of the gauge length. Elastic extension calculations must be based on an elastic modulus of 10,000,000 psi. In the event of controversy, the entire stress-strain diagram must be plotted and the yield strength determined from the 0.2 percent offset.

(3) For the purpose of strain measurement, the initial strain must be set while the specimen is under a stress of 6,000 psi, the strain indicator reading being set at the calculated corresponding strain.

(4) Cross-head speed of the testing machine may not exceed ⅛ inch per minute during yield strength determination.

§ 178.46–14 Rejected cylinder.

Reheat treatment is authorized one time; subsequent thereto, cylinders must pass all prescribed tests to be acceptable.

§ 178.46–15 Marking.

(a) Each cylinder must be plainly and permanently marked, by stamping on the cylinder shoulder, top head, or neck, in the following order)

(1) The specification marking "DOT 3AL" must appear first on the cylinder followed immediately by the service pressure (for example: DOT–3AL 1800).

(2) The serial number and an identifying symbol or letters appear next; location of the number to be just below or immediately following the DOT mark; location of the symbol to be just below or immediately following the number. The symbol and numbers must be those of the maker, or of the purchaser or user if the maker's symbol also appears near the date of the original test. The symbol must be registered with the Associate Director for OE. No duplication is authorized. Examples:

DOT–3AL 1800
1234

DOT–3AL1800–1234–XY.

(3) The inspector's official mark must appear near the serial number; then the date of test (such as 5–73 for May 1973), so placed that the dates of subsequent test can be easily added.

(4) Marks must be at least ¼ inch high if space permits.

(b) Other marks are authorized provided they are made in low stress areas other than the side wall and are not of a size and depth that will create harmful stress concentrations. Such marks may not conflict with any DOT required markings.

§ 178.46–16 Inspector's report.

(a) Required to be clear, legible, and in the following form:

Place _____
Date _____
Gas Cylinders:
Manufactured for _____
Location at _____
Manufactured by _____
Location at _____
Consigned to _____
Location at _____
Quantity _____
Size _____ inches outside diameter by _____ inches long
Marks stamped into the shoulder of the cylinder are:
Specification DOT _____
Serial number _____ to _____ inclusive
Identifying symbol (registered) _____
Cylinder manufacturer's identification symbol _____
Inspector's mark _____
Test Date _____
Tare weights (yes or no) _____
Other marks (if any) _____
These cylinders were made by process of _____
The cylinders were heat treated by the process of _____
(alloy and temper designation).

The material used was verified as to chemical analysis and record thereof is attached hereto.

All material and each cylinder were inspected; all that were accepted were found free from seams, cracks, laminations, and other defects which might prove injurious to the strength of the cylinder. The processess of manufacture and heat treatment of cylinders were supervised and found to be efficient and satisfactory.

The cylinder walls were measured and the minimum thickness noted was _____ inch. The outside diameter was determined to be _____ inches. The wall stress was calculated to be _____ pounds per square inch under an internal pressure of _____ pounds per square inch. The required minimum thickness is _____ inch and the maximum wall stress allowed is _____ pounds per square inch at an internal pressure of _____ pounds per square inch.

Hydrostatic tests, flattening tests, tensile tests of material, and other tests, as prescribed in Specification DOT–3AL were made in the presence of the inspector and all material and cylinders accepted were found to be in compliance with the specification. Records thereof are attached hereto.

I hereby certify that all of these cylinders proved satisfactory in every way and comply with the Department of Transportation Specification 3AL except as follows:

INTERSTATE COMMERCE COMMISSION

49 CFR Part 1039

[Ex Parte No. 364]

Railroad Freight Forwarder Contract Rates; General Policy Statement

AGENCY: Interstate Commerce Commission.

ACTION: Proposed policy statement; notice of termination of proceeding.

SUMMARY: The issues in this proceeding were (1) the jurisdiction of the Commission to permit the filing of contract rates between rail carriers and freight forwarders; and (2) the standards to be used to judge these contracts, if permitted. (44 FR 33714, June 12, 1979) We had proposed, for these purposes, to treat freight forwarders as shippers, and had suggested that the standards developed in Ex Parte No. 383F, Change of Policy—Railroad Contract Rates, for rail contracts with shippers be imposed on rail contracts with freight forwarders.

Pub. L. No. 96-296 has made a number of changes that require a realignment of this approach. New section 10703(a)(4)(E) specifically authorizes these contracts with rail and water carriers. In addition, the legislative history [1] clearly states that, for contracting purposes, freight forwarders are to be treated as carriers, not as shippers. Thus, the issues raised in the notice in this proceeding are no longer relevant. Instead, the statutory amendments reflect the intent to treat these contracts in a fashion similar to contracts presently authorized under section 10766 (b). In addition, in this proceeding we proposed to issue a policy statement. The amendments require actual rules. Due to this basic inconsistency between our original notice and the recent statutory amendments, we are discontinuing this proceeding. A new proceeding, Ex Parte No. 364 (Sub No. 1), Freight Forwarder Contract Rates—Implementation of Pub. L. 96-296, is being instituted on this date to accomplish the changes required by the legislation.

This decision will not significantly affect either the quality of the human environment or conservation of energy resources.

EFFECTIVE DATE: August 14, 1980.

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

50 CFR Part 17

Endangered and Threatened Wildlife and Plants; Extension of Comment Period on Leopard Reclassification

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Proposed rule; notice of extension of comment period.

SUMMARY: In the Federal Register of 24 March 1980 (45 FR 19007), the Service published a proposed rule to reclassify the leopard (*Panthera pardus*) under the Endangered Species Act of 1973, from Endangered to Threatened status in Sub-Saharan Africa; the Service also proposed to permit the importation of sport-hunted leopard trophies from this area under the rules and regulations established by the Convention on International Trade in Endangered Species of Wild Fauna and Flora. The comment period permitted by the proposal expired on June 24, 1980, and during this established comment period the Service received an unprecedented amount of correspondence on the proposal. At the close of the comment period, the Service was still receiving a large volume of mail daily on the leopard issue, and it is obvious that many more comments remain to be received. Because of the great public interest in the matter, and the Service's desire to adequately address all the issues involved, it has now been decided that the comment period will be extended until November 24, 1980. All parties with data, comments, opinion, new insights, etc. on the proposal to reclassify the leopard in Sub-Saharan Africa, and to permit regulated importation of sport-hunted trophies, are invited to correspond with the Service before November 24, 1980.

DATES: All relevant comments and materials concerning the March 24, 1980, proposal to reclassify the leopard as a Threatened species and to permit the regulated import of sport-hunted trophies of this species, must be received no later than November 24, 1980.

ADDRESSES: All comments and materials should be sent to the Director (FWS/OES), U.S. Fish and Wildlife Service, U.S. Department of the Interior, Washington, D.C. 20240. Such comments and materials will be available for public inspection during normal business hours at the Service's Office of Endangered Species, 1000 N. Glebe Road, Arlington, Virginia 22201.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235-2771).

SUPPLEMENTARY INFORMATION:

Background

On March 24, 1980, the Service published in the **Federal Register** (45 FR 19007) a proposal to reclassify the leopard (*Panthera pardus*) in Sub-Saharan Africa from Endangered to Threatened status. The Service also proposed to permit the importation into the United States of legally-taken, sport-hunted trophies under the terms and conditions specified by the Convention on Trade in Endangered Species of Wild Fauna and Flora. The leopard is on Appendix I of the Convention which means that a valid export permit from the country of origin would be required, and a valid import permit must be issued by the United States Management Authority for the Convention before a trophy could be imported. An export permit will not be granted by the State of export unless its Scientific Authority advises that such export will not be detrimental to the survival of the species. The United States Management Authority will not issue an import permit unless it determines that an export permit has been granted and that the importation is

not for primarily commercial purposes,

final, or whether it should be modified,

technical information presented at the

whether or not to repropose the Illinois

California Commencing in 1978," and

coho salmon abundance and catch data for

not for primarily commercial purposes, and unless the United States Scientific Authority has advised that the importation will be for purposes which are not detrimental to the survival of the species involved.

In addition to publishing the proposal in the **Federal Register**, the Service notified each of the African countries in which the leopard is resident of the proposed action and requested any comments, data, opinions or new insights they may have on the matter.

All interested and/or concerned parties were invited to submit their comments for consideration before June 24, 1980. This deadline for receipt of comments has now passed but the Service feels that, due to the following factors, it is necessary to extend the deadline date for comments to November 24, 1980.

(1) The response to the leopard proposal has been very large. At the time of the closing date for comments, letters were still arriving in great numbers and such correspondence continues to arrive daily. Additional time is required to allow the public to adequately express its views concerning the proposal.

(2) Only three African countries have responded to the Service's notification. It is essential that the other African countries have ample opportunity to present their data comments, and this can best be achieved by an extension of the comment period.

(3) Because of the great volume of new data and insights received, and the complexity of the issues involved, the Service will need more time than originally believed in which to analyze the data and arrive at a final determination. An extension of the comment period would provide the Service with the additional time needed.

Because of the above, the Service has decided to extend the comment period on the reclassification of the Sub-Saharan African leopard from June 24, 1980 to November 24, 1980. Complete details on the leopard's status and current distribution, and the Service's reasons for proposing reclassification and regulated trophy importation, may be found in the March 24, 1980 **Federal Register** (45 FR 19007–19012).

The Service is recontacting the Sub-Saharan African countries where the leopard is resident and requesting from them any data or comments relative to the status, distribution, population trends, or potential threats to the species. All data and comments received as a result of the proposal, and of this comment period extension, will be analyzed by the Service to determine whether the proposal should be made final, or whether it should be modified, or abandoned.

This notice was prepared by John L. Paradiso, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240.

Dated: August 1, 1980.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

---

50 CFR Part 17

Endangered and Threatened Wildlife and Plants: Notice of Withdrawal of An Expired Proposal for Listing of the Illinois Mud Turtle

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of withdrawal of an expired proposed rule.

SUMMARY: The Endangered Species Act mandates withdrawal of proposed rules to list species which have not been finalized within 2 years of the proposal. The time limit has expired for the Illinois mud turtle (*Kinosternon flavescens spooneri*) which was originally proposed for listing as Endangered with Critical Habitat on July 6, 1978 (43 FR 29152–54). This notice constitutes the withdrawal of the Illinois mud turtle listing proposal.

FOR FURTHER INFORMATION CONTACT: Mr. John L. Spinks, Jr., Chief, Office of Endangered Species, Fish and Wildlife Service, Washington, D.C. 20240 (703/235–2771).

SUPPLEMENTARY INFORMATION: Background—The Illinois mud turtle (*Kinosternon flavescens spooneri*) was proposed to be an Endangered species, together with Critical Habitat areas in Illinois and Iowa, on July 6, 1978 (43 FR 29152–29154). The Critical Habitat portion of this proposal was withdrawn by the Service on March 6, 1979 (44 FR 12382–12384), because of procedural and substantive changes in prior law made by the Endangered Species Act Amendments of 1978. On December 7, 1979 (44 FR 70680–70682) the Service reproposed Critical Habitat for the Illinois mud turtle. The areas proposed were modified somewhat based upon information received subsequent to the original proposal. Public meetings were held on the proposal on January 30, 1980, in Springfield, Illinois, and on January 31, 1980, at Muscatine, Iowa. The public comment period on this reproposal expired on February 5, 1980, but was reopened from March 7 to March 22, 1980, in order for the Service to receive written comments submitted on the technical information presented at the two hearings (45 FR 14608–9). As a result of the comment periods a total of 131 written comments were received by the Service. Many of the comments were extensive and had appended scientific studies or reports.

As a result of analyzing the comments received it became apparent that there were strong differences of opinion among the commentors as to: (1) Whether the Illinois mud turtle was a valid subspecies, (2) whether any population estimates for the turtle were accurate, and (3) whether the species qualified for listing. It was the decision of the Service to convene a panel of outside qualified biologists to examine the submitted data and to advise the Service as to its considered judgment of the above questions, as well as other issues. The panel members were selected from a list recommended by the National Academy of Science. Accordingly, on June 5, 1980, the Service convened a 2 day panel meeting on the issues. The panel members were Dr. James F. Berry (Elmburst College), Dr. James L. Christiansen (Drake University), Dr. Carl H. Ernst (George Mason University), Dr. J. Whitfied Gibbons (Savannah River Ecology Laboratory), Dr. Paul N. Hinz (Iowa State University), and Dr. John B. Iverson (Earlham College). The panel felt *Kinosternon flavescens spooneri* was a valid subspecies, but that the small Nebraska population may belong to this subspecies, in addition to those known from Illinois, Iowa, and Missouri. The panel judged that no reliable overall population estimate was available, nor was it possible to determine an overall population trend. The panel did express that it felt the number of available habitats for the Illinois mud turtle were declining in quantity and quality, and went on to state that there is a need for protection of this subspecies, especially populations in Illinois. It should be noted that the panel did not state whether Federal, State, or local protection would be the most appropriate and effective strategy.

Based upon the panel's report it was felt that insufficient information is available to justify listing the Illinois mud turtle as a Threatened or Endangered species. Further, there is a need to conduct additional research so as to clarify the complex taxonomic relationship and to estimate the total population of this subspecies.

Accordingly, I have determined that the proposal to list the Illinois mud turtle should be withdrawn so that taxonomic and other questions raised by the panel may be clarified. A determination as to whether or not to repropose the Illinois mud turtle will be made on the basis of findings from the above study.

Section 4(f)(5) of the Endangered Species Act of 1973, states that:

> A final regulation adding a species to any list published pursuant to subsection (c) shall be published in the **Federal Register** not later than 2 years after the date of publication of the notice of the regulation proposing listing under paragraph (B)(i)(1). If a final regulation is not adopted within such 2 year period, the Secretary shall withdraw the proposed regulation and shall publish notice of such withdrawal in the **Federal Register** not later than 30 days after the end of such period.

The 2-year time limit on proposals established in this subsection have expired for the Illinois mud turtle which was proposed July 6, 1978 (43 FR 29152–54). The Illinois mud turtle is known to occur from several localities in Illinois, Iowa, and Missouri.

In accord with section 4(f)(5), the Illinois mud turtle is withdrawn. This action gives notice of the withdrawal of this species.

This notice is issued under the authority contained in the Endangered Species Act of 1973.

The primary author of this notice is Dr. Paul A. Opler, Office of Endangered Species, U.S. Fish and Wildlife Service, Washington, D.C. 20240 (703/235–1975).

Dated: August 1, 1980.

Lynn A. Greenwalt,

Director, Fish and Wildlife Service.

BILLING CODE 4310-55-M

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

50 CFR Part 661

Commercial and Recreational Salmon Fisheries Off the Coasts of Oregon, Washington, and California

AGENCY: National Oceanic and Atmospheric Administration (NOAA)/Commerce.

ACTION: Notice of preliminary projections.

SUMMARY: The Acting Director, Northwest Region, ("Regional Director") National Marine Fisheries Service, (NMFS), has completed a preliminary in-season review of pre-season estimates of coho salmon stock abundance and total ocean harvest of coho to date. This review is in accordance with the 1980 amendment to the Fishery Management Plan (FMP) for the "Commercial and Recreational Salmon Fisheries off the Coasts of Washington, Oregon and California Commencing in 1978," and regulations implementing the 1980 amendment. The area considered is from the U.S./Canadian boundary to the California/Oregon boundary.

On or before August 22, a final determination will be made using the best information then available. If the data indicate that in-season modification of the 1980 seasons or catch limits is necessary, such action will be taken by publication of a notice of final rulemaking in the **Federal Register** on or near August 22.

DATE: Public comments are invited until August 21, 1980.

ADDRESS: Comments may be sent to: H. A. Larkins, Acting Director, Northwest Region, National Marine Fisheries Service, 1700 Westlake Avenue North, Seattle, Washington 98109.

FOR FURTHER INFORMATION CONTACT: H. A. Larkins, Telephone 206–442–7575.

SUPPLEMENTARY INFORMATION: The final regulations implementing the FMP at 50 CFR Part 661, were filed with the **Federal Register** on July 29, 1980. They specify in § 661.12(b) that the Acting Director, Northwest Region, NMFS, on August 22, may modify the open seasons and catch limits set forth in § 661.10 and § 661.11 in any portion of Sub-areas A, B or C by issuing a field order if he determines that (1) actual conditions of abundance and distribution of salmon and fishing efforts and catches differ from conditions anticipated prior to May 1; and (2) in-season modifications are necessary to provide adequate escapement for spawning, to meet treaty-Indian allocation requirements, or to maintain insofar as possible the historical harvest ratio between commercial and recreational salmon fisheries. Sub-area A is the area extending from Cape Falcon, Oregon, to the U.S./Canadian boundary; Sub-area B is the area from Cape Falcon to Cape Blanco, Oregon, and Sub-area C extends from Cape Blanco to the California/Oregon border.

According to § 661.12(d)(1) of the regulations, preliminary projections are to be made on August 7 based on the following factors:

(A) The number of participants, amount and distribution of fishing effort, in the commercial and recreational fisheries as of August 7 compared to similar time periods in prior years; and

(B) The current and historical coho salmon harvest ratios between the commerical fishery and the recreational fishery, as set forth in paragraph (e) of this section; and

(C) Abundance estimates and catches of coho stocks in the WPP Regulatory Area as of August 7 compared to the WPP estimate of coho salmon abundance and catch data for the 1974–1976 period; and

(D) Abundance estimates and catches of coho stocks in the OPI Regulatory Area, including private hatchery fish, compared to the original OPI predictions; and

(E) Data from marked-fish recoveries, including analysis of recoveries of coho salmon with implanted coded-wire tags and

(F) Any other scientific information relevant to the abundance and distribution of coho stocks, total fishing efforts and catches that is available as of August 7.

These criteria were applied to two major production areas as follows:

The Washington Production Projection (WPP) Regulatory Area

Catch Data

Information gathered through July 27, 1980, indicates that as of that time the ocean harvest of coho in the WPP was 498,666 fish: 283,397 caught in the recreational fishery and 214,271 in the troll fishery (31,637 by the treaty Indian ocean fishery). These data reveal a harvest ratio between the commercial and recreational fisheries of 43:57 as compared to the 1971–75 historic seasonal ratio of 60:40. Coho harvest figures for 1979 for the WPP through July 27 were 164,641 for the recreational fishery and 392,165 for the troll fishery. Comparable catch data for the 1974–76 period show an average WPP coho harvest of 502,085 fish for the first two weeks of the all species season for those years; 300,894 in the recreational fishery and 201,191 in the troll fishery.

Effort Data

Current WPP troll effort through July 27, 1980, is 12,079 boat days down approximately 36.5% from the 1979 effort to July 27 of 19,033 boat days. Recreational effort through the same date is 174,764 angler trips as compared to a 1979 level of 171,820 angler trips and a 1977–79 average of 216,773 angler trips.

The Oregon Production Index (OPI)

Catch Data

An estimated 623,285 coho have been harvested by the ocean fisheries in the OPI as of July 27, 1980. This total includes catches of 135,781 for Ilwaco, 440,641 for Oregon and 46,843 for California. The troll fishery harvested 228,409 compared with 394,856 for the recreational fishery. The 1980 harvest ratio between the commercial and recreational fisheries through the same date was 37:63 as compared to the 1971–75 historic seasonal ratio of 71:29.

Comparable OPI catch data as of the same date for the 1979 season was 760,952 coho for the troll fishery and 176,831 coho for the recreational fishery.

Effort Data

June vs early May releases. An

WPP is slightly lower than originally

Notices

Effort Data

Effort for the combined Oregon, and Ilwaco, Washington, area through July 27, 1980 was 14,922 boat days for the troll fishery and 274,649 angler trips for the recreational fishery. This is compared with 1979 effort through a comparable date of 26,213 boat days for the troll fishery and 241,031 angler trips for the recreational fishery.

Coho Abundance in the WPP and OPI

Preliminary analysis of May through early July coded-wire tag (CWT) recoveries indicates a significant increase in percentage contribution of Columbia River-origin coho to the recreational fishery catches in all four Washington coastal areas as contrasted to final pre-season forecasts. This implies that either the OPI or the WPP or both pre-season forecasts of coho stock abundance are inaccurate and may be in need of modification. The possible reasons for this inaccuracy are:

a. The initial OPI abundance estimate is correct, but Puget Sound-Washington coastal coho abundance is much lower than originally forecast.

b. Coho abundance for the OPI is moderately higher than forecast, and Puget Sound-Washington coastal coho abundance is moderately lower than pre-season forecasts.

c. The initial Puget Sound-Washington coastal forecasts are correct, but the actual OPI coho abundance is much higher than forecast.

For the following reasons, alternative "b" above seems to be the most plausible, although refinement of stock composition and distribution analysis will require CWT data from the first three complete weeks of the all species troll fishery which are not currently available.

1. CWT data available to date in 1980 on 3-year-old adults show improved survival for delayed-release hatchery coho in the Columbia River system. Results from 1979 hatchery returns of 2-year-olds indicate, however, that this type of production also produces 2-year-old jack salmon at a much lower rate than normal releases. Since these jacks are the basis for the OPI abundance forecast, a reduction in jack production resulting from delayed releases can produce an OPI underestimate. In addition, delayed-release production was not uniformly distributed among artificial production stations included in the OPI jack total.

2. Preliminary analysis of 1977 brood year time-of-release experimental groups from four different Columbia River hatcheries show a survival advantage as adults of 2.18 to 1 for early June vs early May releases. An estimated 21% of total Columbia River yearling coho releases benefited from this advantage (release from May 16–June 7) which could translate into an increased Columbia River coho stock size as high as 25%.

3. To date, private Oregon aquaculture production has been a very small contributor to Washington's ocean salmon catch.

4. Although efforts to develop predictive methods similar to the OPI for salmon stocks predominating off northern Washington have been less successful to date, real time statistics available for the northern Washington troll fishery seem to indicate a lower abundance of coho than prevailed in any of the past five years.

Summary and Conclusions

It is apparent that to date the harvest of coho by recreational fishermen off Oregon and Washington is higher than anticipated. Through July 27, 623,265 coho have been harvested in the OPI, of which 63% (394,856 coho) were taken by the recreational fishery. The preseason forecast for the OPI was for a 820,000 coho harvest of which 29% (240,000) were expected to be harvested by recreational fishermen.

In the WPP, 498,668 coho were harvested through July 27, of which 284,397 coho were taken by the recreational fishery. The preseason estimate of available coho harvest in the WPP was 857,000 coho of which 40% (347,000 coho) were expected to be harvested in the recreational fishery.

As of this date there is insufficient reliable information to conclude that actual conditions of coho abundance differ from pre-season estimates although there are indicators that there could be differences identified by August 22, 1980, in either the OPI area, the WPP area or both. It is possible that the Columbia River component of the OPI is slightly higher than forecast and the Puget Sound component of the WPP is slightly lower than forecast. If such differences are confirmed by later data, modifications to provide adequate escapement for spawning, or to meet treaty-Indian allocation requirements, or to help insofar as possible achieve the historical harvest ratio between commercial and recreational salmon fisheries, may be made by notice of final rulemaking by the Regional Director on August 22. Such modifications could shorten or extend either the recreational or the troll season in the OPI area or the WPP area or both.

A finding that the Columbia River component of the OPI is slightly higher and the Puget Sound component of the WPP is slightly lower than originally forecast has the following implications: A downward revision of abundance for the WPP coho stocks will lead to a reduction in the 857,000 fish allowable ocean catch north of Cape Falcon since the fishery will be limited by the strength of the stocks and treaty Indian allocation requirements. This could lead to a shortening of the recreational season, the troll season, or both.

An upward revision of the OPI coho abundance forecast could increase the allowable ocean coho catch in the area south of Leadbetter Point and necessitate some lengthening of one or more of the seasons. Whether this occurs depends on the level of effort and catch rates between now and August 22. The 37 percent commercial *vs.* 63 percent recreational catch ratio, if maintained, will certainly be a factor in adjusting the seasons, if necessary, on August 22.

Comments and Subsequent Actions

In accordance with § 661.12(g) of the final regulations, the Regional Director finds that a public comment period ending August 21 would be in the best interests of the public and the resource prior to the finalization of these preliminary findings and determinations. Relevant data on which these preliminary projections are based may be reviewed at the offices of the Regional Director (address above) during the comment period.

As a result of comments received during the public comment period and updated information available on August 21, the Regional Director will consider further the necessity for in-season modifications in the 1980 open fishing seasons and catch limits of the ocean recreational and commercial fisheries and will, as soon as practicable, publish in the Federal Register either (a) a notice of final rulemaking that makes in-season modifications or (b) a notice of no change in the regulations.

Signed at Washington, D.C., this 11th day of August 1980.

(16 U.S.C. 1801 *et seq.*)

Robert K. Crowell,

Deputy Executive Director, National Marine Fisheries Service.

Vol. 45, No. 159
Thursday, August 14, 1980

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Farmers Home Administration

[F.C.D.A. Number 10.422, Business and Industrial Loans]

Business and Industrial Loans; Insured Loan Interest Rates

AGENCY: Farmers Home Administration, USDA.

ACTION: Notice.

SUMMARY: Notice is hereby given by the Farmers Home Administration that the current rate of interest for insured business and industrial loans, established pursuant to 7 CFR 1980.423(b) is as follows:

a. Insured loans for other than public bodies in rural areas will be at the rate of eleven and one-half percent (11½%).

This rate will remain in effect until a change is published in the Federal Register.

Funds are very limited for this program. $10 million is available nationwide for fiscal year 1980.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: Mr. LaVerne A. Isenberg, Room 4118, Farmers Home Administration, USDA, Washington, DC 20250. Phone: 202–447–4871.

This notice does not directly affect any FmHA program or projects which are subject to A–95 clearinghouse review.

Dated: August 1, 1980.

Gordon Cavanaugh,

Administrator, Farmers Home Administration.

FR Doc. 80-24190 Filed 8-13-80; 8:45 am]

BILLING CODE 3410-07-M

Federal Grain Inspection Service

Administrative Modification of Registration Procedures for Foreign Commerce Grain Businesses

AGENCY: Federal Grain Inspection Service, USDA.

ACTION: Notice.

SUMMARY: This notice announces a modification of the administrative procedures established by the Administrator of the Federal Grain Inspection Service (FGIS or Service) for purposes of inital implementation of the registration procedures for foreign commerce grain businesses under the United States Grain Standards Act, as amended (7 U.S.C. 71 *et seq.)* (Act), and the regulations which implement the Act. The modification will permit grain firms to submit one application form and FGIS to issue one certificate of registration for the period from October 10, 1980, through December 31, 1981.

EFFECTIVE DATE: August 14, 1980.

FOR FURTHER INFORMATION CONTACT: J. T. Abshier, Director, Compliance Division, Federal Grain Inspection Service, 2405 Auditors Building, Washington, D.C. 20250, telephone (202) 447–8262.

SUPPLEMENTARY INFORMATION: Section 17A of the Act requires the registration of all persons engaged in the business of buying grain for sale in foreign commerce, and in the business of handling, weighing, or transporting grain for sale in foreign commerce.

Sections 800.32–800.38 of the regulations require the registration of grain firms beginning October 10, 1980, (6 months after the effective date of the regulations). They further state that applications shall be made on a form furnished by the Service and that certificates of registration will terminate on December 31 of the year for which they are issued. Renewal notices may be sent to holders of a certificate of registration at least 60 calendar days before termination.

To prevent the duplication of effort involved in having grain firms complete two application forms (one for the period October 10, 1980, through December 31, 1980, and another for calendar year 1981), the Service will combine the two periods. Thus, the initial certificates of registration will be valid for the period from October 10, 1980, through December 31, 1981. Applicable registration fees (§ 800.71 of the regulations) will be prorated for the remainder of 1980, and the annual fee will be charged for calendar year 1981.

The Service has developed a list of potential registrants and will be mailing applications forms to them on or about August 15, 1980. Firms which do not receive application forms may request them by writing or calling the Compliance Division, Federal Grain Inspection Service, 2405 Auditors Building, Washington, D.C. 20250 (202) 447–8300. Firms having one or more facilities will be required to submit only one application for registration, since registration is done on a corporate basis, not a facility basis.

(Sec. 17A, Pub. L. 95–113, 91 Stat. 1024 (7 U.S.C. 87(f–1)))

Done in Washington, D.C., on August 8, 1980.

L. E. Bartelt,

Administrator.

BILLING CODE 3410-02-M

Soil Conservation Service

Betsy Jeff Penn 4–H Center Critical Area Treatment RC&D Measure, North Carolina

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT: Mr. Jesse L. Hicks, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, telephone 919–755–4210.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Betsy Jeff Penn 4–H Center Critical Area Treatment RC&D Measure, Rockingham County, North Carolina.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these

findings, Mr. Jesse L. Hicks, State

(Catalog of Federal Domestic Assistance

Davis, California 95616, telephone 916–

eliminate ponding. All disturbed areas

Time limits may be set on individual

agencies and interested parties. A

findings, Mr. Jesse L. Hicks, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the reduction of erosion on 200 feet of streambank. The planned works of improvement include sloping existing streambank to a 2:1 slope and installing rock riprap. All disturbed areas will be seeded with adapted permanent vegetation.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Jesse L. Hicks, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, telephone 919–755–4210. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 15, 1980.

BILLING CODE 3410-16-M

Placerville Airport RC&D Measure and the Georgetown Divide Public Utilities District RC&D Measure, California

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Francis C. H. Lum, State Conservationist; Soil Conservation Service, 2828 Chiles Road, Davis, California 95616; telephone 916–758–2200.

Notice: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969 the Council on Environment Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service, U.S. Department of Agriculture, gives notice that environmental impact statements are not being prepared for the High Sierra RC&D Area, Placerville Airport and Georgetown Public Utilities District Critical Treatment Measures in El Dorado County, California.

The environmental assessment of these federally-assisted actions indicates that the projects will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Francis C. H. Lum, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for these measures.

The measures concern plans for critical area treatment. The planned works of improvement include erosion control practices such as small grade stabilization structures, diversions, minor grading and shaping, debris basins, metal culverts, concrete crib walls, grassed waterways, and revegetation of exposed and critically eroding areas.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Francis C. H. Lum, State Conservationist, Soil Conservation Service, 2828 Chiles Road, Davis, California 95616, telephone 916–758–2200. A combined environmental assessment and FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 15, 1980.

(Catalog of Federal Domestic Assistance Program No. 10.901, Resource Conservation and Development Program. Office of Management and Budget Circular A–95 regarding State and local clearinghouse review of Federal and federally-assisted programs and projects is applicable.)

BILLING CODE 3410-16-M

Washington County Union School Flood Prevention RC&D Measure, North Carolina

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Jesse L. Hicks, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, telephone 919–755–4210.

Notice: Pursuant to Section 192(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Washington County Union School Flood Prevention RC&D Measure, Washington, County, North Carolina.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Jesse L. Hicks, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for reducing flooding and for improving drainage on the school grounds. The planned works of improvement include installing catch basins, pipes, subsurface drainage tubing and one sump pump. Grading and shaping will be done to improve surface drainage and to eliminate ponding. All disturbed areas will be seeded with adapted permanent vegetation.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Jesse L. Hicks, State Conservationist, Soil Conservation Service, Room 544, Federal Building, 310 New Bern Avenue, Raleigh, North Carolina 27611, telephone 919–755–4210. Soil Conservation Service

Camp Whitney, W. Va., Advent Christian Conference Critical Area Treatment; R.C. & D. Measure, W. Va.; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a finding of no significant impact.

FOR FURTHER INFORMATION CONTACT:
Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, W. Va. 26505, telephone 304–599–7151.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Camp Whitney, W. Va., Advent Christian Conference Critical Area Treatment R.C. & D. Measure, Kanawha County, W. Va.

The environmental assessment of this federally-assisted action indicates that the projects will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of a subsurface drainage system totaling 1,340 feet of 4- and 6-inch tile to correct internal drainage problems. These drains will be constructed of clay tile and have a sand-gravel backfill to the ground surface. This will improve infiltration and also provide suitable bedding for the tile.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Craig M. Right, State Conservaton Service, 75 High Street, Morgantown, W. Va. 26505, telephone 304–599–7151. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 15, 1980.

BILLING CODE 3410-16-M

Jebens Park Critical Area Treatment; R. C. & D. Measure, Wyoming; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Frank S. Dickson, Jr., State Conservationist, Soil Conservation Service, Room 3113, Federal Building, 100 East "B" Street, P.O. Box 2440, Casper, Wyoming 82602, telephone 307–265–5550, Ext. 5201.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Jebens Park Critical Area Treatment RC&D Measure, Carbon County, Wyoming.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Frank S. Dickson, Jr., State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan to stabilize about 640 feet of the Little Snake River streambank by use of rock gabions. Trees and shrubs will be planted behind the gabion structures. The measure area is entirely in the boundaries of Jebens Park, a town park for Baggs, Wyoming.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Frank S. Dickson, Jr., State Conservationist, Soil Conservation Service, Room 3113, Federal Building, 100 East "B" Street, P.O. Box 2440, Casper, Wyoming 82602, telephone 307–265–5550, Ext. 5201. The FNSI has been sent to various Federal, State, and local agencies and interested parties. A limited number of copies of the FNSI are available to fill single copy requests at the above address.

Implementation of the proposal will not be initiated until September 15, 1980.

Putnam County Vocational and Technical Center Critical Area Treatment R. C. & D. Measure, West Virginia; Finding of No Significant Impact

AGENCY: Soil Conservation Service, U.S. Department of Agriculture.

ACTION: Notice of a Finding of No Significant Impact.

FOR FURTHER INFORMATION CONTACT: Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151.

NOTICE: Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR Part 1500); and the Soil Conservation Service Guidelines (7 CFR Part 650); the Soil Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Putnam County Vocational and Technical Center Critical Area Treatment RC&D Measure, Putnam County, West Virginia.

The environmental assessment of this federally-assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Mr. Craig M. Right, State Conservationist, has determined that the preparation and review of an environmental impact statement are not needed for this project.

The measure concerns a plan for the installation of critical area treatment on approximately 1.5 acres. About ¼ acre will be shaped to provide a stable slope for revegetation. The entire site will be vegetated in accordance with seeding recommendations for high-use areas.

The Notice of a Finding of No Significant Impact (FNSI) has been forwarded to the Environmental Protection Agency. The basic data developed during the environmental assessment are on file and may be reviewed by contacting Mr. Craig M. Right, State Conservationist, Soil Conservation Service, 75 High Street, Morgantown, West Virginia 26505, telephone 304–599–7151. BILLING CODE 3410-16-M

UNITED STATES DEPARTMENT OF COMMERCE

International Trade Administration

[Case No. 597 and Case No. 598]

Joseph Kelmer, d.b.a. Excel Industries and Peter G. Virag, d.b.a. DeVimy Test-Lab, Ltd.; Order Denying Export Privileges

In the matter of Jacob Kelmer, d.b.a. Excel Industries, 66 Hanita Street, Haifa, Isreal, and/or P.O. Box 11369, Tel Aviv, Isral, and/or 58 Bustenai Street, Ramat Hasharon, Israel, Respondent; Peter G. Virag, d.b.a.; DeVimy Test-Lab, Ltd., 388 St. James Street West; Montreal 126, Quebec, Canada, and/or 72 Manual Drive, Dallard des Orneaux, Montreal, Quebec, Canada; Respondent.

Separate proceedings were initiated by the June 13, 1980 service of charging letters issued by the Director, Office of

Export Administration (OEA) against Jacob Kelmer [1] (in Israel) and Peter G. Virag [2] (in Canada). The actions are joined because of their common background. Each of the parties was separately charged with violating the Export Administration Act, 50 U.S.C. App. 2401 *et seq.* OEA alleged that on not fewer than ten occasions, each unlawfully exported or caused to be exported or reexported, U.S. manufactured, and COCOM controlled, electronic manufacturing equipment valued in excess of $1,500,000. The Director alleged that the equipment was exported from the United States to Canada, thence to the Netherlands, or other friendly country, and ultimately delivered to proscribed destinations in the Eastern Bloc countries, all without authorization from the Office of Export Administration.

The respondents failed to answer or deny the charging letters. Although the charges against the parties may be taken as confessed, 15 CFR 388.9, the Compliance Division, OEA, submitted evidence to support the charges. The evidence was considered by the undersigned Hearing Commissioner, whose findings are limited to a single export of March 19, 1976, as detailed below.

The Compliance Division, while investigating a series of possible violations by the respondents, alerted the Customs authorities who seized an export from the United States at the control point in Champlain, New York, on May 19, 1976. Ostensibly, the consignment was for DeVimy, but the arrangements had been made with a shipping company for its immediate reexportation. In recognition of Virag's cooperation with the Department of Justice, criminal process was issued against and limited to DeVimy, which company was fined $1,500 in the U.S. District Court, Northern District, New York, Cr. No. 76–Cr.–3 (January 18, 1978), upon a finding that:

> Defendant has been convicted as charged of the offense(s) of wilfully and knowingly exporting from the United States, at the Port of Entry, Champlain, New York, to Amsterdam, Holland, a certain commodity, that is, one complete Mann photomask system, without a validated license authorizing such exportation having been applied for, granted or issued by the Office of Export Control, United States Department of Commerce as required by the Export Control Regulations issued under the Export Administration Act, on or about March 19, 1976, in violation of Title 50, Appendix, United States Code Section 2405(e); Title 15 CFR, § 370.3

Canada also found the company criminally guilty of violating that country's export laws. Kelmer was indicted for his complicity in the aborted export attempt of May 17. An unexecuted warrant for his arrest was issued from the U.S. District Court for the Northern District of New York, 78 Cr–60, and is outstanding. Although he was interviewed for his part in the illegal export activities by the Fraud Division, National Police Headquarters, Jaffa, Israel, Kelmer refused to give a written statement or to meet with the U.S. authorities. The gist of Virag's statements in connection with the criminal proceedings surrounding the seizure of May 19, 1976, and the voluntary information furnished by Kelmer to the fraud Division is the basis for the findings herein.

Kelmer is a commissioned merchant primarily dealing in catalogue items. He is fully knowledgeable of the import and export laws of the United States, Israel and the European countries. Knowing full well that controlled electronic manufacturing equipment would not be licensed to the Eastern Bloc countries, he devised a scheme to circumvent the export laws. He convinced Virag that the goods were destined for Israel and that a validated export license would be issued upon proper application for the commodities. However, in some inexplicable fashion, he convinced Virag that the Israelis wanted no publicity and enlisted his aid to that end. The vision of high dollar profits, even though he knew better, encouraged Virag to become a willing dupe in an illegal plot. Once involved, Virag was unable or unwilling to extricate himself. On instructions and cash advances from Kelmer, Virag purchased controlled electronic commodities in the United States. The end-user was stated to be the innocent-appearing Canadian manufacturing DeVimy company, for which no validated export license is required. Virag receipted the export declarations for the illegal shipment. It bore the caveat, "These commodities licensed by the United States for ultimate destination, Canada, diversion contrary to United States law prohibited." In reality the commodities were purchased for delivery to Eastern European destinations and delivered to the ultimate end-users in those countries.

When the scheme of operations was initiated, deliveries of electronic materials were made to a warehouse in Montreal. Later they were reexported to Amsterdam, where they were on-loaded for ultimate delivery to Eastern Europe. The seized shipment [3] destined for Czechoslavakia was one of a series of illegal exports.

Based on the foregoing, I find that respondents, by scheme and subterfuge, knowingly and wilfully engaged in illegal export activities and did effect illegal reexports, all in violation of the Export Administration Act and Regulations, as alleged in the separate charging letters. I find that an order denying export privileges to Jacob Kelmer for a period ending May 31, 1995 and an order denying export privileges to Peter G. Virag for a period ending May 31, 1990 is reasonably necessary to protect the public interest and to achieve effective enforcement of the regulations. Therefore, pursuant to the authority delegated to me, 15 CFR 388, *it is ordered*

I. All outstanding export licenses in which respondents appear or participate, in any manner or capacity, are hereby revoked and shall be returned forthwith to the Office of Export Administration for cancellation.

II. The respondents are denied all privileges of participating, directly or indirectly, in any manner or capacity, in any transaction involving commodities or technical data exported or to be exported from the United States, in whole or in part. Without limitation of the generality of the foregoing, participation, directly or indirectly, in any manner or capacity; (a) As a party or as a representative of a party to any export license application; (b) in the preparation or filing of any export license application or reexportation authorization, or any document to be submitted therewith; (c) in the obtaining or using of any validated or general export license or other export control documents; (d) in the carrying on of negotiation with respect to, or in the receiving, ordering, buying, selling, delivering, storing, using, or disposing of any commodities or technical data, in whole or in part, exported or to be exported from the United States; and (e) in the financing, forwarding, transporting, or other servicing of such commodities or technical data.

III. Such denial of export privileges shall extend not only to the respondents but also to their agents, employees, representatives, and partners and to any other person, firm, corporation, or

[1] Unless otherwise stated, reference to Jacob Kelmer includes his wholly owned or controlled company, Excel Industries. Kelmer is also known as Jack Kay, Jack Kaye and Jack Kelmer. He was previously denied all export privileges, 37 FR 10511 (August 15, 1972).

[2] Unless otherwise stated, Peter G. Virag includes his wholly owned company, DeVimy Test-Lab Ltd.

[3] A Decree of Forfeiture, *U.S.* vs. *One Mann Type 3595 Photorepeater, Parts and Accessories*, U.S. District Court, Northern District, New York, Civil No. 79–CV–207, was entered on May 7, 1979.

business organization with which the respondents now or hereafter may be

business organization with which the respondents now or hereafter may be related by affiliation, ownership, control, position of responsibility, or other connection in the conduct of trade or services connected therewith.

IV. No person, firm, corporation, partnership or other business organization, whether in the United States or elsewhere, without prior disclosure to and specific authorization from the Office of Export Administration, shall do any of the following acts, directly or indirectly, or carry on negotiations with respect thereto, in any manner or capacity, on behalf of or in any association with the respondents or any related party, or whereby the respondents or any related party may obtain any benefit therefrom or have any interest or participation therein, directly or indirectly: (a) Apply for, obtain, transfer, or use any license, Shipper's Export Declaration, bill of lading, or other export control document relating to any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States, by, to, or for said respondents or related party denied export privileges; or (b) order, buy, receive, use, sell, deliver, store, dispose of, forward, transport, finance, or otherwise service or participate in any exportation, reexportation, transshipment, or diversion of any commodity or technical data exported or to be exported from the United States.

V. (a) This order shall remain in effect against the respondents, Peter G. Virag and DeVimy Test-Lab, Ltd. for the period ending May 31, 1990. (b) This order shall remain in effect against the respondents Jacob Kelmer and Excel Industries for the period ending May 31, 1995. The prior order of August 15, 1972 is hereby superseded.

VI. In accordance with the provisions of § 388.18 of the Export Administration Regulations, the respondents may move at any time to vacate or modify this Denial Order by filing with the Hearing Commissioner, International Trade Administration, U.S. Department of Commerce, Washington, D.C. 20230, an appropriate motion for relief, supported by substantial evidence, and may also request an oral hearing thereon, which if requested shall be held before the Hearing Commissioner at the earliest convenient date.

This order shall become effective immediately.

Dated: August 7, 1980.

Bertram Freedman,

Hearing Commissioner.

BILLING CODE 3510-25-M

DEPARTMENT OF COMMERCE

Minority Business Development Agency

Financial Assistance Application Announcement

The Minority Business Development Agency (MBDA), formerly the Office of Minority Business Enterprise, announces that it is seeking applications under its program to operate one to three national projects for a 12 month period beginning October 1, 1980. The total cost of the project is estimated to be $600,000.

Funding Instrument: It is anticipated that the funding instrument as defined by the Federal Grant and Cooperative Agreement Act of 1977, will be a grant.

Program Description: Executive Order 11625 authorizes MBDA to fund projects which will provide technical and management assistance to eligible clients in areas related to the establishment and operation of businesses. This proposed project is specifically designed to provide consulting and technical support services to minority buyers to assist them in evaluating the historical performance of the business being acquired, its present financial condition, prospects for the future, and the present management; to determine capital requirements in connection with the proposed purchase; to prepare a business plan and forecast financial statements for three years from the date of purchase; to aid in the negotiation of an agreement to purchase; and to identify sources of financing and prepare appropriate applications, documentation (other than legal) and information necessary to facilitate lenders and/or investors' decision. The Grantee, as an independent recipient and not as an agent of the Government, shall provide, on call, all qualified personnel, equipment, materials and facilities to perform all services required by this grant on a task-by-task basis.

Eligibility Requirements: There are no restrictions. Any for-profit or non-profit institution is eligible to submit an application.

Application Materials: An application kit for this project may be requested either by calling (202) 377-3165 or writing to the following address: Grants Administration Division, Minority Business Development Agency, U.S. Department of Commerce, Washington, D.C. 20230

In requesting an application kit, the applicant must specify its profit status (i.e., a State or local government, federally recognized Indian tribunal unit, educational institution, hospital, or other type of non-profit organization, or if the applicant is a for-profit firm), this information is necessary to enable MBDA to include the appropriate cost principles in the application kit.

Award Process: All applications that are submitted in accordance with the instructions in the application kit will be submitted to a panel for review and ranking. Specific criteria by which applications will be evaluated will be included in the application kit.

Closing Date: Applicants are encouraged to obtain an application kit as soon as possible in order to allow sufficient time to prepare and submit an application before the closing date of September 16, 1980. Detailed submission procedures are outlined in each application kit.

[Catalog of Federal Domestic Assistance. This program is not subject to the requirements of OMB Circular A-95, 11.800 Minority Business Development]

Dated: August 8, 1980.

Allan A. Stephenson,

Deputy Director.

BILLING CODE 3510-21-M

National Oceanic and Atmospheric Administration

Membership of National Oceanic and Atmospheric Administration Performance Review Boards

AGENCY: National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of initial membership of NOAA Performance Review Boards.

SUMMARY: In conformance with the Civil Service Reform Act of 1978, 5 USC, 4314(c)(4), NOAA announces the appointment of persons to serve as members of NOAA Performance Review Boards (PRB's). The NOAA PRB's are responsible for reviewing performance apprisals and ratings of Senior Executive Service (SES) members and making written recommendations to the appointing authority on SES retention and compensation matters, including performance-based pay adjustments, awarding of bonuses and amounts, and initial recommendations from potential rank awards. The appointment of the initial members to the NOAA PRB's will be for a period of approximately 18 months service, which officially begins on August 8, 1980.

DATE: The effective date of service of initial appointees to the NOAA Performance Review Boards is August 8, 1980.

FOR FURTHER INFORMATION CONTACT: Ralph C. Reeder, Director, Office of Personnel, NOAA, 6001 Executive Boulevard, Rockville, Maryland 20852, (301) 443-8781.

SUPPLEMENTARY INFORMATION: The names and titles of the initial members of the NOAA PRB's (NOAA officials unless otherwise identified) are set forth below:

James P. Walsh—Deputy Administrator
George S. Benton—Associate Administrator
Martin H. Belsky—Assistant Administrator for Policy and Planning
Samuel A. Lawrence—Assistant Administrator for Management and Budget
James W. Brennan—Deputy General Counsel, Office of the General Counsel
William H. Stevenson—Deputy Assistant Administrator for Fisheries, Office of Fisheries
Martha O. Blaxall—Director, Office of Utilization and Development, Office of Fisheries
Mirco Snidero—Deputy Assistant Administrator for Management and Budget
Ned A. Ostenso—Deputy Assistant Administrator, Office of Research and Development
C. Gordon Little—Director, Wave Propagation Lab, Environmental Research Laboratories, Office of Research and Development
Hugo F. Bezdek—Director, Atlantic Oceanographic and Meteorological Laboratories, Environmental Research Laboratories, Office of Research and Development
Donald P. Martineau—Acting Deputy Assistant Administrator for Office of Oceanic and Atmospheric Services
Richard H. Hagemeyer—Executive Director, National Weather Service, Office of Oceanic and Atmospheric Services
Robert L. Carnahan—Director, Weather and Flood Warnings Coordination, National Weather Service, Office of Oceanic and Atmospheric Services
Thomas D. Potter—Director, Environmental Data and Information Service, Office of Oceanic and Atmospheric Services
Joan Hock—Director, Center for Environmental Assessment Services Environmental Data and Information Service, Office of Oceanic and Atmospheric Services
Clifford A. Spohn—Deputy Director, National Environmental Satellite Service, Office of Oceanic and Atmospheric Services
Ross Williams—Rear Admiral, Oceanographer of the Navy
Thomas A. Dillon—Deputy Director, National Bureau of Standards
Claude C. Gravett, Jr.—Deputy Director, Programs, National Measurements Laboratories, National Bureau of Standards
Mary Johrde—Oceanographer, Office of Astronomical, Atmospheric, Earth and Ocean Sciences, National Science Foundation
Helen McCammon—Director, Ecological Division, Department of Energy
Robert G. Prestemon—Director, Programs and Evaluation, Office of Assistant Secretary for Budget and Programs, Department of Transportation
Alexander Grant—Associate Commissioner of Consumer Affairs, Food and Drug Administration, Public Health Service, Health and Human Resources

Dated: August 8, 1980.

Samuel A. Lawrence,

Assistant Administrator for Management and Budget.

BILLING CODE 3510-25-M

COMMITTEE FOR THE IMPLEMENTATION OF TEXTILE AGREEMENTS

Cancelling Import Controls on Certain Man-Made Fiber Textile Products From Taiwan

AGENCY: Commitee for the Implementation of Textile Agreements.

ACTION: Cancelling the import controls established on man-made fiber textile products in Category 669, including fish netting and fishing nets in T.S.U.S.A. 355.4560, produced or manufactured in Taiwan and exported to the United States during the agreement year which began on January 1, 1980 and extends through December 31, 1980.

(A detailed description of the textile categories in terms of T.S.U.S.A. numbers was published in the Federal Register on February 28, 1980 (45 FR 21372), as amended on April 23, 1980 (45 FR 27463).)

SUMMARY: In discussions between the American Institute in Taiwan and the Coordination Council for North American Affairs, it has been agreed to establish an export certificate system pursuant to the Bilateral Cotton, Wool and Man-Made Fiber Textile Agreement of June 8, 1978, as amended, which will eliminate the need for further control of certain categories by the United States. Accordingly, the imports controls previously established on Category 669 and 669 pt. are being cancelled.

EFFECTIVE DATE: August 15, 1980.

FOR FURTHER INFORMATION CONTACT: Ronald J. Sorini, International Trade Specialist, Office of Textiles and Apparel, U.S. Department of Commerce, Washington, D.C. 20230. (202/377-5423).

SUPPLEMENTARY INFORMATION: On December 28, 1979, there was published in the Federal Register (44 FR 76839) a letter dated December 21, 1979 from the Chairman of the Committee for the Implementation of Textile Agreements to the Commissioner of Customs which established levels of restraint for certain specified categories of cotton, wool and man-made fiber textile products, produced or manufactured in Taiwan, including man-made fiber textile products in Category 669 and 669 pt., which may be entered into the United States for consumption, or withdrawn from warehouse for consumption, during the twelve-month period which began on January 1, 1980 and extends through December 31, 1980. In the letter published below the Chairman of the Committee for the Implementation of Textile Agreements directs the Commissioner of Customs to cancel the import controls in effect on Category 669 and 669 pt.

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

August 11, 1980.

Committee for the Implementation of Textile Agreements

Commissioner of Customs
Department of the Treasury, Washington, D.C.

Dear Mr. Commissioner: This directive further amends, but does not cancel, the directive of December 21, 1979 from the Chairman of the Committee for the Implementation of Textile Agreements which directed you to prohibit, effective on January 1, 1980 and for the twelve-month period extending through December 31, 1980, entry into the United States for consumption, and withdrawal from warehouse for consumption, of cotton, wool and man-made fiber textile products in certain designated categories.

Under the terms of the Arrangement Regarding International Trade in Textiles done at Geneva on December 20, 1973, as extended on December 15, 1977; pursuant to the Bilateral Agreement of June 8, 1978, as amended, concerning cotton, wool and man-made fiber textile products exported from Taiwan; and in accordance with the provisions of Executive Order 11651 of March 3, 1972, as amended by Executive Order 11951 of January 6, 1977, you are directed, effective on August 15, 1980, to cancel the import controls established in the directive of December 21, 1979 for Category 669 and 669 pt. (only T.S.U.S.A. 355.4560).

The action taken with respect to Taiwan and with respect to imports of man-made fiber textile products from Taiwan has been determined by the Committee for the Implementation of Textile Agreements to involve foreign affairs functions of the United States. Therefore, these directions to the Commissioner of Customs, which are necessary to the implementation of such actions, fall within the foreign affairs exception to the rule-making provisions of 5 U.S.C. 553. This letter will be published in the **Federal Register.**

Sincerely,

Arthur Garel,

Acting Chairman, Committee for the Implementation of Textile Agreements.

BILLING CODE 3510-25-M

DEPARTMENT OF DEFENSE

Department of Army

Department of Army Performance Review Boards

AGENCY: Department of Army, DOD.

ACTION: Notice.

SUMMARY: Notice is hereby given of the names of the members of the Performance Review Boards for the Office of the Surgeon General and the Office of the Chief of Engineers.

EFFECTIVE DATE: August 15, 1980.

FOR FURTHER INFORMATION CONTACT: Carol D. Smith, Senior Executive Service Office, Directorate of Civilian Personnel, Headquarters, Department of Army, the Pentagon, Washington, DC 20310, (202) 697-2169.

SUPPLEMENTARY INFORMATION: Section 4314(c)(1) through (5) of Title 5 U.S.C., requires each agency to establish, in accordance with regulations prescribed by the Office of Personnel Management, one or more performance review boards. The boards shall review and evaluate the initial appraisal of senior executives' performance by the supervisor and make recommendations to the appointing authority or rating official relative to the performance of the senior executives. Each board's review and recommendation will include only those senior executives' appraisals from their respective commands or activities. Publication of this notice provides corrections, additions and/or deletions of members previously published in 45 FR, page 49122, dated July 23, 1980.

The Members of the Performance Review Board for the Office of the Surgeon General are:

1. Major General Enrique Mendez, Jr., M.D., Deputy Surgeon General-Chairman.
2. Brigadier General Robert T. Cutting, M.D., Director, Health Care Operations, Office of the Surgeon General.
3. Brigadier General Bernhard T. Mittemeyer, M.D., Director of Professional Services, Office of the Surgeon General.
4. Brigadier General Garrison Rapmund, M.D., Commander, U.S. Army Medical Research and Development Command.
5. Dr. F. K. Mostofi, M.D., Chairman, Center for Advanced Pathology, Armed Forces Institute of Pathology.
6. Dr. L. C. Johnson, M.D., Chairman, Department of Orthopedic Pathology, Armed Force Institute of Pathology.
7. Dr. G. F. Bahr, M.D., Chairman, Department of Cellular Pathology, Armed Forces Institute of Pathology.
8. Dr. W. R. Beisel, M.D., Deputy for Science, Walter Reed Army Institute of Research.
9. Dr. T. R. Sweeney, M.D., Ph.D., Scientific Advisor (Biochemistry), Walter Reed Army Institute of Research.

The Members of the Performance Review Board for the Office of the Chief of Engineers (OCE) are:

1. Major General Joseph K. Bratton, Deputy Chief of Engineers.
2. Major General William E. Read, Assistant Chief of Engineers.
3. Major General E. R. Heiberg, Director of Civil Works, Chief of Engineers.
4. Brigadier General Ames S. Albro, Jr., Division Engineer, Middle East Division.
5. Brigadier General Henry J. Hatch, Division Engineer, Pacific Ocean Division.
6. Ms. Betty J. Farwell, Director of Real Estate, Office, Chief of Engineers.
7. Dr. L. R. Shaffer, Technical Director, Construction Engineering Research Lab.
8. Mr. Lee Garrett, Chief, Engineer Division, Director of Military Programs, Office, Chief of Engineers.
9. Mr. Zane Goodwin, Chief, Engineer Division, North Central Division.
10. Mr. Herbert Howard, Chief, Engineer Division, North Atlantic Division.
11. Mr. Rodney Resta, Chief, Engineer Division, Lower Mississippi Valley Division.
12. Mr. William N. McCormick, Chief, Engineer Division, South Atlantic Division.
13. Dr. James Choromokos, Chief, Research and Development, Office, Chief of Engineers.
14. Mr. George Brazier, Chief, Construction-Operations Division, Director of Civil Works, Office, Chief of Engineers.
15. Mr. Delbert E. Olsen, Chief, Planning Division, North Pacific Division.

Carol D. Smith, *Chief*

Senior Executive Service Office.

BILLING CODE 3710-08-M

Corps of Engineers, Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Brazos Island Harbor Channel, Brownsville, Tex. Regulatory Permit

AGENCY: Galveston District, U.S. Army Corps of Engineers, DOD.

APPLICANT: Brownsville Navigation District, Brownsville, Texas.

ACTION: Notice of intent to prepare a DEIS.

SUMMARY: 1. The Galveston District, Corps of Engineers has received an application for a permit to construct improvements to the Brazos Island Harbor Channel, Texas, an existing Federal navigation project in south Texas. A preliminary assessment of the application has determined that an EIS is required. A revised application is anticipated after development of the scope and preparation of an environmental report. The proposed project is intended to provide more efficient waterborne commerce in the general area of the Lower Rio Grande Valley of Texas. Benefits would be derived from savings in transportation of commodities such as petroleum, petroleum products, ores, and grains.

2. Potential alternatives proposed for consideration would include: (1) no action; (2) alternative means of commodity transport, i.e., rail, truck, barge, and pipeline; (3) alternative facility sitings, (4) alternative facility designs,

(5) alternative channel designs, i.e., depth, length, and width;

(6) alternative channel alignments, (7) alternative disposal methods for dredged material; and (8) alternative disposal sites, i.e., upland disposal, ocean disposal, upland/ocean disposal. Channel widening by 100 feet and channel deepening by 9 and 19 feet will be intensely investigated.

3.a. A public scoping and coordination meeting is scheduled to be held on 3 September 1980 for the purpose of obtaining government agency and other public comment on relevant matters of concern in examining the various alternatives of the project. Proposed plans will be developed in accordance with Corps of Engineers regulations, considering the views expressed by the public and agencies of the local, State, and Federal governments.

b. Some important environmental considerations to be analyzed because of the potential for special environmental concern include: (1) dredging and disposal, (2) aquatic ecology/wetlands, (3) sport and commercial fisheries, (4) water and sediment quality, (5) hydrography, (6) air quality, (7) socioeconomic/hazards analysis and, (8) cultural resources.

c. Agencies which may be requested to become cooperating agencies include the U.S. Fish and Wildlife Service, the Environmental Protection Agency, and the National Marine Fisheries Service.

d. Other environmental consultation and review will be conducted in accordance with various laws and regulations.

4. A public meeting specifically to determine the scope of the DEIS will be held on 3 September 1980 in Brownsville, Texas. All previous and future input to studies for the project will be considered in the scoping process, if made during the relevant time frames for comment and response in the overall permitting process.

5. The DEIS is scheduled to be available to the public in April 1981.

ADDRESS: Questions about the proposed action and DEIS can be answered by Mr. Marcos De La Rosa, Chief, Permit Branch, Galveston District, Corps of Engineers, P.O. Box 1229, Galveston, Texas 77553, (713) 763-1211, extension 382.

Dated: August 7, 1980.

James M. Sigler,

Colonel, Corps of Engineers, District Engineer.

[FR Doc. 80-24661 Filed 8-13-80; 8:45 am]

BILLING CODE 3710-GK-M

Corps of Engineers; Department of the Army

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for Palo Blanco and Cibolo Creeks, Falfurrias, Tex., Flood Control Study

AGENCY: Galveston District, U.S. Army Corps of Engineers, DOD.

ACTION: Notice of intent to prepare a DEIS.

SUMMARY: 1. The proposed action to be addressed in the DEIS consists of construction of flood control improvements to Palo Blanco and Cibolo Creeks at and in the vicinity of Falfurrias, Brooks County, Texas. The proposed project would provide for protection in the Falfurrias vicinity now subject to periodic stream flooding.

2. Alternatives to be considered in the DEIS include no action, diversion channels, reservoirs, various levels of flood plain buyout, ring levee, and various levels of channel enlargement and straightening with and without channel lining, and various combinations.

3.a. Coordination of the project has included a public meeting and workshop, consultation with local governing entities, and a planning aid document from the U.S. Fish and Wildlife Service. A public meeting and workshop was held in Falfurrias, Texas on April 13, 1977 to obtain information on flooding problems in Falfurrias and adjacent areas of Brooks County and to identify concerns of all interested individuals and groups. Proposed plans for improvement are being developed in accordance with Corps of Engineers' regulations considering the views expressed by the public and agencies of the local, State, and Federal governments. Additional meetings will be held to discuss these plans and to determine public views on issues and preferences on proposed alternative plans. A final plan will be developed to reflect the views expressed by the public and local, State and Federal agencies.

b. Some important environmental considerations to be analyzed as a result of past coordination and participation include: (1) Preserving and minimizing disturbance to the wildlife habitat along existing creeks and lakes, (2) preserving and enhancing acquatic ecosystems of natural lakes, especially Laguna Salada, by reducing erosion, (3) preserving or maintaining existing wetlands in lake and riparian areas, (4) preserving and enhancing species of recognized importance that may occur in the area, (5) avoiding removal of vegetation in brushland habitat, (6) disposing of excavated material in areas where environmental damages would be minimal, and (7) considering effects of burrowing animals on maintenance of levees.

c. Further coordintion and consultation will be continued with appropriate local, State, and Federal agencies and interested organizations and individuals.

d. Environmental consultation and review of the project will be conducted in accordance with the requirements of the National Environmental Policy Act of 1969, Council on Environmental Quality Regulations (40 CFR Parts 1500-1508), and all other applicable laws, regulations and guidelines.

4. A scoping meeting specifically to determine and identify significant resources of the project area for preparing the DEIS is being planned.

The meeting is to be held on September 18, 1980 at Brooks County Court House, Falfurrias, Texas. Various Federal, State, and local agencies will be contacted and requested to send a representative to the meeting.

5. The DEIS is scheduled to be available to the public in early 1982.

ADDRESS: Questions about the proposed action can be answered by Mr. Paul Wilson, Chief, Regional Planning Section at (713) 763-1211, extension 313 or toll-free in Texas at 1-800-392-6412. Questions concerning the DEIS should be directed to Mr. C. R. Harbaugh, Chief, Environmental Resources Branch at (713) 763-1211, extension 492. Written inquiries should be addressed to the District Engineer, Galveston District, Corps of Engineers, P.O. Box 1229, Galveston, Texas 77553.

Dated: August 3, 1980.

James M. Sigler,

Colonel, Corps of Engineers, District Engineer.

BILLING CODE 3710-GK-M

Corps of Engineers, Department of the Army

Rippowam River Basin Study in Connecticut and New York; Intent To Prepare a Draft Environmental Impact Statement (DEIS)

AGENCY: U.S. Army Corps of Engineers, DOD, New England Division.

ACTION: Notice of intent to prepare a draft environmental impact statement.

SUMMARY: 1. The proposed action is a plan to provide flood protection to the lower Rippowam River Basin. During the

course of the study, other water resource needs have also been

4. A scoping meeting will be held. The date and location will be identified

Defense Systems Management College; Board of Visitors Meeting

Findings

related to the contract work to be performed. To aid in the information-

Federal Government. Both Dames & Moore and SAI are in the latter group.

course of the study, other water resource needs have also been investigated, including recreation, water supply, water quality, fish and wildlife, and environmental amenities.

2. The alternatives being considered include:

a. Structural channel enlargement with flood proofing of buildings in the residual flood plain,

b. Bypass tunnel to divert excess channel flow from the Stillwater Pond area into a 26' diameter deep rock tunnel to Stamford Harbor,

c. Bypass tunnel of same alignment but with a diameter reduced to 24' due to floodwater storage provided by a new enlarged dam and reservoir located at existing Siscowit Dam in Pound Ridge, New York and New Canaan, Connecticut,

d. Utilizing existing and proposed water supply reservoirs to provide seasonal flood control storage in conjunction with flood forecasting, warning and emergency evacuation,

e. No action.

3. a. Close coordination with key resource agencies and local interests is underway to determine the problems and needs to be addressed and to identify the significant issues related to each alternative being considered. Additional public meetings and coordination with other agencies will be held as issues and alternatives are more clearly defined. Affected Federal, State and local agencies and other interested organizations and parties will continue to be encouraged to participate in the identification of issues, problems and needs and the formulation of alternative courses of action by communicating with the addressee listed below.

b. Significant issues to be analyzed in depth in the DEIS include river basin flood damage control needs, fish and wildlife habitat requisites, potential impacts on proposed plans for a recreation greenbelt along the banks of the lower Rippowam River, water quality impacts resulting from retention and periodic discharge of water in a subsurface diversion tunnel, and construction activity impacts.

c. Consultation with the State Historic Preservation Officer and the U.S. Heritage Conservation and Recreation Service will be initiated in accordance with the National Historic Preservation Act of 1966 and Executive Order 11593. Planning is being coordinated with the U.S. Fish and Wildlife Service on an informal and formal basis, including the procedures required by the Fish and Wildlife Coordination Act of 1958 and the Endangered Species Act Amendments of 1978.

4. A scoping meeting will be held. The date and location will be identified through Public Notice procedures.

5. The DEIS is scheduled to be completed and available for review in September 1981.

ADDRESS: Information concerning the proposed action and DEIS can be obtained by contacting: Charles Freeman, Impact Analysis Branch, New England Division, U.S. Army Corps of Engineers, 424 Trapelo Road, Waltham, Massachusetts 02154, ATTN: NEDPL–IR, Phone (617) 894–2400, Extension 347; (FTS 839–7347).

Dated: August 7, 1980.

Defense Advisory Committee on Women in the Services (DACOWITS); Meeting

Pursuant to Pub. L. 92–463, notice is hereby given that a meeting of the Executive Committee of the Defense Advisory Committee on Women in the Services (DACOWITS) is scheduled to be held from 1:30 p.m. to 5:00 p.m., September 8, 1980 and from 9:30 a.m. to approximately 1:00 p.m., September 9, 1980 in Room 1E801, The Pentagon. Meeting sessions will be open to the public.

The purpose of the meeting is to review responses to recommendations/requests for information made at the 1980 Spring Meeting, discuss current issues relevant to women in the Services, and plan the itinerary/program for the next Semi-Annual Meeting scheduled for November 16–19, 1980 in Scottsdale, Arizona.

Persons desiring to make oral presentations or submit written statements for consideration at the Executive Committee Meeting must contact Captain Mary J. Mayer, Executive Secretary, DACOWITS, OASD (Manpower, Reserve Affairs, and Logistics), Room 3D322, The Pentagon, Washington, D.C. 20301, telephone 202–697–5655 no later than September 1, 1980.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

August 11, 1980.

Defense Systems Management College; Board of Visitors Meeting

A meeting of the Defense Systems Management College (DSMC) Board of Visitors will be held in Building 202, Fort Belvoir, VA, on Wednesday, September 10, 1980, from 8:30 a.m. until 5 p.m. The agenda will include a review of accomplishments related to the system acquisition education, system acquisition research, and information collection and dissemination missions. It will also include a review of the DSMC plans, resources and operations. The meeting is open to the public; however, because of limitations on the space available, allocation of seating will be made on a first-come, first-served basis. Persons desiring to attend the meeting should call Lieutenant Commander Judy Ray (703–664–1175) to reserve a seat.

M. S. Healy,

OSD Federal Register Liaison Officer, Washington Headquarters Services, Department of Defense.

August 8, 1980.

BILLING CODE 3810-70-M

DEPARTMENT OF ENERGY

Economic Regulatory Administration

Proposed Contract Award

AGENCY: Economic Regulatory Administration.

ACTION: Notice of proposed contract award.

SUMMARY: In accordance with Department of Energy Procurement Regulations, the Economic Regulatory Administration gives public notice that two (2) contracts are being awarded, after taking into account the existence of potential organizational conflicts of interest, because this procurement is determined to be in the best interest of the United States.

FOR FURTHER INFORMATION CONTACT: Mr. Steven E. Ferguson, Office of Fuels Conversion, Economic Regulatory Administration, Room 3322-D, 2000 M Street, N.W., Washington, D.C. 20461.

SUPPLEMENTARY INFORMATION: Upon the basis of the following findings, mitigation and determination, the proposed contracts described below are being awarded, after taking into account the existence of potential organizational conflicts of interest, because this procurement is determined to be in the best interest of the United States pursuant to the authority of Department of Energy Procurement Regulation 41 CFR 9–1.5409(a)(3).

Findings

(1) The Department of Energy (DOE), Economic Regulatory Administration ERA), Office of Fuels Conversion implements the provisions of the Powerplant and Industrial Fuel Use Act of 1978 (the "Act") (Pub. L. 95–888). A primary purpose of the Act is to reduce the importation of petroleum and increase the Nation's capability to use indigenous energy resources of the United States by encouraging and fostering the greater use of coal and other alternate fuels, in lieu of natural gas and petroleum, as a primary energy source by utilities and major fuel burning installations. In implementing the Act, ERA, on an individual facility basis, (1) issues prohibition orders against the further use of petroleum or natural gas, and (2) processes petitions for exemption from the prohibitions against petroleum or natural gas use contained in the Act.

(2) In the course of implementing the Act it is necessary for ERA to obtain by contract technical support services regarding aspects of the environmental issues associated with acting on individual prohibition orders and exemption petitions. The contractors shall analyze and evaluate the site-specific environmental impacts of prohibiting specific powerplants and major fuel burning installations (MFBIs) or classes of powerplants and MFBIs from using natural gas or petroleum; shall evaluate the environmental impact of the granting or denying of a petition for exemption from prohibitions against natural gas or petroleum use; shall evaluate the adequacy and validity of environmental analyses provided in petitions for exemptions; and shall perform other similar assessments and analyses as appropriate. Without such environmental analyses Federal decisions cannot be made and the authorities of the Act would remain unimplemented.

A Source Evaluation Board (SEB) was convened for the procurement, since the anticipated cost for the requirement exceeded five (5) million dollars. The Request for Proposal (RFP) was sent to nearly 250 prospective offerors. Proposals were received from 15 firms. As a result of the evaluation process, it was determined that six (6) firms were in the competitive ranges. Two (2) contractors among the six (6) were selected for award. They are Dames & Moore, and Science Applications, Inc. (SAI).

(3) In accordance with 41 CFR 9–1.5405, all six (6) offerors in the competitive range provided disclosure of information concerning their interests related to the contract work to be performed. To aid in the information-gathering process, detailed questions concerning the nature of their businesses and how various aspects of them (e.g., organizational, Financial, past or current contracts) could contribute to a possible organizational conflict of interest were provided to each contractor. As a result of this process, DOE was furnished with information concerning whether possible organizational conflicts of interest exist with respect to (1) a contractor's ability to render impartial technically sound and objective assistance or advice, and (2) whether an unfair competitive advantage may be conferred on a contractor as a result of performing specific tasks.

(4) After a thorough review of the information submitted, DOE was unable to find that there is little or no likelihood that a possible organizational conflict of interest exists for any of the six (6) offerors. This result is due to the nature of the business in which the offerors (and in appropriate cases, their subcontractors) are engaged. All six (6) offerors actively seek work with private industry to provide environmental services similar to that required by this procurement. Any such firm would stand to benefit economically from actions taken by DOE regarding the continued use of petroleum or natural gas in powerplants and major fuel burning installations to the extent that such actions by DOE would increase the demand by energy firms for environmental professional support services.

However, the potential for an organizational conflict of interest varies among the six (6) offerors. Three (3) offerors have a substantially greater potential for a conflict because they design and construct powerplants and major fuel burning installations as well as provide environmental consulting services to the owner of such facilities. They could thus obtain additional work (e.g., design and/or construction of a new plant or a plant modification) as a direct result of a Federal action in which they participate. The other three (3) offerors perform only analytical studies rather than design and construction work and thus the professional services they render are the end product of their involvement with a private client. Any potential for bias would result only indirectly, i.e., from the expectation of obtaining additional industry business as environmental consultants because of their Federal association or the nature of the consultation they provide to the Federal Government. Both Dames & Moore and SAI are in the latter group.

(5) Dames & Moore performs a substantial part of its business in providing services to industry that are similar to those being procured. It describes itself as providing ". . . a broad range of geotechnical, planning and environmental services to both industry and governement." A significant portion of its business is with energy firms. Dames & Moore is not proposing to use subcontractors for this effort.

(6) Although SAI does a substantially smaller proportion of its business with private clients, it does actively seek similar business in the private sector. Thus, its potential for a conflict is different only in degree from that of Dames & Moore. In addtion, several of SAI's proposed subcontractors were found to have potential for conflicts, due to their work for industrial clients, including in some cases energy firms. These subcontractors were found to be essential to SAI's proposal. SAI proposed to use the following five (5) subcontractors: JRB Associates; GCA Corporation/Technology Division; Jacobs Engineering Group; Environmental Systems Corporation and Engineering Analysis, Inc.

(7) If an award is made to any of the six (6) firms in the competitive range, the possibility exists that the firm would be simultaneously performing similar technical and analytical services both for the Government and for private clients in support of different actions occurring under the Act.

(8) DOE has been unable to develop reasonable contractual language to totally avoid the type of potential conflict of interest recognized in this case. Furthermore, it is unreasonable as a condition for award to restrict any further the ability of a firm to secure business in the private section other than that provided in the Special Contract Clause (41 CFR 9–1.5408–2(b)), particularly when so doing would not affect the presence of the potential conflict, but rather would only contribute to the degree of mitigation achieved. Both the determination of whether a potential conflict exists and the establishment of reasonable mitigation in those cases where a potential conflict is recognized should be guided by good business judgment based upon the relevant facts and the work to be performed.

Mitigation

(1) Documents prepared by these contractors to support DOE's NEPA compliance requirements will be prepared under the regulations

promulgated by the Council on

contractor analysis will become a part

FOR FURTHER INFORMATION CONTACT:

promulgated by the Council on Environmental Quality (CEQ) (43 FR 55978, November 29, 1978). These regulations recognize that contractor assistance is an integral part of Federal agency NEPA documentation, and they provide that in order to avoid a conflict of interest, contractors shall submit a disclosure statement showing that they have no financial or other interest in the project being evaluated. The mitigation procedures used in this procurement to insure that no conflict of interest will in fact exist substantially exceed the CEQ requirement.

(2) Both contracts awarded under this procurement will include the Organizational Conflicts of Interest Special Clause (41 CFR 9–1.5408–2(b)), which will apply to both prime and subcontractors. The primary purpose of this clause is to aid in ensuring that the Contractor is not biased because of its past, present, or currently planned interests (financial, contractual, organizational, or otherwise) which relate to the work under this contract, and does not obtain any unfair competitive advantage over other parties by virtue of its performance of this contract.

(3) The RFP provides that a principal reason for awarding more than one contract under this procurement is to provide a mechanism for avoiding the situation where a conflict of interest would actually exist. Prior to the assignment of a task, the contractor will submit a statement as to whether performing that task for the Government would create a conflict because of work performed for the company in question under a past, present, or currently planned relationship. The contractor will also be required to state whether performing that task would require them to review work they had previously performed for the Government. Similar information will be required from all subcontractors. DOE will independently review that statement, and if a conflict is found the contractor will be disqualified and that task will be assigned to another contractor or will be completed with other resources at DOE's disposal. In the case of a prohibition by rule for a class of powerplants or MFBIs, DOE will prior to assignment of a task establish that no conflict exist for any facility included in the class.

(4) As stated in the RFP, all work performed by the contractors under this procurement will be independently reviewed by DOE. All final decisions will be made by the Government, and the contractors will play an advisory role only. In addition, all pertinent contractor analysis will become a part of the public record of the particular action in question and thus will be subject to close third-party scrutiny for the validity of the data and technical findings presented.

(5) Similarly, any work which one of the contractors might perform for a private client and which is submitted by that company as part of an action under the Act will also become part of the public record and subject to review and comment. Furthermore, any information so developed for and submitted by a company would be independently evaluated and verified by DOE (either by the other support contractor secured by this procurement or by another resource) before it is used in support of a Government decision.

Determination

In light of the above findings and mitigation, I hereby determine in accordance with 41 CFR 9–1.5409(a)(3) that award of these contracts would be in the best interests of the United States.

Dated August 5, 1980.

Hazel R. Rollins,

Administrator, Economic Regulatory Administration.

ENVIRONMENTAL PROTECTION AGENCY

[FRL 1570–3]

California State Motor Vehicle Pollution Control Standards; Waiver of Federal Preemption

AGENCY: Environmental Protection Agency.

ACTION: Waiver of Federal preemption.

SUMMARY: This decision grants California a waiver of Federal preemption to enforce amendments to its 1979 and 1980 model year Assembly-Line Test procedures and New Vehicle Compliance Test procedures.

ADDRESSES: Information relevant to this decision is available for public inspection during normal working hours (8:00 a.m. to 4:30 p.m.) at: U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2404 (EPA Library), 401 M St., S.W., Washington, D.C. 20460. (202) 755–2808. Copies of the standards and test procedures are also available upon request from the California Air Resources Board, 1102 Q Street, P.O. Box 2815, Sacramento, California 95812.

FOR FURTHER INFORMATION CONTACT: Jerry Schwartz, Attorney/Advisor, Manufacturers Operations Division, (EM–340), U.S. Environmental Protection Agency, Washington, D.C. 20460, (202) 472–9421.

SUPPLEMENTARY INFORMATION:

I. Introduction

By this decision, issued under section 209(b) of the Clean Air Act, as amended (hereinafter the "Act"),[1] I am granting the State of California a waiver of Federal preemption to enforce the following enforcement procedures:

(1) Amendments to Assembly-Line Test procedures which California has adopted for (a) the 1979 model year, as set forth in section 2057 of title 13 of the California Administrative Code and in "California Assembly-Line Test Procedures for 1979 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles" adopted December 19, 1977, as amended May 9, 1979,[2] and (b) the 1980 model year, as set forth in section 2058 of title 12 of the California Administrative Code and in "California Assembly-Line Test Procedures for 1980 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles" adopted November 16, 1978, as amended January 30, 1979 and May 9, 1979.[3]

(2) California's New Vehicle Compliance Testing program under section 2100 et seq. of title 13 of the California Administrative Code and "California New Vehicle Compliance Test Procedures" adopted June 24, 1976, as amended May 9, 1979, for 1979 and subsequent model year gasoline- and diesel-powered passenger cars, light-duty trucks and medium-duty vehicles.

Under section 209(b)(1) of the Act, when California requests a waiver of Federal preemption as to accompanying enforcement procedures which relate to standards for which a waiver has already been granted and is still in effect, I must grant the requested waiver unless I find that (1) the procedures may cause the California standards, in the aggregate, to be less protective of public health and welfare than the applicable Federal standards or (2) the accompanying enforcement procedures are not consistent with section 202(a) of the Act. With regard to the first finding, if the public record of the proceedings before me contains plausible evidence that the California enforcement procedures may cause the California standards, in the aggregate, to be less protective than the corresponding Federal standards, then I must deny the waiver if: (1) California did not make a positive determination as to the protectiveness of the standards when coupled with the new enforcement procedures or (2) California did make such a determination, and the record contains clear and compelling evidence that its determination is arbitrary and capricious.[4] With regard to the second finding, State enforcement procedures are deemed not to be consistent with section 202(a) if there is inadequate lead time to permit the development of the technology necessary to implement the new procedures, giving appropriate consideration to the cost of compliance within that time frame, or if the Federal and California test procedures impose inconsistent certification requirements.

On the basis of the record before me, I cannot make the findings required for a denial of the waiver under section 209(b)(1) with respect to California's 1979 and 1980 model year Assembly-Line Test procedures and New Vehicle Compliance Test procedures.

[1] 42 U.S.C. 7543(b) (1977).

[2] These amended procedures are applicable to 1979 model year gasoline-powered passenger cars, gasoline- and diesel-powered light-duty trucks, and gasoline- and diesel-powered medium-duty vehicles.

[3] These amended procedures are applicable to 1980 model year gasoline- and diesel-powered passenger cars, light-duty trucks and medium-duty vehicles. California has not requested a waiver of Federal preemption for its unamended 1980 model year Assembly-Line Test procedures, but the unamended 1980 procedures fall within the scope of the waiver I previously granted for the 1979 model year procedures. 44 FR 7807 (February 27, 1979). I have reached this conclusion because the unamended 1980 procedures are identical to the unamended 1979 procedures; thus, they are not new "initially adopted" standards or enforcement procedures, they do not undermine California's protectiveness determination, and they do not cause any inconsistency with section 202(a) of the Act. See 44 FR 61096 (October 23, 1979). No party presented evidence as part of these proceedings which would tend to contradict this conclusion.

II. Background

A. Amendments to Assembly-Line Test Procedures

The California Air Resources Board (CARB) adopted Assembly-Line Test (ALT) procedures (one of two separate programs which the amendments under consideration in this decision affect) for 1979 and 1980 model year passenger cars, light-duty trucks and medium-duty vehicles on February 16, 1978, and November 16, 1978, respectively. These ALT procedures require each manufacturer to conduct a functional inspection and a steady-state emissions test of every vehicle it produces for sale in California, and to perform quality audit tests (according to the full California exhaust emission test procedures) on at least two percent of its California production.

[4] 43 FR 9344, 9345, 9346 (March 7, 1978).

California received a waiver of Federal preemption to enforce its 1979 ALT procedures on February 2, 1979.[5] On May 9, 179, CARB adopted amendments to both the 1979 and 1980 ALT procedures that form part of the basis of this waiver request.[6] The 1979 ALT amendments contained several minor changes which no party contested in these waiver proceedings and an amendment regarding Quality Audit testing at remote facilities which several parties did contest.

California also incorporated these changes into its 1980 ALT procedures. These amendments along with some additional minor changes CARB adopted on January 30, 1979 (also uncontested in these waiver proceedings), are the changes relating to the 1980 model year vehicles for which California has requested a waiver.[7]

The Quality Audit testing change at issue pertains to test procedures performed at remote facilities.[8] Under the unamended 1979 procedure, California permitted manufacturers to perform a "Pre-Delivery Inspection" (PDI) prior to the actual emissions testing to correct any shipping-related defects that may have occurred during shipment to the remote facility.[9] Under the amendments, a manufacturer may correct shipping-related damage only *after* the initial Quality Audit test of the vehicle, except for "compelling reasons".[10] The manufacturer otherwise may not conduct any PDI activity prior to the emissions test. If the manufacturer performs a retest, the manufacturer may petition the Executive Officer to substitute the after-repair results for the original test results.[11] A manufacturer may perform PDI on Quality Audit test cars prior to initial test without petitioning the Executive Officer only if the manufacturer performs the same PDI on 100% of its production, subsequent to consignment for shipping from the assembly line.

CARB adopted these contested Quality Audit amendments to prevent a manufacturer from correcting previously undetected manufacturing defects along with shipping-related defects before Quality Audit testing, and thereby to ensure that a manufacturer will test vehicles in the same condition in which they arrive at the dealership.[12] CARB further stated that neither CARB nor the manufacturer has any real assurance that, before delivering a vehicle to a consumer, dealership personnel actually perform a PDI identical to that performed by the manufacturer at the Quality Audit test site.[13]

B. Amendments to New Vehicle Compliance Test Procedures

On June 24, 1976, California adopted its New Vehicle Compliance Test procedures (the other program which amendments under consideration in this decision affect), which, along with subsequent amendments, received waivers of Federal preemption.[14] The 1979 and subsequent model year amendments under consideration in these proceedings include the following provisions:

(1) A prohibition against pre-test mileage accumulation or modifications, and adjustments or special preparation

[5] 44 FR 7807 (February 27, 1979).

[6] The waiver request was contained in a letter from Mr. Thomas C. Austin, Executive Officer (CARB), to Administrator, Environmental Protection Agency (EPA), dated July 5, 1979. EPA held a public hearing on this request on October 24, 1979. At the same time, a waiver request for California's optional 100,000-mile emission standards and accompanying enforcement procedures applicable to 1980 and subsequent model year passenger cars, light-duty trucks and medium-duty vehicles was considered. I granted the waiver request for the 100,000-mile option in a decision published on February 25, 1980 (45 FR 12291).

[7] All of the amendments to both the 1979 and 1980 ALT procedures were before the Presiding Officer for his consideration at the October 24, 1979 waiver hearing.

[8] Under California's regulations, manufacturers have the option of performing their Quality Audit tests at either the end of their assembly lines, or at a "remote facility" away from the assembly line.

[9] PDI is any procedure a manufacturer may instruct its dealers to perform to identify and correct a variety of defects before the dealers actually deliver the vehicles to consumers. CARB's 1979 model year regulations initially permitted a manufacturer to perform its PDI procedures on Quality Audit vehicles shipped to remote facilities for testing because those procedures presumably would be representative of the repairs its dealers actually would perform to correct shipping-related defects on vehicles delivered to consumers. As a result, the emissions performance of the vehicles on which a manufacturer would conduct Quality Audit testing after performing PDI presumably would be representative of the emissions performance of the vehicles its dealers ultimately would deliver to consumers for actual use.

[10] Compelling reasons are "that the vehicle is not testable, or is not reasonably operative, or is not safe to drive, or that damage to the vehicle would be likely if the vehicle were tested". See California Assembly-Line Test Procedures for 1979 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles, p. 11.

[11] The Executive Officer must respond to the petition within 10 days. *Id.*

[12] April 5, 1979 CARB Staff Report, "Public Hearing to Consider Proposed Changes in the Regulations of the Air Resources Board Regarding Predelivery Inspection and Compliance Test Evaluation," 4 (hereinafter "Staff Report").

[13] Staff Report, 6.

[14] 43 FR 9344 (March 7, 1978) (pertaining to 1978–1982 model year medium-duty vehicles, diesel-powered light-duty trucks and 1979–1982 model year gasoline-powered light-duty trucks), 43 FR 15490 (April 13, 1978) (pertaining to 1983 and later model year light-duty trucks and medium-duty vehicles); 43 FR 25729 (June 14, 1978) (pertaining to 1979 model year gasoline-powered passenger cars and 1980 and later year gasoline- and diesel-powered passenger cars.)

or maintenance, unless the manufacturer

that the vehicles actually tested under

speculative.[37] AM testified that its lead

involved.[44] AM, also stated that

or maintenance, unless the manufacturer first procures written consent from the Executive Officer. The Executive Officer will not unreasonably withhold consent where the adjustments are necessary "to render the vehicle testable and reasonably operative."

(2) A manufacturer may perform "Specific, Special Maintenance" (SSM) necessary to restore test vehicles to their "natural condition" [15] Only if it has submitted an advance written request to the Executive Officer, and he approves the request.

(3) A manufacturer may inspect for and correct shipping-related damage or maladjustment only after it has conducted an initial emissions test of the vehicle, except where 100% of the manufacturer's production receives the same inspections or corrections. After the initial test, the manufacturer may request permission to correct shipping-related damages and to retest the vehicle. If it receives this permission, the manufacturer then may substitute its retest results for the original test results. This provision parallels the Assembly-Line test procedure amendment.

(4) The manufacturer must supply any unique specialty hardware and personnel necessary to perform the test.

(5) Under the unamended procedure, when the Executive Officer evaluated the test vehicles, if "no decision" was reached after 20 vehicles, he could not make a "pass" or a "fail" decision, and he did not have the authority to test any additional vehicles to give him an adequate basis for reaching a "pass" or "fail" decision. The amendments allow him to select 10 additional vehicles for testing. If the average emissions of the 30 vehicles tested exceed or are less than any of the exhaust emission standards, the Executive Officer may render a "fail" or "pass" decision, respectively.

III. Discussion

A. Public Health and Welfare

Test procedures like the California Assembly-Line Test procedures and New Vehicle Compliance Test procedures are "accompanying enforcement procedures" under section 209(b)(1) of the Act.[16] The criteria for my review of the public health and welfare issue as it pertains to accompanying enforcement procedures have been set forth in the introduction.

All exhaust emission standards to be enforced by the procedures under consideration here have received waivers of Federal preemption which are still in effect.[17] The public record contains no plausible evidence that the proposed Assembly-Line Test procedures or New Vehicle Compliance Test procedures reduce the protectiveness of these standards.[18] In fact, CARB testified that the amended PDI procedures are slightly more stringent than the current procedures.[19] With regard to the amended New Vehicle Compliance Test evaluation procedures, CARB,[20] the Motor Vehicle Manufacturers Association (MVMA)[21] Ford Motor Company (Ford),[22] and General Motors Corporation (GM) [23] agreed that the amended procedure is slightly more stringent than the current procedure. Accordingly, California did not need to make any additional public health and welfare determinations in conjunction with these waiver requests. Thus, I cannot find a basis for denying the waiver on this issue.

B. Consistency

Under section 209(b)(1)(C), I must grant a California waiver request unless I find that California's accompanying enforcement procedures are not consistent with section 202(a) of the Act. Section 202(a) states, in part, that any regulation promulgated under its authority "shall take effect after such period as the Administrator finds necessary to permit the development and application of the requisite technology, giving appropriate consideration to the cost of compliance within such period."

1. *Lead Time and Technology.*—With regard to the PDI rule for the Assembly-Line Test procedures and the New Vehicle Compliance Test procedures, Ford contended that the definition of the compelling reasons exception is too vague,[24] making it impossible to determine whether compliance with the proposed procedures is technically feasible.[25] GM opposed granting the waiver, stating that to continue performing PDI under the proposed procedure would necessitate the establishment of its own PDI center or centers in California, and that the amendment does not afford adequate lead time to consider this decision.[26] GM also contended that the compelling reasons exception was too vague and lacked objective criteria it could depend on and, thus, compliance with the rule would not be feasible when lead time is considered.[27] Chrysler testified that it would experience lead time problems in performing any engineering modifications the new procedures may require, and therefore only favored granting the waiver if the effective date were changed to the 1981 model year.[28] American Motors (AM), addressing its remarks only to the New Vehicle Compliance Test procedures, also expressed lead time concerns by stating that the amendments established a new test procedure. AM stated that manufacturers must receive lead time to facilitate compliance with this new procedure prior to the effective date of the amendments.[29] AM also was concerned that the New Vehicle Compliance Test procedures did not include a corresponding compelling reasons exception.[30]

Finally, CARB testified that no lead time is necessary, because the changes are not new requirements. CARB explained that the changes are simply intended to permit more accurate checks on assembly line quality, thus ensuring that the vehicles actually tested under the Assembly-Line Test procedures and the New Vehicle Compliance Test procedures will be representative of vehicles leaving the assembly line.[31] As to the vagueness objection, CARB stated that the exceptions permitting PDI are sufficiently clear and specific, and that they adequately implement the intent of CARB's regulations by providing examples that show PDI is not allowed for the correction of manufacturing defects.[32] Moreover, CARB expressed its willingness to work with the manufacturers on a case-by-case basis to create a list of compelling reasons agreeable to both parties.[33]

The manufacturers' testimony also points out the deficiencies in their arguments regarding lead time and technology. Ford testified that it has already implemented the PDI rule, and it has had no greater difficulty complying with the emission standards.[34] GM testified that it already subjects every vehicle shipped to California to a thorough end-of-the-line inspection that, to some extent, is more thorough than the PDI performed by dealers.[35] Since GM performs this check on 100% of its California vehicles, it still may perform the check under the amended procedures. It did indicate, however, that the "key issue" involved the shipping-related defects that may occur after the vehicles leave the assembly line, because the end-of-assembly line check obviously cannot correct those problems.[36] The amended PDI procedure specifically addresses these shipping-related problems by permitting PDI to correct them after the manufacturer performs the initial test. Thus, GM apparently is already functioning successfully using procedures that it still may ultimately employ under the contested amendments.

GM also testified that it was considering constructing its own PDI center or centers in California to perform PDI on 100% of its California production. It has not yet decided whether it will construct any centers; therefore, any claims regarding lead time problems it may encounter in employing such a center are merely speculative.[37] AM testified that its lead time concerns would be somewhat vitiated if CARB included the compelling reasons exceptions in the New Vehicle Compliance Test procedures.[38] CARB had already testified at the October 24, 1979, EPA hearing that the substance of the exception is included in those procedures.[39]

With regard to the proposed changes in the evaluation of test results obtained from the New Vehicle Compliance Test procedure, if tests of 20 vehicles do not result in a "pass" or "fail" decision, the MVMA and several manufacturers testified that the increased stringency of the amended procedure may result in the failure of vehicles that would otherwise pass.[40] CARB testified, however, that the proposed evaluation procedures were only slightly more stringent than the present procedures.[41] Thus, the proposed changes are not a new requirement; they simply facilitate the capabilities of both the Assembly-Line Test and the New Vehicle Compliance Test procedures to ensure that production vehicles actually meet California's emission standards.

In light of the above discussion, I cannot conclude that manufacturers cannot develop and apply the requisite technology within the available lead time in order to achieve compliance with the California standards under the proposed Assembly-Line Test procedures and New Vehicle Compliance Test procedures.

2. *Cost of Compliance.*—With regard to the cost of compliance, GM testified that compliance with the proposed procedures might require the construction of its own PDI center or centers, which, because of GM's high volume of sales, would involve substantial costs.[42] Additionally, GM asserted that the burden of possible retests would also be very disruptive of manufacturing and impose a significant cost penalty, although it did not provide estimates of such costs.[43] AM testified that the additional personnel, equipment, and possible expansion of existing facilities that would be necessary to comply with the procedures would be costly. AM failed to provide estimates of the costs involved.[44] AM, also stated that administrative costs due to the possible double testing under the retest provision would be burdensome.[45]

Finally, CARB testified that under the Quality Audit Assembly-Line Test procedures, the PDI rule only applies to vehicles that have been shipped to remote facilities.[46] This is only a small percentage of total production; therefore, CARB contended that the potential additional costs manufacturers would incur in retesting these vehicles also would be limited. Moreover, a manufacturer may retest a vehicle only if it has corrected a shipping-related defect, and CARB indicated that it did not believe that there were many vehicles in that category. GM's projected costs for construction of its own PDI center or centers are uncertain, because GM has not actually decided to proceed with construction.[47] I therefore cannot find that the cost of compliance with any or all of the amendments at issue is so excessive as to warrant a denial of the waiver on these grounds.

Other Objections to Granting the Wavier. Ford and GM testified that their dealers are obligated by contract and specifically reimbursed to perform a thorough PDI. Additionally, they are subject to legal liability under section 11705 of the California code if they fail to do so. Ford [48] and GM [49] also introduced evidence intended to indicate that their dealers were complying with their obligations. Chrysler,[50] GM,[51] Ford [52] and MVMA [53] contended that testing vehicles without PDI constituted testing at an "intermediate" step, and that since the condition of the vehicle as received by the consumer is the crucial consideration, a manufacturer should conduct the tests after it performs any PDI procedure similar to that which the dealer will perform.

CARB, however, introduced evidence indicating that the manufacturers' PDI

instructions were vague [54] and that dealers were not completely performing their PDI obligations.[55] More importantly, on occasion manufacturers can use PDI to correct production defects instead of only shipping-related defects as intended by the amended regulations.[56] The PDI rule, therefore, is not a new legal obligation, but simply a device to ensure that the manufacturer produces vehicles that meet the standards when they leave the assembly line. This is the point where the manufacturer relinquishes physical control over the condition of its vehicles.[57] The PDI rule simply fixes responsibility for emissions control with the manufacturer.

GM objected to the provision requiring the manufacturers to supply any personnel and unique specialty hardware that may be necessary to perform the tests. GM stated that the requirement was unnecessary since the manufacturers were already supplying them.[58]

The Act does not authorize me to deny California a waiver on the grounds supplied in these other objections. The decision on such matters of public policy is properly left to California's judgment.[59]

IV. Finding and Decision

Having given due consideration to the public hearing record of October 24, 1979, all material submitted for the record, and other relevant information, I find that I cannot make the determinations required for a denial of the waiver under section 209(b) of the Act, and therefore I hereby waive application of section 209(a) of the Act to the State of California with respect to the following enforcement procedures:

(1)(a) Amendments to the 1979 model year Assembly-Line Test procedures set forth in section 2057 of title 13 of the California Administrative Code and in "California Assembly-Line Test Procedures for 1979 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles" adopted December 19, 1977, as amended May 9, 1979, for 1979 model year gasoline-powered passenger cars, gasoline- and diesel-powered light-duty trucks, and gasoline- and diesel-powered medium-duty vehicles.

The unamended 1980 model year Assembly-Line Test procedures fall within the scope of the waiver I previously granted for the unamended 1979 procedures because the unamended 1980 procedures are identical to the 1979 procedures, and therefore they do not: (1) undermine California's determinations that its standards, in the aggregate, are as protective of public health and welfare as applicable Federal Standard, nor (2) cause California's requirements to be inconsistent with section 202(a) of the Act.

(b) The amendments to the 1980 model year Assembly-Line Test procedures set forth in section 2058 of title 13 of the California Administrative Code and in "California Assembly-Line Test Procedures for 1980 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles," adopted November 16, 1978, as amended January 30, 1979, and May 9, 1979. The procedures are applicable for 1980 model year gasoline- and diesel-powered passenger cars, light-duty trucks and medium-duty vehicles.

(2) California's New Vehicle Compliance Testing program under section 2100 et seq. of title 13 of the California Administrative Code and "California New Vehicle Compliance Test Procedures" adopted June 24, 1976, as amended May 9, 1979, for 1979 and subsequent model years gasoline- and diesel-powered passenger cars, light-duty trucks and medium-duty vehicles.

My decision will affect not only persons in California but also the manufacturers located outside the State which must comply with California's standards in order to produce motor vehicles for sale in California. For this reason, I hereby determine and find that this decision is of nationwide scope and effect.

Dated: August 8, 1980.

Douglas M. Costle,
Administrator.

California State Motor Vehicle Pollution Control Standards; Amendments Within Previous Waivers of Federal Preemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The California Air Resources Board (CARB) has notified EPA that it has adpoted Assembly-Line Test procedures for various classes of new motor vehicles, for the 1981 model year. The 1981 procedures are essentially the same as those for the 1980 model year. The few changes which CARB has adopted are minor in nature. I find these changes to be included within the scope of previously granted waivers of Federal preemption and the accompanying waiver that I am granting today. Since the changes are included within these waivers, a public hearing to consider them is necessary. However, if any party asserts a *bona fide* objection to these findings, a public hearing will be held to provide an opportunity to present testimony and evidence to show that there are issues to be addressed through a section 209(b) waiver determination and that I should reconsider my findings.

DATES: Any *bona fide* objection to the findings in this notice must be filed on or before September 15, 1980; otherwise, at the expiration of this 30-day period these findings will be deemed final. Upon the receipt of any timely objection a public hearing will be scheduled and announced in a subsequent **Federal Register** notice.

ADDRESS: Any *bona fide* objection to the findings in this notice should be filed with Mr. Charles N. Freed, Director, Manufacturers Operations Division, (EN–340), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460. Copies of the above standards and procedures at issue in this notice, as well as those documents used in arriving at this decision, are available for public inspection during normal working hours (8 a.m. to 4:30 p.m.) at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2404 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. Copies of the standards and test procedures are also available upon request from the California Air Resources Board, 1102 Q Street, P.O. Box 2815, Sacremento, California 98512.

FOR FURTHER INFORMATION CONTACT: Jerry Schwartz, Manufacturers Operations Division, (EN–340), U.S. Environmental Protection Agency, Washington, D.C. 20460. (202) 472–9421.

SUPPLEMENTARY INFORMATION:

I. Introduction

Section 209(a) of the Clean Air Act, as amended ("Act"), 42 U.S.C. 7543(a), provides in part: "No State or any political subdivision thereof shall adopt or attempt to enforce any standard

relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part. No State shall require certification, inspection, or any other approval to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment."

Section 209(b)(1) of the Act requires the Administrator, after notice and opportunity for public hearing, to waive application of the prohibitions of section 209 to any State which has adopted standards (other than crankcase emission standards) for the control of emissions from new motor vehicles or new motor vehicle engines prior to March 30, 1966, if the State determines that the State standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. The Administrtor must grant a waiver unless he finds that: (1) the determination of the State is arbitrary and capricious, (2) the State does not need the State standards to meet compelling and extraordinary conditions, or (3) the State standards and accompanying enforcement procedures are not consistent with section 202(a) of the Act.

In addition, once the State receives a waiver of Federal preemption for its standards and enforcement procedures for a class of vehicles, it may adopt other conditions precedent to initial retail sale, titling or registration of the subject class of vehicles without the necessity of receiving a further waiver of Federal preemption.[1] If the State acts to change a previously-waived accompanying enforcement procedure, the change may be included within the scope of the previous waiver if it does not undermine the State's determination that its standards, in the aggregate, are as protective as comparable Federal standards, does not affect the technological feasibility of the State's requirements, and raises no new issues affecting the Administrator's previous waiver determinations.[2]

II. Discussion

In a February 13, 1980 letter to the Administrator, CARB notified EPA that it had adopted Assembly-Line Test (ALT) procedures for various classes of new motor vehicles for the 1981 model year.[3] CARB also stated its belief that the 1980 and 1981 model year ALT procedures are essentially the same, that changes from 1980 to 1981 are of a minor, technical nature, and that these 1981 changes are included within the scope of previous waivers of Federal preemption. I agree with CARB's judgment that these changes are included within the scope of previous waivers because they are not new, "initially-adopted" standards of enforcement procedures, present no new issues affecting my previous determinations with regard to California's standards and enforcement procedures, do not undermine California's "protectiveness in the aggregate" determination, and do not effect the technological feasibility of California's requirements.

The 1981 changes[4] adopted on December 19, 1979, and the existing waivers[5] which include them are as follows:

(i) Clarification of the "compelling reasons exception" to the pre-delivery inspection (PDI) rule of the Quality Audit test procedures.

The 1980 ALT procedures prohibit a manufacturer from correcting damages or maladjustments which have resulted from shipment of a vehicle to a remote testing facility until after the initial Quality Audit test, [6] except for "compelling reasons". The 1981 amendments delete the words "compelling reasons" but expand and clarify the substance of the exception to ensure that the exception includes only defects which are easily recognizable to the average observer. This restriction now applies to every adjustment or repair, whether a manufacturer performs it at a remote test facility or not. Previously, this restriction only applied to tests conducted at remote test facilities.

In addition, a manufacturer previously was required to report every adjustment or repair. The amendments now require the manufacturer to justify its adjustments and repairs, and delineate the information the manufacturer must report, such as the conditions and obvious symptoms of the vehicle and the reason for repair. These changes do not undermine the State's determination that its standards, in the aggregate, are as protective of public health and welfare as applicable Federal standards, do not cause the State's requirements to be inconsistent with section 202(a) of the Act, and raise no new issues affecting the Administrator's previous waiver determinations, and therefore, are included within the previous waiver for the 1980 ALT procedures.

(ii) Clarification of the exception permitting repair of Quality Audit test vehicles if, subsequent to shipping from the assembly line, the manufacturer performs an identical repair on all of its California production vehicles.

The 1980 ALT procedures permitted repair of vehicles prior to performance of the Quality Audit test if the manufacturer has been performing the same corrections on all California vehicles subsequent to consignment for shipping from the assembly line. The 1981 change clarifies the language to make it clear that inspections and repairs by dealers or distributors will not suffice to allow repairs on Quality Audit vehicles. Since this change is only a clarification of an existing requirement it does not undermine California's protectiveness determination, and it raises no new issues of technological feasibility or other issues. Accordingly, it is included within the previous waiver for the 1980 ALT procedures.

(iii) Requirement that each manufacturer report all of its invalidated or aborted Quality Audit tests, the retest results, and the reasons explaining the necessity for the retest before CARB will permit the invalidations. Additionally, each manufacturer must report the applicable exhaust emission standard it has elected to meet by listing options selected, durability mileage used, and whether non-methane or total hydrocarbon standards apply.

The 1980 ALT procedures already obligate the manufacturers to provide some of the information required in the 1981 ALT procedures; however, the manufacturers were not meeting all the

[1] *See* 43 FR 36679, 36680 (1978).

[2] *See* 44 FR 61096, 61099–61001 (1979); *see also*, letter from Marvin B. Durning, Assistant Administrator for Enforcement, Environmental Protection Agency (EPA), to Thomas C. Austin, Executive Officer, California Air Resources Board (CARB), March 8, 1979.

[3] Letter from Gary Rubenstein, Deputy Executive Officer, California Air Resources Board (CARB), to Douglas M. Costle, Administrator, Environmental Protection Agency (EPA), February 13, 1980. CARB's ALT program involves emission-related testing and inspection of new production motor vehicles coming off manufacturer's assembly line.

[4] The 1981 procedures are set forth in Section 2059 of Title 13 of the California Administrative Code and in State of California Air Resources Board, "California Assembly-Line Test Procedures for 1981 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles" (hereinafter "1981 ALT procedures").

[5] Most of the changes are included within the 1980 Assembly Line Test Procedures as set forth in Section 2058 of Title 13 of the California Administrative Code and in State of California Air Resources Board "California Assembly-Line Test Procedures for 1980 Model Year Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles". The entire 1980 procedures, along with amendments to the 1979 ALT procedures received a waiver of Federal preemption in an accompanying notice published in today's **Federal Register**. Change number (iv) below is included within the scope of a previously granted waiver.

[6] The Quality Audit test is one of three tests performed in Assembly-Line testing, and is a slightly modified version of a full certification test procedure. The ALT procedures require the manufacturers to Quality Audit test approximately two percent of their California production for each engine family produced.

1980 reporting requirements.[7] Therefore, under these changes CARB now will not

California Air Resources Board, 1102 Q

of vehicles, it may adopt other

passenger cars, light-duty trucks, and

1980 reporting requirements.[7] Therefore, under these changes CARB now will not permit invalidation of any emission test result unless the manufacturer retests the vehicle and reports the reasons for invalidation. Additionally, since for the 1981 model year, a vehicle may meet any one of several emission standards to show compliance with the Quality Audit test procedure, a manufacturer must indicate the standards it is selecting, the durability mileage it has used, and whether it has taken non-methane or total hydrocarbon measurements. Because the manufacturers need only report the required information to comply with the amendments, they do not undermine the State's determination that its standards, in the aggregate, are as protective of public health and welfare as applicable Federal standards, do not cause the State's requirements to be inconsistent with section 202(a) of the Act, and raise no new issues affecting the Administrator's previous waiver determinations; therefore, they are included within the previous waiver for California's 1980 ALT procedures.

(iv) Requirement that if a manufacturer uses a flame ionization detector (FID) to measure non-methane hydrocarbon (HC) emissions the manufacturer must supply the hexane equivalent conversion value for each different FID model it uses and for each engine family it tests.

In an accompanying notice, I have determined that California's adoption of a specific reference method utilizing a gas chromatograph combined with a flame ionization detector for determining compliance with the non-methane hydrocarbon standard falls within the scope of a previously granted waiver.[8] In the past (and in the 1980 ALT procedures), EPA recommended and CARB used conversion factors to convert FID measurements of non-methane HC to non-dispersive infra-red (NDIR) measurements. CARB has concluded that the actual conversion factors, in fact, vary from CARB's and EPA's values;[9] therefore, CARB is now requirings the manufacturers to obtain the actual conversion value after they obtain their test results. Since this requirement raises no new issues of technological feasibility, raises no new issues affecting the Administrator's previous waiver determinations, and through increased accuracy of measurement will enhance the protectiveness of California's standards, it is included within the previous waivers for California's test procedures.

(v) Elimination of the Methane Content Correction Factor (MCCF) for Quality Audit testing. CARB's regulations now require engine families to meet the same HC standard they met during certification testing without application of the factor.

The 1980 ALT procedures provided a manfuacturer with the option of applying a MCCF to its HC measurements, whether the manufacturer certified an engine family to the non-methane HC standard or the total HC standard. The 1981 changes eliminate this MCCF option, thereby requiring a manufacturer to meet the same standards it met during certification while using the appropriate instrumentation. Although the manufacturers may encounter some possible lead time problems in procuring HC instrumentation necessary to certify to the non-methane standard, CARB's regulations still provide the manufacturers with the option of certifying to either a total HC standard or a non-methane standard.[10] Thus, the manfacturers are not required to purchase the non-methane HC instrumentation. Additionally, the MCCF was subject to certain inherent variability and inaccuracies; thus, its elimination will improve the reliability of HC measurements.[11] Since there do not appear to be potential technological feasibility problems, and since the increased accuracy of measurement will enhance the protectiveness of California's standards, this amendment is included within the previous waivers for the 1980 ALT procedures.

III. Finding and Decision

Accordingly, the California regulations addressed in this notice [12] need not independently meet the waiver criteria of Section 209(b)(1) and may be enforced by California at the expiration of 30 days (September 15, 1980) following publication of this notice unless a *bona fide* objection is filed.

My decision will affect not only persons in California but also the manufacturers located outside the State which must comply with California's standards in order to produce motor vehicles for sale in California. For this reason, I hereby determine and find that this decision is of nationwide scope and effect.

Dated: August 8, 1980

California State Motor Vehicle Pollution Control Standards; Amendments Within Previous Waivers of Federal Preemption

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The California Air Resources Board (CARB) has notified EPA that it has adopted several changes to the California Exhaust Emission Standards and Test Procedures, for various classes of new motor vehicles, for 1979, 1980, 1981 and subsequent model years. I find these changes to be included within the scope of previously granted waivers of Federal preemption. Since the changes are included within previous waivers, a public hearing to consider them is unnecessary. However, if any party asserts a *bona fide* objection to these findings, a public hearing will be held to provide an opportunity to present testimony and evidence to show that there are issues to be addressed through a section 209(b) waiver determination and that I should reconsider my findings.

DATES: Any *bona fide* objection to the findings in this notice must be filed on or before September 15, 1980; otherwise, at the expiration of this 30-day period these findings will be deemed final. Upon the receipt of any timely objection a public hearing will be scheduled and announced in a subsequent **Federal Register** notice.

ADDRESS: Any *bona fide* objection to the findings in this notice should be filed with Mr. Charles N. Freed, Director, Manufacturers Operations Division (EN-340), U.S. Environmental Protection Agency, 401 M Street, S.W., Washington, D.C. 20460.

Copies of the above standards and procedures at issue in this notice, as well as those documents used in arriving at this decision, are available for public inspection during normal working hours (8 a.m. to 4:30 p.m.) at the U.S. Environmental Protection Agency, Public Information Reference Unit, Room 2404 (EPA Library), 401 M Street, S.W., Washington, D.C. 20460. Copies of the standards and test procedures are also available upon request from the California Air Resources Board, 1102 Q Street, P.O. Box 2815, Sacramento, California 98512.

FOR FURTHER INFORMATION CONTACT: Glenn Unterberger, Manufacturers Operations Division (EN-340), U.S. Environmental Protection Agency, Washington, D.C. 20460. Telephone 202-472-9421.

SUPPLEMENTARY INFORMATION:

I. Introduction

Section 209(a) of the Clean Air Act, as amended, 42 U.S.C. 7543(a) ("Act"), provides:

> "No State or any political subdivision thereof shall adopt or attempt to enforce any standard relating to the control of emissions from new motor vehicles or new motor vehicle engines subject to this part. No state shall require certification, inspection, or any other approval relating to the control of emissions from any new motor vehicle or new motor vehicle engine as condition precedent to the initial retail sale, titling (if any), or registration of such motor vehicle, motor vehicle engine, or equipment."

Section 209(b)(1) of the Act requires the Administrator, after notice and opportunity for public hearing, to waive application of the prohibitions of section 209 to any State which has adopted standards (other than crankcase emission standards) for the control of emissions from new motor vehicles or new motor vehicle engines prior to March 30, 1966, if the State determines that the State standards will be, in the aggregate, at least as protective of public health and welfare as applicable Federal standards. The Administrator must grant a waiver unless he finds that: (A) the determination of the State is arbitrary and capricious, (B) the State does not need the State standards to meet compelling and extraordinary conditions, or (C) the State standards and accompanying enforcement procedures are not consistent with section 202(a) of the Act.

As previous waiver decisions have explained, State standards or enforcement procedures are not consistent with section 202(a) if there is inadequate lead time to permit the development of the technology necessary to meet those requirements, giving appropriate considerations to cost of compliance within that time frame, or if the Federal and State test procedures impose inconsistent certification requirements.[1] California is the only state which meets section 209(b)(1)'s eligibility criteria for receiving waivers.

Once California has received a waiver of Federal preemption for its standards and enforcement procedures for a class of vehicles, it may adopt other conditions precedent to initial retail sale, titling or registration of the subject class of vehicles without the necessity of receiving a further waiver of Federal preemption.[2] If California adopts a change to a previously-waived standard or accompanying enforcement procedure, the change may be included within the scope of the previous waiver if it does not cause California's standards, in the aggregate, to be less protective of public health and welfare than applicable Federal standards, does not cause California's requirements to be inconsistent with section 202(a) of the Act, and raises no new issues affecting the Administrator's previous waiver determinations.[3]

II. Discussion

In a May 30, 1979, letter to the Administrator,[4] the California Air Resources Board (CARB) notified EPA that it had adopted several changes to the California Exhaust Emission Standards and Test Procedures for various vehicle classes for the 1979, 1980, 1981, and later model years. CARB also stated its belief that the changes are of a minor, technical nature and are included within the scope of waivers of Federal preemption already granted to California. I agree with CARB's judgment that these changes are included within the scope of previous waivers because they are not new standards or enforcement procedures, they present no new issues affecting my previous determinations with regard to California's standards and enforcement procedures, they do not cause the California standards, in the aggregate, to be less protective than applicable Federal standards, and they do not affect the technological feasibility of California's requirements of their consistency with Federal certification test requirements. The amendments, adopted on May 24, 1978, and on September 6, 1978, and the existing waivers in which they are included, are as discussed below:

(i) *Adoption of a non-methane hydrocarbon (HC) test procedure for 1980 model year passenger cars and 1981 and subsequent model year passenger cars, light-duty trucks, and medium-duty vehicles.*[5]

In a notice published on June 14, 1978, EPA waived Federal preemption for California's non-methane hydrocarbon standard for these classes of vehicles, as well as for the method for determining compliance with that standard, provided that hydrocarbon emissions be measured with an analytical system which responds only to the non-methane fractions.[6] CARB now has adopted a specific reference method utilizing a gas chromatograph combined with a flame ionization detector to measure the non-methane fraction, and allows equivalent methods to be used.[7]

This specific test procedure merely identifies a specific method for compliance with a test procedure requirement for which California already has received a waiver. It does not affect the stringency of the standard or raise any new issues affecting the previous waiver determination. This specific reference method therefore constitutes a test procedure covered by the June 14, 1978, waiver.

(ii) *Addition of warning signal requirement for exhaust gas sensor in allowable maintenance regulations for 1980 and 1981 and later model passenger cars, light-duty trucks, and medium-duty vehicles.*[8]

EPA waived Federal preemption on July 17, 1978, for California to enforce its allowable maintenance regulations.[9] The regulations allow manufacturers to require replacement of exhaust gas sensors at 30,000 miles, and the May 24, 1978, California amendment requires manufacturers to provide an audible and/or visible signal to the driver if maintenance on this item is necessary. This requirement raises no new issues of technological feasibility of achieving applicable emission standards or of consistency in general with section 202(a) of the Act because it does not

[9] 43 FR 32182 (1978).

impose any new emission control requirements on vehicles and requires little lead time or cost to implement.[10] In addition, the requirement, if anything, will serve to increase the protectiveness of California's standards by increasing the likelihood that consumers will be aware of and act on the need for maintenance of an emission control component. Finally, the requirement does not raise any new issues affecting the previous waiver determinations. As a result, the warning signal requirement is included within the scope of the July 17, 1978, waiver.

(iii) *Requirement that each manufacturer submit a statement that the driveability and performance characteristics of vehicles for which certification is requested satisfy the manufacturer's own driveability and performance requirements, applicable to 1980, 1981 and later model year passenger cars, light-duty trucks, and medium-duty vehicles.*[11]

On June 14, 1978, EPA waived Federal preemption for California to enforce its earlier adopted 1980 and 1981 and later model year passenger car standards and test procedures.[12] This May 24, 1978, amendment simply requires manufacturers to submit statements that their vehicles comply with their own driveability and performance criteria, and authorizes the Executive Officer of CARB to request from a manufacturer driveability data for vehicles demonstrating performance problems and to take appropriate enforcement action. There are no technological issues surrounding compliance with this requirement because it does not impose any new emission requirements on vehicles; rather, it merely requires the submittal of a statement by the manufacturers. For the same reason, it does not undermine California's previous determinations that its 1980 and later model year passenger car standards, in the aggregate, are as protective as applicable Federal standards. Nor does this requirement raise any new issues affecting the previous waiver determinations. Therefore, it is included within the scope of the previous waivers for California's standards and test procedures.

(iv) *Two-year postponement of 1.5 grams per vehicle mile (gpm) oxides of nitrogen (NO_x)* standard for 1979 and 1980 model year four-wheel drive lightduty trucks under 4,000 pounds, with appropriate amendments to 1979 model year assembly-line test procedures.[13]

EPA waived Federal preemption for California to enforce its emission standards for 1979 and 1980 model light-duty trucks, including a 1.5 gpm NO_x standard, on January 12, 1978.[14] CARB's postponement of the waived 1.5 gpm NO_x standard for 1979 and 1980 model light-duty trucks (LDTs) leaves in effect the model year 1978 NO_x standard of 2.0 gpm for these two years. Although this postponement affects the stringency of the standards, each California emission standard (i.e. for carbon monoxide (CO), HC and NO_x) for this vehicle class in these two model years remains more stringent than each corresponding Federal standard, and therefore does not affect California's determination that its own standards are at least as protective as Federal standards.[15] The Delay is intended to permit the enlargement of the chassis of the LDT in this small class of vehicles to accommodate the larger catalysts needed to permit this LDT to comply with the more stringent NO_x standard.[16] Since a waiver has already been granted California to enforce the more stringent NO_x standard of 1.5 gpm, california's lessening of the stringency presents no issues of technological feasibility. This amendment also raises no other new issues affecting the previous waiver determinations; therefore, it is included within the previous waiver for California's 1979 and 1980 LDT emissions standards.

(v) *Editorial and corrective changes to the standards and test procedures for 1980 and 1981 and later model passenger cars, light-duty trucks and medium-duty vehicles*[17] and to the standards and test procedures for 1980 and later model heavy-duty engines and vehicles.[18]

These changes consist merely of correcting and updating references, separating documentation, and reinstating items inadvertently omitted in earlier documents.[19] Thus, they automatically are incorporated into the waiver for these vehicle classes.

III. Finding and Decision

Accordingly, the California amendments addressed in this notice [20] are included within the scope of waivers California already has received and may be enforced by California at the expiration of 30 days (September 15, 1980) following publication of this notice unless a *bona fide* objection is filed.

My decision will affect not only persons in California but also the manufacturers located outside the State who must comply with California's standards in order to produce motor vehicles for sale in California. For this reason I hereby determine and find that

[10] Before adopting this amendment, California already had been enforcing a similar warning signal requirement when a manufacturer schedules catalyst or exhaust gas recirculation maintenance.

[11] 1980 Standards and Test Procedures, ¶ 5(g); 1981 Standards and Test Procedures, ¶ 5(g).

[12] 43 FR 25729 (1978).

[13] Title 13, California Administrative Code, ¶¶ 1959.5(a), 1960.0(a), and 2057, as amended September 7, 1978; "California Exhaust Emission Standards and Test Procedures for 1979 Model Passenger Cars, Light-Duty Trucks and Medium-Duty Vehicles", ¶ 4, as amended September 6, 1978; 1980 Standards and Test Procedures, ¶ 4, as amended September 6, 1978.

[14] 43FR 1829 (1978).

[15] The California standards for 1979 and 1980 model year four-wheel drive light-duty trucks under 4,000 pounds with the requested postponement of the 1.5 NO_x standard are:

HC:	CO:	NO_x
0.41	Model year 1979—9.0	2.0
0.39(0.41)*	Model year 1980—9.0	2.0

(*Beginning in 1980, the HC standard is expressed as a non-methane HC standard. HC standards in parentheses apply to total hydrocarbons, or, for 1980 models only, to emissions corrected by a methane content correction factor. 43 FR 1829, 1830 (1978).)

The Federal standards for the same vehicle class in these model years are: 1.7 gpm HC, 18 gpm CO and 2.3 gpm NO_x.

[16] CARB May 30, 1979, letter at 6; "Hearing Officers Report Regarding American Motors Petition for Modification of Light-Duty Truck Emission Standards for 1979–1980 Model Years."

[17] 1980 standards and Test Procedures, as amended May 24, 1978; 1981 Standards and Test Procedures, as amended May 24, 1978.

[18] "California Exhaust Emission Standards and Test Procedures for 1980 Model Heavy-Duty Engines", as amended May 24, Procedures for 1981 and Subsequent Model Heavy-Duty Engines", as amended May 24, 1978.

[19] *See* CARB May 30, 1979 letter, at 2, 5. Regarding the inadvertently omitted items, CARB explained that it had not included fuel filters and air filters in its list of allowable maintenance items from its earlier version of the "California Exhaust Emission Standards and Test Procedures for 1980 and Subsequent Model Passenger Cars, Light-Duty trucks, and Medium-Duty Vehicles."

[20] Specifically, those regulations are the following: "California Non-Methane Hydrocarbon Test Procedures", adopted May 24, 1978, incorporated by reference in "California Exhaust Emissions Standards and Test Procedures for 1980 Model Passenger Cars, Light-Duty Truck, and Medium-Duty vehicles" [hereinafter "1980 Standards and Test Procedures"] ¶ 3(a), and in "California Exhaust Emissions Standards and Test Procedures for 1981 and Subsequent Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles" [hereinafter "1981 Standards and Test Procedures"], ¶ 3(a), as amended May 24, 1978; 1980 Standards and Test Procedures, ¶¶ 3(f)(i)(A)(5), 5(g), and 3(f)(i)(ii), as amended May 24, 1978; 1980 Standards and Test Procedures, as amended May 24, 1978; 1981 Standards and Test Procedures, ¶¶(3)(i)(i)(A)(5), 5(g) and 3(e)(i)(ii), as amended May 24, 1978; 1981 Standards and Test Procedures, as amended May 24, 1978; "California Exhaust Emission Standards and Test Procedures for 1980 Model Heavy-Duty Engines", as amended May 24, 1978, and "California Exhaust Emission Standards and Test Procedures for 1981 and Subsequent Heavy-Duty Engines", as amended May 24, 1978; Title 13, California Administrative Code, ¶¶ 1959.5(a), 1960.0(a) and 2057, as amended September 7, 1978; "California Exhaust Emission Standards and Test Procedures for 1979 Model Passenger Cars, Light-Duty Trucks, and Medium-Duty Vehicles", ¶4, as amended September 6, 1978; and 1980 Standards and Test Procedures, ¶4, as amended September 6, 1978.

this decision is of nationwide scope and effect.

Dated: August 8, 1980.

Douglas M. Costle,

Administrator.

BILLING CODE 6560-01-M

[FRL 1568-8]

National Pollutant Discharge Elimination System (NPDES); Availability of Wastewater Treatment Manual (Treatability Manual)

AGENCY: Environmental Protection Agency.

ACTION: Notice of availability of technical information and request for comments.

SUMMARY: This notice announces the availability of the Treatability Manual. The Treatability Manual is a compilation of available information including: (1) Physical, chemical, biological and treatability data on the toxic or "priority" pollutants; (2) descriptive information on numerous industrial categories; (3) summaries of performance data on existing pollutant treatment technologies; (4) capital, operating and maintenance cost estimates for these treatment technologies; and (5) an executive summary to assist users. To enhance the quality of information in future supplements or revisions to the Treatability Manual, EPA also is providing a review and comment period.

DATES: Comments may be submitted at any time. However, to be considered for inclusion in the Manual's first scheduled annual supplement or revision, comments must be received on or before April 1, 1981.

ADDRESSES: Interested persons may obtain a copy of the Treatability Manual after September 15, 1980 by requesting publication stock number 055-000-00190-1 from the Superintendent of Documents, U.S. Government Printing Office, Department 50, Washington, D.C. 20402. The price of the Manual is $47.00. The Treatability Manual is available for examination at the following EPA Regional Offices, Laboratories and State Offices after September 1, 1980:

EPA Regions

Region I

(Connecticut, Maine, Massachusetts, New Hampshire, Rhode Island, Vermont)
Library, EPA Region I, Twenty-first Floor, JFK Building, Boston, Massachusetts 02203, (617) 223–5791
Librarian, Environmental Research Laboratory, U.S. EPA, South Ferry Road, Narragansett, Rhode Island 02882, (401) 789–1071

Region II

(New Jersey, New York, Puerto Rico, Virgin Islands)
Water Permits Branch, EPA Region II, Room 845, 26 Federal Plaza, New York, New York 10278, (212) 264–9895

Region III

(Delaware, Maryland, Pennsylvania, Virginia, West Virginia, District of Columbia)
Library, EPA Region III, Curtis Building, 6th & Walnut Streets, Philadelphia, Pennsylvania 19106, (215) 597–0580

Region IV

(Alabama, Georgia, Florida, Mississippi, North Carolina, South Carolina, Tennessee, Kentucky)
Library, EPA Region IV, 345 Courtland Street, NE, Atlanta, Georgia 30365, (404) 881–4216
Chris L. West, Office of Public Awareness, Environmental Research Center, Room M–306, U.S. EPA, Research Triangle Park, North Carolina 27711, (919) 541–4577
Robert C. Ryans, Environmental Research Laboratory, U.S. EPA, College Station Road, Athens, Georgia 30613, (404) 546–3306
Andre Lowery, Librarian, Environmental Research Laboratory, U.S. EPA, Sabine Island, Gulf Breeze, Florida 32561, (904) 932–5311 Ext. 218

Region V

Comments on the Treatability Manual should be submitted to:

William A. Cawley, Industrial Environmental Research Laboratory, U.S. Environmental Protection Agency, 26 West St. Clair, Cincinnati, Ohio 45268, (513) 684–4310

FOR FURTHER INFORMATION CONTACT:

William A. Cawley, Industrial Environmental Research Laboratory, U.S. Environmental Protection Agency, 26 West St. Clair, Cincinnati, Ohio 45268, (513) 684–4310

SUPPLEMENTARY INFORMATION: The Clean Water Act of 1977 (the Act) places an increased emphasis on the control of discharges of toxic pollutants from industrial sources by requiring the achievement of effluent limitations based on the application of the best available technology economically achievable (BAT) by July 1, 1984. The BAT effluent limitations guidelines are currently under development by EPA's Effluent Guidelines Division for numerous industries which discharge toxic (priority) pollutants. Although BAT guidelines have been proposed for several industrial categories, some BAT guidelines will not be available in the immediate future. Also, even where guidelines are available, certain waste streams may not be covered by the guidelines. Therefore, in those cases where no national guidelines exist or where guidelines are not applicable, NPDES permitting authorities, either the EPA Regional Office or NPDES State, will be required to exercise "best engineering judgment" in order to establish BAT effluent limitations in new or renewed permits.

The Treatability Manual (The Manual) was developed by EPA's Office of Research and Development (ORD) with assistance from the Office of Water and Waste Management (OWWM) and the Office of Water Enforcement (OWE). The Manual is, primarily, a compilation of currently available data on the effectiveness of water pollution control technologies for removal of toxic pollutants from industrial waste streams. A variety of data sources were used to develop the Manual, including: EPA's Effluent Guidelines Division's technical files; EPA Regional and State files; government publications; ORD treatability studies; equipment vendors' information; and open literature.

The Manual is expected to be of general interest to industry, academia, and public interest groups. NPDES permitting authorities should find the Manual useful to develop case-by-case effluent limitations for toxic pollutants in permits in the absence of national effluent limitations guidelines. In addition, the Manual may be used to develop limitations for conventional and nonconventional pollutants as well as other pollutants not specifically addressed by national guidelines. In summary, the Manual is expected to be useful for:

- Evaluating the potential effectiveness and approximate costs of proposed effluent treatment systems;
- Determining the potential cost and feasibility of compliance with discharge limitations under consideration; and
- Developing wastewater pollution control strategies.

While the Manual has been developed to be a comprehensive information resource, it is not intended to be a substitute for effluent limitations guidelines.

The Manual consists of five volumes:
Volume I—Treatability Data,
Volume II—Industrial Descriptions,

Volume III—Technologies,
Volume IV—Cost Estimating,

- Subcategory-wide or industry-wide tables covering,

references examined and/or used in developing the Manual.

revision. The same timetable is expected

EPA, 230 South Dearborn Street, Chicago, Illinois 60604, (312) 353–2000

FEDERAL HOME LOAN BANK BOARD

Volume III—Technologies,
Volume IV—Cost Estimating,
Volume V—Summary.

Volume I is a compendium of treatability data for specific pollutants. Information is provided on the 129 priority pollutants developed by EPA from the list of 65 chemicals and classes of chemicals originally contained in a Consent Agreement between EPA and the Natural Resources Defense Council, 8 ERC 2120 (D.D.C. 1976). Also included is information on a number of compounds found among the 299 chemicals (now 297 with the deletion of calcium oxide and calcium hydroxide from the list) designated by EPA as hazardous substances under the authority of Section 311 of the Act. The pollutants contained in the volume are organized into the following chemical categories:

- Metals and inorganics
- Ethers
- Phthalates
- Nitrogen compounds
- Phenols
- Aromatics
- Polynuclear aromatic hydrocarbons
- PCB's and related compounds
- Halogenated hydrocarbons
- Pesticides
- Oxygenated compounds
- Miscellaneous

For each of the pollutants, the following information is provided when available:

- Alternate names of the chemical;
- Chemical Abstracts Number;
- Physical, chemical, and biological properties, including molecular weight, melting point, boiling point, vapor pressure, solubility in water at 20° C, log octanol/water partition coefficient, Henry's Law constant, and biodegradability data;
- Probable fate of the compound in the aqueous environment. Removal processes considered include photolysis, oxidation, hydrolysis, volatilization, sorption and biological processes;
- Isotherm data on the effectiveness of activated carbon to remove organics;
- Industrial occurrence of the material. Minimum, maximum, and mean concentrations are reported for both untreated and treated wastewater for each industry in which the substance has been detected; and
- Average and maximum removal efficiencies and average effluent concentrations for specific control technologies.

Volume II contains a general description of most of the primary industries (and their major subcategories) cited in the 1976 NRDC Consent Agreement. Also included are:

- Subcategory-wide or industry-wide tables covering,

The number of dischargers,
The types of pollution control systems in use,
The range of effluent flow rates and pollutant concentrations in controlled and uncontrolled waste streams, and
The efficiency of treatment systems, when available;

- Summary tables, when available, on BPT effluent guidelines and the status of BAT guidelines, New Source Performance Standards, and Pretreatment Standards; and
- Tabulated information on individual plants specifying industrial subcategory, treatment systems (including operating characteristics, when available), effluent pollutant concentrations, and influent pollutant concentrations, when available.

Volume III summarizes information on the nature and effectiveness of various pollution treatment technologies. It described the nature of the generic type of control equipment, the major variations of design, and the following information on each of the technologies:

- Design criteria
- Typical performance
- Applications and limitations
- Reliability information
- Chemical requirements
- Environmental impacts

A summary table for each technology is also provided showing the concentrations of various pollutants in the effluents; the minimum, maximum, median, and mean removal efficiencies for these pollutants; and the number of data points used to generate this information. Data sheets summarizing the sampling results at specific installations also are included.

Volume IV provides typical costs of treatment unit operations. The following information is provided for each unit operation:

- Equipment purchase and installation costs;
- Total capital cost;
- Total direct operating cost, including materials, chemicals, power, fuel and labor; and
- Total annual operating cost, including total direct operating cost and total indirect operating cost (plant overhead, taxes, insurance, administrative expenses, depreciation, and interest on working capital).

Volume V is a summary designed to facilitate the use of the first four volumes by including a user's guide and several summary tables in the appendices. Volume V also contains an executive summary of Volumes I through IV, and a bibliography listing all references examined and/or used in developing the Manual.

Although the Manual contains a considerable amount of data, it is not intended to be the sole source of information for permit writers in establishing case-by-case effluent limitations.

Permit writers can be expected to use other available information including but not limited to: Historical information on the individual facility; personal knowledge of the particular facility and similar facilities; applications for permit(s) previously submitted; applicable Effluent Guidelines' Development Documents; the initial permit for the discharger (if any) and associated files; consultation with technical experts both within and outside EPA; relevant technical reports such as those published by EPA's Office of Research and Development; attainable effluent limitations for similar facilities; EPA guidance for best practicable, best available and best conventional technologies as well as best management practices; trip reports on site visits; results of ambient and effluent water monitoring; compliance monitoring reports; and permit writers' engineering judgment.

The Manual, in the present form, is intended to be neither a definitive document on treatment systems performance, nor an effluent limitations guideline. The document is a compilation of existing data as of early 1980 on the performance of various water pollution control technologies and systems.

The Agency expects to update the Manual annually as additional data become available and believes that the Manual can be improved and important issues resolved by soliciting public comments on its content and format. Therefore, the Agency welcomes any data or comments of a technical nature that might improve the quality of the Manual.

At the present time, EPA plans to revise the Manual by publishing annually either a supplement or a revised Manual. The supplement or revision will consist of changes resulting from public comments and newly acquired data. The Agency will accept written comments on the Manual at any time after the date of this notice. However, in order for comments to be considered for inclusion in the first supplement or revision, comments must be received no later than April 1, 1981, 90 days before the expected publication date of the first annual supplement or revised Manual. Comments received after this date will be reviewed and considered for the next supplement or revision. The same timetable is expected to be maintained for subsequent supplements or revisions, as necessary.

Each year, the Agency will review all comments received during the preceding 12-month period and respond to significant comments as appropriate. The response may take the form of the publication of a summary of significant comments and responses in the Federal Register and/or incorporation of suggestions into the annual supplement or revision.

Dated: July 29, 1980.

Jeffrey G. Miller,

Acting Assistant Administrator for Enforcement.

Stephen J. Gage,

Assistant Administrator for Research and Development.

BILLING CODE 6560-01-M

[FRL 1570-7]

Columbia Gas Transmission Corp.; Applicability of Regulations for Prevention of Significant Air Quality Deterioration; West Virginia

In the matter of the applicability of Title I, Part C of the Clean Air Act (the Act), as amended, 42 U.S.C. 7401 *et seq.*, and the Federal regulations promulgated thereunder at 40 CFR 52.21 (43 FR 26388, June 19, 1978) for the Prevention of Significant Deterioration of Air Quality (PSD), to Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, Southeast, Charleston, West Virginia 25314.

On March 7, 1980, Columbia Gas Transmission submitted a request to the U.S. Environmental Protection Agency (U.S. EPA), Region V office, for a determination of applicability of the regulations for PSD.

On May 19, 1980, Columbia Gas Transmission was notified that it is not subject to a PSD review.

This determination does not relieve Columbia Gas Transmission of the responsibility to comply with the control strategy and all local, State and Federal regulations which are part of the applicable State and local requirements.

This determination may now be considered final agency action which is locally applicable under Section 307(b)(1) of the Act and therefore a petition for review may be filed in the U.S. Court of Appeals for the Seventh Circuit by any appropriate party. In accordance with Section 307(b)(1), petitions for review must be filed on or before October 14, 1980.

For further information contact Eric Cohen, Chief, Compliance Section, Region V, U.S. EPA, 230 South Dearborn Street, Chicago, Illinois 60604. (312) 353-2090.

John McGuire,

Regional Administrator, Region V.

May 19, 1980

A. M. Ferenz, P. E., *supervisory Engineer, Engineeering Services, Columbia Gas Transmission Corp., 1700 MacCorkle Ave. SE., Charleston, W.Va.*

Dear Mr. Ferenz: We are in receipt of your request for exemption from New Source Review under the regulations for the Prevention of Significant Deterioration of Air Quality (PSD), 43 F.R. 26403, June 19, 1978 (40 CFR 52.21). Your letter of March 7, 1980 describes Columbia Gas Transmission's (CGT) proposed modification of the Crawford Compressor Station in Fairfield County, Ohio.

CGT currently has 15 natural gas compressor units and is replacing 3 Snow compressor units (totaling 4050 horsepower) with a single compressor unit rated at 4000 horsepower. After the modification, there would be 13 gas compressors at the site. The potential emissions have been calculated and are compared to the present source emissions in Table 1.

TABLE 1.—Changes in Potential to emit

[Tons per year]

	From	To	Change
NO_x	2,289.0	2,052.2	−236.8
CO	306.7	329.2	+22.5
HC*	62.4	100.0	+37.6
SO_2	.47	.47	0

*Nonmethane.

One set of emission factors applied to three of the Snow compressors in identical to the set which appears in the U.S. Environmental Protection Agency's (U.S. EPA) publication 42, while the factors used for the other compressors are believed to have been supplied by the manufacturers (including the factors for the new replacement unit).

As a result of the *Alabama Power Co.* vs. Douglas M. Costle (78-1006 and consolidated cases) ruling on December 14, 1978, and the proposed regulations promulgated on September 5, 1979, 44 F.R. 51924, the Crawford Compressor Station modification is not subject to PSD review. This exemption from PSD review does not relieve Columbia Gas Transmission of the responsibility to comply with the control strategy and all local, State, and Federal regulations which are part of the applicable State Implementation Plan, as well as all other applicable Federal, State and local requirements.

Thank you for cooperation.

Very truly yours,

Sandra S. Gardebring,

Director, Enforcement Division

Charles Taylor,

Chief, Office of Air Pollution Control, Ohio Environmental Protection Agency.

BILLING CODE 6560-01-M

FEDERAL HOME LOAN BANK BOARD

Proposed Implementation of the Part-time Employment Program

AGENCY: The Federal Home Loan Bank Board.

ACTION: Proposed implementation of the Federal Employees Part-time Employment Program Act of 1978, 5 U.S.C. 3401 et seq by establishing a continuing program to provide career part-time employment opportunities within the Federal Home Loan Bank Board.

In accordance with 5 U.S.C. 3406, the Federal Home Loan Bank Board is required to publish its instructions in proposed form and to provide an opportunity for interested parties to comment. After comments have been received and reviewed, the final intructions will be issued and the Program implemented immediately.

DATES: Written comments will be considered if received by the person named below on or before October 14, 1980.

ADDRESS: Doris McGhee, Director of Personnel, Federal Home Loan Bank Board, 1700 G Street, NW—2nd Floor, Washington, DC 20552.

FOR FURTHER INFORMATION CONTACT: Lenor Reese (202) 377-6054 (this is not a toll free number).

Part-Time Employment Program

I. General Provisions

A. *Purpose*—These regulations implement Pub. L. 95-437, the Federal Employees Part-Time Career Employment Act of 1978, and establishes a continuing program to provide career part-time employment opportunities within the Federal Home Loan Bank Board (FHLBB).

B. *Policy*—It is the policy of the FHLBB to provide career part-time employment opportunities to the maximum extent possible consistent with agency resources and mission requirements for positions in GS-1 through GS-15, for hourly paid blue collar positions and any other career positions which do not exceed a GS-15 equivalent. This policy provides the FHLBB the opportunity to recognize talented workers who otherwise might not be available for employment.

C. *Definitions*—1. *Part-time career employment* is regularly scheduled work of 16 to 32 hours per week performed by individuals serving under competitive or excepted appointments in tenure groups of I or II.

2. *Tenure Group I* includes employees in the competitive service under career

appointments when not serving

rate; affirmative action; and employee

F. Notifying the Public of Part-Time

to Sea-Land of approximately 6 acres of

Register and served upon Aviation

[Independent Ocean Freight Forwarder

appointments when not serving probation; and permanent employees in the excepted service where appointments carry no restrictions or conditions. This group does not include employment on a temporary or intermittent basis.

3. *Tenure Group II* includes employees in the competitive service serving probation; career-conditional employees in obligated positions; and employees in the excepted service serving trial periods whose tenure is indefinite solely because they occupy obligated positions, or whose tenure is equivalent to career-conditional in the competitive service.

D. Applicability—These regulations are applicable to all FHLBB Offices and Districts.

E. *Exceptions*—These regulations do not apply to positions which are in the Senior Executive Service or others at GS–16 and above.

II. Program Implementation

A. *Program Coordinator*—The Director of Personnel is hereby designated as the Agency Part-Time Employment Coordinator and assigned the following responsibilities:

1. Establishing Agency part-time employment goals and timetables.

2. Consulting with the Equal Employment Opportunity Officer, Selective Placement Coordinator, Federal Women's Program Coordinator, and Hispanic Employment Coordinator to assure that the specific needs of minorities, women and the handicapped are addressed and to assess the impact on these groups.

3. Consulting with interested parties in other special interest areas (e.g. employment of veterans, upward mobility) and with union officials.

4. Responding to requests for advice and assistance from management officials within the Agency.

5. Monitoring agency progress in expanding part-time employment opportunities within the Agency; and

6. Preparing reports on part-time employment for transmittal to the Office of Personnel Management and Congress.

B. Part-Time Employment Goals and Timetables

1. Each year the Program Coordinator will set goals for establishing and converting positions for part-time career employment; and a timetable setting forth interim and final deadlines for achieving such goals.

2. The goals and timetables will be based on considerations such as agency mission and occupational mix; workload fluctuations; size of workload; turnover rate; affirmative action; and employee interest in part-time employment.

C. Guidance for Managers, Supervisors and Employees

The Director of Personnel will be responsible for insuring that Office Directors and employees are informed of the procedures and benefits derived through the establishment of part-time positions.

D. Evaluating and Reporting

1. The part-time employment program will be received and evaluated through the internal personnel management evaluation process.

2. The Director of Personnel will report twice a year to the Office of Personnel Management on its progress in meeting part-time goals, noting any impediments encountered and measures taken to overcome them; and the extent to which part-time career employment opportunities have been extended to older persons, physically and mentally handicapped persons, persons with family responsibilities, and students.

E. Part-Time Employment Practices

1. *Vacant Positions*—Prior to filling any vacancy, the supervisor and Personnel Management Specialist shall give consideration to filling the position on a part-time basis.

2. *Establishment and Conversion of Part-Time Career Positions*—The Personnel Management Office is responsible for developing procedures and criteria for employees to follow in requesting a change from full-time to a part-time work schedule.

3. An employee requesting a change in employment from full-time to part-time should consult with the immediate supervisor to determine the effects the change would have on his/her rights and benefits. If the employee wishes to pursue the matter, a formal request should be made in writing to the immediate supervisor.

4. The supervisor should evaluate the request in terms of the following criteria:

a. Employment ceilings
b. Workloads
c. Special space and equipment requirements
d. Benefit to the employee
e. Retention of a valuable employee

A written decision will be given to the employee within 5 workdays.

5. A position may not be abolished in order to make the duties and responsibilites available to be performed on a part-time basis.

6. Specific part-time employment guidelines will be updated as needed and published in the agency's How-To-Do-It-Manual.

F. Notifying the Public of Part-Time Vacancies

The Personnel Management Office shall take appropriate steps to notify the public of vacant part-time positions. This requirement will be carried out through such methods as Federal Job Information Announcements and position vacancy listings.

J. J. Finn,

Secretary.

BILLING CODE 6720-01-M

FEDERAL MARITIME COMMISSION

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for review and approval, if required, pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10423; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, Louisiana, San Francisco, California, and Old San Juan, Puerto Rico. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 25, 1980. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation of detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

Agreement No. T–3918.

Filing Party: David A. Schaller, Director of Administration, Port Everglades Authority, P.O. Box 13136, Port Everglades, Florida 33316.

Summary: Agreement No. T–3918, between Port Everglades Authority (Port) and Sea-Land Service, Inc. (Sea-Land), restates and extends the terms of a previous lease agreement between the parties. Agreement No. T–3918 provides for the one-year lease to Sea-Land of approximately 6 acres of land for use in the handling and processing of containers and related equipment. As compensation, Sea-Land will pay Port an annual rental of $47,460, as well as applicable State taxes. Rental, however, may be offset by dockage and wharfage payments.

By Order of the Federal Maritime Commission.

Dated: August 11, 1980.

Joseph C. Polking,

Assistant Secretary.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 1603]

Aviation Transport Systems, Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4 further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of Aviation Transport Systems, Inc., 130–29 135th Avenue, South Ozone Park, New York, 11420, FMC No. 1603, was cancelled effective August 2, 1980.

By letter dated July 3, 1980, Aviation Transport Systems, Inc. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 1603 would be automatically revoked or suspended unless a valid surety bond was filed with the Commission.

Aviation Transport Systems, Inc. has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(d) dated August 8, 1977;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 1603 be and is hereby revoked effective August 2, 1980.

It is ordered, that Independent Ocean Freight Forwarder License No. 1603, issued to Aviation Transport Systems, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon Aviation Transport Systems, Inc.

Robert G. Drew,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

[Independent Ocean Freight fowarder License No. 244R]

James Loudon & Co., Inc.; Order of Revocation

Section 44(c), Shipping Act, 1916, provides that no independent ocean freight forwarder license shall remain in force unless a valid bond is in effect and on file with the Commission. Rule 510.9 of Federal Maritime Commission General Order 4 further provides that a license will be automatically revoked or suspended for failure of a licensee to maintain a valid bond on file.

The bond issued in favor of James Loudon & Company, Inc., 110 West Ocean Boulevard, Long Beach, California, 90802, FMC No. 244R, was cancelled effective August 2, 1980.

By letter dated July 3, 1980, James Loudon & Company, Inc. was advised by the Federal Maritime Commission that Independent Ocean Freight Forwarder License No. 244R would be automatically revoked or suspended unless a valid surety bond was filed with the Commission.

James Loudon & Company, Inc. has failed to furnish a valid surety bond.

By virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(d) dated August 8, 1977;

Notice is hereby given, that Independent Ocean Freight Forwarder License No. 244R be and is hereby revoked effective August 2, 1980.

It is ordered, that Independent Ocean Freight Forwarder License No. 244R, issued to James Loudon & Company, Inc. be returned to the Commission for cancellation.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon James Loudon & Company, Inc.

Robert G. Drew,

Director, Bureau of Certification and Licensing.

BILLING CODE 6730-01-M

[Independent Ocean Freight Forwarder License No. 729]

J. J. Gavin & Co., Inc.; Order of Revocation

On July 18, 1980, J. J. Gavin & Co., Inc., 140 Cedar Street, New York, New York, 10006, requested the Commission to revoke its Independent Ocean Freight Forwarder License No. 729; on August 4, 1980, the licensee returned FMC License No. 729.

Therefore, by virtue of authority vested in me by the Federal Maritime Commission as set forth in Manual of Orders, Commission Order No. 201.1 (Revised), section 5.01(c), dated August 8, 1977;

It is ordered, that Independent Ocean Freight Forwarder License No. 729 issued to J. J. Gavin & Co., Inc., be and is hereby revoked effective July 18, 1980, without prejudice to reapplication for a license in the future.

It is further ordered, that a copy of this Order be published in the **Federal Register** and served upon J. J. Gavin & Co., Inc.

Robert G. Drew,

Director, Bureau of Certification and Licensing.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Office of Assistant Secretary for Health

President's Council on Physical Fitness and Sports

The President's Council on Physical Fitness and Sports (PCPFS) will hold its quarterly meeting on Thursday, September 18, 1980. The meeting will be held from 10:00 a.m. to 4:00 p.m. in Room 2008 of the New Executive Office Building, 17th and Pennsylvania Avenue, NW., Washington, D.C.

The purpose of the meeting is to report on ongoing projects; to provide an update on progress that has been made on directives made to the Council by President Carter at the National Conference on Physical Fitness and Sports for All; and to discuss future directions of the PCPFS.

A list of Council members and the Executive Order 11562, as amended October 25, 1976, establishing their responsibility, may be obtained from: C. Carson Conrad, Executive Director, President's Council on Physical Fitness and Sports, Washington, DC 20201, Telephone: 202/755–7947. The meeting will be open to the public.

Dated: August 7, 1980.

V. L. Nicholson,

Acting Executive Director, President's Council on Physical Fitness and Sports.

[FR Doc. 80-24624 Filed 8-13-80; 8:45 am]

BILLING CODE 4110-86-M

Alcohol, Drug Abuse, and Mental Health Administration

Advisory Committees; Meetings

In accordance with Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National advisory bodies scheduled to assemble during the month of September 1980.

National Advisory Mental Health Council

September 16–18; 9:30 a.m. (September 16th Only), Conference Room 6, "C" Wing, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

(September 17 and 18), Conference Room A, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open—September 16, 9:30 a.m. to adjournment.

Closed—September 17 and 18.

Contact: Mrs. Ruth Gorin, Room 9–95, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–4333.

Purpose: The National Advisory Mental Health Council advises the Secretary of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute of Mental Health, regarding the policies and programs of the Department in the field of mental health. The Council reviews applications for grants-in-aid relating to research, training, and services in the field of mental health and makes recommendations to the Secretary with respect to approval of applications for, and the amount of, these grants.

Agenda: On September 16, the meeting will be open for discussion of NIMH policy issues and will include current administrative, legislative, and program developments. Otherwise, the Council will conduct a final review of grant applications for Federal assistance and this session will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

National Advisory Council on Alcohol Abuse and Alcoholism

September 22–23, 9:30 a.m., Conference Room 6, Building 31C, National Institutes of Health, 9000 Rockville Pike, Bethesda, Maryland 20205.

Open—September 22.

Closed—September 23.

Contact: Mr. James Vaughan, Room 16C–06, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, (301) 443–3887.

Purpose: The Council advises the Secretary, Department of Health and Human Services regarding policy direction and program issues of national significance in the area of alcohol abuse and alcoholism. Reviews all grant applications submitted, evaluates these applications in terms of scientific merit and coherence with Department policies, and makes recommendations to the Secretary with respect to approval and amount of award.

Agenda: September 22 will be devoted to general business of the Council and a discussion of psychotherapy assessment, modified confidentiality regulations, and other subjects related to Institute programs. On September 23, the Council will conduct a final review of grant applications for Federal Assistance and this session will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions set forth in Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

National Advisory Council on Drug Abuse

September 25–26, 9:00 a.m., Conference Room C, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857.

Open—September 25, 9:00 a.m. to 5:00 p.m., September 26, 1:00 p.m. to 5:00 p.m.

Closed—September 26, 9:00 a.m. to 12 noon.

Contact: Ms. Pamela Jo Thurber, Executive Secretary, National Advisory Council on Drug Abuse, 5600 Fishers Lane, Rockville, Maryland 20857 (301) 443–6480.

Purpose: The National Advisory Council on Drug Abuse advises and makes recommendations to the Secretary of Health and Human Services, the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, and the Director, National Institute on Drug Abuse, on the development of new initiatives and priorities and the efficient administration of drug abuse research, training, demonstration, prevention, and community services programs. The Council also gives advice on policies and priorities for drug abuse grants and contracts, and reviews and makes recommendations on grant applications.

Agenda: On September 25, from 9:00 a.m. to 5:00 p.m., and September 26, from 1:00 p.m. to 5:00 p.m., the session will be open to the public for discussion of program development and policy issues.

On September 26, from 9:00 a.m. to 12 noon, the session will be closed to the public for the final review of grant applications for Federal assistance, in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of Section 552b(c)(6), Title 5 U.S. Code and Section 10(d) of Pub. L. 92–463 (5 U.S.C. Appendix I).

Substantive program information may be obtained from the contact persons listed above. The NIMH Information Officer, who will furnish upon request summaries of the meeting and rosters of the Council members, is Mr. Paul Sirovatka, Chief, Public Information Branch, Division of Scientific and Public Information, NIMH, Room 15–105, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–4536. The NIAAA Information Officer, who will furnish upon request summaries of the meeting and rosters of the Council members is Mr. Harry Bell, Associate Director, Office of Public Affairs, NIAAA, Room 11A–17, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–3306. The NIDA Information Officer who will furnish summaries of the meeting and rosters of the Council members is Ms. Mary Carol Kelly, Program Information Officer for Drug Abuse, NIDA, Room 10A–56, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20857, 301–443–6245.

Dated: August 8, 1980.

Elizabeth A. Connolly,

Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

BILLING CODE 1505-01-M

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Office of Assistant Secretary for Housing—Federal Housing Commissioner

[Docket No. D–80–608]

Redelegation of Authority to Waive the Section 8 and Traditional Public Housing Conflict of Interest Provisions

AGENCY: Department of Housing and Urban Development.

ACTION: Redelegation of Authority to Waive the Section 8 and Traditional Public Housing Conflict of Interest Provisions.

SUMMARY: This Notice redelegates to each Regional Administrator, Deputy Regional Administrator, Area Manager, Deputy Area Manager, and Multifamily Service Office Supervisor authority to waive, to a limited extent, the conflict of interest provisions contained in the Annual Contributions Contracts, the Agreement to Enter into Housing Assistance Payments Contracts, the Housing Assistance Payments Contracts and the Consolidated Annual Contributions Contracts.

FOR FURTHER INFORMATION CONTACT: Joseph F. Gelletich, Assistant General Counsel, Office of General Counsel, Department of Housing and Urban Development, Washington, D.C. 20410, (202) 755–7227. This is not a toll free number.

SUPPLEMENTAL INFORMATION: The redelegation of authority by the Assistant Secretary for Housing-Federal Housing Commissioner published at 35 FR 16105, October 14, 1979, as amended at 35 FR 17964, November 31, 1970, 36 FR 21298, November 5, 1971, and 37 FR 12420, June 23, 1972, is amended to add the following provisions to section A paragraph 8c:

v. The Section 8 Existing Housing and Moderate Rehabilitation Programs' conflict of interest provisions.

vi. The Section 8 New Construction Substantial Rehabilitation, and State Agency Programs' conflict of interest provisions for individuals who involuntarily acquire an interest in the program or in a project, or who had acquired, prior to the beginning of their tenure, any such interest.

vii. The traditional Public Housing Programs' conflict of interest provisions for individuals who involuntarily acquire an interest in the program or in a project, or who had acquired, prior to the beginning of their tenure, any such interest.

Effective date: June 20, 1980.

(Sec. 7(d), Department of Housing and Urban Development Act (42 U.S.C. 3535(d))

Issued at Washington, D.C., August 7, 1980.

Lawrence B. Simons,

Assistant Secretary for Housing—Federal Housing Commissioner.

BILLING CODE 4210-01-M

Office of the Secretary

[Docket No. D–80–609]

Assistant Secretary for Community Planning and Development and Assistant Secretary for Housing; Delegation of Authority With Respect to the Section 312 Rehabilitation Loan Program

AGENCY: Department of Housing and Urban Development.

ACTION: Delegation of Authority.

SUMMARY: This Notice consolidates in one document, amends, and supersedes prior delegations of authority to the Assistant Secretaries of the Department with respect to the property rehabilitation loan program authorized by Section 312 of the Housing Act of 1964, as amended (Section 312). The principal substantive change is to transfer responsibility for servicing Section 312 loans to the Assistant Secretary for Community Planning and Development from the Assistant Secretary for Housing. In addition, the power and authority to establish interest rates, which was excepted from the authorities previously delegated to the Assistant Secretaries responsible for the Section 312 program, is being delegated in this Notice to the Assistant Secretary for Community Planning and Development. Existing redelegations to field officials of the Department are not affected by this Notice.

SUPPLEMENTARY INFORMATION: The previously issued delegations of authority to Assistant Secretaries of the Department concerning the Section 312 rehabilitation loan program are set forth at 36 FR 5004 (March 16, 1971), 36 FR 5005 (March 16, 1971), 38 FR 8011 (March 27, 1973) and 41 FR 24755 (June 18, 1976). This Notice amends, consolidates, and supersedes such prior delegations. However, outstanding redelegations to field officials concerning the Section 312 loan program are not contained in the cited documents and are not superseded by this Notice; such redelegations therefore remain in effect. The most significant of these redelegations were published at 41 FR 29011 (July 14, 1976), 37 FR 15948 (August 8, 1972), 35 FR 16104 (October 14, 1970) and 35 FR 16106 (October 14, 1970). While it is anticipated that some changes will be made in these redelegations, particularly with respect to the loan servicing function, any revised redelegations will be published at a later date, so that an orderly transfer of responsibility in the field can be arranged.

The principal substantive change made by this document in the pattern of delegated authority with respect to the Section 312 loan program is to transfer, from the Assistant Secretary for Housing to the Assistant Secretary for Community Planning and Development, the responsibility for loan servicing (i.e., management of loan collection activities, including responsibility for decisions to make expeditures for the protection of the Government's financial interest in non-acquired properties securing Section 312 loans, to seek mortgagee-in-possession status, to foreclose upon or otherwise to acquire security properties, or to take other legal action against the borrower.) However, the Assistant Secretary for Housing retains authority to act for the Secretary once mortgagee-in-possession status is obtained and with respect to the management and disposition of acquired properties.

Accordingly, the Secretary delegates as follows:

Section A. Authority delegated. The Assistant Secretary for Community Planning and Development shall exercise the power and authority to the Secretary with respect to the rehabilitation loan program under Section 312 of the Housing Act of 1964, as amended, except for the power and authority delegated to the Assistant Secretary for Housing in this Section A and as additionally excepted in Section B. The Assistant Secretary for Housing shall exercise the power and authority of the Secretary under Section 312 of the Housing Act of 1964, as amended, to manage, repair, lease, and otherwise take all actions necessary to protect the financial interest of the Secretary in properties as to which the Secretary is mortgagee-in-possession and to manage,

V 45 A G 14 80 UMI

repair, complete, remodel and convert, administer, dispose of, lease, sell or exchange at public or private sale, pay annual sums in lieu of taxes on, obtain insurance against loss on, and otherwise to deal with properties as to which the Secretary has acquired title under the Section 312 rehabilitation loan program.

Section B. Authority excepted. There is excepted from the authority delegated in Section A the power to:

1. Issue notes or other obligations for purchase by the Secretary of the Treasury.

2. Exercise the powers under Section 402(a) of the Housing Act of 1950 (12 U.S.C. 1749(a)).

3. Sue and be sued.

Section C. Authority redelegated. The Assistant Secretary for Community Planning and Development is authorized to redelegate to employees of the Department any of the authority delegated to the Assistant Secretary for Community Planning and Development under Section A, except the power and authority to issue rules and regulations. The Assistant Secretary for Housing is authorized to redelegate to employees of the Department any of the authority delegated to the Assistant Secretary for Housing under Section A, except the authority to issue rules and regulations.

Section D. Continuation in effect of redelegations. Existing redelegations of authority by the Assistant Secretary for Community Planning and Development or the Assistant Secretary for Housing or their predecessors with respect to the Section 312 loan program which are in effect as of the effective date of this delegation of authority are continued in effect as if issued under this document, unless and until expressly modified or revoked by a delegation or redelegation of authority issued hereafter.

Section E. Supersedure. This delegation supersedes preceding delegations to the Assistant Secretary for Community Planning and Development or the Assistant Secretary for Housing or their predecessors with respect to the Section 312 rehabilitation loan program.

(Sec. 7(d), Department of HUD Act (42 U.S.C. 3535(d)); and sec. 312(g) of the Housing Act of 1964, as amended (42 U.S.C. 1452b(g)))

Effective date. This delegation of authority shall be effective as of August 8, 1980.

Moon Landrieu,

Secretary, Department of Housing and Urban Development.

BILLING CODE 4310-31-M

Bureau of Land Management

Oregon, Lakeview Grazing Management Plan; Intent To Prepare an Environmental Impact Statement and Conduct Scoping Meeting

The Department of the Interior, Bureau of Land Management, Oregon State Office, will be preparing an Environmental Impact Statement (EIS) on the grazing management program on 3,360,000 acres of public land in the Lakeview District in south-central Oregon. The final statement is to be completed by September 30, 1981. Dicisionmaking will take place over a several-month period following comletion of the final statement. A public meeting will be held during the decisionmaking process.

The proposed grazing management program has evolved from coordinated land use allocations for all resources developed through the Bureau's land use planning system. The objectives of the proposed program are to enhance the vegetative resource, provide quality habitat for wildlife and wild horses, provide a continuous supply of livestock forage, reduce soil erosion and sedimentation damage, improve water quality, improve the recreation and visual resources, and protect archeological and historical sites.

The EIS will discuss alternatives to the proposed grazing management program. Two alternatives, no action and no livestock grazing, will be included in the EIS. Other alternatives being considered for discussion include a least a higher and lower level of livestock grazing than that in the proposal.

The EIS will identify the impacts that can be expected from implementation of either the proposed grazing management program or any of the alternatives discussed. The statement will be an analytical tool used in making final decisions for managing livestock grazing in the Lakeview EIS area.

A public scoping meeting will be held to identify the significant issues which must be discussed in detail in the EIS. Also to be discussed in the meetings are the various alternatives that could realistically be addressed in the EIS and the possible methods of obtaining public comment on the draft EIS after it is published next year. Input from the public will be sought in those areas.

The public meeting will be held September 3, 1980, at 7:30 p.m. at the Bureau of Land Management District Office, 1000 Ninth Street, Lakeview, Oregon 97630.

Further information may be obtained from:

Richard A. Gerity, District Manager, Bureau of Land Management, P.O. Box 151, Lakeview, Oregon 97630, Telephone (503) 947–2177.

Gerry Fullerton, Statement Leader, Bureau of Land Management (911.1), P.O. Box 2965, Portland,Oregon 97208, Telephone (503) 231–6955.

Dated: August 1, 1980.

Phillip C. Hamilton,

Chief, Planning and Environmental Coordination Staff, Oregon State Office.

BILLING CODE 4310-84-M

Roswell District Advisory Council; Meeting

Notice is hereby given in accordance with Pub. L. 94–579 that a meeting of the Roswell District Advisory Council will be held on September 16, 1980, at 9:00 a.m. in the Conference Room of the Roswell District Office, 1717 W. Second Street, Roswell, New Mexico.

The agenda for the meeting will include: (1) An orientation to the U.S. Bureau of Land Management and the Roswell District Office; (2) definition of the organization and functions of the Council; (3) general discussion of programs, objectives, and goals for the 1981 fiscal year; (4) preliminary information on potential issues; (5) identification of additional issues the Council wishes to address; and (6) scheduling and determination of the agenda for the next meeting.

The meeting is open to the public. Interested persons may make oral statements to the Council or file written statements. Anyone wishing to make an oral statement must notify the District Manager, Bureau of Land Management, by September 15, 1980. The public comment period will begin at 1:30 p.m. on the day of the Council meeting.

Summary minutes of the Council meeting will be maintained in the District Office and will be available for public inspection and reproduction during regular business hours within 30 days following the meeting.

James H. O'Connor,

District Manager.

August 5, 1980.

BILLING CODE 4310-84-M

Utah; Amendment of Maximum Party Size Per Trip Limits for Desolation and Gray Canyons of the Green River

AGENCY: Bureau of Land Management, Interior.

ACTION: Amendment of Maximum Party Size Per Trip Limits for Desolation and Gray Canyons of the Green River.

Summary

On November 2, 1979, the River Management Plan for Desolation and Gray Canyons portion of the Green River was issued to the general public.

The River Management Plan is a recreation use management plan. It provides a framework for management decisions and actions relating to river management in Desolation and Gray Canyons. This plan has been prepared to protect the resource and to meet the needs of the recreational users. Coordination has been carried out to ensure that the provisions of the River Management Plan result in minimum conflict with other multiple use resource management values.

The seven management objectives found on pages 19 and 20 of the plan spell out the long term goals for management action on Desolation and Gray Canyons. Based on the present knowledge, the seventeen management actions beginning on page 21 are intended to implement the management objectives until changes are needed.

In 1974, the State Director for the Bureau of Land Management in Utah established criteria for issuing commerical permits to river guides and outfitters, and setting amounts of use each would be entitled to. Noncommercial permits were also required that use could be managed within acceptable limits. In 1974, there was a maximum party size limitation of 40 persons, established for Desolation and Gray Canyons of the Green River.

Notice is hereby given that pursuant to the Federal Land Policy and Management Act of 1976, and the Land and Water Conservation Fund Act, as amended, Management Action Number 10—Maximum Party Size of the Desolation and Gray Canyons River Management Plan is amended to allow 25 persons per trip for non-commercial trips, and 25 persons plus boatman for commercial trips.

The above stated action becomes effective beginning the 1981 river use season, and will remain in effect unless modified by future publication in the Federal Register.

DATE: Effective Immediately.

ADDRESS: District Manager, Moab District, Bureau of Land Management, P.O. Box 970, Moab, Utah 84532.

FOR FURTHER INFORMATION CONTACT: District Manager, Moab District (801) 259–6111.

Kenneth V. Rhea,

Assistant District Manager.
